7 Class Vehicles contained the ACU Defect, and that the ACU Defect has caused
8 ACUs and ASICs to malfunction in crashes involving Class Vehicles; however, to
9 date, FCA, Kia Korea, and Kia USA have not instituted a recall or any other repair
10 program with respect to the unrecalled FCA and Kia Class Vehicles, or even
11 acknowledged that the ACU Defect exists in all of the FCA and Kia Class Vehicles,
12 including the recalled FCA and Kia Class Vehicles. Therefore, the Minnesota
13 Plaintiffs and Minnesota State Class members had no reason to believe that FCA,
14 Kia Korea, and Kia USA would have repaired the ACU Defect if they presented
15 their Class Vehicles to FCA, Kia Korea, and Kia USA for repair.

16 3380. As a direct and proximate result of FCA's, Kia Korea's, and Kia
17 USA's breach of their express warranties, the FCA and Kia Class Vehicles were
18 and are defective and the ACU Defect in the Minnesota Plaintiffs' and Minnesota
19 State Class members' FCA and Kia Class Vehicles was not remedied. Therefore,
20 the Minnesota Plaintiffs and Minnesota State Class members have been damaged,
21 in an amount to be proven at trial, through their overpayment at the time of
22 purchase or lease for Kia Class Vehicles with an undisclosed safety defect that
23 would not be remedied.

24 **b. Minnesota Count 2: Breach of Implied Warranty of**
25 **Merchantability (Minn. Stat. §§ 336.2-314 and 336.2A-212)**
26 **Against FCA and Kia USA**

27 3381. Plaintiffs reallege and incorporate by reference all preceding
28 allegations as though fully set forth herein.

1 3382. Plaintiff Steve Keister brings this count individually and on behalf of
2 members of the Minnesota State Class who purchased or leased FCA Class
3 Vehicles, against FCA.

4 3383. Plaintiff Bobbi Jo Birk-LaBarge brings this count individually and on
5 behalf of members of the Minnesota State Class who purchased or leased Kia Class
6 Vehicles, against Kia USA.

7 3384. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
8 be referred to as the “Minnesota Plaintiffs.”

9 3385. A warranty that the FCA and Kia Class Vehicles were in merchantable
10 condition and fit for the ordinary purpose for which such goods are used is implied
11 by law pursuant to Minn. Stat. §§ 336.2-314 and 336.2A-212.

12 3386. The FCA and Kia Defendants are and were at all relevant times
13 “merchants” with respect to motor vehicles under Minn. Stat. §§ 336.2-104(1) and
14 336.2A-103(3), and “sellers” of motor vehicles under § 336.2-103(1)(d).

15 3387. With respect to leases, the FCA and Kia Defendants are and were at all
16 relevant times “lessors” of motor vehicles under Minn. Stat. § 336.2A-103(1)(p).

17 3388. All Minnesota State Class members who purchased FCA and Kia
18 Class Vehicles in Minnesota are “buyers” within the meaning of Minn. Stat.
19 § 336.2-103(1)(a),

20 3389. All Minnesota State Class members who leased FCA and Kia Class
21 Vehicles in Minnesota are “lessees” within the meaning of Minn. Stat. § 336.2A-
22 103(1)(n).

23 3390. The FCA and Kia Class Vehicles are and were at all relevant times
24 “goods” within the meaning of Minn. Stat. §§ 336.2-105(1) and 336.2A-103(1)(h).

25 3391. The FCA and Kia Class Vehicles did not comply with the implied
26 warranty of merchantability because, at the time of sale and at all times thereafter,
27 they were defective and not in merchantable condition, would not pass without
28 objection in the trade, and were not fit for the ordinary purpose for which vehicles

1 were used. Specifically, at the time they were sold and leased the FCA and Kia
2 Class Vehicles contained the ACU Defect, which may cause the airbags and
3 seatbelt pretensioners to fail to deploy during a crash, the failure to unlock doors
4 automatically after a crash, the failure to turn off a fuel supply or high-voltage
5 battery after a crash, or the airbags to inadvertently deploy, all of which render the
6 FCA and Kia Class Vehicles inherently defective and dangerous.

7 3392. The Minnesota Plaintiffs and Minnesota State Class members have
8 provided FCA and Kia USA with reasonable notice and opportunity to cure the
9 breaches of their implied warranties by way of the numerous NHTSA complaints
10 filed against them, and individual notice letters sent by the Minnesota State Class
11 members within a reasonable amount of time after the ACU Defect became public.
12 Additionally, a notice letter was sent on behalf of the Minnesota Plaintiffs and
13 Minnesota State Class members to FCA and Kia USA on April 24, 2020.

14 3393. Alternatively, the Minnesota Plaintiffs and Minnesota State Class
15 members were excused from providing FCA and Kia USA with notice and an
16 opportunity to cure the breach, because it would have been futile. As alleged above,
17 FCA and Kia USA have long known that the FCA and Kia Class Vehicles
18 contained the ACU Defect, and that the ACU Defect has caused ACUs and ASICs
19 to malfunction in crashes involving Class Vehicles; however, to date, FCA and Kia
20 USA have not instituted a recall or any other repair program with respect to the
21 unrecalled FCA and Kia Class Vehicles, or even acknowledged that the ACU Defect
22 exists in all of the FCA and Kia Class Vehicles, including the recalled FCA and Kia
23 Class Vehicles. Therefore, the Minnesota Plaintiffs and Minnesota State Class
24 members had no reason to believe that FCA and Kia USA would have repaired the
25 ACU Defect if they presented their Class Vehicles to FCA and Kia USA for repair.

26 3394. As a direct and proximate result of the FCA's and Kia USA's breach
27 of the implied warranty of merchantability, the Minnesota Plaintiffs and Minnesota
28 State Class members have been damaged in an amount to be proven at trial.

1 c. **Minnesota Count 3: Violation of the Minnesota Prevention**
2 **of Consumer Fraud Act (Minn. Stat. § 325F.68, et seq. and**
3 **Minn. Stat. § 8.31, subd. 3a) Against FCA, Kia Korea, and**
4 **Kia USA**

5 3395. Plaintiffs reallege and incorporate by reference all preceding
6 allegations as though fully set forth herein.

7 3396. Plaintiff Steve Keister brings this count individually and on behalf of
8 members of the Minnesota State Class who purchased or leased FCA Class
9 Vehicles, against FCA.

10 3397. Plaintiff Bobbi Jo Birk-LaBarge brings this count individually and on
11 behalf of members of the Minnesota State Class who purchased or leased Kia Class
12 Vehicles, against Kia Korea and Kia USA.

13 3398. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
14 be referred to as the “Minnesota Plaintiffs.”

15 3399. FCA, Kia Korea, Kia USA, the Minnesota Plaintiffs, and the
16 Minnesota State Class members are “persons” within the meaning of Minn. Stat.
17 § 325F.68(3).

18 3400. The FCA and Kia Class Vehicles and ACUs and ASICs installed in
19 them are “merchandise” within the meaning of Minn. Stat. § 325F.68(2).

20 3401. The Minnesota Prevention of Consumer Fraud Act (“Minnesota
21 CFA”) prohibits “act, use, or employment by any person of any fraud, false
22 pretense, false promise, misrepresentation, misleading statement or deceptive
23 practice, with the intent that others rely thereon in connection with the sale of any
24 merchandise, whether or not any person has in fact been misled, deceived, or
25 damaged[.]” Minn. Stat. § 325F.69(1).

26 3402. In the course of their business, FCA, Kia Korea, and Kia USA,
27 through their agents, employees, and/or subsidiaries, violated the Minnesota CFA
28 by knowingly and intentionally misrepresenting, omitting, concealing, and/or
 failing to disclose material facts regarding the reliability, safety, and performance of

1 the Class Vehicles, the safety of their Occupant Restraint Systems, and the ACU
2 Defect, as detailed above.

3 3403. FCA, Kia Korea, and Kia USA had an ongoing duty to the Minnesota
4 Plaintiffs and Minnesota State Class members to refrain from unfair or deceptive
5 practices under the Minnesota CFA in the course of their business. Specifically,
6 FCA, Kia Korea, and Kia USA owed the Minnesota Plaintiffs and Minnesota State
7 Class members a duty to disclose all the material facts concerning the ACU Defect
8 in the FCA and Kia Class Vehicles because they possessed exclusive knowledge of
9 and intentionally concealed the ACU Defect from the Minnesota Plaintiffs and
10 Minnesota State Class members, and they made misrepresentations that were
11 rendered misleading because they were contradicted by withheld facts.

12 3404. By misrepresenting the FCA and Kia Class Vehicles as safe and
13 reliable and the defective ACU and ASICs installed in them as properly-functioning
14 and free from defects, and by failing to disclose and actively concealing the dangers
15 and risk posed by the ACU Defect to both consumers and NHTSA, FCA, Kia
16 Korea, and Kia USA engaged in unfair or deceptive business practices prohibited
17 by Minn. Stat. § 325F.69, including use, or employment by any person of any fraud,
18 false pretense, false promise, misrepresentation, misleading statement or deceptive
19 practice, with the intent that others rely thereon in connection with the sale of any
20 merchandise.

21 3405. FCA's, Kia Korea's and Kia USA's unfair and deceptive acts or
22 practices, including their misrepresentations, concealments, omissions, and
23 suppressions of material facts, were designed to mislead and had a tendency or
24 capacity to mislead and create a false impression in consumers that the FCA and
25 Kia Class Vehicles had properly-functioning and reliable airbags and seatbelts, and
26 that the Occupant Restraint System did not contain the ACU Defect and would
27 perform its intended function of activating the seatbelts and airbags during a
28 collision. Indeed, those misrepresentations, concealments, omissions, and

1 suppressions of material facts did in fact deceive reasonable consumers, including
2 the Minnesota Plaintiffs and Minnesota State Class members, about the true safety
3 and reliability of FCA and Kia Class Vehicles and the defective ACUs and ASICs
4 installed in them, the quality of the FCA and Kia Class Vehicles, and their true
5 value.

6 3406. FCA's, Kia Korea's, and Kia USA's misrepresentations,
7 concealments, omissions, and suppressions of material facts regarding the ACU
8 Defect and true characteristics of the Occupant Restraint Systems in the FCA and
9 Kia Class Vehicles were material to the decisions of the Minnesota Plaintiffs and
10 Minnesota State Class members to purchase and lease those vehicles, as FCA, Kia
11 Korea, and Kia USA intended. The Minnesota Plaintiffs and Minnesota State Class
12 members were exposed to those misrepresentations, concealments, omissions, and
13 suppressions of material facts, and relied on FCA's, Kia Korea's, and Kia USA's
14 misrepresentations that the FCA and Kia Class Vehicles and their Occupant
15 Restraint Systems were safe and reliable in deciding to purchase and lease those
16 vehicles. Plaintiffs allege the information they relied upon in Section II.B above. To
17 aid review of this information, Exhibit 19 provides paragraph numbers for each
18 Plaintiff.

19 3407. The Minnesota Plaintiffs and Minnesota State Class members had no
20 way of discerning that FCA's, Kia Korea's, and Kia USA's representations were
21 false and misleading and/or otherwise learning the facts that FCA, Kia Korea, and
22 Kia USA had concealed or failed to disclose. The Minnesota Plaintiffs and
23 Minnesota State Class members did not, and could not, unravel FCA's, Kia
24 Korea's, and Kia USA's deception on their own.

25 3408. Had the Minnesota Plaintiffs and Minnesota State Class members
26 known the truth about the ACU Defect, they would not have purchased or leased
27 the FCA and Kia Class Vehicles, or would have paid significantly less for them.
28

1 3409. The Minnesota Plaintiffs and Minnesota State Class members suffered
2 ascertainable losses and actual damages as a direct and proximate result of FCA’s,
3 Kia Korea’s, and Kia USA’s misrepresentations, concealment, and/or failure to
4 disclose material information.

5 3410. FCA’s, Kia Korea’s, and Kia USA’s violations present a continuing
6 risk to the Minnesota Plaintiffs and Minnesota State Class members, as well as to
7 the general public, because the Class Vehicles remain unsafe due to the defective
8 ACUs and ASICs therein. FCA’s, Kia Korea’s, and Kia USA’s unlawful acts and
9 practices complained of herein affect the public interest.

10 3411. Pursuant to Minn. Stat. §§ 8.31(3a) and 549.20(1)(a), the Minnesota
11 Plaintiffs and Minnesota State Class members seek an order enjoining FCA’s, Kia
12 Korea’s, and Kia USA’s unfair or deceptive acts or practices and awarding damages
13 and any other just and proper relief available under the Minnesota CFA.

14 **d. Minnesota Count 4: Violation of the Minnesota Uniform**
15 **Deceptive Trade Practices Act (Minn. Stat. § 325D.43, et**
16 **seq.) Against FCA, Kia Korea, and Kia USA**

17 3412. Plaintiffs reallege and incorporate by reference all allegations in
18 Sections I-VI above as though fully set forth herein.

19 3413. Plaintiff Steve Keister brings this count individually and on behalf of
20 members of the Minnesota State Class who purchased or leased FCA Class
21 Vehicles, against FCA.

22 3414. Plaintiff Bobbi Jo Birk-LaBarge brings this count individually and on
23 behalf of members of the Minnesota State Class who purchased or leased Kia Class
24 Vehicles, against Kia Korea and Kia USA.

25 3415. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
26 be referred to as the “Minnesota Plaintiffs.”

27 3416. The Minnesota Deceptive Trade Practices Act (“Minnesota DTPA”)
28 prohibits deceptive trade practices in the course of a business, vocation, or
occupation. Minn. Stat. § 325D.44, Subd. 1.

1 3417. In the course of their business, FCA, Kia Korea, and Kia USA,
2 through their agents, employees, and/or subsidiaries, violated the Minnesota DTPA
3 by knowingly and intentionally misrepresenting, omitting, concealing, and/or
4 failing to disclose material facts regarding the reliability, safety, and performance of
5 the FCA and Kia Class Vehicles, the safety of their Occupant Restraint Systems,
6 and the ACU Defect, as detailed above.

7 3418. FCA, Kia Korea, and Kia USA had an ongoing duty to the Minnesota
8 Plaintiffs and Minnesota State Class members to refrain from unfair or deceptive
9 practices under the Minnesota DTPA in the course of their business. Specifically,
10 FCA, Kia Korea, and Kia USA owed the Minnesota Plaintiffs and Minnesota State
11 Class members a duty to disclose all the material facts concerning the ACU Defect
12 in the FCA and Kia Class Vehicles because they possessed exclusive knowledge of
13 and intentionally concealed the ACU Defect from the Minnesota Plaintiffs and
14 Minnesota State Class members, and they made misrepresentations that were
15 rendered misleading because they were contradicted by withheld facts.

16 3419. By misrepresenting the FCA and Kia Class Vehicles as safe and
17 reliable and the defective ACU and ASICs installed in them as properly-functioning
18 and free from defects, and by failing to disclose and actively concealing the dangers
19 and risk posed by the ACU Defect to both consumers and NHTSA, FCA, Kia
20 Korea, and Kia USA engaged in one or more of the following unfair or deceptive
21 business practices prohibited by Minn. Stat. § 325D.44, Subd. 1:

- 22 a. Representing that the FCA and Kia Class Vehicles and the
23 defective ACUs and ASICs installed in them have
24 characteristics, uses, benefits, and qualities which they do not
25 have;
- 26 b. Representing that the FCA and Kia Class Vehicles and/or the
27 defective ACUs and ASICs installed in them are of a particular
28 standard, quality, and grade when they are not;

- 1 c. Advertising the Class Vehicles and/or the defective ACUs and
- 2 ASICs installed in them with the intent not to sell or lease them
- 3 as advertised; and
- 4 d. Engaging in false, misleading, or deceptive acts or practice in
- 5 the conduct of trade or commerce pertaining to the FCA and Kia
- 6 Class Vehicles and the defective ACUs installed in them.

7 Minn. Stat. §§ 325D.44, Subd. 1(5), (7), (9), and (13).

8 3420. FCA's, Kia Korea's and Kia USA's unfair and deceptive acts or
9 practices, including their misrepresentations, concealments, omissions, and
10 suppressions of material facts, were designed to mislead and had a tendency or
11 capacity to mislead and create a false impression in consumers that the FCA and
12 Kia Class Vehicles had properly-functioning and reliable airbags and seatbelts, and
13 that the Occupant Restraint System did not contain the ACU Defect and would
14 perform its intended function of activating the seatbelts and airbags during a
15 collision. Indeed, those misrepresentations, concealments, omissions, and
16 suppressions of material facts did in fact deceive reasonable consumers, including
17 the Minnesota Plaintiffs and Minnesota State Class members, about the true safety
18 and reliability of FCA and Kia Class Vehicles and the defective ACUs and ASICs
19 installed in them, the quality of the FCA and Kia Class Vehicles, and their true
20 value.

21 3421. FCA's, Kia Korea's, and Kia USA's misrepresentations,
22 concealments, omissions, and suppressions of material facts regarding the ACU
23 Defect and true characteristics of the Occupant Restraint Systems in the FCA and
24 Kia Class Vehicles were material to the decisions of the Minnesota Plaintiffs and
25 Minnesota State Class members to purchase and lease those vehicles, as FCA, Kia
26 Korea, and Kia USA intended. The Minnesota Plaintiffs and Minnesota State Class
27 members were exposed to those misrepresentations, concealments, omissions, and
28 suppressions of material facts, and relied on FCA's, Kia Korea's, and Kia USA's

1 misrepresentations that the FCA and Kia Class Vehicles and their Occupant
2 Restraint Systems were safe and reliable in deciding to purchase and lease those
3 vehicles. Plaintiffs allege the information they relied upon in Section II.B above. To
4 aid review of this information, Exhibit 19 provides paragraph numbers for each
5 Plaintiff.

6 3422. The Minnesota Plaintiffs and Minnesota State Class members had no
7 way of discerning that FCA's, Kia Korea's, and Kia USA's representations were
8 false and misleading and/or otherwise learning the facts that FCA, Kia Korea, and
9 Kia USA had concealed or failed to disclose. The Minnesota Plaintiffs and
10 Minnesota State Class members did not, and could not, unravel FCA's, Kia
11 Korea's, and Kia USA's deception on their own.

12 3423. Had the Minnesota Plaintiffs and Minnesota State Class members
13 known the truth about the ACU Defect, they would not have purchased or leased
14 the FCA and Kia Class Vehicles, or would have paid significantly less for them.

15 3424. The Minnesota Plaintiffs and Minnesota State Class members suffered
16 ascertainable losses and actual damages as a direct and proximate result of FCA's,
17 Kia Korea's, and Kia USA's misrepresentations, concealment, and/or failure to
18 disclose material information.

19 3425. FCA's, Kia Korea's, and Kia USA's violations present a continuing
20 risk to the Minnesota Plaintiffs and Minnesota State Class members, as well as to
21 the general public, because the Class Vehicles remain unsafe due to the defective
22 ACUs and ASICs therein. FCA's, Kia Korea's, and Kia USA's unlawful acts and
23 practices complained of herein affect the public interest.

24 3426. Pursuant to Minn. Stat. §§ 8.31(3a), 325D.45, and 549.20(1)(a), the
25 Minnesota Plaintiffs and Minnesota State Class members seek an order enjoining
26 FCA's, Kia Korea's, and Kia USA's unfair or deceptive acts or practices and any
27 other just and proper relief available under the Minnesota CFA.
28

1 3427. The Minnesota Plaintiffs plead this claim separately as well as in the
2 alternative to their claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
3 Minnesota Plaintiffs' claims for damages are dismissed or judgment is entered in
4 favor of Defendants, the Minnesota Plaintiffs will have no adequate legal remedy.

5 e. **Minnesota Count 5: Violation of the Minnesota Prevention
6 of Consumer Fraud Act (Minn. Stat. § 325F.68, *et seq.* and
7 Minn. Stat. § 8.31, subd. 3a) Against ZF Electronics USA, ZF
8 Passive Safety USA, ZF Automotive USA, ZF TRW Corp.,
9 ZF Germany, ST Italy, ST USA, and ST Malaysia**

10 3428. Plaintiffs reallege and incorporate by reference all preceding
11 allegations as though fully set forth herein.

12 3429. Plaintiffs Steve Keister and Bobbi Jo Birk-LaBarge bring this count
13 individually and on behalf of members of the Minnesota State Class ZF Electronics
14 USA, ZF Passive Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF
15 Germany (collectively, the "ZF Defendants"), and ST Italy, ST Malaysia, and ST
16 USA (collectively, the "ST Defendants").

17 3430. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
18 be referred to as the "Minnesota Plaintiffs."

19 3431. The ZF Defendants, ST Defendants, Minnesota Plaintiffs, and
20 Minnesota State Class members are "persons" within the meaning of Minn. Stat.
21 § 325F.68(3).

22 3432. The Class Vehicles and defective ACUs installed in them are
23 "merchandise" within the meaning of Minn. Stat. § 325F.68(2).

24 3433. The Minnesota Prevention of Consumer Fraud Act ("Minnesota
25 CFA") prohibits "act, use, or employment by any person of any fraud, false
26 pretense, false promise, misrepresentation, misleading statement or deceptive
27 practice, with the intent that others rely thereon in connection with the sale of any
28 merchandise, whether or not any person has in fact been misled, deceived, or
damaged[.]" Minn. Stat. § 325F.69(1).

1 3434. The ZF and ST Defendants had an ongoing duty to the Minnesota
2 Plaintiffs and Minnesota State Class members to refrain from unfair or deceptive
3 practices under the Minnesota CFA in the course of their business. Specifically, the
4 ZF and ST Defendants owed the Minnesota Plaintiffs and Minnesota State Class
5 members a duty to disclose all the material facts concerning the ACU Defect in the
6 Class Vehicles because they possessed exclusive knowledge of and intentionally
7 concealed the ACU Defect from the Minnesota Plaintiffs and Minnesota State Class
8 members.

9 3435. In the course of their business, the ZF and ST Defendants, through
10 their agents, employees, and/or subsidiaries, violated the Minnesota CFA by
11 knowingly and intentionally omitting, concealing, and failing to disclose material
12 facts regarding the existence, nature, and scope of the ACU Defect in the Class
13 Vehicles, as detailed above.

14 3436. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
15 Automotive USA, through their agents, employees, and/or subsidiaries, violated the
16 Minnesota CPA by knowingly and intentionally misrepresenting the Class Vehicles
17 as safe and reliable and the defective ACU and ASICs installed in them as properly-
18 functioning and free from defects. Specifically, ZF Electronics USA, ZF Passive
19 Safety USA, and ZF Automotive USA worked with the Vehicle Manufacturer
20 Defendants on the design and inclusion of the airbag readiness indicators in the
21 Class Vehicles, which falsely assured Plaintiffs and Class Members that the
22 Occupant Restraint Systems in the Class Vehicles would function properly in a
23 crash.

24 3437. By misrepresenting, failing to disclose and actively concealing the
25 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
26 ST Defendants engaged in unfair or deceptive trade practices prohibited by Minn.
27 Stat. § 325F.69, including the use or employment of fraud, false pretense, and
28 deceptive practices.

1 3438. The ZF and ST Defendants' unfair or deceptive acts or practices,
2 including their misrepresentations, concealments, omissions, and suppressions of
3 material facts, were designed to mislead and had a tendency or capacity to mislead
4 and create a false impression in consumers that the Class Vehicles had properly-
5 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
6 System did not contain the ACU Defect and would perform its intended function of
7 activating the seatbelts and airbags during a collision. Indeed, those
8 misrepresentations, concealments, omissions, and suppressions of material facts did
9 in fact deceive reasonable consumers, including the Minnesota Plaintiffs and
10 Minnesota State Class members, about the true safety and reliability of Class
11 Vehicles and the defective ACUs and ASICs installed in them, the quality of the
12 Class Vehicles, and the true value of the Class Vehicles.

13 3439. The Minnesota Plaintiffs and Minnesota State Class members
14 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
15 concealment, as they had no way of learning the facts that the ZF and ST
16 Defendants had concealed or failed to disclose. The Minnesota Plaintiffs and
17 Minnesota State Class members did not, and could not, unravel the ZF and ST
18 Defendants' deception on their own.

19 3440. The ZF and ST Defendants' misrepresentations and concealment of the
20 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
21 Vehicles were material to the Minnesota Plaintiffs and Minnesota State Class
22 members, as the ZF and ST Defendants intended. Had they known the truth, the
23 Minnesota Plaintiffs and Minnesota State Class members would not have purchased
24 or leased the Class Vehicles, or would have paid significantly less for them.

25 3441. The Minnesota Plaintiffs and Minnesota State Class members suffered
26 ascertainable losses and actual damages as a direct and proximate result of the ZF
27 and ST Defendants' misrepresentations, concealment, and failure to disclose
28 material information.

1 3442. The ZF and ST Defendants’ violations present a continuing risk to the
2 Minnesota Plaintiffs and Minnesota State Class members, as well as to the general
3 public, because the Class Vehicles remain unsafe due to the defective ACUs and
4 ASICs therein. The ZF and ST Defendants’ unlawful acts and practices complained
5 of herein affect the public interest.

6 3443. Pursuant to Minn. Stat. §§ 8.31(3a) and 549.20(1)(a), the Minnesota
7 Plaintiffs and Minnesota State Class members seek an order enjoining the ZF and
8 ST Defendants’ unfair or deceptive acts or practices and awarding damages and any
9 other just and proper relief available under the Minnesota CFA.

10 **f. Minnesota Count 6: Violation of the Minnesota Uniform**
11 **Deceptive Trade Practices Act (Minn. Stat. § 325D.43, et**
12 **seq.) Against ZF Electronics USA, ZF Passive Safety USA,**
13 **ZF Automotive USA, ZF TRW Corp., ZF Germany, ST**
14 **Italy, ST USA, and ST Malaysia**

15 3444. Plaintiffs reallege and incorporate by reference all allegations in
16 Sections I-VI above as though fully set forth herein.

17 3445. Plaintiffs Steve Keister and Bobbi Jo Birk-LaBarge bring this count
18 individually and on behalf of members of the Minnesota State Class against ZF
19 Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF TRW Corp.,
20 and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST Malaysia,
21 and ST USA (collectively, the “ST Defendants”).

22 3446. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
23 be referred to as the “Minnesota Plaintiffs.”

24 3447. The Minnesota Deceptive Trade Practices Act (“Minnesota DTPA”)
25 prohibits deceptive trade practices in the course of a business, vocation, or
26 occupation. Minn. Stat. § 325D.44, Subd. 1.

27 3448. The ZF and ST Defendants had an ongoing duty to the Minnesota
28 Plaintiffs and Minnesota State Class members to refrain from unfair or deceptive
practices under the Minnesota DTPA in the course of their business. Specifically,
the ZF and ST Defendants owed the Minnesota Plaintiffs and Minnesota State Class

1 members a duty to disclose all the material facts concerning the ACU Defect in the
2 Class Vehicles because they possessed exclusive knowledge of and intentionally
3 concealed the ACU Defect from the Minnesota Plaintiffs and Minnesota State Class
4 members.

5 3449. In the course of their business, the ZF and ST Defendants, through
6 their agents, employees, and/or subsidiaries, violated the Minnesota DTPA by
7 knowingly and intentionally omitting, concealing, and failing to disclose material
8 facts regarding the existence, nature, and scope of the ACU Defect in the Class
9 Vehicles, as detailed above.

10 3450. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
11 Automotive USA, through their agents, employees, and/or subsidiaries, violated the
12 Minnesota DTPA by knowingly and intentionally misrepresenting the Class
13 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
14 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
15 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
16 Manufacturer Defendants on the design and inclusion of the airbag readiness
17 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
18 Members that the Occupant Restraint Systems in the Class Vehicles would function
19 properly in a crash.

20 3451. By misrepresenting, failing to disclose and actively concealing the
21 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
22 ST Defendants engaged in unfair or deceptive trade practices prohibited by Minn.
23 Stat. § 325D.44, Subd. 1, including engaging in false, misleading, or deceptive acts
24 or practices in the conduct of trade or commerce pertaining to the FCA and Kia
25 Class Vehicles and the defective ACUs installed in them.

26 3452. The ZF and ST Defendants' unfair or deceptive acts or practices,
27 including their misrepresentations, concealments, omissions, and suppressions of
28 material facts, were designed to mislead and had a tendency or capacity to mislead

1 and create a false impression in consumers that the Class Vehicles had properly-
2 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
3 System did not contain the ACU Defect and would perform its intended function of
4 activating the seatbelts and airbags during a collision. Indeed, those
5 misrepresentations, concealments, omissions, and suppressions of material facts did
6 in fact deceive reasonable consumers, including the Minnesota Plaintiffs and
7 Minnesota State Class members, about the true safety and reliability of Class
8 Vehicles and the defective ACUs and ASICs installed in them, the quality of the
9 Class Vehicles, and the true value of the Class Vehicles.

10 3453. The Minnesota Plaintiffs and Minnesota State Class members
11 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
12 concealment, as they had no way of learning the facts that the ZF and ST
13 Defendants had concealed or failed to disclose. The Minnesota Plaintiffs and
14 Minnesota State Class members did not, and could not, unravel the ZF and ST
15 Defendants' deception on their own.

16 3454. The ZF and ST Defendants' misrepresentations and concealment of the
17 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
18 Vehicles were material to the Minnesota Plaintiffs and Minnesota State Class
19 members, as the ZF and ST Defendants intended. Had they known the truth, the
20 Minnesota Plaintiffs and Minnesota State Class members would not have purchased
21 or leased the Class Vehicles, or would have paid significantly less for them.

22 3455. The Minnesota Plaintiffs and Minnesota State Class members suffered
23 ascertainable losses and actual damages as a direct and proximate result of the ZF
24 and ST Defendants' misrepresentations, concealment, and failure to disclose
25 material information.

26 3456. The ZF and ST Defendants' violations present a continuing risk to the
27 Minnesota Plaintiffs and Minnesota State Class members, as well as to the general
28 public, because the Class Vehicles remain unsafe due to the defective ACUs and

1 ASICs therein. The ZF and ST Defendants’ unlawful acts and practices complained
2 of herein affect the public interest.

3 3457. Pursuant to Minn. Stat. §§ 8.31(3a), 325D.45, and 549.20(1)(a), the
4 Minnesota Plaintiffs and Minnesota State Class members seek an order enjoining
5 the ZF and ST Defendants’ unfair or deceptive acts or practices and awarding
6 damages and any other just and proper relief available under the Minnesota DTPA.

7 3458. The Minnesota Plaintiffs plead this claim separately as well as in the
8 alternative to their claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
9 Minnesota Plaintiffs’ claims for damages are dismissed or judgment is entered in
10 favor of Defendants, the Minnesota Plaintiffs will have no adequate legal remedy.

11 **g. Minnesota Count 7: Fraud by Omission and Concealment**
12 **Against FCA, Kia Korea, and Kia USA**

13 3459. Plaintiffs reallege and incorporate by reference all preceding
14 allegations as though fully set forth herein.

15 3460. Plaintiff Steve Keister brings this count individually and on behalf of
16 members of the Minnesota State Class who purchased or leased FCA Class
17 Vehicles, against FCA.

18 3461. Plaintiff Bobbi Jo Birk-LaBarge brings this count individually and on
19 behalf of members of the Minnesota State Class who purchased or leased Kia Class
20 Vehicles, against Kia Korea and Kia USA.

21 3462. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
22 be referred to as the “Minnesota Plaintiffs.”

23 3463. FCA, Kia Korea, and Kia USA are liable for both fraudulent
24 concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-
25 51 (1977).

26 3464. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
27 serious risks to vehicle occupants, including that it can cause: (1) airbags and
28 seatbelts not to activate during a crash because crashes can sometimes release

1 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
2 vehicle has not crashed, which is dangerous because it is shocking and difficult for
3 the driver to operate a vehicle when the airbag deploys without warning; and (3)
4 failures of other important post-crash operations of the safety system, such as
5 unlocking doors to facilitate escape or extraction of drivers and passengers by
6 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

7 3465. FCA, Kia Korea, and Kia USA had a duty to disclose the ACU Defect
8 to the Minnesota Plaintiffs and Minnesota State Class members because:

- 9 a. FCA, Kia Korea, and Kia USA had exclusive access to and far
10 superior knowledge about technical facts regarding the ACU
11 Defect;
- 12 b. Given the ACU Defect's hidden and technical nature, the
13 Minnesota Plaintiffs and Minnesota State Class members lack
14 the sophisticated expertise in vehicle components and electrical
15 phenomena that would be necessary to discover the ACU Defect
16 on their own;
- 17 c. FCA, Kia Korea, and Kia USA knew that the ACU Defect gave
18 rise to serious safety concerns for the consumers who use the
19 vehicles, and the FCA and Kia Class Vehicles containing the
20 ACU Defect would have been a material fact to the Minnesota
21 Plaintiffs' and Minnesota State Class members' decisions to buy
22 or lease FCA and Kia Class Vehicles; and
- 23 d. FCA, Kia Korea, and Kia USA made incomplete representations
24 about the safety and reliability of the FCA and Kia Class
25 Vehicles and their Occupant Restraint System, while
26 purposefully withholding material facts about a known safety
27 defect. In uniform advertising and materials provided with each
28 Class Vehicle, FCA, Kia Korea, and Kia USA intentionally

1 concealed, suppressed, and failed to disclose to the Minnesota
2 Plaintiffs and Minnesota State Class members that the FCA and
3 Kia Class Vehicles contained the ACU Defect. Because they
4 volunteered to provide information about the FCA and Kia Class
5 Vehicles that they marketed and offered for sale and lease to the
6 Minnesota Plaintiffs and Minnesota State Class members, FCA,
7 Kia Korea, and Kia USA had the duty to disclose the whole
8 truth.

9 3466. In breach of their duties, FCA, Kia Korea, and Kia USA failed to
10 disclose that the FCA and Kia Class Vehicles were not safe and reliable, and that
11 their Occupant Restraint Systems, including their airbags and seatbelt pretensioners,
12 could fail in the event of a crash due to the ACU Defect.

13 3467. FCA, Kia Korea, and Kia USA intended for the Minnesota Plaintiffs
14 and Minnesota State Class members to rely on their omissions—which they did by
15 purchasing and leasing the FCA and Kia Class Vehicles at the prices they paid
16 believing that the Occupant Restraint Systems in their Class Vehicles would
17 function properly.

18 3468. That reliance was reasonable, because a reasonable consumer would
19 not have expected that the FCA and Kia Class Vehicles contained a safety defect
20 that poses such a serious risk. FCA, Kia Korea, and Kia USA knew that reasonable
21 consumers expect that their vehicle has working airbags and seatbelt pretensioners
22 and would rely on those facts in deciding whether to purchase, lease, or retain a
23 new or used motor vehicle. Whether a manufacturer’s products are safe and
24 reliable, and whether that manufacturer stands behind its products, are material
25 concerns to a consumer. Especially here when at least nine people have already
26 died due to the ACU Defect, and many more have been injured.

27 3469. Additionally, FCA, Kia Korea, and Kia USA ensured that the
28 Minnesota Plaintiffs and Minnesota State Class members did not discover this

1 information by actively concealing and misrepresenting the true nature of the FCA
2 and Kia Class Vehicles' Occupant Restraint Systems to consumers and NHTSA.

3 3470. FCA, Kia Korea, and Kia USA actively concealed and suppressed
4 these material facts, in whole or in part, to maintain a market for their Class
5 Vehicles, to protect profits, and to avoid costly recalls that would expose them to
6 liability for those expenses and harm the commercial reputations of Defendants and
7 their products. They did so at the expense of the Minnesota Plaintiffs and
8 Minnesota State Class members.

9 3471. To this day, FCA, Kia Korea, and Kia USA have not fully and
10 adequately disclosed the ACU Defect, and they continue to conceal material
11 information about the defect from consumers and NHTSA. The omitted and
12 concealed facts were material because a reasonable person would find them
13 important in purchasing, leasing, or retaining a new or used motor vehicle, and
14 because they directly impact the value of the FCA and Kia Class Vehicles
15 purchased or leased by the Minnesota Plaintiffs and Minnesota State Class
16 members.

17 3472. Had they been aware of the ACU Defect in the FCA and Kia Class
18 Vehicles, and FCA's, Kia Korea's, and Kia USA's callous disregard for safety, the
19 Minnesota Plaintiffs and Minnesota State Class members either would not have
20 paid as much as they did for their Class Vehicles, or they would not have purchased
21 or leased them.

22 3473. As alleged in Section V above, if FCA, Kia Korea, and Kia USA had
23 fully and adequately disclosed the ACU Defect to consumers and NHTSA, the
24 Minnesota Plaintiffs and Minnesota State Class members would have seen such a
25 disclosure.

26 3474. Accordingly, FCA, Kia Korea, and Kia USA are liable to the
27 Minnesota Plaintiffs and Minnesota State Class members for their damages in an
28

1 amount to be proven at trial, including, but not limited to, their lost overpayment
2 for the FCA and Kia Class Vehicles at the time of purchase or lease.

3 3475. FCA's, Kia Korea's, and Kia USA's acts were done maliciously,
4 oppressively, deliberately, with intent to defraud; in reckless disregard of the
5 Minnesota Plaintiffs' and Minnesota State Class members' rights and well-being;
6 and to enrich themselves. FCA's, Kia Korea's, and Kia USA's misconduct warrants
7 an assessment of punitive damages, as permitted by law, in an amount sufficient to
8 deter such conduct in the future, which amount shall be determined according to
9 proof at trial.

10 **h. Minnesota Count 8: Fraud by Omission and Concealment**
11 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
12 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
13 **ST USA, and ST Malaysia**

14 3476. Plaintiffs reallege and incorporate by reference all preceding
15 allegations as though fully set forth herein.

16 3477. The Minnesota Plaintiffs bring this count individually and on behalf of
17 members of the Minnesota State Class who purchased or leased Class Vehicles,
18 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
19 TRW Corp., and ZF Germany (collectively, the "ZF Defendants"), and ST Italy, ST
20 Malaysia, and ST USA (collectively, the "ST Defendants").

21 3478. The ZF and ST Defendants are liable for both fraudulent concealment
22 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

23 3479. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
24 serious risks to vehicle occupants, including that it can cause: (1) airbags and
25 seatbelts not to activate during a crash because crashes can sometimes release
26 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
27 vehicle has not crashed, which is dangerous because it is shocking and difficult for
28 the driver to operate a vehicle when the airbag deploys without warning; and (3)
failures of other important post-crash operations of the safety system, such as

1 unlocking doors to facilitate escape or extraction of drivers and passengers by
2 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

3 3480. The ZF and ST Defendants had a duty to disclose the ACU Defect to
4 the Minnesota Plaintiffs and Minnesota State Class members because:

- 5 a. The ZF and ST Defendants had exclusive access to and far
6 superior knowledge about technical facts regarding the ACU
7 Defect;
- 8 b. Given the ACU Defect’s hidden and technical nature, the
9 Minnesota Plaintiffs and Minnesota State Class members lack
10 the sophisticated expertise in vehicle components and electrical
11 phenomena that would be necessary to discover the ACU Defect
12 on their own;
- 13 c. The ZF and ST Defendants knew that the ACU Defect gave rise
14 to serious safety concerns for the consumers who use the
15 vehicles, and the Class Vehicles containing the ACU Defect
16 would have been a material fact to the Minnesota Plaintiffs’ and
17 Minnesota State Class members’ decisions to buy or lease Class
18 Vehicles; and
- 19 d. The ZF Defendants made incomplete representations about the
20 safety and reliability of the Class Vehicles and their Occupant
21 Restraint System, while purposefully withholding material facts
22 about a known safety defect, creating a duty to disclose the
23 whole truth. Specifically, ZF Electronics USA, ZF Passive
24 Safety USA, and ZF Automotive USA worked with the Vehicle
25 Manufacturer Defendants on the design and inclusion of the
26 airbag readiness indicators in the Class Vehicles, which falsely
27 assured Plaintiffs and Class Members that the Occupant
28

1 Restraint Systems in the Class Vehicles would function properly
2 in a crash.

3 3481. In breach of their duties, the ZF and ST Defendants failed to disclose
4 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
5 Systems, including their airbags and seatbelt pretensioners, could fail in the event
6 of a crash due to the ACU Defect.

7 3482. The ZF and ST Defendants intended for the Minnesota Plaintiffs and
8 Minnesota State Class members to rely on their omissions—which they did by
9 purchasing and leasing the Class Vehicles at the prices they paid believing that the
10 Occupant Restraint Systems in their Class Vehicles would function properly.

11 3483. That reliance was reasonable, because a reasonable consumer would
12 not have expected that the Class Vehicles contained a safety defect that poses such
13 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
14 that their vehicle has working airbags and seatbelt pretensioners and would rely on
15 those facts in deciding whether to purchase, lease, or retain a new or used motor
16 vehicle. Whether a manufacturer's products are safe and reliable, and whether that
17 manufacturer stands behind its products, are material concerns to a consumer.
18 Especially here when at least nine people have already died due to the ACU Defect,
19 and many more have been injured.

20 3484. Additionally, the ZF and ST Defendants ensured that the Minnesota
21 Plaintiffs and Minnesota State Class members did not discover this information by
22 actively concealing and misrepresenting the true nature of the Class Vehicles'
23 Occupant Restraint Systems to consumers and NHTSA.

24 3485. The ZF and ST Defendants actively concealed and suppressed these
25 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
26 protect profits, and to avoid costly recalls that would expose them to liability for
27 those expenses and harm the commercial reputations of Defendants and their
28

1 products. They did so at the expense of the Minnesota Plaintiffs and Minnesota
2 State Class members.

3 3486. To this day, the ZF and ST Defendants have not fully and adequately
4 disclosed the ACU Defect, and they continue to conceal material information about
5 the defect from consumers and NHTSA. The omitted and concealed facts were
6 material because a reasonable person would find them important in purchasing,
7 leasing, or retaining a new or used motor vehicle, and because they directly impact
8 the value of the Class Vehicles purchased or leased by the Minnesota Plaintiffs and
9 Minnesota State Class members.

10 3487. Had they been aware of the ACU Defect in the Class Vehicles, and the
11 ZF and ST Defendants' callous disregard for safety, the Minnesota Plaintiffs and
12 Minnesota State Class members either would not have paid as much as they did for
13 their Class Vehicles, or they would not have purchased or leased them.

14 3488. As alleged in Section V above, if the ZF and ST Defendants had fully
15 and adequately disclosed the ACU Defect to consumers and NHTSA, the
16 Minnesota Plaintiffs and Minnesota State Class members would have seen such a
17 disclosure.

18 3489. Accordingly, the ZF and ST Defendants are liable to the Minnesota
19 Plaintiffs and Minnesota State Class members for their damages in an amount to be
20 proven at trial, including, but not limited to, their lost overpayment for the Class
21 Vehicles at the time of purchase or lease.

22 3490. The ZF and ST Defendants' acts were done maliciously, oppressively,
23 deliberately, with intent to defraud; in reckless disregard of the Minnesota
24 Plaintiffs' and Minnesota State Class members' rights and well-being; and to enrich
25 themselves. The ZF and ST Defendants' misconduct warrants an assessment of
26 punitive damages, as permitted by law, in an amount sufficient to deter such
27 conduct in the future, which amount shall be determined according to proof at trial.
28

1 **i. Minnesota Count 9: Unjust Enrichment Against FCA, Kia**
2 **Korea, and Kia USA**

3 3491. Plaintiffs reallege and incorporate by reference all preceding
4 allegations in Sections I-VI above as though fully set forth herein.

5 3492. Plaintiff Steve Keister brings this count individually and on behalf of
6 members of the Minnesota State Class who purchased or leased FCA Class
7 Vehicles, against FCA.

8 3493. Plaintiff Bobbi Jo Birk-LaBarge brings this count individually and on
9 behalf of members of the Minnesota State Class who purchased or leased Kia Class
10 Vehicles, against Kia Korea, and Kia USA.

11 3494. For purposes of this count, Plaintiffs Keister and Birk-LaBarge shall
12 be referred to as the “Minnesota Plaintiffs.”

13 3495. The Minnesota Plaintiffs and Minnesota State Class members
14 conferred tangible and material economic benefits upon FCA, Kia Korea, and Kia
15 USA when they purchased or leased the FCA and Kia Class Vehicles. FCA, Kia
16 Korea, and Kia USA readily accepted and retained these benefits.

17 3496. The Minnesota Plaintiffs and Minnesota State Class members would
18 not have purchased or leased their FCA and Kia Class Vehicles, or would have paid
19 less for them, had they known of the ACU Defect at the time of purchase or lease.
20 Therefore, FCA, Kia Korea, and Kia USA profited from the sale and lease of the
21 FCA and Kia Class Vehicles to the detriment and expense of the Minnesota
22 Plaintiffs and Minnesota State Class members.

23 3497. FCA, Kia Korea, and Kia USA appreciated these benefits, which were
24 the expected result of FCA, Kia Korea, and Kia USA acting in their pecuniary
25 interest at the expense of their customers. FCA, Kia Korea, and Kia USA knew of
26 these benefits because they were aware of the ACU Defect, yet they failed to
27 disclose this knowledge and misled Minnesota Plaintiffs and Minnesota State Class
28

1 members regarding the nature and quality of the FCA and Kia Class Vehicles while
2 profiting from this deception.

3 3498. It would be unjust, inequitable, and unconscionable for FCA, Kia
4 Korea, and Kia USA to retain these benefits, including because they were procured
5 as a result of FCA's, Kia Korea's, and Kia USA's wrongful conduct alleged above.

6 3499. The Minnesota Plaintiffs and Minnesota State Class members are
7 entitled to restitution of the benefits FCA, Kia Korea, and Kia USA unjustly
8 retained and/or any amounts necessary to return the Minnesota Plaintiffs and
9 Minnesota State Class members to the position they occupied prior to dealing with
10 FCA, Kia Korea, and Kia USA, with such amounts to be determined at trial.

11 3500. The Minnesota Plaintiffs plead this claim separately as well as in the
12 alternative to their claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
13 Minnesota Plaintiffs' claims for damages are dismissed or judgment is entered in
14 favor of Defendants, the Minnesota Plaintiffs will have no adequate legal remedy.

15 **13. Missouri**

16 **a. Missouri Count 1: Breach of Express Warranty (Mo. Rev. Stat. §§ 400.2-313 and 400.2A-210) Against Kia Korea and**
17 **Kia USA**

18 3501. Plaintiffs reallege and incorporate by reference all preceding
19 allegations as though fully set forth herein.

20 3502. Plaintiff Dan Sutterfield (hereinafter, "Missouri Plaintiff") brings this
21 count individually and on behalf of members of the Missouri State Class who
22 purchased or leased Kia Class Vehicles, against Kia Korea and Kia USA.

23 3503. Kia Korea and Kia USA are and were at all relevant times "merchants"
24 with respect to motor vehicles under Mo. Rev. Stat. §§ 400.2-104(1) and 400.2A-
25 103(3), and "sellers" of motor vehicles under § 400.2-103(1)(d).

26 3504. With respect to leases, Kia Korea and Kia USA are and were at all
27 relevant times "lessors" of motor vehicles under Mo. Rev. Stat. § 400.2A-
28 103(1)(p).

1 3505. All Missouri State Class members who purchased Kia Class Vehicles
2 in Missouri are “buyers” within the meaning of Mo. Rev. Stat. § 400.2-103(1)(a).

3 3506. All Missouri State Class members who leased Kia Class Vehicles in
4 Missouri are “lessees” within the meaning of Mo. Rev. Stat. § 400.2A-103(1)(n).

5 3507. The Kia Class Vehicles are and were at all relevant times “goods”
6 within the meaning of Mo. Rev. Stat. §§ 400.2-105(1) and 400.2A-103(1)(h).

7 3508. In connection with the purchase or lease of Kia Class Vehicles, Kia
8 Korea and Kia USA provided the Missouri Plaintiff and Missouri State Class
9 members with warranties in the form of: (a) written express warranties covering the
10 repair or replacement of components that are defective in materials or
11 workmanship, and (b) descriptions of the Kia Class Vehicles as safe and reliable,
12 and that their Occupant Restraint Systems, including their airbags and seatbelt
13 pretensioners, would function properly in the event of a crash.

14 3509. However, Kia Korea and Kia USA knew or should have known that
15 the warranties were false and/or misleading. Specifically, Kia Korea and Kia USA
16 were aware of the ACU Defect in the Kia Class Vehicles, which made the vehicles
17 inherently defective and dangerous at the time that they were sold and leased to the
18 Missouri Plaintiff and Missouri State Class members.

19 3510. The Missouri Plaintiff and Missouri State Class members were aware
20 the Kia Class Vehicles were covered by express warranties, and those warranties
21 were an essential part of the bargain between them, Kia Korea and Kia USA when
22 the Missouri Plaintiff and Missouri State Class members unknowingly purchased
23 and leased Kia Class Vehicles that came equipped with defective ACUs and ASICs.

24 3511. Kia Korea and Kia USA misrepresented the Kia Class Vehicles as safe
25 and reliable while concealing that they contained the ACU Defect, the Missouri
26 Plaintiff and Missouri State Class members were exposed to those
27 misrepresentations, and the Missouri Plaintiff and Missouri State Class members
28 had no way of discerning that Kia Korea’s and Kia USA’s representations were

1 false and misleading or otherwise learning the material facts that Kia Korea and Kia
2 USA had concealed or failed to disclose. Accordingly, the Missouri Plaintiff and
3 Missouri State Class members reasonably relied on Kia Korea's and Kia USA's
4 express warranties when purchasing or leasing their Kia Class Vehicles. Plaintiffs
5 allege the information they relied upon in Section II.B above. To aid review of this
6 information, Exhibit 19 provides paragraph numbers for each Plaintiff.

7 3512. Kia Korea and Kia USA knowingly breached their express warranties
8 to repair defects in materials and workmanship by failing to repair the ACU Defect
9 or replace the defective ACUs and ASICs in the Kia Class Vehicles. Kia Korea and
10 Kia USA also breached their express warranties by selling and leasing Kia Class
11 Vehicles with a defect that was never disclosed to the Missouri Plaintiff and
12 Missouri State Class members.

13 3513. The Missouri Plaintiff and Missouri State Class members have
14 provided Kia Korea and Kia USA with reasonable notice and opportunity to cure
15 the breaches of their express warranties by way of the numerous NHTSA
16 complaints filed against them, and the individual notice letters sent by Missouri
17 State Class members within a reasonable amount of time after the ACU Defect
18 became public. Additionally, on April 24, 2020, a notice letter was sent on behalf of
19 the Missouri Plaintiff and Missouri State Class members to Kia Korea and Kia
20 USA.

21 3514. Alternatively, the Missouri Plaintiff and Missouri State Class members
22 were excused from providing Kia Korea and Kia USA with notice and an
23 opportunity to cure the breach, because it would have been futile. As alleged above,
24 Kia Korea and Kia USA have long known that the Kia Class Vehicles contained the
25 ACU Defect, and that the ACU Defect has caused ACUs and ASICs to malfunction
26 in crashes involving Class Vehicles; however, to date, Kia Korea and Kia USA
27 have not instituted a recall or any other repair program with respect to the
28 unrecalled Kia Class Vehicles, or even acknowledged that the ACU Defect exists in

1 all Kia Class Vehicles, including the recalled Kia Class Vehicles—even though all
2 of the Kia Class Vehicles are subject to the NHTSA investigation. Therefore, the
3 Missouri Plaintiff and Missouri State Class members had no reason to believe that
4 Kia Korea and Kia USA would have repaired the ACU Defect if the Missouri
5 Plaintiff and Missouri State Class members presented their Class Vehicles to them
6 for repair.

7 3515. As a direct and proximate result of Kia Korea’s and Kia USA’s breach
8 of their express warranties, the Kia Class Vehicles were and are defective and the
9 ACU Defect in the Missouri Plaintiff’s and Missouri State Class members’ Kia
10 Class Vehicles was not remedied. Therefore, the Missouri Plaintiff and Missouri
11 State Class members have been damaged, in an amount to be proven at trial,
12 through their overpayment at the time of purchase or lease for Kia Class Vehicles
13 with an undisclosed safety defect that would not be remedied.

14 **b. Missouri Count 2: Breach of Implied Warranty of**
15 **Merchantability (Mo. Rev. Stat. §§ 400.2-314 and 400.2A-**
16 **212) Against Kia USA**

17 3516. Plaintiffs reallege and incorporate by reference all preceding
18 allegations as though fully set forth herein.

19 3517. The Missouri Plaintiff brings this count individually and on behalf of
20 members of the Missouri State Class who purchased or leased Kia Class Vehicles,
21 against Kia USA.

22 3518. A warranty that the Kia Class Vehicles were in merchantable condition
23 and fit for the ordinary purpose for which such goods are used is implied by law
24 pursuant to Mo. Rev. Stat. §§ 400.2-314 and 400.2A-212.

25 3519. Kia USA is and was at all relevant times a “merchant” with respect to
26 motor vehicles under Mo. Rev. Stat. §§ 400.2-104(1) and 400.2A-103(3), and a
27 “seller” of motor vehicles under § 400.2-103(1)(d).

28 3520. With respect to leases, Kia USA is and was at all relevant times a
“lessor” of motor vehicles under Mo. Rev. Stat. § 400.2A-103(1)(p).

1 3521. All Missouri State Class members who purchased Kia Class Vehicles
2 in Missouri are “buyers” within the meaning of Mo. Rev. Stat. § 400.2-103(1)(a).

3 3522. All Missouri State Class members who leased Kia Class Vehicles in
4 Missouri are “lessees” within the meaning of Mo. Rev. Stat. § 400.2A-103(1)(n).

5 3523. The Kia Class Vehicles are and were at all relevant times “goods”
6 within the meaning of Mo. Rev. Stat. §§ 400.2-105(1) and 400.2A-103(1)(h).

7 3524. The Kia Class Vehicles did not comply with the implied warranty of
8 merchantability because, at the time of sale and lease and at all times thereafter,
9 they were defective and not in merchantable condition, would not pass without
10 objection in the trade, and were not fit for the ordinary purpose for which vehicles
11 were used. Specifically, at the time they were sold and leased, the Kia Class
12 Vehicles contained the ACU Defect, which may cause the airbags and seatbelt
13 pretensioners to fail to deploy during a crash, the failure to unlock doors
14 automatically after a crash, the failure to turn off a fuel supply or high-voltage
15 battery after a crash, or the airbags to inadvertently deploy, all of which render the
16 Kia Class Vehicles inherently defective and dangerous.

17 3525. The Missouri Plaintiff and Missouri State Class members have
18 provided Kia USA with reasonable notice and opportunity to cure the breaches of
19 its implied warranty by way of the numerous NHTSA complaints filed against it,
20 and the individual notice letters sent by Missouri State Class members within a
21 reasonable amount of time after the ACU Defect became public. Additionally, on
22 April 24, 2020, a notice letter was sent on behalf of the Missouri Plaintiff and
23 Missouri State Class members to Kia USA.

24 3526. Alternatively, the Missouri Plaintiff and Missouri State Class members
25 were excused from providing Kia USA with notice and an opportunity to cure the
26 breach, because it would have been futile. As alleged above, Kia USA has long
27 known that the Kia Class Vehicles contained the ACU Defect, and that the ACU
28 Defect has caused ACUs and ASICs to malfunction in crashes involving Class

1 Vehicles; however, to date, Kia USA has not instituted a recall or any other repair
2 program with respect to the unrecalled Kia Class Vehicles, or even acknowledged
3 that the ACU Defect exists in all Kia Class Vehicles, including the recalled Kia
4 Class Vehicles—even though all of the Kia Class Vehicles are subject to the
5 NHTSA investigation. Therefore, the Missouri Plaintiff and Missouri State Class
6 members had no reason to believe that Kia USA would have repaired the ACU
7 Defect if the Missouri Plaintiff and Missouri State Class members presented their
8 Class Vehicles to it for repair.

9 3527. As a direct and proximate result of Kia USA’s breach of the implied
10 warranty of merchantability, the Missouri Plaintiff and Missouri State Class
11 members have been damaged through their overpayment at the time of purchase or
12 lease for Kia Class Vehicles with an undisclosed safety defect in an amount to be
13 proven at trial.

14 c. **Missouri Count 3: Violation of the Missouri Merchandising**
15 **Practices Act (Mo. Rev. Stat. § 407.010, *et seq.*) Against Kia**
16 **Korea and Kia USA**

17 3528. Plaintiffs reallege and incorporate by reference all preceding
18 allegations as though fully set forth herein.

19 3529. The Missouri Plaintiff brings this count individually and on behalf of
20 members of the Missouri State Class who purchased or leased Kia Class Vehicles,
21 against Kia Korea and Kia USA.

22 3530. Kia Korea, Kia USA, the Missouri Plaintiff, and Missouri State Class
23 members are “persons” within the meaning of Mo. Rev. Stat. § 407.010(5).

24 3531. Kia Korea and Kia USA were and are engaged in “trade or commerce”
25 within the meaning of Mo. Rev. Stat. § 407.010(7).

26 3532. The Missouri Merchandising Practices Act (“Missouri MPA”)
27 prohibits unlawful business practices. Mo. Rev. Stat. § 407.020(1).
28

1 3533. The Missouri Plaintiff and Missouri State Class Members purchased
2 their Kia Class Vehicles and the ACUs installed in them primarily for personal,
3 family, or household purposes.

4 3534. In the course of their business, Kia Korea and Kia USA, through their
5 agents, employees, and/or subsidiaries, violated the Missouri MPA by knowingly
6 and intentionally misrepresenting, omitting, concealing, and/or failing to disclose
7 material facts regarding the reliability, safety, and performance of the Kia Class
8 Vehicles, the safety of their Occupant Restraint Systems, and the ACU Defect, as
9 detailed above.

10 3535. Kia Korea and Kia USA had an ongoing duty to the Missouri Plaintiff
11 and Missouri State Class members to refrain from unfair or deceptive practices
12 under the Missouri MPA in the course of their business. Specifically, Kia Korea
13 and Kia USA owed the Missouri Plaintiff and Missouri State Class members a duty
14 to disclose all the material facts concerning the ACU Defect in the Kia Class
15 Vehicles because they possessed exclusive knowledge, they intentionally concealed
16 the ACU Defect from the Missouri Plaintiff and Missouri State Class members,
17 and/or they made misrepresentations that were rendered misleading because they
18 were contradicted by withheld facts.

19 3536. By misrepresenting the Kia Class Vehicles as safe and reliable and the
20 defective ACU and ASICs installed in them as properly-functioning and free from
21 defects, and by failing to disclose and actively concealing the dangers and risk
22 posed by the ACU Defect to both consumers and NHTSA, Kia Korea and Kia USA
23 engaged in one or more of the following unfair or deceptive business practices
24 prohibited by Mo. Rev. Stat. § 407.020(1): using or employing deception, fraud,
25 false pretense, false promise or misrepresentation, or the concealment, suppression
26 or omission of a material fact with intent that others rely upon such concealment,
27 suppression or omission, in connection with the advertisement and sale/lease of the
28

1 Kia Class Vehicles, whether or not any person has in fact been misled, deceived or
2 damaged thereby.

3 3537. Kia Korea's and Kia USA's unfair and deceptive acts or practices,
4 including their misrepresentations, concealments, omissions, and suppressions of
5 material facts, were designed to mislead and had a tendency or capacity to mislead
6 and create a false impression in consumers that the Kia Class Vehicles had
7 properly-functioning and reliable airbags and seatbelts, and that the Occupant
8 Restraint System did not contain the ACU Defect and would perform its intended
9 function of activating the seatbelts and airbags during a collision. Indeed, those
10 misrepresentations, concealments, omissions, and suppressions of material facts did
11 in fact deceive reasonable consumers, including the Missouri Plaintiff and Missouri
12 State Class members, about the true safety and reliability of Kia Class Vehicles
13 and/or the defective ACUs and ASICs installed in them, the quality of the Kia Class
14 Vehicles, and the true value of the Kia Class Vehicles.

15 3538. Kia Korea's and Kia USA's misrepresentations, concealments,
16 omissions, and suppressions of material facts regarding the ACU Defect and true
17 characteristics of the Occupant Restraint Systems in the Kia Class Vehicles were
18 material to the decisions of the Missouri Plaintiff and Missouri State Class
19 members to purchase and lease those vehicles, as Kia Korea and Kia USA intended.
20 The Missouri Plaintiff and Missouri State Class members were exposed to those
21 misrepresentations, concealments, omissions, and suppressions of material facts,
22 and relied on Kia Korea's and Kia USA's misrepresentations that the Kia Class
23 Vehicles and their Occupant Restraint Systems were safe and reliable in deciding to
24 purchase and lease Kia Class Vehicles. Plaintiffs allege the information they relied
25 upon in Section II.B above. To aid review of this information, Exhibit 19 provides
26 paragraph numbers for each Plaintiff.

27 3539. The Missouri Plaintiff's and Missouri State Class members' reliance
28 was reasonable, as they had no way of discerning that Kia Korea's and Kia USA's

1 representations were false and misleading, or otherwise learning the facts that Kia
2 Korea and Kia USA had concealed or failed to disclose. The Missouri Plaintiff and
3 Missouri State Class members did not, and could not, unravel Kia Korea's and Kia
4 USA's deception on their own.

5 3540. Had the Missouri Plaintiff and Missouri State Class members known
6 the truth about the ACU Defect, the Missouri Plaintiff and Missouri State Class
7 members would not have purchased or leased Kia Class Vehicles, or would have
8 paid significantly less for them.

9 3541. The Missouri Plaintiff and Missouri State Class members suffered
10 ascertainable losses and actual damages through their overpayment at the time of
11 purchase and lease for Kia Class Vehicles with an undisclosed safety defect as a
12 direct and proximate result of Kia Korea's and Kia USA's concealment,
13 misrepresentations, and/or failure to disclose material information.

14 3542. Kia Korea's and Kia USA's violations present a continuing risk to the
15 Missouri Plaintiff and Missouri State Class members, as well as to the general
16 public, because the Class Vehicles remain unsafe due to the defective ACUs and
17 ASICs therein. Additionally, their unlawful acts and practices complained of herein
18 affect the public interest.

19 3543. Pursuant to Mo. Rev. Stat. § 407.025, the Missouri Plaintiff and
20 Missouri State Class members seek an order enjoining Kia Korea's and Kia USA's
21 unfair or deceptive acts or practices and awarding damages and any other just and
22 proper relief available under the Missouri MPA.

23 **d. Missouri Count 4: Violation of the Missouri Merchandising**
24 **Practices Act (Mo. Rev. Stat. § 407.010, et seq.) Against ZF**
25 **Electronics USA, ZF Passive Safety USA, ZF Automotive**
26 **USA, ZF TRW Corp., ZF Germany, ST Italy, ST USA, and**
27 **ST Malaysia**

28 3544. Plaintiffs reallege and incorporate by reference all preceding
allegations as though fully set forth herein.

1 3545. The Missouri Plaintiff brings this count individually and on behalf of
2 members of the Missouri State Class against ZF Electronics USA, ZF Passive
3 Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively,
4 the “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the
5 “ST Defendants”).

6 3546. The ZF Defendants, the ST Defendants, the Missouri Plaintiff, and
7 Missouri State Class members are “persons” within the meaning of Mo. Rev. Stat.
8 § 407.010(5).

9 3547. The ZF and ST Defendants were and are engaged in “trade or
10 commerce” within the meaning of Mo. Rev. Stat. § 407.010(7).

11 3548. The Missouri Merchandising Practices Act (“Missouri MPA”)
12 prohibits unlawful business practices. Mo. Rev. Stat. § 407.020(1).

13 3549. The Missouri Plaintiff and Missouri State Class Members purchased
14 their Kia Class Vehicles and the ACUs installed in them primarily for personal,
15 family, or household purposes.

16 3550. The ZF and ST Defendants had an ongoing duty to the Missouri
17 Plaintiff and Missouri State Class members to refrain from unfair or deceptive
18 practices under the Missouri MPA in the course of their business. Specifically, the
19 ZF and ST Defendants owed the Missouri Plaintiff and Missouri State Class
20 members a duty to disclose all the material facts concerning the ACU Defect in the
21 Class Vehicles because they possessed exclusive knowledge and they intentionally
22 concealed the ACU Defect from the Missouri Plaintiff and Missouri State Class
23 members.

24 3551. In the course of their business, the ZF and ST Defendants, through
25 their agents, employees, and/or subsidiaries, violated the Missouri MPA by
26 knowingly and intentionally omitting, concealing, and failing to disclose material
27 facts regarding the existence, nature, and scope of the defective ACU and ASIC
28 installed in the Class Vehicles, as detailed above.

1 3552. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
2 Automotive USA, through their agents, employees, and/or subsidiaries, violated the
3 Missouri MPA when they knowingly and intentionally misrepresented the Class
4 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
5 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
6 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
7 Manufacturer Defendants on the design and inclusion of the airbag readiness
8 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
9 Members that the Occupant Restraint Systems in the Class Vehicles would function
10 properly in a crash.

11 3553. By misrepresenting, failing to disclose, and actively concealing the
12 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
13 ST Defendants engaged in unlawful business practices prohibited by Mo. Rev. Stat.
14 § 407.020(1), including using or employing deception and fraud, and/or the
15 misrepresentation, concealment, suppression or omission of material facts regarding
16 the ACU Defect.

17 3554. The ZF and ST Defendants' unfair or deceptive acts or practices,
18 including their misrepresentations, concealments, omissions, and suppressions of
19 material facts, were designed to mislead and had a tendency or capacity to mislead
20 and create a false impression in consumers that the Class Vehicles had properly-
21 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
22 System did not contain the ACU Defect and would perform its intended function of
23 activating the seatbelts and airbags during a collision. Indeed, those
24 misrepresentations, concealments, omissions, and suppressions of material facts did
25 in fact deceive reasonable consumers, including the Missouri Plaintiff and Missouri
26 State Class members, about the true safety and reliability of Class Vehicles and/or
27 the defective ACUs and ASICs installed in them, the quality of the Class Vehicles,
28 and the true value of the Class Vehicles.

1 3555. The Missouri Plaintiff and Missouri State Class members justifiably
2 relied on the ZF and ST Defendants’ misrepresentations, omissions, and
3 concealment, as they had no way of discerning that the Class Vehicles contained
4 the ACU Defect, as alleged above. The Missouri Plaintiff and Missouri State Class
5 members did not, and could not, unravel the ZF and ST Defendants’ deception on
6 their own.

7 3556. The ZF and ST Defendants’ misrepresentations and concealment of the
8 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
9 Vehicles were material to the decisions of the Missouri Plaintiff and Missouri State
10 Class members to purchase and lease Class Vehicles, as the ZF and ST Defendants
11 intended. Had they known the truth, the Missouri Plaintiff and Missouri State Class
12 members would not have purchased or leased the Class Vehicles, or would have
13 paid significantly less for them.

14 3557. The Missouri Plaintiff and Missouri State Class members suffered
15 ascertainable losses and actual damages as a direct and proximate result of the ZF
16 and ST Defendants’ misrepresentations, concealment and/or failure to disclose
17 material information.

18 3558. The ZF and ST Defendants’ violations present a continuing risk to the
19 Missouri Plaintiff and Missouri State Class members, as well as to the general
20 public, because the Class Vehicles remain unsafe due to the defective ACUs and
21 ASICs therein. The ZF and ST Defendants’ unlawful acts and practices complained
22 of herein affect the public interest.

23 3559. Pursuant to Mo. Rev. Stat. § 407.025, the Missouri Plaintiff and
24 Missouri State Class members seek an order enjoining the ZF and ST Defendants’
25 unfair or deceptive acts or practices and awarding damages and any other just and
26 proper relief available under the Missouri MPA.

**e. Missouri Count 5: Fraud by Omission and Concealment
Against Kia Korea and Kia USA**

3560. Plaintiffs reallege and incorporate by reference all preceding allegations as though fully set forth herein.

3561. The Missouri Plaintiff brings this count individually and on behalf of members of the Missouri State Class who purchased or leased Kia Class Vehicles, against Kia Korea and Kia USA.

3562. Kia Korea and Kia USA are liable for both fraudulent concealment and non-disclosure. See, e.g., Restatement (Second) of Torts §§ 550-51 (1977).

3563. As explained in Section IV.A, the ACU Defect in Class Vehicles poses serious risks to vehicle occupants, including that it can cause: (1) airbags and seatbelts not to activate during a crash because crashes can sometimes release electrical transients, which cause the ACU to fail; (2) airbags to deploy when the vehicle has not crashed, which is dangerous because it is shocking and difficult for the driver to operate a vehicle when the airbag deploys without warning; and (3) failures of other important post-crash operations of the safety system, such as unlocking doors to facilitate escape or extraction of drivers and passengers by emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

3564. Kia Korea and Kia USA had a duty to disclose the ACU Defect to the Missouri Plaintiff and the Missouri State Class members because:

- a. Kia Korea and Kia USA had exclusive access to and far superior knowledge about technical facts regarding the ACU Defect;
- b. Given the ACU Defect’s hidden and technical nature, the Missouri Plaintiff and Missouri State Class members lack the sophisticated expertise in vehicle components and electrical phenomena that would be necessary to discover the ACU Defect on their own;

1 c. Kia Korea and Kia USA knew that the ACU Defect gave rise to
2 serious safety concerns for the consumers who use the vehicles,
3 and the Kia Class Vehicles containing the ACU Defect would
4 have been a material fact to the Missouri Plaintiff's and
5 Missouri State Class members' decisions to buy or lease Kia
6 Class Vehicles; and

7 d. Kia Korea and Kia USA made incomplete representations about
8 the safety and reliability of the Kia Class Vehicles and their
9 Occupant Restraint System, while purposefully withholding
10 material facts about a known safety defect. In uniform
11 advertising and materials provided with each Class Vehicle, Kia
12 Korea, and Kia USA intentionally concealed, suppressed, and
13 failed to disclose to the Missouri Plaintiff and Missouri State
14 Class members that the Kia Class Vehicles contained the ACU
15 Defect. Because they volunteered to provide information about
16 the Kia Class Vehicles that they marketed and offered for sale
17 and lease to the Missouri Plaintiff and Missouri State Class
18 members, Kia Korea and Kia USA had the duty to disclose the
19 whole truth.

20 3565. In breach of their duties, Kia Korea and Kia USA failed to disclose
21 that the Kia Class Vehicles were not safe and reliable, and that their Occupant
22 Restraint Systems, including their airbags and seatbelt pretensioners could fail in
23 the event of a crash due to the ACU Defect.

24 3566. Kia Korea and Kia USA intended for the Missouri Plaintiff and
25 Missouri State Class members to rely on their omissions—which they did by
26 purchasing and leasing the Kia Class Vehicles at the prices they paid believing that
27 the Occupant Restraint Systems in their Class Vehicles would function properly.
28

1 3567. That reliance was reasonable, because a reasonable consumer would
2 not have expected that the Kia Class Vehicles contained a safety defect that poses
3 such a serious risk. Kia Korea and Kia USA knew that reasonable consumers
4 expect that their vehicle has working airbags and seatbelt pretensioners and would
5 rely on those facts in deciding whether to purchase, lease, or retain a new or used
6 motor vehicle. Whether a manufacturer's products are safe and reliable, and
7 whether that manufacturer stands behind its products, are material concerns to a
8 consumer. Especially here when at least nine people have already died due to the
9 ACU Defect, and many more have been injured.

10 3568. Additionally, Kia Korea and Kia USA ensured that the Missouri
11 Plaintiff and Missouri State Class members did not discover this information by
12 actively concealing and misrepresenting the true nature of the Kia Class Vehicles'
13 Occupant Restraint Systems to consumers and NHTSA.

14 3569. Kia Korea and Kia USA actively concealed and suppressed these
15 material facts, in whole or in part, to maintain a market for their Class Vehicles, to
16 protect profits, and to avoid costly recalls that would expose them to liability for
17 those expenses and harm the commercial reputations of Defendants and their
18 products. They did so at the expense of the Missouri Plaintiff and Missouri State
19 Class members.

20 3570. To this day, Kia Korea and Kia USA have not fully and adequately
21 disclosed the ACU Defect, and they continue to conceal material information about
22 the defect from consumers and NHTSA. The omitted and concealed facts were
23 material because a reasonable person would find them important in purchasing,
24 leasing, or retaining a new or used motor vehicle, and because they directly impact
25 the value of the Kia Class Vehicles purchased or leased by the Missouri Plaintiff
26 and Missouri State Class members.

27 3571. Had they been aware of the ACU Defect in the Kia Class Vehicles,
28 and Kia Korea's and Kia USA's callous disregard for safety, the Missouri Plaintiff

1 and Missouri State Class members either would not have paid as much as they did
2 for their Class Vehicles, or they would not have purchased or leased them.

3 3572. As alleged in Section V above, if Kia Korea and Kia USA had fully
4 and adequately disclosed the ACU Defect to consumers and NHTSA, the Missouri
5 Plaintiff and Missouri State Class members would have seen such a disclosure.

6 3573. Accordingly, Kia Korea and Kia USA are liable to the Missouri
7 Plaintiff and Missouri State Class members for their damages in an amount to be
8 proven at trial, including, but not limited to, their lost overpayment for the Kia
9 Class Vehicles at the time of purchase or lease.

10 3574. Kia Korea's and Kia USA's acts were done maliciously, oppressively,
11 deliberately, with intent to defraud; in reckless disregard of the Missouri Plaintiff's
12 and Missouri State Class members' rights and well-being; and to enrich themselves.
13 Kia Korea's and Kia USA's misconduct warrants an assessment of punitive
14 damages, as permitted by law, in an amount sufficient to deter such conduct in the
15 future, which amount shall be determined according to proof at trial.

16 **f. Missouri Count 6: Fraud by Omission and Concealment**
17 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
18 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
ST USA, and ST Malaysia

19 3575. Plaintiffs reallege and incorporate by reference all preceding
20 allegations as though fully set forth herein.

21 3576. The Missouri Plaintiff brings this count individually and on behalf of
22 members of the Missouri State Class who purchased or leased Class Vehicles,
23 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
24 TRW Corp., and ZF Germany (collectively, the "ZF Defendants"), and ST Italy, ST
25 Malaysia, and ST USA (collectively, the "ST Defendants").

26 3577. The ZF and ST Defendants are liable for both fraudulent concealment
27 and non-disclosure. See, e.g., Restatement (Second) of Torts §§ 550-51 (1977).
28

1 3578. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
2 serious risks to vehicle occupants, including that it can cause: (1) airbags and
3 seatbelts not to activate during a crash because crashes can sometimes release
4 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
5 vehicle has not crashed, which is dangerous because it is shocking and difficult for
6 the driver to operate a vehicle when the airbag deploys without warning; and (3)
7 failures of other important post-crash operations of the safety system, such as
8 unlocking doors to facilitate escape or extraction of drivers and passengers by
9 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

10 3579. The ZF and ST Defendants had a duty to disclose the ACU Defect to
11 the Missouri Plaintiff and Missouri State Class members because:

- 12 a. The ZF and ST Defendants had exclusive access to and far
13 superior knowledge about technical facts regarding the ACU
14 Defect;
- 15 b. Given the ACU Defect’s hidden and technical nature, the
16 Missouri Plaintiff and Missouri State Class members lack the
17 sophisticated expertise in vehicle components and electrical
18 phenomena that would be necessary to discover the ACU Defect
19 on their own;
- 20 c. The ZF and ST Defendants knew that the ACU Defect gave rise
21 to serious safety concerns for the consumers who use the
22 vehicles, and the Class Vehicles containing the ACU Defect
23 would have been a material fact to the Missouri Plaintiff’s and
24 Missouri State Class members’ decisions to buy or lease Class
25 Vehicles; and
- 26 d. The ZF Defendants made incomplete representations about the
27 safety and reliability of the Class Vehicles and their Occupant
28 Restraint System, while purposefully withholding material facts

1 about a known safety defect, creating a duty to disclose the
2 whole truth. Specifically, ZF Electronics USA, ZF Passive
3 Safety USA, and ZF Automotive USA worked with the Vehicle
4 Manufacturer Defendants on the design and inclusion of the
5 airbag readiness indicators in the Class Vehicles, which falsely
6 assured Plaintiffs and Class Members that the Occupant
7 Restraint Systems in the Class Vehicles would function properly
8 in a crash.

9 3580. In breach of their duties, the ZF and ST Defendants failed to disclose
10 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
11 Systems, including their airbags and seatbelt pretensioners could fail in the event of
12 a crash due to the ACU Defect.

13 3581. The ZF and ST Defendants intended for the Missouri Plaintiff and
14 Missouri State Class members to rely on their omissions—which they did by
15 purchasing and leasing the Class Vehicles at the prices they paid believing that the
16 Occupant Restraint Systems in their Class Vehicles would function properly.

17 3582. That reliance was reasonable, because a reasonable consumer would
18 not have expected that the Class Vehicles contained a safety defect that poses such
19 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
20 that their vehicle has working airbags and seatbelt pretensioners and would rely on
21 those facts in deciding whether to purchase, lease, or retain a new or used motor
22 vehicle. Whether a manufacturer's products are safe and reliable, and whether that
23 manufacturer stands behind its products, are material concerns to a consumer.
24 Especially here when at least nine people have already died due to the ACU Defect,
25 and many more have been injured.

26 3583. Additionally, the ZF and ST Defendants ensured that the Missouri
27 Plaintiff and Missouri State Class members did not discover this information by
28

1 actively concealing and misrepresenting the true nature of the Class Vehicles’
2 Occupant Restraint Systems to consumers and NHTSA.

3 3584. The ZF and ST Defendants actively concealed and suppressed these
4 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
5 protect profits, and to avoid costly recalls that would expose them to liability for
6 those expenses and harm the commercial reputations of Defendants and their
7 products. They did so at the expense of the Missouri Plaintiff and Missouri State
8 Class members.

9 3585. To this day, the ZF and ST Defendants have not fully and adequately
10 disclosed the ACU Defect, and they continue to conceal material information about
11 the defect from consumers and NHTSA. The omitted and concealed facts were
12 material because a reasonable person would find them important in purchasing,
13 leasing, or retaining a new or used motor vehicle, and because they directly impact
14 the value of the Class Vehicles purchased or leased by the Missouri Plaintiff and
15 Missouri State Class members.

16 3586. Had they been aware of the ACU Defect in the Class Vehicles, and the
17 ZF and ST Defendants’ callous disregard for safety, the Missouri Plaintiff and
18 Missouri State Class members either would not have paid as much as they did for
19 their Class Vehicles, or they would not have purchased or leased them.

20 3587. As alleged in Section V above, if the ZF and ST Defendants had fully
21 and adequately disclosed the ACU Defect to consumers and NHTSA, the Missouri
22 Plaintiff and Missouri State Class members would have seen such a disclosure.

23 3588. Accordingly, the ZF and ST Defendants are liable to the Missouri
24 Plaintiff and Missouri State Class members for their damages in an amount to be
25 proven at trial, including, but not limited to, their lost overpayment for the Class
26 Vehicles at the time of purchase or lease.

27 3589. The ZF and ST Defendants’ acts were done maliciously, oppressively,
28 deliberately, with intent to defraud; in reckless disregard of the Missouri Plaintiff’s

1 and Missouri State Class members' rights and well-being; and to enrich themselves.
2 The ZF and ST Defendants' misconduct warrants an assessment of punitive
3 damages, as permitted by law, in an amount sufficient to deter such conduct in the
4 future, which amount shall be determined according to proof at trial.

5 **g. Missouri Count 7: Unjust Enrichment Against the Kia**
6 **Korea and Kia USA**

7 3590. Plaintiffs reallege and incorporate by reference all allegations in
8 Sections I-VI above as though fully set forth herein.

9 3591. The Missouri Plaintiff brings this count individually and on behalf of
10 members of the Missouri State Class who purchased or leased Kia Class Vehicles,
11 against Kia Korea and Kia USA.

12 3592. The Missouri Plaintiff and Missouri State Class members conferred
13 tangible and material monetary benefits upon Kia Korea and Kia USA when they
14 purchased or leased the Kia Class Vehicles. Kia Korea and Kia USA readily
15 accepted and retained these benefits.

16 3593. The Missouri Plaintiff and Missouri State Class members would not
17 have purchased or leased the Kia Class Vehicles, or would have paid less for them,
18 had they known of the ACU Defect at the time of purchase or lease. Therefore, Kia
19 Korea and Kia USA profited from the sale and lease of the Kia Class Vehicles to
20 the detriment and expense of the Missouri Plaintiff and Missouri State Class
21 members.

22 3594. Kia Korea and Kia USA appreciated these monetary benefits. These
23 benefits were the expected result of Kia Korea and Kia USA acting in their
24 pecuniary interest at the expense of their customers. Kia Korea and Kia USA knew
25 of these benefits because they were aware of the ACU Defect, yet they failed to
26 disclose this knowledge and misled the Missouri Plaintiff and Missouri State Class
27 members regarding the nature and quality of the Kia Class Vehicles while profiting
28 from this deception.

1 3595. It would be unjust, inequitable, and unconscionable for Kia Korea and
2 Kia USA to retain these monetary benefits, including because they were procured
3 as a result of Kia Korea’s and Kia USA’s wrongful conduct alleged above.

4 3596. The Missouri Plaintiff and Missouri State Class members are entitled
5 to restitution of the benefits Kia Korea and Kia USA unjustly retained and/or any
6 amounts necessary to return the Missouri Plaintiff and Missouri State Class
7 members to the position they occupied prior to dealing with Kia Korea and Kia
8 USA, with such amounts to be determined at trial.

9 3597. The Missouri Plaintiff pleads this claim separately as well as in the
10 alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
11 Missouri Plaintiff’s claims for damages are dismissed or judgment is entered in
12 favor of Defendants, the Missouri Plaintiff would have no adequate legal remedy.

13 **14. Nevada**

14 **a. Nevada Count 1: Breach of Express Warranty (Nev. Rev. Stat. §§ 104.2313 and 104A.2210) Against Toyota Sales USA¹⁴**

15
16 3598. Plaintiffs reallege and incorporate by reference all preceding
17 allegations as though fully set forth herein.

18 3599. Plaintiff Gary Samouris (hereinafter, “Nevada Plaintiff”) brings this
19 count individually and on behalf of members of the Nevada State Class who
20 purchased or leased Toyota Class Vehicles, against Toyota Sales USA.

21 3600. Toyota Sales USA is and was at all relevant times a “merchant” with
22 respect to motor vehicles under Nev. Rev. Stat. §§ 104.2104(1) and 104A.2103(3),
23 and a “seller” of motor vehicles under § 104.2103(1)(c).

24 3601. With respect to leases, Toyota Sales USA is and was at all relevant
25 times a “lessor” of motor vehicles under Nev. Rev. Stat. § 104A.2103(1)(p).

26

27

28 ¹⁴ The Court held in its February 9, 2022 Order that the Nevada Plaintiff stated a claim for breach of express warranty. *See* ECF No. 396 at 150.

1 3602. All Nevada State Class members who purchased Toyota Class
2 Vehicles in Nevada are “buyers” within the meaning of Nev. Rev. Stat.
3 § 104.2103(1)(a).

4 3603. All Nevada State Class members who leased Toyota Class Vehicles in
5 Nevada are “lessees” within the meaning of Nev. Rev. Stat. § 104A.2103(1)(n).

6 3604. The Toyota Class Vehicles are and were at all relevant times “goods”
7 within the meaning of Nev. Rev. Stat. §§ 104.2105(1) and 104A.2103(1)(h).

8 3605. In connection with the purchase or lease of Toyota Class Vehicles,
9 Toyota Sales USA provided the Nevada Plaintiff and Nevada State Class members
10 with warranties in the form of: (a) written express warranties covering the repair or
11 replacement of components that are defective in materials or workmanship, and (b)
12 descriptions of the Toyota Class Vehicles as safe and reliable, and that their
13 Occupant Restraint Systems, including their airbags and seatbelt pretensioners,
14 would function properly in the event of a crash

15 3606. However, Toyota Sales USA knew or should have known that the
16 warranties were false and/or misleading. Specifically, Toyota Sales USA was aware
17 of the ACU Defect in the Toyota Class Vehicles, which made the vehicles
18 inherently defective and dangerous at the time that they were sold and leased to the
19 Nevada Plaintiff and Nevada State Class members.

20 3607. The Nevada Plaintiff and Nevada State Class members were aware the
21 Toyota Class Vehicles were covered by express warranties, and those warranties
22 were an essential part of the bargain between them and Toyota Sales USA when the
23 Nevada Plaintiff and Nevada State Class members unknowingly purchased and
24 leased Toyota Class Vehicles that came equipped with defective ACUs and ASICs.

25 3608. Toyota Sales USA misrepresented the Toyota Class Vehicles as safe
26 and reliable while concealing that they contained the ACU Defect, the Nevada
27 Plaintiff and Nevada State Class members were exposed to those
28 misrepresentations, and the Nevada Plaintiff and Nevada State Class members had

1 no way of discerning that Toyota Sales USA's representations were false and
2 misleading or otherwise learning the material facts that Toyota Sales USA had
3 concealed or failed to disclose. Accordingly, the Nevada Plaintiff and Nevada State
4 Class members reasonably relied on Toyota Sales USA's express warranties when
5 purchasing or leasing their Toyota Class Vehicles. Plaintiffs allege the information
6 they relied upon in Section II.B above. To aid review of this information, Exhibit
7 19 provides paragraph numbers for each Plaintiff.

8 3609. Toyota Sales USA knowingly breached its express warranties to repair
9 defects in materials and workmanship by failing to repair the ACU Defect or
10 replace the defective ACUs and ASICs in the Toyota Class Vehicles. Toyota Sales
11 USA also breached its express warranties by selling and leasing Toyota Class
12 Vehicles with a defect that was never disclosed to the Nevada Plaintiff and Nevada
13 State Class members.

14 3610. The Nevada Plaintiff and Nevada State Class members provided
15 Toyota Sales USA with reasonable notice and opportunity to cure the breaches of
16 its express warranties by way of the numerous NHTSA complaints filed against it,
17 and the individual notice letters sent by Nevada State Class members within a
18 reasonable amount of time after the ACU Defect became public. Additionally, on
19 April 24, 2020, a notice letter was sent on behalf of the Nevada Plaintiff and
20 Nevada State Class members to Toyota Sales USA.

21 3611. Alternatively, the Nevada Plaintiff and Nevada State Class members
22 were excused from providing Toyota Sales USA with notice and an opportunity to
23 cure the breach, because it would have been futile. As alleged above, Toyota Sales
24 USA has long known that the Toyota Class Vehicles contained the ACU Defect,
25 and that the ACU Defect has caused ACUs and ASICs to malfunction in crashes
26 involving Class Vehicles; however, to date, Toyota Sales USA has not instituted a
27 recall or any other repair program with respect to the unrecalled Toyota Class
28 Vehicles, or even acknowledged that the ACU Defect still exists in all Toyota Class

1 Vehicles, including the recalled Toyota Class Vehicles—even though Toyota Class
2 Vehicles are subject to the NHTSA investigation. Therefore, the Nevada Plaintiff
3 and Nevada State Class members had no reason to believe that Toyota Sales USA
4 would have repaired the ACU Defect if the Nevada Plaintiff and Nevada State
5 Class members presented their Class Vehicles to it for repair.

6 3612. As a direct and proximate result of Toyota Sales USA’s breach of its
7 express warranties, the Toyota Class Vehicles were and are defective and the ACU
8 Defect in the Nevada Plaintiff’s and Nevada State Class members’ Toyota Class
9 Vehicles was not remedied. Therefore, the Nevada Plaintiff and Nevada State Class
10 members have been damaged, in an amount to be proven at trial, through their
11 overpayment at the time of purchase or lease for Toyota Class Vehicles with an
12 undisclosed safety defect that would not be remedied.

13 **b. Nevada Count 2: Breach of Implied Warranty of**
14 **Merchantability (Nev. Rev. Stat. §§ 104.2314 and**
104A.2212) Against Toyota Sales USA

15 3613. Plaintiffs reallege and incorporate by reference all preceding
16 allegations as though fully set forth herein.

17 3614. The Nevada Plaintiff brings this count individually and on behalf of
18 members of the Nevada State Class who purchased or leased Toyota Class
19 Vehicles, against Toyota Sales USA.

20 3615. A warranty that the Toyota Class Vehicles were in merchantable
21 condition and fit for the ordinary purpose for which such goods are used is implied
22 by law pursuant to Nev. Rev. Stat. §§ 104.2314 and 104A.2212.

23 3616. Toyota Sales USA is and was at all relevant times a “merchant” with
24 respect to motor vehicles under Nev. Rev. Stat. §§ 104.2104(1) and 104A.2103(3),
25 and a “seller” of motor vehicles under § 104.2103(1)(c).

26 3617. With respect to leases, Toyota Sales USA is and was at all relevant
27 times a “lessor” of motor vehicles under Nev. Rev. Stat. § 104A.2103(1)(p).
28

1 3618. All Nevada State Class members who purchased Toyota Class
2 Vehicles in Nevada are “buyers” within the meaning of Nev. Rev. Stat.
3 § 104.2103(1)(a).

4 3619. All Nevada State Class members who leased Toyota Class Vehicles in
5 Nevada are “lessees” within the meaning of Nev. Rev. Stat. § 104A.2103(1)(n).

6 3620. The Toyota Class Vehicles are and were at all relevant times “goods”
7 within the meaning of Nev. Rev. Stat. §§ 104.2105(1) and 104A.2103(1)(h).

8 3621. The Toyota Class Vehicles did not comply with the implied warranty
9 of merchantability because, at the time of sale and lease and at all times thereafter,
10 they were defective and not in merchantable condition, would not pass without
11 objection in the trade, and were not fit for the ordinary purpose for which vehicles
12 were used. Specifically, at the time they were sold and leased, the Toyota Class
13 Vehicles contained the ACU Defect, which may cause the airbags and seatbelt
14 pretensioners to fail to deploy during a crash, the failure to unlock doors
15 automatically after a crash, the failure to turn off a fuel supply or high-voltage
16 battery after a crash, or the airbags to inadvertently deploy, all of which render the
17 Toyota Class Vehicles inherently defective and dangerous.

18 3622. The Nevada Plaintiff and Nevada State Class members have provided
19 Toyota Sales USA with reasonable notice and opportunity to cure the breaches of
20 their implied warranties by way of the numerous NHTSA complaints filed against
21 them, and the individual notice letters sent by Nevada State Class members within a
22 reasonable amount of time after the ACU Defect became public. Additionally, on
23 April 24, 2020, a notice letter was sent on behalf of the Nevada Plaintiff and
24 Nevada State Class members to Toyota Sales USA.

25 3623. Alternatively, the Nevada Plaintiff and Nevada State Class members
26 were excused from providing Toyota Sales USA with notice and an opportunity to
27 cure the breach, because it would have been futile. As alleged above, Toyota Sales
28 USA has long known that the Toyota Class Vehicles contained the ACU Defect,

1 and that the ACU Defect has caused ACUs and ASICs to malfunction in crashes
2 involving Class Vehicles; however, to date, Toyota Sales USA has not instituted a
3 recall or any other repair program with respect to the unrecalled Toyota Class
4 Vehicles, or even acknowledged that the ACU Defect still exists in all Toyota Class
5 Vehicles, including the recalled Toyota Class Vehicles—even though Toyota Class
6 Vehicles are subject to the NHTSA investigation. Therefore, the Nevada Plaintiff
7 and Nevada State Class members had no reason to believe that Toyota Sales USA
8 would have repaired the ACU Defect if the Nevada Plaintiff and Nevada State
9 Class members presented their Class Vehicles to it for repair.

10 3624. As a direct and proximate result of Toyota Sales USA’s breach of the
11 implied warranty of merchantability, the Nevada Plaintiff and Nevada State Class
12 members have been damaged through their overpayment at the time of purchase or
13 lease for Toyota Class Vehicles with an undisclosed safety defect in an amount to
14 be proven at trial.

15 **c. Nevada Count 3: Violation of the Nevada Deceptive Trade**
16 **Practices Act (Nev. Rev. Stat. § 598.0903, et seq.) Against**
Toyota Sales USA and Toyota USA

17 3625. Plaintiffs reallege and incorporate by reference all preceding
18 allegations as though fully set forth herein.

19 3626. The Nevada Plaintiff brings this count individually and on behalf of
20 members of the Nevada State Class who purchased or leased Toyota Class
21 Vehicles, against Toyota Sales USA and Toyota USA.

22 3627. The Nevada Deceptive Trade Practices Act (“Nevada DTPA”), Nev.
23 Rev. Stat. § 598.0903, et. seq. prohibits the use of deceptive trade practices in the
24 course of business and occupation.

25 3628. In the course of their business, Toyota Sales USA and Toyota USA,
26 through their agents, employees, and/or subsidiaries, violated the Nevada DTPA by
27 knowingly and intentionally misrepresenting, omitting, concealing, and/or failing to
28 disclose material facts regarding the reliability, safety, and performance of the

1 Toyota Class Vehicles, the safety of their Occupant Restraint Systems, and the
2 ACU Defect, as detailed above.

3 3629. Toyota Sales USA and Toyota USA had an ongoing duty to the
4 Nevada Plaintiff and Nevada State Class members to refrain from unfair or
5 deceptive practices under the Nevada DTPA in the course of their business.
6 Specifically, Toyota Sales USA and Toyota USA owed the Nevada Plaintiff and
7 Nevada State Class members a duty to disclose all the material facts concerning the
8 ACU Defect in the Toyota Class Vehicles because they possessed exclusive
9 knowledge, they intentionally concealed the ACU Defect from the Toyota Plaintiff
10 and Toyota State Class members, and/or they made misrepresentations that were
11 rendered misleading because they were contradicted by withheld facts.

12 3630. By misrepresenting the Toyota Class Vehicles as safe and reliable and
13 the defective ACU and ASICs installed in them as properly-functioning and free
14 from defects, and by failing to disclose and actively concealing the dangers and risk
15 posed by the ACU Defect to both consumers and NHTSA, Toyota Sales USA and
16 Toyota USA engaged in one or more of the following unfair or deceptive business
17 practices prohibited by Nev. Rev. Stat. §§ 598.0915, 598.0923, and 598.0925:

- 18 a. Representing that the Toyota Class Vehicles and/or the defective
19 ACU and ASICs installed in them have certifications which they
20 do not have;
- 21 b. Representing that the Toyota Class Vehicles and/or the defective
22 ACU and ASICs installed in them have characteristics, uses,
23 benefits, and qualities which they do not have;
- 24 c. Representing that the Toyota Class Vehicles and/or the defective
25 ACU and ASICs installed in them are of a particular standard,
26 quality, and grade when they are not;

27
28

- 1 d. Advertising the Toyota Class Vehicles and/or the defective ACU
- 2 and ASICs installed in them with the intent not to sell or lease
- 3 them as advertised;
- 4 e. Failing to disclose the defective ACU and ASICs in connection
- 5 with the sale of the Toyota Class Vehicles; and
- 6 f. Making an assertion of scientific fact in an advertisement which
- 7 would cause a reasonable person to believe that the assertion is
- 8 true.

9 Nev. Rev. Stat. §§ 598.0915(5), (7), (9), (15), 598.0923(2), and 598.0925.
10 3631. Toyota Sales USA’s and Toyota USA’s unfair and deceptive acts or
11 practices, including their misrepresentations, concealments, omissions, and
12 suppressions of material facts, were designed to mislead and had a tendency or
13 capacity to mislead and create a false impression in consumers that the Toyota
14 Class Vehicles had properly-functioning and reliable airbags and seatbelts, and that
15 the Occupant Restraint System did not contain the ACU Defect and would perform
16 its intended function of activating the seatbelts and airbags during a collision.
17 Indeed, those misrepresentations, concealments, omissions, and suppressions of
18 material facts did in fact deceive reasonable consumers, including the Nevada
19 Plaintiff and Nevada State Class members, about the true safety and reliability of
20 Toyota Class Vehicles and/or the defective ACUs and ASICs installed in them, the
21 quality of the Toyota Class Vehicles, and the true value of the Toyota Class
22 Vehicles.

23 3632. Toyota Sales USA’s and Toyota USA’s misrepresentations,
24 concealments, omissions, and suppressions of material facts regarding the ACU
25 Defect and true characteristics of the Occupant Restraint Systems in the Toyota
26 Class Vehicles were material to the decisions of the Nevada Plaintiff and Nevada
27 State Class members to purchase and lease those vehicles, as Toyota Sales USA
28 and Toyota USA intended. The Nevada Plaintiff and Nevada State Class members

1 were exposed to those misrepresentations, concealments, omissions, and
2 suppressions of material facts, and relied on Toyota Sales USA's and Toyota
3 USA's misrepresentations that the Toyota Class Vehicles and their Occupant
4 Restraint Systems were safe and reliable in deciding to purchase and lease Toyota
5 Class Vehicles. Plaintiffs allege the information they relied upon in Section II.B
6 above. To aid review of this information, Exhibit 19 provides paragraph numbers
7 for each Plaintiff.

8 3633. The Nevada Plaintiff's and Nevada State Class members' reliance was
9 reasonable, as they had no way of discerning that Toyota Sales USA's and Toyota
10 USA's representations were false and misleading, or otherwise learning the facts
11 that Toyota Sales USA and Toyota USA had concealed or failed to disclose. The
12 Nevada Plaintiff and Nevada State Class members did not, and could not, unravel
13 Toyota Sales USA's and Toyota USA's deception on their own.

14 3634. Had the Nevada Plaintiff and Nevada State Class members known the
15 truth about the ACU Defect, the Nevada Plaintiff and Nevada State Class members
16 would not have purchased or leased Toyota Class Vehicles, or would have paid
17 significantly less for them.

18 3635. The Nevada Plaintiff and Nevada State Class members suffered
19 ascertainable losses and actual damages through their overpayment at the time of
20 purchase and lease for Toyota Class Vehicles with an undisclosed safety defect as a
21 direct and proximate result of Toyota Sales USA's and Toyota USA's concealment,
22 misrepresentations, and/or failure to disclose material information.

23 3636. Toyota Sales USA's and Toyota USA's violations present a continuing
24 risk to the Nevada Plaintiff and Nevada State Class members, as well as to the
25 general public, because the Class Vehicles remain unsafe due to the defective
26 ACUs and ASICs therein. Additionally, their unlawful acts and practices
27 complained of herein affect the public interest.
28

1 3637. Pursuant to Nev. Rev. Stat. §§ 41.600, the Nevada Plaintiff and
2 Nevada State Class members seek an order enjoining Toyota Sales USA’s and
3 Toyota USA’s unfair or deceptive acts or practices and awarding damages and any
4 other just and proper relief available under the Nevada DTPA.

5 **d. Nevada Count 4: Violation of the Nevada Deceptive Trade**
6 **Practices Act (Nev. Rev. Stat. § 598.0903, et seq.) Against ZF**
7 **Electronics USA, ZF Passive Safety USA, ZF Automotive**
8 **USA, ZF TRW Corp., ZF Germany, ST Italy, ST USA, and**
9 **ST Malaysia.**

10 3638. Plaintiffs reallege and incorporate by reference all preceding
11 allegations as though fully set forth herein.

12 3639. The Nevada Plaintiff brings this count individually and on behalf of
13 members of the Nevada State Class against ZF Electronics USA, ZF Passive Safety
14 USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively, the
15 “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the “ST
16 Defendants”).

17 3640. The Nevada Deceptive Trade Practices Act (“Nevada DTPA”), Nev.
18 Rev. Stat. § 598.0903, et. seq. prohibits the use of deceptive trade practices in the
19 course of business and occupation.

20 3641. The ZF and ST Defendants had an ongoing duty to the Nevada
21 Plaintiff and Nevada State Class members to refrain from unfair or deceptive
22 practices under the Nevada DTPA in the course of their business. Specifically, the
23 ZF and ST Defendants owed the Nevada Plaintiff and Nevada State Class members
24 a duty to disclose all the material facts concerning the ACU Defect in the Class
25 Vehicles because they possessed exclusive knowledge and they intentionally
26 concealed the ACU Defect from the Nevada Plaintiff and Nevada State Class
27 members.

28 3642. In the course of their business, the ZF and ST Defendants, through
their agents, employees, and/or subsidiaries, violated the Nevada DTPA by
knowingly and intentionally omitting, concealing, and failing to disclose material

1 facts regarding the existence, nature, and scope of the defective ACU and ASIC
2 installed in the Class Vehicles, as detailed above.

3 3643. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
4 Automotive USA, through their agents, employees, and/or subsidiaries, violated the
5 Nevada DTPA when they knowingly and intentionally misrepresented the Class
6 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
7 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
8 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
9 Manufacturer Defendants on the design and inclusion of the airbag readiness
10 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
11 Members that the Occupant Restraint Systems in the Class Vehicles would function
12 properly in a crash.

13 3644. By misrepresenting, failing to disclose, and actively concealing the
14 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
15 ST Defendants engaged in deceptive acts or practices prohibited by the Nevada
16 DTPA.

17 3645. The ZF and ST Defendants' unfair or deceptive acts or practices,
18 including their misrepresentations, concealments, omissions, and suppressions of
19 material facts, were designed to mislead and had a tendency or capacity to mislead
20 and create a false impression in consumers that the Class Vehicles had properly-
21 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
22 System did not contain the ACU Defect and would perform its intended function of
23 activating the seatbelts and airbags during a collision. Indeed, those
24 misrepresentations, concealments, omissions, and suppressions of material facts did
25 in fact deceive reasonable consumers, including the Nevada Plaintiff and Nevada
26 State Class members, about the true safety and reliability of Class Vehicles and/or
27 the defective ACUs and ASICs installed in them, the quality of the Class Vehicles,
28 and the true value of the Class Vehicles.

1 3646. The Nevada Plaintiff and Nevada State Class members justifiably
2 relied on the ZF and ST Defendants' misrepresentations, omissions, and
3 concealment, as they had no way of discerning that the Class Vehicles contained
4 the ACU Defect, as alleged above. The Nevada Plaintiff and Nevada State Class
5 members did not, and could not, unravel the ZF and ST Defendants' deception on
6 their own

7 3647. The ZF and ST Defendants' misrepresentations and concealment of the
8 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
9 Vehicles were material to the decisions of the Nevada Plaintiff and Nevada State
10 Class members to purchase and lease Class Vehicles, as the ZF and ST Defendants
11 intended. Had they known the truth, the Nevada Plaintiff and Nevada State Class
12 members would not have purchased or leased the Class Vehicles, or would have
13 paid significantly less for them.

14 3648. The Nevada Plaintiff and Nevada State Class members suffered
15 ascertainable losses and actual damages as a direct and proximate result of the ZF
16 and ST Defendants' misrepresentations, concealment and/or failure to disclose
17 material information.

18 3649. The ZF and ST Defendants' violations present a continuing risk to the
19 Nevada Plaintiff and Nevada State Class members, as well as to the general public,
20 because the Class Vehicles remain unsafe due to the defective ACUs and ASICs
21 therein. The ZF and ST Defendants' unlawful acts and practices complained of
22 herein affect the public interest.

23 3650. Pursuant to Nev. Rev. Stat. §§ 41.600, the Nevada Plaintiff and
24 Nevada State Class members seek an order enjoining the ZF and ST Defendants'
25 unfair or deceptive acts or practices and awarding damages and any other just and
26 proper relief available under the Nevada DTPA.

27
28

1 **e. Nevada Count 5: Fraud by Omission and Concealment**
2 **Against Toyota Sales USA and Toyota USA**

3 3651. Plaintiffs reallege and incorporate by reference all preceding
4 allegations as though fully set forth herein.

5 3652. The Nevada Plaintiff brings this count individually and on behalf of
6 members of the Nevada State Class who purchased or leased Toyota Class
7 Vehicles, against Toyota Sales USA and Toyota USA.

8 3653. Toyota Sales USA and Toyota USA are liable for both fraudulent
9 concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-
10 51 (1977).

11 3654. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
12 serious risks to vehicle occupants, including that it can cause: (1) airbags and
13 seatbelts not to activate during a crash because crashes can sometimes release
14 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
15 vehicle has not crashed, which is dangerous because it is shocking and difficult for
16 the driver to operate a vehicle when the airbag deploys without warning; and (3)
17 failures of other important post-crash operations of the safety system, such as
18 unlocking doors to facilitate escape or extraction of drivers and passengers by
19 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

20 3655. Toyota Sales USA and Toyota USA had a duty to disclose the ACU
21 Defect to the Nevada Plaintiff and Nevada State Class members because:

- 22 a. Toyota Sales USA and Toyota USA had exclusive access to and
23 far superior knowledge about technical facts regarding the ACU
24 Defect;
- 25 b. Given the ACU Defect’s hidden and technical nature, the
26 Nevada Plaintiff and Nevada State Class members lack the
27 sophisticated expertise in vehicle components and electrical
28

1 phenomena that would be necessary to discover the ACU Defect
2 on their own;

3 c. Toyota Sales USA and Toyota USA knew that the ACU Defect
4 gave rise to serious safety concerns for the consumers who use
5 the vehicles, and the Toyota Class Vehicles containing the ACU
6 Defect would have been a material fact to the Nevada Plaintiff's
7 and Nevada State Class members' decisions to buy or lease
8 Toyota Class Vehicles; and

9 d. Toyota Sales USA and Toyota USA made incomplete
10 representations about the safety and reliability of the Toyota
11 Class Vehicles and their Occupant Restraint System, while
12 purposefully withholding material facts about a known safety
13 defect. In uniform advertising and materials provided with each
14 Class Vehicle, Toyota Sales USA and Toyota USA intentionally
15 concealed, suppressed, and failed to disclose to the Nevada
16 Plaintiff and Nevada State Class members that the Toyota Class
17 Vehicles contained the ACU Defect. Because they volunteered
18 to provide information about the Toyota Class Vehicles that they
19 marketed and offered for sale and lease to the Nevada Plaintiff
20 and Nevada State Class members, Toyota Sales USA and
21 Toyota USA had the duty to disclose the whole truth.

22 3656. In breach of their duties, Toyota Sales USA and Toyota USA failed to
23 disclose that the Toyota Class Vehicles were not safe and reliable, and that their
24 Occupant Restraint Systems, including their airbags and seatbelt pretensioners
25 could fail in the event of a crash due to the ACU Defect.

26 3657. Toyota Sales USA and Toyota USA intended for the Nevada Plaintiff
27 and Nevada State Class members to rely on their omissions—which they did by
28 purchasing and leasing the Toyota Class Vehicles at the prices they paid believing

1 that the Occupant Restraint Systems in their Class Vehicles would function
2 properly.

3 3658. That reliance was reasonable, because a reasonable consumer would
4 not have expected that the Toyota Class Vehicles contained a safety defect that
5 poses such a serious risk. Toyota Sales USA and Toyota USA knew that reasonable
6 consumers expect that their vehicle has working airbags and seatbelt pretensioners
7 and would rely on those facts in deciding whether to purchase, lease, or retain a
8 new or used motor vehicle. Whether a manufacturer's products are safe and
9 reliable, and whether that manufacturer stands behind its products, are material
10 concerns to a consumer. Especially here when at least nine people have already
11 died due to the ACU Defect, and many more have been injured.

12 3659. Additionally, Toyota Sales USA and Toyota USA ensured that the
13 Nevada Plaintiff and Nevada State Class members did not discover this information
14 by actively concealing and misrepresenting the true nature of the Toyota Class
15 Vehicles' Occupant Restraint Systems to consumers and NHTSA.

16 3660. Toyota Sales USA and Toyota USA actively concealed and suppressed
17 these material facts, in whole or in part, to maintain a market for their Class
18 Vehicles, to protect profits, and to avoid costly recalls that would expose them to
19 liability for those expenses and harm the commercial reputations of Defendants and
20 their products. They did so at the expense of the Nevada Plaintiff and Nevada State
21 Class members.

22 3661. To this day, Toyota Sales USA and Toyota USA have not fully and
23 adequately disclosed the ACU Defect, and they continue to conceal material
24 information about the defect from consumers and NHTSA. The omitted and
25 concealed facts were material because a reasonable person would find them
26 important in purchasing, leasing, or retaining a new or used motor vehicle, and
27 because they directly impact the value of the Toyota Class Vehicles purchased or
28 leased by the Nevada Plaintiff and Nevada State Class members.

1 3662. Had they been aware of the ACU Defect in the Toyota Class Vehicles,
2 and Toyota Sales USA's and Toyota USA's callous disregard for safety, the
3 Nevada Plaintiff and Nevada State Class members either would not have paid as
4 much as they did for their Class Vehicles, or they would not have purchased or
5 leased them.

6 3663. As alleged in Section V above, if Toyota Sales USA and Toyota USA
7 had fully and adequately disclosed the ACU Defect to consumers and NHTSA, the
8 Nevada Plaintiff and Nevada State Class members would have seen such a
9 disclosure.

10 3664. Accordingly, Toyota Sales USA and Toyota USA are liable to the
11 Nevada Plaintiff and Nevada State Class members for their damages in an amount
12 to be proven at trial, including, but not limited to, their lost overpayment for the
13 Toyota Class Vehicles at the time of purchase or lease.

14 3665. Toyota Sales USA's and Toyota USA's acts were done maliciously,
15 oppressively, deliberately, with intent to defraud; in reckless disregard of the
16 Nevada Plaintiff's and Nevada State Class members' rights and well-being; and to
17 enrich themselves. Toyota Sales USA's and Toyota USA's misconduct warrants an
18 assessment of punitive damages, as permitted by law, in an amount sufficient to
19 deter such conduct in the future, which amount shall be determined according to
20 proof at trial.

21 **f. Nevada Count 6: Fraud by Omission and Concealment**
22 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
23 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
24 **ST USA, and ST Malaysia**

25 3666. Plaintiffs reallege and incorporate by reference all preceding
26 allegations as though fully set forth herein.

27 3667. The Nevada Plaintiff brings this count individually and on behalf of
28 members of the Nevada State Class who purchased or leased Class Vehicles,
against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF

1 TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST
2 Malaysia, and ST USA (collectively, the “ST Defendants”).

3 3668. The ZF and ST Defendants are liable for both fraudulent concealment
4 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

5 3669. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
6 serious risks to vehicle occupants, including that it can cause: (1) airbags and
7 seatbelts not to activate during a crash because crashes can sometimes release
8 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
9 vehicle has not crashed, which is dangerous because it is shocking and difficult for
10 the driver to operate a vehicle when the airbag deploys without warning; and (3)
11 failures of other important post-crash operations of the safety system, such as
12 unlocking doors to facilitate escape or extraction of drivers and passengers by
13 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

14 3670. The ZF and ST Defendants had a duty to disclose the ACU Defect to
15 the Nevada Plaintiff and Nevada State Class members because:

- 16 a. The ZF and ST Defendants had exclusive access to and far
17 superior knowledge about technical facts regarding the ACU
18 Defect;
- 19 b. Given the ACU Defect’s hidden and technical nature, the
20 Nevada Plaintiff and Nevada State Class members lack the
21 sophisticated expertise in vehicle components and electrical
22 phenomena that would be necessary to discover the ACU Defect
23 on their own;
- 24 c. The ZF and ST Defendants knew that the ACU Defect gave rise
25 to serious safety concerns for the consumers who use the
26 vehicles, and the Class Vehicles containing the ACU Defect
27 would have been a material fact to the Nevada Plaintiff’s and
28

1 Nevada State Class members’ decisions to buy or lease Class
2 Vehicles; and

3 d. The ZF Defendants made incomplete representations about the
4 safety and reliability of the Class Vehicles and their Occupant
5 Restraint System, while purposefully withholding material facts
6 about a known safety defect, creating a duty to disclose the
7 whole truth. Specifically, ZF Electronics USA, ZF Passive
8 Safety USA, and ZF Automotive USA worked with the Vehicle
9 Manufacturer Defendants on the design and inclusion of the
10 airbag readiness indicators in the Class Vehicles, which falsely
11 assured Plaintiffs and Class Members that the Occupant
12 Restraint Systems in the Class Vehicles would function properly
13 in a crash.

14 3671. In breach of their duties, the ZF and ST Defendants failed to disclose
15 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
16 Systems, including their airbags and seatbelt pretensioners could fail in the event of
17 a crash due to the ACU Defect.

18 3672. The ZF and ST Defendants intended for the Nevada Plaintiff and
19 Nevada State Class members to rely on their omissions—which they did by
20 purchasing and leasing the Class Vehicles at the prices they paid believing that the
21 Occupant Restraint Systems in their Class Vehicles would function properly.

22 3673. That reliance was reasonable, because a reasonable consumer would
23 not have expected that the Class Vehicles contained a safety defect that poses such
24 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
25 that their vehicle has working airbags and seatbelt pretensioners and would rely on
26 those facts in deciding whether to purchase, lease, or retain a new or used motor
27 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
28 manufacturer stands behind its products, are material concerns to a consumer.

1 Especially here when at least nine people have already died due to the ACU Defect,
2 and many more have been injured.

3 3674. Additionally, the ZF and ST Defendants ensured that the Nevada
4 Plaintiff and Nevada State Class members did not discover this information by
5 actively concealing and misrepresenting the true nature of the Class Vehicles'
6 Occupant Restraint Systems to consumers and NHTSA.

7 3675. The ZF and ST Defendants actively concealed and suppressed these
8 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
9 protect profits, and to avoid costly recalls that would expose them to liability for
10 those expenses and harm the commercial reputations of Defendants and their
11 products. They did so at the expense of the Nevada Plaintiff and Nevada State Class
12 members.

13 3676. To this day, the ZF and ST Defendants have not fully and adequately
14 disclosed the ACU Defect, and they continue to conceal material information about
15 the defect from consumers and NHTSA. The omitted and concealed facts were
16 material because a reasonable person would find them important in purchasing,
17 leasing, or retaining a new or used motor vehicle, and because they directly impact
18 the value of the Class Vehicles purchased or leased by the Nevada Plaintiff and
19 Nevada State Class members.

20 3677. Had they been aware of the ACU Defect in the Class Vehicles, and the
21 ZF and ST Defendants' callous disregard for safety, the Nevada Plaintiff and
22 Nevada State Class members either would not have paid as much as they did for
23 their Class Vehicles, or they would not have purchased or leased them.

24 3678. As alleged in Section V above, if the ZF and ST Defendants had fully
25 and adequately disclosed the ACU Defect to consumers and NHTSA, the Nevada
26 Plaintiff and Nevada State Class members would have seen such a disclosure.

27 3679. Accordingly, the ZF and ST Defendants are liable to the Nevada
28 Plaintiff and Nevada State Class members for their damages in an amount to be

1 proven at trial, including, but not limited to, their lost overpayment for the Class
2 Vehicles at the time of purchase or lease.

3 3680. The ZF and ST Defendants' acts were done maliciously, oppressively,
4 deliberately, with intent to defraud; in reckless disregard of the Nevada Plaintiff's
5 and Nevada State Class members' rights and well-being; and to enrich themselves.
6 The ZF and ST Defendants' misconduct warrants an assessment of punitive
7 damages, as permitted by law, in an amount sufficient to deter such conduct in the
8 future, which amount shall be determined according to proof at trial.

9 **g. Nevada Count 7: Unjust Enrichment Against Toyota Sales**
10 **USA, Toyota USA, and Toyota Engineering USA**

11 3681. Plaintiffs reallege and incorporate by reference all allegations in
12 Sections I-V above as though fully set forth herein.

13 3682. The Nevada Plaintiff brings this count individually and on behalf of
14 members of the Nevada State Class who purchased or leased Toyota Class
15 Vehicles, against Toyota Sales USA, Toyota USA, and Toyota Engineering USA.

16 3683. The Nevada Plaintiff and Nevada State Class members conferred
17 tangible and material monetary benefits upon Toyota Sales USA, Toyota USA, and
18 Toyota Engineering USA when they purchased or leased the Toyota Class
19 Vehicles. Toyota Sales USA, Toyota USA, and Toyota Engineering USA readily
20 accepted and retained these benefits.

21 3684. The Nevada Plaintiff and Nevada State Class members would not have
22 purchased or leased the Toyota Class Vehicles, or would have paid less for them,
23 had they known of the ACU Defect at the time of purchase or lease. Therefore,
24 Toyota Sales USA, Toyota USA, and Toyota Engineering USA profited from the
25 sale and lease of the Toyota Class Vehicles to the detriment and expense of the
26 Nevada Plaintiff and Nevada State Class members.

27 3685. Toyota Sales USA, Toyota USA, and Toyota Engineering USA
28 appreciated these monetary benefits. These benefits were the expected result of

1 Toyota Sales USA's, Toyota USA's, and Toyota Engineering USA's acting in their
2 pecuniary interest at the expense of their customers. Toyota Sales USA, Toyota
3 USA, and Toyota Engineering USA knew of these benefits because they were
4 aware of the ACU Defect, yet they failed to disclose this knowledge and misled the
5 Nevada Plaintiff and Nevada State Class members regarding the nature and quality
6 of the Toyota Class Vehicles while profiting from this deception.

7 3686. It would be unjust, inequitable, and unconscionable for Toyota Sales
8 USA, Toyota USA, and Toyota Engineering USA to retain these monetary benefits,
9 including because they were procured as a result of Toyota Sales USA's, Toyota
10 USA's, and Toyota Engineering USA's wrongful conduct alleged above.

11 3687. The Nevada Plaintiff and Nevada State Class members are entitled to
12 restitution of the benefits Toyota Sales USA, Toyota USA, and Toyota Engineering
13 USA unjustly retained and/or any amounts necessary to return the Nevada Plaintiff
14 and Nevada State Class members to the position they occupied prior to dealing with
15 Toyota Sales USA, Toyota USA, and Toyota Engineering USA, with such amounts
16 to be determined at trial.

17 3688. The Nevada Plaintiff pleads this claim separately as well as in the
18 alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
19 Nevada Plaintiff's claims for damages are dismissed or judgment is entered in favor
20 of Defendants, the Nevada Plaintiff would have no adequate legal remedy.

21 **15. New Jersey**

22 **a. New Jersey Count 1: Breach of Implied Warranty of**
23 **Merchantability (N.J. Stat. Ann. §§ 12A:2-314 and 12A:2A-**
24 **212) Against Kia USA**

25 3689. Plaintiffs reallege and incorporate by reference all preceding
26 allegations as though fully set forth herein.

27 3690. Plaintiff Gersen Damens (hereinafter, "New Jersey Plaintiff") brings
28 this count individually and on behalf of members of the New Jersey State Class
who purchased or leased Kia Class Vehicles, against Kia USA.

1 3691. A warranty that the Kia Class Vehicles were in merchantable condition
2 and fit for the ordinary purpose for which such goods are used is implied by law
3 pursuant to N.J. Stat. Ann. §§ 12A:2-314 and 12A:2A-212.

4 3692. Kia USA is and was at all relevant times a “merchant” with respect to
5 motor vehicles under N.J. Stat. Ann. §§ 12A:2-104(1) and 12A:2A-103(3), and a
6 “seller” of motor vehicles under § 12A:2-103(1)(d).

7 3693. With respect to leases, Kia USA is and was at all relevant times a
8 “lessor” of motor vehicles under N.J. Stat. Ann. § 12A:2A-103(1)(p).

9 3694. All New Jersey State Class members who purchased Kia Class
10 Vehicles in New Jersey are “buyers” within the meaning of N.J. Stat. Ann.
11 § 12A:2-103(1)(a).

12 3695. All New Jersey State Class members who leased Kia Class Vehicles in
13 New Jersey are “lessees” within the meaning of N.J. Stat. Ann. § 12A:2A-
14 103(1)(n).

15 3696. The Kia Class Vehicles are and were at all relevant times “goods”
16 within the meaning of N.J. Stat. Ann. §§ 12A:2-105(1) and 2A-103(1)(h).

17 3697. The Kia Class Vehicles did not comply with the implied warranty of
18 merchantability because, at the time of sale and lease and at all times thereafter,
19 they were defective and not in merchantable condition, would not pass without
20 objection in the trade, and were not fit for the ordinary purpose for which vehicles
21 were used. Specifically, at the time they were sold and leased, the Kia Class
22 Vehicles contained the ACU Defect, which may cause the airbags and seatbelt
23 pretensioners to fail to deploy during a crash, the failure to unlock doors
24 automatically after a crash, the failure to turn off a fuel supply or high-voltage
25 battery after a crash, or the airbags to inadvertently deploy, all of which render the
26 Kia Class Vehicles inherently defective and dangerous.

27 3698. The New Jersey Plaintiff and New Jersey State Class members have
28 provided Kia USA with reasonable notice and opportunity to cure the breaches of

1 its implied warranty by way of the numerous NHTSA complaints filed against it,
2 and individual notice letters sent by the New Jersey State Class members within a
3 reasonable amount of time after the ACU Defect became public. Additionally, on
4 April 24, 2020, a notice letter was sent on behalf of the New Jersey Plaintiff and
5 New Jersey State Class members to Kia USA.

6 3699. Alternatively, the New Jersey Plaintiff and New Jersey State Class
7 members were excused from providing Kia USA with notice and an opportunity to
8 cure the breach, because it would have been futile. As alleged above, Kia USA has
9 long known that the Kia Class Vehicles contained the ACU Defect, and that the
10 ACU Defect has caused ACUs and ASICs to malfunction in crashes involving
11 Class Vehicles; however, to date, Kia USA has not instituted a recall or any other
12 repair program with respect to the unrecalled Kia Class Vehicles, or even
13 acknowledged that the ACU Defect exists in all Kia Class Vehicles, including the
14 recalled Kia Class Vehicles—even though all of the Kia Class Vehicles are subject
15 to the NHTSA investigation. Therefore, the New Jersey Plaintiff and New Jersey
16 State Class members had no reason to believe that Kia USA would have repaired
17 the ACU Defect if the New Jersey Plaintiff and New Jersey State Class members
18 presented their Class Vehicles to it for repair.

19 3700. As a direct and proximate result of Kia USA’s breach of the implied
20 warranty of merchantability, the New Jersey Plaintiff and New Jersey State Class
21 members have been damaged through their overpayment at the time of purchase or
22 lease for Kia Class Vehicles with an undisclosed safety defect in an amount to be
23 proven at trial.

24 **b. New Jersey Count 2: Violation of New Jersey Consumer**
25 **Fraud Act (N.J. Stat. Ann. § 56:8-1, et seq.) Against Kia**
26 **Korea and Kia USA**

27 3701. Plaintiffs reallege and incorporate by reference all preceding
28 allegations as though fully set forth herein.

1 3702. The New Jersey Plaintiff brings this count individually and on behalf
2 of members of the New Jersey State Class who purchased or leased Kia Class
3 Vehicles, against Kia Korea and Kia USA.

4 3703. Kia Korea and Kia USA, the New Jersey Plaintiff, and New Jersey
5 State Class members are “persons” within the meaning of N.J. Stat. Ann. § 56:8-
6 1(d).

7 3704. The Kia Class Vehicles and the ACU and ASICs installed in them are
8 “merchandise” within the meaning of N.J. Stat. Ann. § 56:8-1(c).

9 3705. The New Jersey Consumer Fraud Act (“New Jersey CFA”) prohibits
10 unfair trade practices. N.J. Stat. Ann. § 56:8-2.

11 3706. In the course of their business, Kia Korea and Kia USA, through their
12 agents, employees, and/or subsidiaries, violated the New Jersey CFA by knowingly
13 and intentionally misrepresenting, omitting, concealing, and/or failing to disclose
14 material facts regarding the reliability, safety, and performance of the Kia Class
15 Vehicles, the safety of their Occupant Restraint Systems, and the ACU Defect, as
16 detailed above.

17 3707. Kia Korea and Kia USA had an ongoing duty to the New Jersey
18 Plaintiff and New Jersey State Class members to refrain from unfair or deceptive
19 practices under the New Jersey CFA in the course of their business. Specifically,
20 Kia Korea and Kia USA owed the New Jersey Plaintiff and New Jersey State Class
21 members a duty to disclose all the material facts concerning the ACU Defect in the
22 Kia Class Vehicles because they possessed exclusive knowledge, they intentionally
23 concealed the ACU Defect from the New Jersey Plaintiff and New Jersey State
24 Class members, and/or they made misrepresentations that were rendered misleading
25 because they were contradicted by withheld facts.

26 3708. By misrepresenting the Kia Class Vehicles as safe and reliable and the
27 defective ACU and ASICs installed in them as properly-functioning and free from
28 defects, and by failing to disclose and actively concealing the dangers and risk

1 posed by the ACU Defect to both consumers and NHTSA, Kia Korea and Kia USA
2 engaged in one or more of the following unfair or deceptive business practices
3 prohibited by N.J. Stat. Ann. § 56:8-2: using or employing deception, fraud, false
4 pretense, false promise or misrepresentation, or the concealment, suppression or
5 omission of a material fact with intent that others rely upon such concealment,
6 suppression or omission, in connection with the advertisement and sale/lease of the
7 Kia Class Vehicles.

8 3709. Kia Korea's and Kia USA's unfair and deceptive acts or practices,
9 including their misrepresentations, concealments, omissions, and suppressions of
10 material facts, were designed to mislead and had a tendency or capacity to mislead
11 and create a false impression in consumers that the Kia Class Vehicles had
12 properly-functioning and reliable airbags and seatbelts, and that the Occupant
13 Restraint System did not contain the ACU Defect and would perform its intended
14 function of activating the seatbelts and airbags during a collision. Indeed, those
15 misrepresentations, concealments, omissions, and suppressions of material facts did
16 in fact deceive reasonable consumers, including the New Jersey Plaintiff and New
17 Jersey State Class members, about the true safety and reliability of Kia Class
18 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
19 Kia Class Vehicles, and the true value of the Kia Class Vehicles.

20 3710. Kia Korea's and Kia USA's misrepresentations, concealments,
21 omissions, and suppressions of material facts regarding the ACU Defect and true
22 characteristics of the Occupant Restraint Systems in the Kia Class Vehicles were
23 material to the decisions of the New Jersey Plaintiff and New Jersey State Class
24 members to purchase and lease those vehicles, as Kia Korea and Kia USA intended.
25 The New Jersey Plaintiff and New Jersey State Class members were exposed to
26 those misrepresentations, concealments, omissions, and suppressions of material
27 facts, and relied on Kia Korea's and Kia USA's misrepresentations that the Kia
28 Class Vehicles and their Occupant Restraint Systems were safe and reliable in

1 deciding to purchase and lease Kia Class Vehicles. Plaintiffs allege the information
2 they relied upon in Section II.B above. To aid review of this information, Exhibit
3 19 provides paragraph numbers for each Plaintiff.

4 3711. The New Jersey Plaintiff's and New Jersey State Class members'
5 reliance was reasonable, as they had no way of discerning that Kia Korea's and Kia
6 USA's representations were false and misleading, or otherwise learning the facts
7 that Kia Korea and Kia USA had concealed or failed to disclose. The New Jersey
8 Plaintiff and New Jersey State Class members did not, and could not, unravel Kia
9 Korea's and Kia USA's deception on their own.

10 3712. Had the New Jersey Plaintiff and New Jersey State Class members
11 known the truth about the ACU Defect, the New Jersey Plaintiff and New Jersey
12 State Class members would not have purchased or leased Kia Class Vehicles, or
13 would have paid significantly less for them.

14 3713. The New Jersey Plaintiff and New Jersey State Class members
15 suffered ascertainable losses and actual damages through their overpayment at the
16 time of purchase and lease for Kia Class Vehicles with an undisclosed safety defect
17 as a direct and proximate result of Kia Korea's and Kia USA's concealment,
18 misrepresentations, and/or failure to disclose material information.

19 3714. Kia Korea's and Kia USA's violations present a continuing risk to the
20 New Jersey Plaintiff and New Jersey State Class members, as well as to the general
21 public, because the Class Vehicles remain unsafe due to the defective ACUs and
22 ASICs therein. Additionally, their unlawful acts and practices complained of herein
23 affect the public interest.

24 3715. Pursuant to N.J. Stat. Ann. § 56:8-19, the New Jersey Plaintiff and
25 New Jersey State Class members seek an order enjoining Kia Korea's and Kia
26 USA's unfair or deceptive acts or practices and awarding damages and any other
27 just and proper relief available under the New Jersey CFA.

28

1 c. **New Jersey Count 3: Violation of New Jersey Consumer**
2 **Fraud Act (N.J. Stat. Ann. § 56:8-1, et seq.) Against ZF**
3 **Electronics USA, ZF Passive Safety USA, ZF Automotive**
4 **USA, ZF TRW Corp., ZF Germany, ST Italy, ST USA, and**
5 **ST Malaysia.**

6 3716. Plaintiffs reallege and incorporate by reference all preceding
7 allegations as though fully set forth herein.

8 3717. The New Jersey Plaintiff brings this count individually and on behalf
9 of members of the New Jersey State Class against ZF Electronics USA, ZF Passive
10 Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively,
11 the “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the
12 “ST Defendants”).

13 3718. The ZF Defendants, the ST Defendants, the New Jersey Plaintiff, and
14 New Jersey State Class members are “persons” within the meaning of N.J. Stat.
15 Ann. § 56:8-1(d).

16 3719. The Class Vehicles and ACU and ASICs installed in them are
17 “merchandise” within the meaning of N.J. Stat. Ann. § 56:8-1(c).

18 3720. The New Jersey Consumer Fraud Act (“New Jersey CFA”) prohibits
19 unfair trade practices. N.J. Stat. Ann. § 56:8-2.

20 3721. The ZF and ST Defendants had an ongoing duty to the New Jersey
21 Plaintiff and New Jersey State Class members to refrain from unfair or deceptive
22 practices under the New Jersey CFA in the course of their business. Specifically,
23 the ZF and ST Defendants owed the New Jersey Plaintiff and New Jersey State
24 Class members a duty to disclose all the material facts concerning the ACU Defect
25 in the Class Vehicles because they possessed exclusive knowledge and they
26 intentionally concealed the ACU Defect from the New Jersey Plaintiff and New
27 Jersey State Class members.

28 3722. In the course of their business the ZF and ST Defendants, through their
agents, employees, and/or subsidiaries, violated the New Jersey CFA by knowingly
and intentionally omitting, concealing, and failing to disclose material facts

1 regarding the existence, nature, and scope of the ACU Defect in the Class Vehicles,
2 as detailed above.

3 3723. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
4 Automotive USA, through their agents, employees, and/or subsidiaries, violated the
5 New Jersey CFA when they knowingly and intentionally misrepresented the Class
6 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
7 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
8 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
9 Manufacturer Defendants on the design and inclusion of the airbag readiness
10 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
11 Members that the Occupant Restraint Systems in the Class Vehicles would function
12 properly in a crash.

13 3724. By misrepresenting, failing to disclose and actively concealing the
14 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
15 ST Defendants engaged in one or more of the unlawful practices prohibited by N.J.
16 Stat. Ann. § 56:8-2, including the act, use, or employment of any unconscionable
17 commercial practice, and/or concealment, suppression or omission of material facts.

18 3725. The ZF and ST Defendants' unfair or deceptive acts or practices,
19 including their misrepresentations, concealments, omissions, and suppressions of
20 material facts, were designed to mislead and had a tendency or capacity to mislead
21 and create a false impression in consumers that the Class Vehicles had properly-
22 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
23 System did not contain the ACU Defect and would perform its intended function of
24 activating the seatbelts and airbags during a collision. Indeed, those
25 misrepresentations, concealments, omissions, and suppressions of material facts did
26 in fact deceive reasonable consumers, including the New Jersey Plaintiff and New
27 Jersey State Class members, about the true safety and reliability of Class Vehicles
28

1 and/or the defective ACUs and ASICs installed in them, the quality of the Class
2 Vehicles, and the true value of the Class Vehicles.

3 3726. The New Jersey Plaintiff and New Jersey State Class members
4 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
5 concealment, as they had no way of discerning that the Class Vehicles contained
6 the ACU Defect, as alleged above. The New Jersey Plaintiff and New Jersey State
7 Class members did not, and could not, unravel the ZF and ST Defendants'
8 deception on their own.

9 3727. The ZF and ST Defendants' misrepresentations and concealment of the
10 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
11 Vehicles were material to the decisions of the New Jersey Plaintiff and New Jersey
12 State Class members to purchase and lease Class Vehicles, as the ZF and ST
13 Defendants intended. Had they known the truth, the New Jersey Plaintiff and New
14 Jersey State Class members would not have purchased or leased the Class Vehicles,
15 or would have paid significantly less for them.

16 3728. The New Jersey Plaintiff and New Jersey State Class members
17 suffered ascertainable losses and actual damages as a direct and proximate result of
18 the ZF and ST Defendants' misrepresentations, concealment and/or failure to
19 disclose material information.

20 3729. The ZF and ST Defendants' violations present a continuing risk to the
21 New Jersey Plaintiff and New Jersey State Class members, as well as to the general
22 public, because the Class Vehicles remain unsafe due to the defective ACUs and
23 ASICs therein. The ZF and ST Defendants' unlawful acts and practices complained
24 of herein affect the public interest.

25 3730. Pursuant to N.J. Stat Ann. § 56:8-19, the New Jersey Plaintiff and New
26 Jersey State Class members seek an order enjoining the ZF and ST Defendants'
27 unfair or deceptive acts or practices and awarding damages and any other just and
28 proper relief available under the New Jersey CFA.

d. New Jersey Count 4: Fraud by Omission and Concealment Against Kia Korea and Kia USA

3731. Plaintiffs reallege and incorporate by reference all preceding allegations as though fully set forth herein.

3732. The New Jersey Plaintiff brings this count individually and on behalf of members of the New Jersey State Class who purchased or leased Kia Class Vehicles, against Kia Korea and Kia USA.

3733. Kia Korea and Kia USA are liable for both fraudulent concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

3734. As explained in Section IV.A, the ACU Defect in Class Vehicles poses serious risks to vehicle occupants, including that it can cause: (1) airbags and seatbelts not to activate during a crash because crashes can sometimes release electrical transients, which cause the ACU to fail; (2) airbags to deploy when the vehicle has not crashed, which is dangerous because it is shocking and difficult for the driver to operate a vehicle when the airbag deploys without warning; and (3) failures of other important post-crash operations of the safety system, such as unlocking doors to facilitate escape or extraction of drivers and passengers by emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

3735. Kia Korea and Kia USA had a duty to disclose the ACU Defect to the New Jersey Plaintiff and New Jersey State Class members because:

- a. Kia Korea and Kia USA had exclusive access to and far superior knowledge about technical facts regarding the ACU Defect;
- b. Given the ACU Defect’s hidden and technical nature, the New Jersey Plaintiff and New Jersey State Class members lack the sophisticated expertise in vehicle components and electrical phenomena that would be necessary to discover the ACU Defect on their own;

1 c. Kia Korea and Kia USA knew that the ACU Defect gave rise to
2 serious safety concerns for the consumers who use the vehicles,
3 and the Kia Class Vehicles containing the ACU Defect would
4 have been a material fact to the New Jersey Plaintiff's and New
5 Jersey State Class members' decisions to buy or lease Kia Class
6 Vehicles; and

7 d. Kia Korea and Kia USA made incomplete representations about
8 the safety and reliability of the Kia Class Vehicles and their
9 Occupant Restraint System, while purposefully withholding
10 material facts about a known safety defect. In uniform
11 advertising and materials provided with each Class Vehicle, Kia
12 Korea, and Kia USA intentionally concealed, suppressed, and
13 failed to disclose to the New Jersey Plaintiff and New Jersey
14 State Class members that the Kia Class Vehicles contained the
15 ACU Defect. Because they volunteered to provide information
16 about the Kia Class Vehicles that they marketed and offered for
17 sale and lease to the New Jersey Plaintiff and New Jersey State
18 Class members, Kia Korea and Kia USA had the duty to
19 disclose the whole truth.

20 3736. In breach of their duties, Kia Korea and Kia USA failed to disclose
21 that the Kia Class Vehicles were not safe and reliable, and that their Occupant
22 Restraint Systems, including their airbags and seatbelt pretensioners could fail in
23 the event of a crash due to the ACU Defect.

24 3737. Kia Korea and Kia USA intended for the New Jersey Plaintiff and
25 New Jersey State Class members to rely on their omissions—which they did by
26 purchasing and leasing the Kia Class Vehicles at the prices they paid believing that
27 the Occupant Restraint Systems in their Class Vehicles would function properly.
28

1 3738. That reliance was reasonable, because a reasonable consumer would
2 not have expected that the Kia Class Vehicles contained a safety defect that poses
3 such a serious risk. Kia Korea and Kia USA knew that reasonable consumers
4 expect that their vehicle has working airbags and seatbelt pretensioners and would
5 rely on those facts in deciding whether to purchase, lease, or retain a new or used
6 motor vehicle. Whether a manufacturer's products are safe and reliable, and
7 whether that manufacturer stands behind its products, are material concerns to a
8 consumer. Especially here when at least nine people have already died due to the
9 ACU Defect, and many more have been injured.

10 3739. Additionally, Kia Korea and Kia USA ensured that the New Jersey
11 Plaintiff and New Jersey State Class members did not discover this information by
12 actively concealing and misrepresenting the true nature of the Kia Class Vehicles'
13 Occupant Restraint Systems to consumers and NHTSA.

14 3740. Kia Korea and Kia USA actively concealed and suppressed these
15 material facts, in whole or in part, to maintain a market for their Class Vehicles, to
16 protect profits, and to avoid costly recalls that would expose them to liability for
17 those expenses and harm the commercial reputations of Defendants and their
18 products. They did so at the expense of the New Jersey Plaintiff and New Jersey
19 State Class members.

20 3741. To this day, Kia Korea and Kia USA have not fully and adequately
21 disclosed the ACU Defect, and they continue to conceal material information about
22 the defect from consumers and NHTSA. The omitted and concealed facts were
23 material because a reasonable person would find them important in purchasing,
24 leasing, or retaining a new or used motor vehicle, and because they directly impact
25 the value of the Kia Class Vehicles purchased or leased by the New Jersey Plaintiff
26 and New Jersey State Class members.

27 3742. Had they been aware of the ACU Defect in the Kia Class Vehicles,
28 and Kia Korea's and Kia USA's callous disregard for safety, the New Jersey

1 Plaintiff and New Jersey State Class members either would not have paid as much
2 as they did for their Class Vehicles, or they would not have purchased or leased
3 them.

4 3743. As alleged in Section V above, if Kia Korea and Kia USA had fully
5 and adequately disclosed the ACU Defect to consumers and NHTSA, the New
6 Jersey Plaintiff and New Jersey State Class members would have seen such a
7 disclosure.

8 3744. Accordingly, Kia Korea and Kia USA are liable to the New Jersey
9 Plaintiff and New Jersey State Class members for their damages in an amount to be
10 proven at trial, including, but not limited to, their lost overpayment for the Kia
11 Class Vehicles at the time of purchase or lease.

12 3745. Kia Korea's and Kia USA's acts were done maliciously, oppressively,
13 deliberately, with intent to defraud; in reckless disregard of the New Jersey
14 Plaintiff's and New Jersey State Class members' rights and well-being; and to
15 enrich themselves. Kia Korea's and Kia USA's misconduct warrants an assessment
16 of punitive damages, as permitted by law, in an amount sufficient to deter such
17 conduct in the future, which amount shall be determined according to proof at trial.

18 e. **New Jersey Count 5: Fraud by Omission and Concealment**
19 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
20 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
ST USA, and ST Malaysia

21 3746. Plaintiffs reallege and incorporate by reference all preceding
22 allegations as though fully set forth herein.

23 3747. The New Jersey Plaintiff brings this count individually and on behalf
24 of members of the New Jersey State Class who purchased or leased Class Vehicles,
25 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
26 TRW Corp., and ZF Germany (collectively, the "ZF Defendants"), and ST Italy, ST
27 Malaysia, and ST USA (collectively, the "ST Defendants").
28

1 3748. The ZF and ST Defendants are liable for both fraudulent concealment
2 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

3 3749. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
4 serious risks to vehicle occupants, including that it can cause: (1) airbags and
5 seatbelts not to activate during a crash because crashes can sometimes release
6 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
7 vehicle has not crashed, which is dangerous because it is shocking and difficult for
8 the driver to operate a vehicle when the airbag deploys without warning; and (3)
9 failures of other important post-crash operations of the safety system, such as
10 unlocking doors to facilitate escape or extraction of drivers and passengers by
11 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

12 3750. The ZF and ST Defendants had a duty to disclose the ACU Defect to
13 the New Jersey Plaintiff and New Jersey State Class members because:

- 14 a. The ZF and ST Defendants had exclusive access to and far
15 superior knowledge about technical facts regarding the ACU
16 Defect;
- 17 b. Given the ACU Defect’s hidden and technical nature, the New
18 Jersey Plaintiff and New Jersey State Class members lack the
19 sophisticated expertise in vehicle components and electrical
20 phenomena that would be necessary to discover the ACU Defect
21 on their own;
- 22 c. The ZF and ST Defendants knew that the ACU Defect gave rise
23 to serious safety concerns for the consumers who use the
24 vehicles, and the Class Vehicles containing the ACU Defect
25 would have been a material fact to the New Jersey Plaintiff’s
26 and New Jersey State Class members’ decisions to buy or lease
27 Class Vehicles; and

28

1 d. The ZF Defendants made incomplete representations about the
2 safety and reliability of the Class Vehicles and their Occupant
3 Restraint System, while purposefully withholding material facts
4 about a known safety defect, creating a duty to disclose the
5 whole truth. Specifically, ZF Electronics USA, ZF Passive
6 Safety USA, and ZF Automotive USA worked with the Vehicle
7 Manufacturer Defendants on the design and inclusion of the
8 airbag readiness indicators in the Class Vehicles, which falsely
9 assured Plaintiffs and Class Members that the Occupant
10 Restraint Systems in the Class Vehicles would function properly
11 in a crash.

12 3751. In breach of their duties, the ZF and ST Defendants failed to disclose
13 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
14 Systems, including their airbags and seatbelt pretensioners could fail in the event of
15 a crash due to the ACU Defect.

16 3752. The ZF and ST Defendants intended for the New Jersey Plaintiff and
17 New Jersey State Class members to rely on their omissions—which they did by
18 purchasing and leasing the Class Vehicles at the prices they paid believing that the
19 Occupant Restraint Systems in their Class Vehicles would function properly.

20 3753. That reliance was reasonable, because a reasonable consumer would
21 not have expected that the Class Vehicles contained a safety defect that poses such
22 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
23 that their vehicle has working airbags and seatbelt pretensioners and would rely on
24 those facts in deciding whether to purchase, lease, or retain a new or used motor
25 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
26 manufacturer stands behind its products, are material concerns to a consumer.
27 Especially here when at least nine people have already died due to the ACU Defect,
28 and many more have been injured.

1 3754. Additionally, the ZF and ST Defendants ensured that the New Jersey
2 Plaintiff and New Jersey State Class members did not discover this information by
3 actively concealing and misrepresenting the true nature of the Class Vehicles’
4 Occupant Restraint Systems to consumers and NHTSA.

5 3755. The ZF and ST Defendants actively concealed and suppressed these
6 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
7 protect profits, and to avoid costly recalls that would expose them to liability for
8 those expenses and harm the commercial reputations of Defendants and their
9 products. They did so at the expense of the New Jersey Plaintiff and New Jersey
10 State Class members.

11 3756. To this day, the ZF and ST Defendants have not fully and adequately
12 disclosed the ACU Defect, and they continue to conceal material information about
13 the defect from consumers and NHTSA. The omitted and concealed facts were
14 material because a reasonable person would find them important in purchasing,
15 leasing, or retaining a new or used motor vehicle, and because they directly impact
16 the value of the Class Vehicles purchased or leased by the New Jersey Plaintiff and
17 New Jersey State Class members.

18 3757. Had they been aware of the ACU Defect in the Class Vehicles, and the
19 ZF and ST Defendants’ callous disregard for safety, the New Jersey Plaintiff and
20 New Jersey State Class members either would not have paid as much as they did
21 for their Class Vehicles, or they would not have purchased or leased them.

22 3758. As alleged in Section V above, if the ZF and ST Defendants had fully
23 and adequately disclosed the ACU Defect to consumers and NHTSA, the New
24 Jersey Plaintiff and New Jersey State Class members would have seen such a
25 disclosure.

26 3759. Accordingly, the ZF and ST Defendants are liable to the New Jersey
27 Plaintiff and New Jersey State Class members for their damages in an amount to be
28

1 proven at trial, including, but not limited to, their lost overpayment for the Class
2 Vehicles at the time of purchase or lease.

3 3760. The ZF and ST Defendants' acts were done maliciously, oppressively,
4 deliberately, with intent to defraud; in reckless disregard of the New Jersey
5 Plaintiff's and New Jersey State Class members' rights and well-being; and to
6 enrich themselves. The ZF and ST Defendants' misconduct warrants an assessment
7 of punitive damages, as permitted by law, in an amount sufficient to deter such
8 conduct in the future, which amount shall be determined according to proof at trial.

9 **f. New Jersey Count 6: Unjust Enrichment Against Kia Korea**
10 **and Kia USA**

11 3761. Plaintiffs reallege and incorporate by reference all allegations in
12 Sections I-VI above as though fully set forth herein.

13 3762. The New Jersey Plaintiff brings this count individually and on behalf
14 of members of the New Jersey State Class who purchased or leased Kia Class
15 Vehicles, against Kia Korea and Kia USA.

16 3763. The New Jersey Plaintiff and New Jersey State Class members
17 conferred tangible and material monetary benefits upon Kia Korea and Kia USA
18 when they purchased or leased the Kia Class Vehicles. Kia Korea and Kia USA
19 readily accepted and retained these benefits.

20 3764. The New Jersey Plaintiff and New Jersey State Class members would
21 not have purchased or leased the Kia Class Vehicles, or would have paid less for
22 them, had they known of the ACU Defect at the time of purchase or lease.
23 Therefore, Kia Korea and Kia USA profited from the sale and lease of the Kia
24 Class Vehicles to the detriment and expense of the New Jersey Plaintiff and New
25 Jersey State Class members.

26 3765. Kia Korea and Kia USA appreciated these monetary benefits. These
27 benefits were the expected result of Kia Korea and Kia USA acting in their
28 pecuniary interest at the expense of their customers. Kia Korea and Kia USA knew

1 of these benefits because they were aware of the ACU Defect, yet they failed to
2 disclose this knowledge and misled the New Jersey Plaintiff and New Jersey State
3 Class members regarding the nature and quality of the Kia Class Vehicles while
4 profiting from this deception.

5 3766. It would be unjust, inequitable, and unconscionable for Kia Korea and
6 Kia USA to retain these monetary benefits, including because they were procured
7 as a result of Kia Korea's and Kia USA's wrongful conduct alleged above.

8 3767. The New Jersey Plaintiff and New Jersey State Class members are
9 entitled to restitution of the benefits Kia Korea and Kia USA unjustly retained
10 and/or any amounts necessary to return the New Jersey Plaintiff and New Jersey
11 State Class members to the position they occupied prior to dealing with Kia Korea
12 and Kia USA, with such amounts to be determined at trial.

13 3768. The New Jersey Plaintiff pleads this claim separately as well as in the
14 alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
15 New Jersey Plaintiff's claims for damages are dismissed or judgment is entered in
16 favor of Defendants, the New Jersey Plaintiff would have no adequate legal
17 remedy.

18 **16. New York**

19 **a. New York Count 1: Violation of New York General Business**
20 **Law § 349 (N.Y. Gen. Bus. Law § 349) Against FCA, Honda**
21 **Japan, Honda USA, and Honda Engineering USA**

22 3769. Plaintiffs reallege and incorporate by reference all preceding
23 allegations as though fully set forth herein.

24 3770. Plaintiff Eric Fishon brings this count individually and on behalf of
25 members of the New York State Class who purchased or leased FCA Class
26 Vehicles, against FCA.

27 3771. Plaintiff Ravichandran Namakkal bring this count individually and on
28 behalf of members of the New York State Class who purchased or leased Honda
Class Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

1 3772. For purposes of this count, Plaintiffs Fishon and Namakkal shall be
2 referred to as the “New York Plaintiffs.”

3 3773. The New York Plaintiffs and New York State Class members are
4 “persons” within the meaning of N.Y. Gen. Bus. Law § 349(h).

5 3774. FCA, Honda Japan, Honda USA, and Honda Engineering USA are
6 each a “person,” “firm,” “corporation,” or “association” within the meaning of N.Y.
7 Gen. Bus. Law § 349.

8 3775. The New York Deceptive Acts and Practices Act (“New York
9 DAPA”) prohibits “[d]eceptive acts or practices in the conduct of any business,
10 trade or commerce[.]” N.Y. Gen. Bus. Law. § 349.

11 3776. In the course of their business, FCA, Honda Japan, Honda USA, and
12 Honda Engineering USA, through their agents, employees, and/or subsidiaries,
13 violated the New York DAPA by knowingly and intentionally misrepresenting,
14 omitting, concealing, and/or failing to disclose material facts regarding the
15 reliability, safety, and performance of the FCA and Honda Class Vehicles, the
16 safety of their Occupant Restraint Systems, and the ACU Defect, as detailed above.

17 3777. FCA, Honda Japan, Honda USA, and Honda Engineering USA had an
18 ongoing duty to the New York Plaintiffs and New York State Class members to
19 refrain from unfair or deceptive practices under the New York DAPA in the course
20 of their business. Specifically, they owed the New York Plaintiffs and New York
21 State Class members a duty to disclose all the material facts concerning the ACU
22 Defect in the FCA and Honda Class Vehicles because they possessed exclusive
23 knowledge, they intentionally concealed the ACU Defect from the New York
24 Plaintiffs and New York State Class members, and/or they made misrepresentations
25 that were rendered misleading because they were contradicted by withheld facts.

26 3778. By misrepresenting the FCA and Honda Class Vehicles as safe and
27 reliable and the defective ACU and ASICs installed in them as properly-functioning
28 and free from defects, and by failing to disclose and actively concealing the dangers

1 and risk posed by the ACU Defect to both consumers and NHTSA, FCA, Honda
2 Japan, Honda USA, and Honda Engineering USA engaged in deceptive acts or
3 practices in the conduct of business, trade or commerce, and/or in the furnishing of
4 any service, as prohibited by N.Y. Gen. Bus. Law § 349.

5 3779. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
6 unfair and deceptive acts or practices, including their misrepresentations,
7 concealments, omissions, and suppressions of material facts, were designed to
8 mislead and had a tendency or capacity to mislead and create a false impression in
9 consumers that the FCA and Honda Class Vehicles had properly-functioning and
10 reliable airbags and seatbelts, and that the Occupant Restraint System did not
11 contain the ACU Defect and would perform its intended function of activating the
12 seatbelts and airbags during a collision. Indeed, those misrepresentations,
13 concealments, omissions, and suppressions of material facts did in fact deceive
14 reasonable consumers, including the New York Plaintiffs and New York State
15 Class members, about the true safety and reliability of FCA and Honda Class
16 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
17 FCA and Honda Class Vehicles, and the true value of the FCA and Honda Class
18 Vehicles.

19 3780. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
20 misrepresentations, concealments, omissions, and suppressions of material facts
21 regarding the ACU Defect and true characteristics of the Occupant Restraint
22 Systems in the FCA and Honda Class Vehicles were material to the decisions of the
23 New York Plaintiffs and New York State Class members to purchase and lease
24 those vehicles, as FCA, Honda Japan, Honda USA, and Honda Engineering USA
25 intended. The New York Plaintiffs and New York State Class members were
26 exposed to those misrepresentations, concealments, omissions, and suppressions of
27 material facts, and relied on FCA's, Honda Japan's, Honda USA's, and Honda
28 Engineering USA's misrepresentations that the FCA and Honda Class Vehicles and

1 their Occupant Restraint Systems were safe and reliable in deciding to purchase and
2 lease FCA and Honda Class Vehicles. Plaintiffs allege the information they relied
3 upon in Section II.B above. To aid review of this information, Exhibit 19 provides
4 paragraph numbers for each Plaintiff.

5 3781. The New York Plaintiffs' and New York State Class members'
6 reliance was reasonable, as they had no way of discerning that FCA's, Honda
7 Japan's, Honda USA's, and Honda Engineering USA's representations were false
8 and misleading, or otherwise learning the facts that they had concealed or failed to
9 disclose. The New York Plaintiffs and New York State Class members did not, and
10 could not, unravel FCA's, Honda Japan's, Honda USA's, and Honda Engineering
11 USA's deception on their own.

12 3782. Had the New York Plaintiffs and New York State Class members
13 known the truth about the ACU Defect, the New York Plaintiffs and New York
14 State Class members would not have purchased or leased FCA and Honda Class
15 Vehicles, or would have paid significantly less for them.

16 3783. The New York Plaintiffs and New York State Class members suffered
17 ascertainable losses and actual damages through their overpayment at the time of
18 purchase and lease for FCA and Honda Class Vehicles with an undisclosed safety
19 defect as a direct and proximate result of FCA's, Honda Japan's, Honda USA's,
20 and Honda Engineering USA's concealment, misrepresentations, and/or failure to
21 disclose material information.

22 3784. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
23 violations present a continuing risk to the New York Plaintiffs and New York State
24 Class members, as well as to the general public, because the Class Vehicles remain
25 unsafe due to the defective ACUs and ASICs therein. Additionally, their unlawful
26 acts and practices complained of herein affect the public interest.

27 3785. Pursuant to N.Y. Gen. Bus. Law § 349, the New York Plaintiffs and
28 New York State Class members seek an order enjoining FCA's, Honda Japan's,

1 Honda USA’s, and Honda Engineering USA’s unfair or deceptive acts or practices
2 and awarding damages and any other just and proper relief available under the New
3 York DAPA.

4 **b. New York Count 2: Violation of New York General Business**
5 **Law § 349 (N.Y. Gen. Bus. Law § 349) Against ZF**
6 **Electronics USA, ZF Passive Safety USA, ZF Automotive**
7 **USA, ZF TRW Corp., ZF Germany, ST Italy, ST USA, and**
8 **ST Malaysia**

9 3786. Plaintiffs reallege and incorporate by reference all preceding
10 allegations as though fully set forth herein.

11 3787. Plaintiffs Eric Fishon and Ravichandran Namakkal bring this count
12 individually and on behalf of members of the New York State Class against ZF
13 Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF TRW Corp.,
14 and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST Malaysia,
15 and ST USA (collectively, the “ST Defendants”).

16 3788. For purposes of this count, Plaintiffs Fishon and Namakkal shall be
17 referred to as the “New York Plaintiffs.”

18 3789. The New York Plaintiffs and New York State Class members are
19 “persons” within the meaning of N.Y. Gen. Bus. Law § 349(h).

20 3790. The ZF and ST Defendants are each a “person,” “firm,” “corporation,”
21 or “association” within the meaning of N.Y. Gen. Bus. Law § 349.

22 3791. The New York Deceptive Acts and Practices Act (“New York
23 DAPA”) prohibits “[d]eceptive acts or practices in the conduct of any business,
24 trade or commerce[.]” N.Y. Gen. Bus. Law. § 349.

25 3792. The ZF and ST Defendants had an ongoing duty to the New York
26 Plaintiffs and New York State Class members to refrain from unfair or deceptive
27 practices under the New York DAPA in the course of their business. Specifically,
28 the ZF and ST Defendants owed the New York Plaintiffs and New York State Class
 members a duty to disclose all the material facts concerning the ACU Defect in the
 Class Vehicles because they possessed exclusive knowledge and they intentionally

1 concealed the ACU Defect from the New York Plaintiffs and New York State Class
2 members.

3 3793. In the course of their business, the ZF and ST Defendants, through
4 their agents, employees, and/or subsidiaries, violated the New York DAPA by
5 knowingly and intentionally omitting, concealing, and failing to disclose material
6 facts regarding the existence, nature, and scope of the defective ACU and ASIC
7 installed in the Class Vehicles, as detailed above.

8 3794. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
9 Automotive USA, through their agents, employees, and/or subsidiaries, violated the
10 New York DAPA when they knowingly and intentionally misrepresented the Class
11 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
12 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
13 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
14 Manufacturer Defendants on the design and inclusion of the airbag readiness
15 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
16 Members that the Occupant Restraint Systems in the Class Vehicles would function
17 properly in a crash.

18 3795. By misrepresenting, failing to disclose and actively concealing the
19 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
20 ST Defendants engaged in deceptive acts or practices in the conduct of business,
21 trade or commerce prohibited by N.Y. Gen. Bus. Law § 349.

22 3796. The ZF and ST Defendants' unfair or deceptive acts or practices,
23 including their misrepresentations, concealments, omissions, and suppressions of
24 material facts, were designed to mislead and had a tendency or capacity to mislead
25 and create a false impression in consumers that the Class Vehicles had properly-
26 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
27 System did not contain the ACU Defect and would perform its intended function of
28 activating the seatbelts and airbags during a collision. Indeed, those

1 misrepresentations, concealments, omissions, and suppressions of material facts did
2 in fact deceive reasonable consumers, including the New York Plaintiffs and New
3 York State Class members, about the true safety and reliability of Class Vehicles
4 and/or the defective ACUs and ASICs installed in them, the quality of the Class
5 Vehicles, and the true value of the Class Vehicles.

6 3797. The New York Plaintiffs' and New York State Class members
7 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
8 concealment, as they had no way of discerning that the Class Vehicles contained
9 the ACU Defect, as alleged above. The New York Plaintiffs and New York State
10 Class members did not, and could not, unravel the ZF and ST Defendants'
11 deception on their own

12 3798. The ZF and ST Defendants' misrepresentations and concealment of the
13 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
14 Vehicles were material to the decisions of the New York Plaintiffs and New York
15 State Class members to purchase and lease Class Vehicles, as the ZF and ST
16 Defendants intended. Had they known the truth, the New York Plaintiffs and New
17 York State Class members would not have purchased or leased the Class Vehicles,
18 or would have paid significantly less for them.

19 3799. The New York Plaintiffs and New York State Class members suffered
20 ascertainable losses and actual damages as a direct and proximate result of the ZF
21 and ST Defendants' misrepresentations, concealment and/or failure to disclose
22 material information.

23 3800. The ZF and ST Defendants' violations present a continuing risk to the
24 New York Plaintiffs and New York State Class members, as well as to the general
25 public, because the Class Vehicles remain unsafe due to the defective ACUs and
26 ASICs therein. The ZF and ST Defendants' unlawful acts and practices complained
27 of herein affect the public interest.
28

1 3801. Pursuant to N.Y. Gen. Bus. Law § 349, the New York Plaintiffs and
2 New York State Class members seek an order enjoining the ZF and ST Defendants’
3 unfair or deceptive acts or practices and awarding damages and any other just and
4 proper relief available under the New York DAPA.

5 **c. New York Count 3: Violation of New York General Business**
6 **Law § 350 (N.Y. Gen. Bus. Law § 350) Against FCA, Honda**
7 **Japan, and Honda USA**

8 3802. Plaintiffs reallege and incorporate by reference all preceding
9 allegations as though fully set forth herein.

10 3803. Plaintiff Eric Fishon brings this count individually and on behalf of
11 members of the New York State Class who purchased or leased FCA Class
12 Vehicles, against FCA.

13 3804. Plaintiff Ravichandran Namakkal bring this count individually and on
14 behalf of members of the New York State Class who purchased or leased Honda
15 Class Vehicles, against Honda Japan and Honda USA.

16 3805. For purposes of this count, Plaintiffs Fishon and Namakkal shall be
17 referred to as the “New York Plaintiffs.”

18 3806. FCA, Honda Japan and Honda USA were and are engaged in “conduct
19 of business, trade or commerce” within the meaning of N.Y. Gen. Bus. Law § 350.

20 3807. The New York False Advertising Act (“New York FAA”) prohibits
21 “[f]alse advertising in the conduct of any business, trade or commerce.” N.Y. Gen.
22 Bus. Law § 350.

23 3808. FCA, Honda Japan, and Honda USA caused to be made or
24 disseminated through New York, through advertising, marketing, and other
25 publications, statements that were untrue or misleading, and which were known, or
26 which by exercise of reasonable care should have been known by them to be untrue
27 and misleading to consumers, including the New York Plaintiffs and New York
28 State Class members. Numerous examples of these statements and advertisements

1 appear in the preceding paragraphs throughout this Complaint and the Exhibits
2 hereto.

3 3809. In the course of their business, FCA, Honda Japan, and Honda USA,
4 through their agents, employees, and/or subsidiaries, violated the New York FAA
5 by knowingly and intentionally misrepresenting, omitting, concealing, and/or
6 failing to disclose material facts regarding the reliability, safety, and performance of
7 the FCA and Honda Class Vehicles, the safety of their Occupant Restraint Systems,
8 and the ACU Defect, as detailed above.

9 3810. FCA, Honda Japan, and Honda USA had an ongoing duty to the New
10 York Plaintiffs and New York State Class members to refrain from unfair or
11 deceptive practices under the New York FAA in the course of their business.
12 Specifically, they owed the New York Plaintiffs and New York State Class
13 members a duty to disclose all the material facts concerning the ACU Defect in the
14 FCA and Honda Class Vehicles because they possessed exclusive knowledge, they
15 intentionally concealed the ACU Defect from the New York Plaintiffs and New
16 York State Class members, and/or they made misrepresentations that were rendered
17 misleading because they were contradicted by withheld facts.

18 3811. By misrepresenting the Class Vehicles as safe and reliable and the
19 defective ACU and ASICs installed in them as properly-functioning and free from
20 defects, and by failing to disclose and actively concealing the dangers and risk
21 posed by the ACU Defect to both consumers and NHTSA, FCA, Honda Japan, and
22 Honda USA engaged in the false and misleading advertising practices prohibited by
23 N.Y. Gen. Bus. Law § 350.

24 3812. FCA's, Honda Japan's, and Honda USA's unfair and deceptive acts or
25 practices, including their misrepresentations, concealments, omissions, and
26 suppressions of material facts, were designed to mislead and had a tendency or
27 capacity to mislead and create a false impression in consumers that the FCA and
28 Honda Class Vehicles had properly-functioning and reliable airbags and seatbelts,

1 and that the Occupant Restraint System did not contain the ACU Defect and would
2 perform its intended function of activating the seatbelts and airbags during a
3 collision. Indeed, those misrepresentations, concealments, omissions, and
4 suppressions of material facts did in fact deceive reasonable consumers, including
5 the New York Plaintiffs and New York State Class members, about the true safety
6 and reliability of FCA and Honda Class Vehicles and/or the defective ACUs and
7 ASICs installed in them, the quality of the FCA and Honda Class Vehicles, and the
8 true value of the FCA and Honda Class Vehicles.

9 3813. FCA's, Honda Japan's, and Honda USA's misrepresentations,
10 concealments, omissions, and suppressions of material facts regarding the ACU
11 Defect and true characteristics of the Occupant Restraint Systems in the FCA and
12 Honda Class Vehicles were material to the decisions of the New York Plaintiffs and
13 New York State Class members to purchase and lease those vehicles, as FCA,
14 Honda Japan, and Honda USA intended. The New York Plaintiffs and New York
15 State Class members were exposed to those misrepresentations, concealments,
16 omissions, and suppressions of material facts, and relied on FCA's, Honda Japan's,
17 and Honda USA's misrepresentations that the FCA and Honda Class Vehicles and
18 their Occupant Restraint Systems were safe and reliable in deciding to purchase and
19 lease FCA and Honda Class Vehicles. Plaintiffs allege the information they relied
20 upon in Section II.B above. To aid review of this information, Exhibit 19 provides
21 paragraph numbers for each Plaintiff.

22 3814. The New York Plaintiffs' and New York State Class members'
23 reliance was reasonable, as they had no way of discerning that FCA's, Honda
24 Japan's, and Honda USA's representations were false and misleading, or otherwise
25 learning the facts that FCA, Honda Japan, and Honda USA had concealed or failed
26 to disclose. The New York Plaintiffs and New York State Class members did not,
27 and could not, unravel FCA's, Honda Japan's, and Honda USA's deception on their
28 own.

1 3815. Had the New York Plaintiffs and New York State Class members
2 known the truth about the ACU Defect, the New York Plaintiffs and New York
3 State Class members would not have purchased or leased FCA and Honda Class
4 Vehicles, or would have paid significantly less for them.

5 3816. The New York Plaintiffs and New York State Class members suffered
6 ascertainable losses and actual damages as a direct and proximate result of FCA's,
7 Honda Japan's, and Honda USA's concealment, misrepresentations, and/or failure
8 to disclose material information.

9 3817. FCA's, Honda Japan's, and Honda USA's violations present a
10 continuing risk to the New York Plaintiffs and New York State Class members, as
11 well as to the general public, because the Class Vehicles remain unsafe due to the
12 defective ACUs and ASICs therein. Additionally, their unlawful acts and practices
13 complained of herein affect the public interest.

14 3818. Pursuant to New York FAA, the New York Plaintiffs and New York
15 State Class members seek an order enjoining FCA's, Honda Japan's, and Honda
16 USA's false advertising practices and awarding damages and any other just and
17 proper relief available under the New York FAA.

18 **d. New York Count 4: Fraud by Omission and Concealment**
19 **Against FCA, Honda Japan, Honda USA, and Honda**
20 **Engineering USA**

21 3819. Plaintiffs reallege and incorporate by reference all preceding
22 allegations as though fully set forth herein.

23 3820. Plaintiff Eric Fishon brings this count individually and on behalf of
24 members of the New York State Class who purchased or leased FCA Class
25 Vehicles, against FCA.

26 3821. Plaintiff Ravichandran Namakkal bring this count individually and on
27 behalf of members of the New York State Class who purchased or leased Honda
28 Class Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

1 3822. For purposes of this count, Plaintiffs Fishon and Namakkal shall be
2 referred to as the “New York Plaintiffs.”

3 3823. FCA, Honda Japan, Honda USA, and Honda Engineering USA are
4 liable for both fraudulent concealment and non-disclosure. *See, e.g.*, Restatement
5 (Second) of Torts §§ 550-51 (1977).

6 3824. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
7 serious risks to vehicle occupants, including that it can cause: (1) airbags and
8 seatbelts not to activate during a crash because crashes can sometimes release
9 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
10 vehicle has not crashed, which is dangerous because it is shocking and difficult for
11 the driver to operate a vehicle when the airbag deploys without warning; and (3)
12 failures of other important post-crash operations of the safety system, such as
13 unlocking doors to facilitate escape or extraction of drivers and passengers by
14 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

15 3825. FCA, Honda Japan, Honda USA, and Honda Engineering USA had a
16 duty to disclose the ACU Defect to the New York Plaintiffs and New York State
17 Class members because:

- 18 a. FCA, Honda Japan, Honda USA, and Honda Engineering USA
19 had exclusive access to and far superior knowledge about
20 technical facts regarding the ACU Defect;
- 21 b. Given the ACU Defect’s hidden and technical nature, the New
22 York Plaintiffs and New York State Class members lack the
23 sophisticated expertise in vehicle components and electrical
24 phenomena that would be necessary to discover the ACU Defect
25 on their own;
- 26 c. FCA, Honda Japan, Honda USA, and Honda Engineering USA
27 knew that the ACU Defect gave rise to serious safety concerns
28 for the consumers who use the vehicles, and the FCA and Honda

1 Class Vehicles containing the ACU Defect would have been a
2 material fact to the New York Plaintiffs’ and New York State
3 Class members’ decisions to buy or lease FCA and Honda Class
4 Vehicles; and

5 d. FCA, Honda Japan, Honda USA, and Honda Engineering USA
6 made incomplete representations about the safety and reliability
7 of the FCA and Honda Class Vehicles and their Occupant
8 Restraint System, while purposefully withholding material facts
9 about a known safety defect. In uniform advertising and
10 materials provided with each Class Vehicle, FCA, Honda Japan,
11 Honda USA, and Honda Engineering USA intentionally
12 concealed, suppressed, and failed to disclose to the New York
13 Plaintiffs and New York State Class members that the FCA and
14 Honda Class Vehicles contained the ACU Defect. Because they
15 volunteered to provide information about the FCA and Honda
16 Class Vehicles that they marketed and offered for sale and lease
17 to the New York Plaintiffs and New York State Class members,
18 FCA, Honda Japan, Honda USA, and Honda Engineering USA
19 had the duty to disclose the whole truth.

20 3826. In breach of their duties, FCA, Honda Japan, Honda USA, and Honda
21 Engineering USA failed to disclose that the FCA and Honda Class Vehicles were
22 not safe and reliable, and that their Occupant Restraint Systems, including their
23 airbags and seatbelt pretensioners could fail in the event of a crash due to the ACU
24 Defect.

25 3827. FCA, Honda Japan, Honda USA, and Honda Engineering USA
26 intended for the New York Plaintiffs and New York State Class members to rely on
27 their omissions—which they did by purchasing and leasing the FCA and Honda
28

1 Class Vehicles at the prices they paid believing that the Occupant Restraint Systems
2 in their Class Vehicles would function properly.

3 3828. That reliance was reasonable, because a reasonable consumer would
4 not have expected that the FCA and Honda Class Vehicles contained a safety defect
5 that poses such a serious risk. FCA, Honda Japan, Honda USA, and Honda
6 Engineering USA knew that reasonable consumers expect that their vehicle has
7 working airbags and seatbelt pretensioners and would rely on those facts in
8 deciding whether to purchase, lease, or retain a new or used motor vehicle. Whether
9 a manufacturer's products are safe and reliable, and whether that manufacturer
10 stands behind its products, are material concerns to a consumer. Especially here
11 when at least nine people have already died due to the ACU Defect, and many more
12 have been injured.

13 3829. Additionally, FCA, Honda Japan, Honda USA, and Honda
14 Engineering USA ensured that the New York Plaintiffs and New York State Class
15 members did not discover this information by actively concealing and
16 misrepresenting the true nature of the FCA and Honda Class Vehicles' Occupant
17 Restraint Systems to consumers and NHTSA.

18 3830. FCA, Honda Japan, Honda USA, and Honda Engineering USA
19 actively concealed and suppressed these material facts, in whole or in part, to
20 maintain a market for their Class Vehicles, to protect profits, and to avoid costly
21 recalls that would expose them to liability for those expenses and harm the
22 commercial reputations of Defendants and their products. They did so at the
23 expense of the New York Plaintiffs and New York State Class members.

24 3831. To this day, FCA, Honda Japan, Honda USA, and Honda Engineering
25 USA have not fully and adequately disclosed the ACU Defect, and they continue to
26 conceal material information about the defect from consumers and NHTSA. The
27 omitted and concealed facts were material because a reasonable person would find
28 them important in purchasing, leasing, or retaining a new or used motor vehicle,

1 and because they directly impact the value of the FCA and Honda Class Vehicles
2 purchased or leased by the New York Plaintiffs and New York State Class
3 members.

4 3832. Had they been aware of the ACU Defect in the FCA and Honda Class
5 Vehicles, and FCA's, Honda Japan's, Honda USA's, and Honda Engineering
6 USA's callous disregard for safety, the New York Plaintiffs and New York State
7 Class members either would not have paid as much as they did for their Class
8 Vehicles, or they would not have purchased or leased them.

9 3833. As alleged in Section V above, if FCA, Honda Japan, Honda USA, and
10 Honda Engineering USA had fully and adequately disclosed the ACU Defect to
11 consumers and NHTSA, the New York Plaintiffs and New York State Class
12 members would have seen such a disclosure.

13 3834. Accordingly, FCA, Honda Japan, Honda USA, and Honda
14 Engineering USA are liable to the New York Plaintiffs and New York State Class
15 members for their damages in an amount to be proven at trial, including, but not
16 limited to, their lost overpayment for the FCA and Honda Class Vehicles at the
17 time of purchase or lease.

18 3835. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
19 acts were done maliciously, oppressively, deliberately, with intent to defraud; in
20 reckless disregard of the New York Plaintiffs' and New York State Class members'
21 rights and well-being; and to enrich themselves. FCA's, Honda Japan's, Honda
22 USA's, and Honda Engineering USA's misconduct warrants an assessment of
23 punitive damages, as permitted by law, in an amount sufficient to deter such
24 conduct in the future, which amount shall be determined according to proof at trial.

27
28

1 e. **New York Count 5: Fraud by Omission and Concealment**
2 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
3 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
4 **ST USA, and ST Malaysia**

5 3836. Plaintiffs reallege and incorporate by reference all preceding
6 allegations as though fully set forth herein.

7 3837. The New York Plaintiffs bring this count individually and on behalf of
8 members of the New York State Class who purchased or leased Class Vehicles,
9 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
10 TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST
11 Malaysia, and ST USA (collectively, the “ST Defendants”).

12 3838. The ZF and ST Defendants are liable for both fraudulent concealment
13 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

14 3839. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
15 serious risks to vehicle occupants, including that it can cause: (1) airbags and
16 seatbelts not to activate during a crash because crashes can sometimes release
17 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
18 vehicle has not crashed, which is dangerous because it is shocking and difficult for
19 the driver to operate a vehicle when the airbag deploys without warning; and (3)
20 failures of other important post-crash operations of the safety system, such as
21 unlocking doors to facilitate escape or extraction of drivers and passengers by
22 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

23 3840. The ZF and ST Defendants had a duty to disclose the ACU Defect to
24 the New York Plaintiffs and New York State Class members because:

- 25 a. The ZF and ST Defendants had exclusive access to and far
26 superior knowledge about technical facts regarding the ACU
27 Defect;
- 28 b. Given the ACU Defect’s hidden and technical nature, the New
 York Plaintiffs and New York State Class members lack the

1 sophisticated expertise in vehicle components and electrical
2 phenomena that would be necessary to discover the ACU Defect
3 on their own;

4 c. The ZF and ST Defendants knew that the ACU Defect gave rise
5 to serious safety concerns for the consumers who use the
6 vehicles, and the Class Vehicles containing the ACU Defect
7 would have been a material fact to the New York Plaintiffs' and
8 New York State Class members' decisions to buy or lease Class
9 Vehicles; and

10 d. The ZF Defendants made incomplete representations about the
11 safety and reliability of the Class Vehicles and their Occupant
12 Restraint System, while purposefully withholding material facts
13 about a known safety defect, creating a duty to disclose the
14 whole truth. Specifically, ZF Electronics USA, ZF Passive
15 Safety USA, and ZF Automotive USA worked with the Vehicle
16 Manufacturer Defendants on the design and inclusion of the
17 airbag readiness indicators in the Class Vehicles, which falsely
18 assured Plaintiffs and Class Members that the Occupant
19 Restraint Systems in the Class Vehicles would function properly
20 in a crash.

21 3841. In breach of their duties, the ZF and ST Defendants failed to disclose
22 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
23 Systems, including their airbags and seatbelt pretensioners could fail in the event of
24 a crash due to the ACU Defect.

25 3842. The ZF and ST Defendants intended for the New York Plaintiffs and
26 New York State Class members to rely on their omissions—which they did by
27 purchasing and leasing the Class Vehicles at the prices they paid believing that the
28 Occupant Restraint Systems in their Class Vehicles would function properly.

1 3843. That reliance was reasonable, because a reasonable consumer would
2 not have expected that the Class Vehicles contained a safety defect that poses such
3 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
4 that their vehicle has working airbags and seatbelt pretensioners and would rely on
5 those facts in deciding whether to purchase, lease, or retain a new or used motor
6 vehicle. Whether a manufacturer's products are safe and reliable, and whether that
7 manufacturer stands behind its products, are material concerns to a consumer.
8 Especially here when at least nine people have already died due to the ACU Defect,
9 and many more have been injured.

10 3844. Additionally, the ZF and ST Defendants ensured that the New York
11 Plaintiffs and New York State Class members did not discover this information by
12 actively concealing and misrepresenting the true nature of the Class Vehicles'
13 Occupant Restraint Systems to consumers and NHTSA.

14 3845. The ZF and ST Defendants actively concealed and suppressed these
15 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
16 protect profits, and to avoid costly recalls that would expose them to liability for
17 those expenses and harm the commercial reputations of Defendants and their
18 products. They did so at the expense of the New York Plaintiffs and New York
19 State Class members.

20 3846. To this day, the ZF and ST Defendants have not fully and adequately
21 disclosed the ACU Defect, and they continue to conceal material information about
22 the defect from consumers and NHTSA. The omitted and concealed facts were
23 material because a reasonable person would find them important in purchasing,
24 leasing, or retaining a new or used motor vehicle, and because they directly impact
25 the value of the Class Vehicles purchased or leased by the New York Plaintiffs and
26 New York State Class members.

27 3847. Had they been aware of the ACU Defect in the Class Vehicles, and the
28 ZF and ST Defendants' callous disregard for safety, the New York Plaintiffs and

1 New York State Class members either would not have paid as much as they did for
2 their Class Vehicles, or they would not have purchased or leased them.

3 3848. As alleged in Section V above, if the ZF and ST Defendants had fully
4 and adequately disclosed the ACU Defect to consumers and NHTSA, the New
5 York Plaintiffs and New York State Class members would have seen such a
6 disclosure.

7 3849. Accordingly, the ZF and ST Defendants are liable to the New York
8 Plaintiffs and New York State Class members for their damages in an amount to be
9 proven at trial, including, but not limited to, their lost overpayment for the Class
10 Vehicles at the time of purchase or lease.

11 3850. The ZF and ST Defendants' acts were done maliciously, oppressively,
12 deliberately, with intent to defraud; in reckless disregard of the New York
13 Plaintiffs' and New York State Class members' rights and well-being; and to enrich
14 themselves. The ZF and ST Defendants' misconduct warrants an assessment of
15 punitive damages, as permitted by law, in an amount sufficient to deter such
16 conduct in the future, which amount shall be determined according to proof at trial.

17 **f. New York Count 6: Unjust Enrichment Against FCA,**
18 **Honda Japan, Honda USA, and Honda Engineering USA**

19 3851. Plaintiffs reallege and incorporate by reference all allegations in
20 Sections I- VI above as though fully set forth herein.

21 3852. Plaintiff Eric Fishon brings this count individually and on behalf of
22 members of the New York State Class who purchased or leased FCA Class
23 Vehicles, against FCA.

24 3853. Plaintiff Ravichandran Namakkal brings this count individually and on
25 behalf of members of the New York State Class who purchased or leased Honda
26 Class Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

27 3854. For purposes of this count, Plaintiffs Fishon and Namakkal shall be
28 referred to as the "New York Plaintiffs."

1 3855. The New York Plaintiffs and New York State Class members
2 conferred tangible and material monetary benefits upon FCA, Honda Japan, Honda
3 USA, and Honda Engineering USA when they purchased or leased the FCA and
4 Honda Class Vehicles. FCA, Honda Japan, Honda USA, and Honda Engineering
5 USA readily accepted and retained these benefits.

6 3856. The New York Plaintiffs and New York State Class members would
7 not have purchased or leased the FCA and Honda Class Vehicles, or would have
8 paid less for them, had they known of the ACU Defect at the time of purchase or
9 lease. Therefore, FCA, Honda Japan, Honda USA, and Honda Engineering USA
10 profited from the sale and lease of the FCA and Honda Class Vehicles to the
11 detriment and expense of the New York Plaintiffs and New York State Class
12 members.

13 3857. FCA, Honda Japan, Honda USA, and Honda Engineering USA
14 appreciated these monetary benefits. These benefits were the expected result of
15 FCA, Honda Japan, Honda USA, and Honda Engineering USA acting in their
16 pecuniary interest at the expense of their customers. FCA, Honda Japan, Honda
17 USA, and Honda Engineering USA knew of these benefits because they were aware
18 of the ACU Defect, yet they failed to disclose this knowledge and misled the New
19 York Plaintiffs and New York State Class members regarding the nature and
20 quality of the FCA and Honda Class Vehicles while profiting from this deception.

21 3858. It would be unjust, inequitable, and unconscionable for FCA, Honda
22 Japan, Honda USA, and Honda Engineering USA to retain these monetary benefits,
23 including because they were procured as a result of FCA's, Honda Japan's, Honda
24 USA's, and Honda Engineering USA's wrongful conduct alleged above.

25 3859. The New York Plaintiffs and New York State Class members are
26 entitled to restitution of the benefits FCA, Honda Japan, Honda USA, and Honda
27 Engineering USA unjustly retained and/or any amounts necessary to return the New
28 York Plaintiffs and New York State Class members to the position they occupied

1 prior to dealing with FCA, Honda Japan, Honda USA, and Honda Engineering
2 USA, with such amounts to be determined at trial.

3 3860. The New York Plaintiffs plead this claim separately as well as in the
4 alternative to their claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
5 New York Plaintiffs claims for damages are dismissed or judgment is entered in
6 favor of Defendants, the New York Plaintiffs would have no adequate legal
7 remedy.

8 **17. North Carolina**

9 **a. North Carolina Count 1: Breach of Express Warranty (N.C.
10 Gen. Stat. §§ 25-2-313 and 25-2A-210) Against FCA, Honda
11 Japan, and Honda USA¹⁵**

12 3861. Plaintiffs reallege and incorporate by reference all preceding
13 allegations as though fully set forth herein.

14 3862. Plaintiff Constanza Gonzalez brings this count individually and on
15 behalf of members of the North Carolina State Class who purchased or leased FCA
16 Class Vehicles, against FCA.

17 3863. Plaintiff Tonya McNeely brings this count individually and on behalf
18 of members of the North Carolina State Class who purchased or leased Honda
19 Class Vehicles, against Honda Japan and Honda USA.

20 3864. For purposes of this count, Plaintiffs Gonzalez and McNeely shall be
21 referred to as the “North Carolina Plaintiffs.”

22 3865. FCA, Honda Japan, and Honda USA are and were at all relevant times
23 “merchants” with respect to motor vehicles under N.C. Gen. Stat. §§ 25-2-104(1)
24 and 25-2A-103(3), and “sellers” of motor vehicles under § 25-2-103(1)(d).

25 3866. With respect to leases, FCA, Honda Japan, and Honda USA are and
26 were at all relevant times “lessors” of motor vehicles under N.C. Gen. Stat. § 25-
27 2A-103(1)(p).

28 ¹⁵ The Court held in its February 9, 2022 Order that the North Carolina Plaintiffs
stated a claim for breach of express warranty. *See* ECF No. 396 at 155-56.

1 3867. All North Carolina State Class members who purchased FCA and
2 Honda Class Vehicles in North Carolina are “buyers” within the meaning of N.C.
3 Gen. Stat. § 25-2-103(1)(a).

4 3868. All North Carolina State Class members who leased FCA and Honda
5 Class Vehicles in North Carolina are “lessees” within the meaning of N.C. Gen.
6 Stat. § 25-2A-103(1)(n).

7 3869. The FCA and Honda Class Vehicles are and were at all relevant times
8 “goods” within the meaning of N.C. Gen. Stat. §§ 25-2-105(1) and 25-2A-
9 103(1)(h).

10 3870. In connection with the purchase or lease of FCA and Honda Class
11 Vehicles, FCA, Honda Japan, and Honda USA provided the North Carolina
12 Plaintiffs and North Carolina State Class members with warranties in the form of:
13 (a) written express warranties covering the repair or replacement of components
14 that are defective in materials or workmanship, and (b) descriptions of the FCA and
15 Honda Class Vehicles as safe and reliable, and that their Occupant Restraint
16 Systems, including their airbags and seatbelt pretensioners, would function properly
17 in the event of a crash

18 3871. However, FCA, Honda Japan, and Honda USA knew or should have
19 known that the warranties were false and/or misleading. Specifically, FCA, Honda
20 Japan, and Honda USA were aware of the ACU Defect in the FCA and Honda
21 Class Vehicles, which made the vehicles inherently defective and dangerous at the
22 time that they were sold and leased to the North Carolina Plaintiff and North
23 Carolina State Class members.

24 3872. The North Carolina Plaintiffs and North Carolina State Class members
25 were aware the FCA and Honda Class Vehicles were covered by express
26 warranties, and those warranties were an essential part of the bargain between them
27 and FCA, Honda Japan, and Honda USA when the North Carolina Plaintiffs and
28

1 North Carolina State Class members unknowingly purchased and leased FCA and
2 Honda Class Vehicles that came equipped with defective ACUs and ASICs.

3 3873. FCA, Honda Japan, and Honda USA misrepresented the FCA and
4 Honda Class Vehicles as safe and reliable while concealing that they contained the
5 ACU Defect, the North Carolina Plaintiffs and North Carolina State Class members
6 were exposed to those misrepresentations, and the North Carolina Plaintiffs and
7 North Carolina State Class members had no way of discerning that FCA's, Honda
8 Japan's, and Honda USA's representations were false and misleading or otherwise
9 learning the material facts that FCA, Honda Japan, and Honda USA had concealed
10 or failed to disclose. Accordingly, the North Carolina Plaintiffs and North Carolina
11 State Class members reasonably relied on FCA's, Honda Japan's, and Honda
12 USA's express warranties when purchasing or leasing their FCA and Honda Class
13 Vehicles. Plaintiffs allege the information they relied upon in Section II.B above.
14 To aid review of this information, Exhibit 19 provides paragraph numbers for each
15 Plaintiff.

16 3874. FCA, Honda Japan, and Honda USA knowingly breached their express
17 warranties to repair defects in materials and workmanship by failing to repair the
18 ACU Defect or replace the defective ACUs and ASICs in the FCA and Honda
19 Class Vehicles. FCA, Honda Japan, and Honda USA also breached their express
20 warranties by selling and leasing FCA and Honda Class Vehicles with a defect that
21 was never disclosed to the North Carolina Plaintiffs and North Carolina State Class
22 members.

23 3875. The North Carolina Plaintiffs and North Carolina State Class members
24 have provided FCA, Honda Japan, and Honda USA with reasonable notice and
25 opportunity to cure the breaches of their express warranties by way of the numerous
26 NHTSA complaints filed against them, and the individual notice letters sent by
27 North Carolina State Class members within a reasonable amount of time after the
28 ACU Defect became public. Additionally, on April 24, 2020, a notice letter was

1 sent on behalf of the North Carolina Plaintiffs and North Carolina State Class
2 members to FCA, Honda Japan, and Honda USA.

3 3876. Alternatively, the North Carolina Plaintiffs and North Carolina State
4 Class members were excused from providing FCA, Honda Japan, and Honda USA
5 with notice and an opportunity to cure the breach, because it would have been
6 futile. As alleged above, FCA, Honda Japan, and Honda USA have long known that
7 the FCA and Honda Class Vehicles contained the ACU Defect, and that the ACU
8 Defect has caused ACUs and ASICs to malfunction in crashes involving Class
9 Vehicles; however, to date, the Honda Japan and Honda USA have not instituted a
10 recall or any other repair program, or even acknowledged that the ACU Defect
11 exists—even though Honda Class Vehicles are subject to the NHTSA investigation.
12 Similarly, FCA has not instituted a recall or any other repair program with respect
13 to the unrecalled FCA Class Vehicles, or even acknowledged that the ACU Defect
14 exists in all FCA Class Vehicles, including the recalled FCA Class Vehicles.
15 Therefore, the North Carolina Plaintiffs and North Carolina State Class members
16 had no reason to believe that FCA, Honda Japan, and Honda USA would have
17 repaired the ACU Defect if the North Carolina Plaintiffs and North Carolina State
18 Class members presented their FCA and Honda Class Vehicles to FCA, Honda
19 Japan, and Honda USA for repair.

20 3877. As a direct and proximate result of FCA's, Honda Japan's, and Honda
21 USA's breach of their express warranties, the FCA and Honda Class Vehicles were
22 and are defective and the ACU Defect in the North Carolina Plaintiffs' and North
23 Carolina State Class members' FCA and Honda Class Vehicles was not remedied.
24 Therefore, the North Carolina Plaintiffs and North Carolina State Class members
25 have been damaged, in an amount to be proven at trial, through their overpayment
26 at the time of purchase or lease for FCA and Honda Class Vehicles with an
27 undisclosed safety defect that would not be remedied.

28

1 **b. North Carolina Count 2: Violation of the North Carolina**
2 **Unfair and Deceptive Trade Practices Act (N.C. Gen. Stat.**
3 **§ 75-1.1, et seq.) Against FCA¹⁶, Honda Japan, Honda USA,**
4 **and Honda Engineering USA**

5 3878. Plaintiffs reallege and incorporate by reference all preceding
6 allegations as though fully set forth herein.

7 3879. Plaintiff Constanza Gonzalez brings this count individually and on
8 behalf of members of the North Carolina State Class who purchased or leased FCA
9 Class Vehicles, against FCA.

10 3880. Plaintiff Tonya McNeely brings this count individually and on behalf
11 of members of the North Carolina State Class who purchased or leased Honda
12 Class Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

13 3881. For purposes of this count, Plaintiffs Gonzalez and McNeely shall be
14 referred to as the “North Carolina Plaintiffs.”

15 3882. FCA, Honda Japan, Honda USA, and Honda Engineering USA were
16 and are engaged in “commerce” within the meaning of N.C. Gen. Stat. § 75-1.1(b).

17 3883. In the course of their business, FCA, Honda Japan, Honda USA, and
18 Honda Engineering USA, through their agents, employees, and/or subsidiaries,
19 violated the North Carolina Unfair and Deceptive Trade Practices Act (“North
20 Carolina UDTPA”) by knowingly and intentionally misrepresenting, omitting,
21 concealing, and/or failing to disclose material facts regarding the reliability, safety,
22 and performance of the FCA and Honda Class Vehicles, the safety of their
23 Occupant Restraint Systems, and the ACU Defect, as detailed above.

24 3884. FCA, Honda Japan, Honda USA, and Honda Engineering USA had an
25 ongoing duty to the North Carolina Plaintiffs and North Carolina State Class
26 members to refrain from unfair or deceptive practices under the North Carolina
27 UDTPA in the course of their business. Specifically, FCA, Honda Japan, Honda

28 ¹⁶ The Court held in its February 9, 2022 Order that Plaintiff Gonzalez had
 sufficiently plead a Violation of the North Carolina Unfair and Deceptive Trade
 Practices Act against FCA. *See* ECF No. 396 at 111.

1 USA, and Honda Engineering USA owed the North Carolina Plaintiffs and North
2 Carolina State Class members a duty to disclose all the material facts concerning
3 the ACU Defect in the FCA and Honda Class Vehicles because they possessed
4 exclusive knowledge, they intentionally concealed the ACU Defect from the North
5 Carolina Plaintiffs and North Carolina State Class members, and/or they made
6 misrepresentations that were rendered misleading because they were contradicted
7 by withheld facts.

8 3885. By misrepresenting the FCA and Honda Class Vehicles as safe and
9 reliable and the defective ACU and ASICs installed in them as properly-functioning
10 and free from defects, and by failing to disclose and actively concealing the dangers
11 and risk posed by the ACU Defect to both consumers and NHTSA, FCA, Honda
12 Japan, Honda USA, and Honda Engineering USA engaged the unfair methods of
13 competition in or affecting commerce, and unfair or deceptive acts or practices in or
14 affecting commerce prohibited by N.C. Gen. Stat. § 75-16.

15 3886. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
16 unfair and deceptive acts or practices, including their misrepresentations,
17 concealments, omissions, and suppressions of material facts, were designed to
18 mislead and had a tendency or capacity to mislead and create a false impression in
19 consumers that the FCA and Honda Class Vehicles had properly-functioning and
20 reliable airbags and seatbelts, and that the Occupant Restraint System did not
21 contain the ACU Defect and would perform its intended function of activating the
22 seatbelts and airbags during a collision. Indeed, those misrepresentations,
23 concealments, omissions, and suppressions of material facts did in fact deceive
24 reasonable consumers, including the North Carolina Plaintiffs and North Carolina
25 State Class members, about the true safety and reliability of FCA and Honda Class
26 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
27 FCA and Honda Class Vehicles, and the true value of the FCA and Honda Class
28 Vehicles.

1 3887. FCA’s, Honda Japan’s, Honda USA’s, and Honda Engineering USA’s
2 misrepresentations, concealments, omissions, and suppressions of material facts
3 regarding the ACU Defect and true characteristics of the Occupant Restraint
4 Systems in the FCA and Honda Class Vehicles were material to the decisions of the
5 North Carolina Plaintiffs and North Carolina State Class members to purchase and
6 lease those vehicles, as FCA, Honda Japan, Honda USA, and Honda Engineering
7 USA intended. The North Carolina Plaintiffs and North Carolina State Class
8 members were exposed to those misrepresentations, concealments, omissions, and
9 suppressions of material facts, and relied on FCA’s, Honda Japan’s, Honda USA’s,
10 and Honda Engineering USA’s misrepresentations that the FCA and Honda Class
11 Vehicles and their Occupant Restraint Systems were safe and reliable in deciding to
12 purchase and lease FCA and Honda Class Vehicles. Plaintiffs allege the
13 information they relied upon in Section II.B above. To aid review of this
14 information, Exhibit 19 provides paragraph numbers for each Plaintiff.

15 3888. The North Carolina Plaintiffs’ and North Carolina State Class
16 members’ reliance was reasonable, as they had no way of discerning that FCA’s,
17 Honda Japan’s, Honda USA’s, and Honda Engineering USA’s representations were
18 false and misleading, or otherwise learning the facts that FCA, Honda Japan, Honda
19 USA, and Honda Engineering USA had concealed or failed to disclose. The North
20 Carolina Plaintiffs and North Carolina State Class members did not, and could not,
21 unravel FCA’s, Honda Japan’s, Honda USA’s, and Honda Engineering USA’s
22 deception on their own.

23 3889. Had the North Carolina Plaintiffs and North Carolina State Class
24 members known the truth about the ACU Defect, the North Carolina Plaintiffs and
25 North Carolina State Class members would not have purchased or leased FCA and
26 Honda Class Vehicles, or would have paid significantly less for them.

27 3890. The North Carolina Plaintiff and North Carolina State Class members
28 suffered ascertainable losses and actual damages through their overpayment at the

1 time of purchase and lease for FCA and Honda Class Vehicles with an undisclosed
2 safety defect as a direct and proximate result of FCA's, Honda Japan's, Honda
3 USA's, and Honda Engineering USA's concealment, misrepresentations, and/or
4 failure to disclose material information.

5 3891. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
6 violations present a continuing risk to the North Carolina Plaintiff and North
7 Carolina State Class members, as well as to the general public, because the Class
8 Vehicles remain unsafe due to the defective ACUs and ASICs therein. Additionally,
9 their unlawful acts and practices complained of herein affect the public interest.

10 3892. Pursuant to N.C. Gen. Stat. § 75-16, the North Carolina Plaintiffs and
11 North Carolina State Class members seek an order enjoining FCA's, Honda
12 Japan's, Honda USA's, and Honda Engineering USA's unfair or deceptive acts or
13 practices and awarding damages and any other just and proper relief available under
14 the North Carolina UDTPA.

15 c. **North Carolina Count 3: Violation of the North Carolina**
16 **Unfair and Deceptive Trade Practices Act (N.C. Gen. Stat.**
17 **§ 75-1.1, et seq.) Against ZF Electronics USA, ZF Passive**
18 **Safety USA, ZF Automotive USA, ZF TRW Corp., ZF**
19 **Germany, ST Italy, ST USA, and ST Malaysia**

20 3893. Plaintiffs reallege and incorporate by reference all preceding
21 allegations as though fully set forth herein.

22 3894. Plaintiffs Constanza Gonzalez and Tonya McNeely bring this count
23 individually and on behalf of members of the North Carolina State Class against ZF
24 Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF TRW Corp.,
25 and ZF Germany (collectively, the "ZF Defendants"), and ST Italy, ST Malaysia,
26 and ST USA (collectively, the "ST Defendants").

27 3895. For purposes of this count, Plaintiffs Gonzalez and McNeely shall be
28 referred to as the "North Carolina Plaintiffs."

3896. The ZF and ST Defendants were and are engaged in "commerce"
within the meaning of N.C. Gen. Stat. § 75-1.1(b).

1 3897. The ZF and ST Defendants had an ongoing duty to the North Carolina
2 Plaintiffs and North Carolina State Class members to refrain from unfair or
3 deceptive practices under the North Carolina UDTPA in the course of their
4 business. Specifically, the ZF and ST Defendants owed the North Carolina
5 Plaintiffs and North Carolina State Class members a duty to disclose all the
6 material facts concerning the ACU Defect in the Class Vehicles because they
7 possessed exclusive knowledge and they intentionally concealed the ACU Defect
8 from the North Carolina Plaintiffs and North Carolina State Class members.

9 3898. In the course of their business, the ZF and ST Defendants, through
10 their agents, employees, and/or subsidiaries, violated the North Carolina UDTPA
11 by knowingly and intentionally omitting, concealing, and failing to disclose
12 material facts regarding the existence, nature, and scope of the defective ACU and
13 ASIC installed in the Class Vehicles, as detailed above.

14 3899. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
15 Automotive USA through their agents, employees, and/or subsidiaries, violated the
16 North Carolina UDTPA when they knowingly and intentionally misrepresented the
17 Class Vehicles as safe and reliable and the defective ACU and ASICs installed in
18 them as properly-functioning and free from defects. Specifically, ZF Electronics
19 USA, ZF Passive Safety USA, and ZF Automotive USA worked with the Vehicle
20 Manufacturer Defendants on the design and inclusion of the airbag readiness
21 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
22 Members that the Occupant Restraint Systems in the Class Vehicles would function
23 properly in a crash.

24 3900. By misrepresenting, failing to disclose, and actively concealing the
25 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
26 ST Defendants engaged in unfair methods of competition in or affecting commerce,
27 and unfair or deceptive acts or practices in or affecting commerce prohibited by
28 N.C. Gen. Stat. § 75-1.1(a).

1 3901. The ZF and ST Defendants’ unfair or deceptive acts or practices,
2 including their misrepresentations, concealments, omissions, and suppressions of
3 material facts, were designed to mislead and had a tendency or capacity to mislead
4 and create a false impression in consumers that the Class Vehicles had properly-
5 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
6 System did not contain the ACU Defect and would perform its intended function of
7 activating the seatbelts and airbags during a collision. Indeed, those
8 misrepresentations, concealments, omissions, and suppressions of material facts did
9 in fact deceive reasonable consumers, including the North Carolina Plaintiffs and
10 North Carolina State Class members, about the true safety and reliability of Class
11 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
12 Class Vehicles, and the true value of the Class Vehicles.

13 3902. The North Carolina Plaintiffs and North Carolina State Class members
14 justifiably relied on the ZF and ST Defendants’ misrepresentations, omissions, and
15 concealment, as they had no way of discerning that the Class Vehicles contained
16 the ACU Defect, as alleged above. The North Carolina Plaintiff and North Carolina
17 State Class members did not, and could not, unravel the ZF and ST Defendants’
18 deception on their own

19 3903. The ZF and ST Defendants’ misrepresentations and concealment of the
20 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
21 Vehicles were material to the decisions of the North Carolina Plaintiffs and North
22 Carolina State Class members to purchase and lease Class Vehicles, as the ZF and
23 ST Defendants intended. Had they known the truth, the North Carolina Plaintiffs
24 and North Carolina State Class members would not have purchased or leased the
25 Class Vehicles, or would have paid significantly less for them.

26 3904. The North Carolina Plaintiffs and North Carolina State Class members
27 suffered ascertainable losses and actual damages as a direct and proximate result of
28

1 the ZF and ST Defendants’ misrepresentations, concealment and/or failure to
2 disclose material information.

3 3905. The ZF and ST Defendants’ violations present a continuing risk to the
4 North Carolina Plaintiffs and North Carolina State Class members, as well as to the
5 general public, because the Class Vehicles remain unsafe due to the defective
6 ACUs and ASICs therein. The ZF and ST Defendants’ unlawful acts and practices
7 complained of herein affect the public interest.

8 3906. Pursuant to N.C. Gen. Stat. § 75-1.1(a), the North Carolina Plaintiffs
9 and North Carolina State Class members seek an order enjoining the ZF and ST
10 Defendants’ unfair or deceptive acts or practices and awarding damages and any
11 other just and proper relief available under the North Carolina UDTPA.

12 **d. North Carolina Count 4: Fraud by Omission and**
13 **Concealment Against FCA, Honda Japan, Honda USA, and**
14 **Honda Engineering USA**

15 3907. Plaintiffs reallege and incorporate by reference all preceding
16 allegations as though fully set forth herein.

17 3908. Plaintiff Constanza Gonzalez brings this count individually and on
18 behalf of members of the North Carolina State Class who purchased or leased FCA
19 Class Vehicles, against FCA.

20 3909. Plaintiff Tonya McNeely brings this count individually and on behalf
21 of members of the North Carolina State Class who purchased or leased Honda
22 Class Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

23 3910. For purposes of this count, Plaintiffs Gonzalez and McNeely shall be
24 referred to as the “North Carolina Plaintiffs.”

25 3911. FCA, Honda Japan, Honda USA, and Honda Engineering USA are
26 liable for both fraudulent concealment and non-disclosure. *See, e.g.*, Restatement
(Second) of Torts §§ 550-51 (1977).

27 3912. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
28 serious risks to vehicle occupants, including that it can cause: (1) airbags and

1 seatbelts not to activate during a crash because crashes can sometimes release
2 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
3 vehicle has not crashed, which is dangerous because it is shocking and difficult for
4 the driver to operate a vehicle when the airbag deploys without warning; and (3)
5 failures of other important post-crash operations of the safety system, such as
6 unlocking doors to facilitate escape or extraction of drivers and passengers by
7 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

8 3913. FCA, Honda Japan, Honda USA, and Honda Engineering USA had a
9 duty to disclose the ACU Defect to the North Carolina Plaintiffs and North
10 Carolina State Class members because:

- 11 a. FCA, Honda Japan, Honda USA, and Honda Engineering USA
12 had exclusive access to and far superior knowledge about
13 technical facts regarding the ACU Defect;
- 14 b. Given the ACU Defect's hidden and technical nature, the North
15 Carolina Plaintiffs and North Carolina State Class members lack
16 the sophisticated expertise in vehicle components and electrical
17 phenomena that would be necessary to discover the ACU Defect
18 on their own;
- 19 c. FCA, Honda Japan, Honda USA, and Honda Engineering USA
20 knew that the ACU Defect gave rise to serious safety concerns
21 for the consumers who use the vehicles, and the FCA and Honda
22 Class Vehicles containing the ACU Defect would have been a
23 material fact to the North Carolina Plaintiffs' and North Carolina
24 State Class members' decisions to buy or lease FCA and Honda
25 Class Vehicles; and
- 26 d. FCA, Honda Japan, Honda USA, and Honda Engineering USA
27 made incomplete representations about the safety and reliability
28 of the FCA and Honda Class Vehicles and their Occupant

1 Restraint System, while purposefully withholding material facts
2 about a known safety defect. In uniform advertising and
3 materials provided with each Class Vehicle, FCA, Honda Japan,
4 Honda USA, and Honda Engineering USA intentionally
5 concealed, suppressed, and failed to disclose to the North
6 Carolina Plaintiffs and North Carolina State Class members that
7 the FCA and Honda Class Vehicles contained the ACU Defect.
8 Because they volunteered to provide information about the FCA
9 and Honda Class Vehicles that they marketed and offered for
10 sale and lease to the North Carolina Plaintiffs and North
11 Carolina State Class members, FCA, Honda Japan, Honda USA,
12 and Honda Engineering USA had the duty to disclose the whole
13 truth.

14 3914. In breach of their duties, FCA, Honda Japan, Honda USA, and Honda
15 Engineering USA failed to disclose that the FCA and Honda Class Vehicles were
16 not safe and reliable, and that their Occupant Restraint Systems, including their
17 airbags and seatbelt pretensioners could fail in the event of a crash due to the ACU
18 Defect.

19 3915. FCA, Honda Japan, Honda USA, and Honda Engineering USA
20 intended for the North Carolina Plaintiffs and North Carolina State Class members
21 to rely on their omissions—which they did by purchasing and leasing the FCA and
22 Honda Class Vehicles at the prices they paid believing that the Occupant Restraint
23 Systems in their Class Vehicles would function properly.

24 3916. That reliance was reasonable, because a reasonable consumer would
25 not have expected that the FCA and Honda Class Vehicles contained a safety defect
26 that poses such a serious risk. FCA, Honda Japan, Honda USA, and Honda
27 Engineering USA knew that reasonable consumers expect that their vehicle has
28 working airbags and seatbelt pretensioners and would rely on those facts in

1 deciding whether to purchase, lease, or retain a new or used motor vehicle. Whether
2 a manufacturer's products are safe and reliable, and whether that manufacturer
3 stands behind its products, are material concerns to a consumer. Especially here
4 when at least nine people have already died due to the ACU Defect, and many more
5 have been injured.

6 3917. Additionally, FCA, Honda Japan, Honda USA, and Honda
7 Engineering USA ensured that the North Carolina Plaintiffs and North Carolina
8 State Class members did not discover this information by actively concealing and
9 misrepresenting the true nature of the FCA and Honda Class Vehicles' Occupant
10 Restraint Systems to consumers and NHTSA.

11 3918. FCA, Honda Japan, Honda USA, and Honda Engineering USA
12 actively concealed and suppressed these material facts, in whole or in part, to
13 maintain a market for their Class Vehicles, to protect profits, and to avoid costly
14 recalls that would expose them to liability for those expenses and harm the
15 commercial reputations of Defendants and their products. They did so at the
16 expense of the North Carolina Plaintiffs and North Carolina State Class members.

17 3919. To this day, FCA, Honda Japan, Honda USA, and Honda Engineering
18 USA have not fully and adequately disclosed the ACU Defect, and they continue to
19 conceal material information about the defect from consumers and NHTSA. The
20 omitted and concealed facts were material because a reasonable person would find
21 them important in purchasing, leasing, or retaining a new or used motor vehicle,
22 and because they directly impact the value of the FCA and Honda Class Vehicles
23 purchased or leased by the North Carolina Plaintiffs and North Carolina State Class
24 members.

25 3920. Had they been aware of the ACU Defect in the FCA and Honda Class
26 Vehicles, and FCA's, Honda Japan's, Honda USA's, and Honda Engineering
27 USA's callous disregard for safety, the North Carolina Plaintiffs and North
28

1 Carolina State Class members either would not have paid as much as they did for
2 their Class Vehicles, or they would not have purchased or leased them.

3 3921. As alleged in Section V above, if FCA, Honda Japan, Honda USA, and
4 Honda Engineering USA had fully and adequately disclosed the ACU Defect to
5 consumers and NHTSA, the North Carolina Plaintiffs and North Carolina State
6 Class members would have seen such a disclosure.

7 3922. Accordingly, FCA, Honda Japan, Honda USA, and Honda
8 Engineering USA are liable to the North Carolina Plaintiffs and North Carolina
9 State Class members for their damages in an amount to be proven at trial, including,
10 but not limited to, their lost overpayment for the FCA and Honda Class Vehicles at
11 the time of purchase or lease.

12 3923. FCA's, Honda Japan's, Honda USA's, and Honda Engineering USA's
13 acts were done maliciously, oppressively, deliberately, with intent to defraud; in
14 reckless disregard of the North Carolina Plaintiffs' and North Carolina State Class
15 members' rights and well-being; and to enrich themselves. FCA's, Honda Japan's,
16 Honda USA's, and Honda Engineering USA's misconduct warrants an assessment
17 of punitive damages, as permitted by law, in an amount sufficient to deter such
18 conduct in the future, which amount shall be determined according to proof at trial.

19 **e. North Carolina Count 5: Fraud by Omission and**
20 **Concealment Against ZF Electronics USA, ZF Passive**
21 **Safety USA, ZF Automotive USA, ZF TRW Corp., ZF**
22 **Germany, ST Italy, ST USA, and ST Malaysia**

23 3924. Plaintiffs reallege and incorporate by reference all preceding
24 allegations as though fully set forth herein.

25 3925. The North Carolina Plaintiffs bring this count individually and on
26 behalf of members of the North Carolina State Class who purchased or leased Class
27 Vehicles, against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive
28 USA, ZF TRW Corp., and ZF Germany (collectively, the "ZF Defendants"), and
ST Italy, ST Malaysia, and ST USA (collectively, the "ST Defendants").

1 3926. The ZF and ST Defendants are liable for both fraudulent concealment
2 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

3 3927. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
4 serious risks to vehicle occupants, including that it can cause: (1) airbags and
5 seatbelts not to activate during a crash because crashes can sometimes release
6 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
7 vehicle has not crashed, which is dangerous because it is shocking and difficult for
8 the driver to operate a vehicle when the airbag deploys without warning; and (3)
9 failures of other important post-crash operations of the safety system, such as
10 unlocking doors to facilitate escape or extraction of drivers and passengers by
11 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

12 3928. The ZF and ST Defendants had a duty to disclose the ACU Defect to
13 the North Carolina Plaintiffs and North Carolina State Class members because:

- 14 a. The ZF and ST Defendants had exclusive access to and far
15 superior knowledge about technical facts regarding the ACU
16 Defect;
- 17 b. Given the ACU Defect’s hidden and technical nature, the North
18 Carolina Plaintiffs and North Carolina State Class members lack
19 the sophisticated expertise in vehicle components and electrical
20 phenomena that would be necessary to discover the ACU Defect
21 on their own;
- 22 c. The ZF and ST Defendants knew that the ACU Defect gave rise
23 to serious safety concerns for the consumers who use the
24 vehicles, and the Class Vehicles containing the ACU Defect
25 would have been a material fact to the North Carolina Plaintiffs’
26 and North Carolina State Class members’ decisions to buy or
27 lease Class Vehicles; and

28

1 d. The ZF Defendants made incomplete representations about the
2 safety and reliability of the Class Vehicles and their Occupant
3 Restraint System, while purposefully withholding material facts
4 about a known safety defect, creating a duty to disclose the
5 whole truth. Specifically, ZF Electronics USA, ZF Passive
6 Safety USA, and ZF Automotive USA worked with the Vehicle
7 Manufacturer Defendants on the design and inclusion of the
8 airbag readiness indicators in the Class Vehicles, which falsely
9 assured Plaintiffs and Class Members that the Occupant
10 Restraint Systems in the Class Vehicles would function properly
11 in a crash.

12 3929. In breach of their duties, the ZF and ST Defendants failed to disclose
13 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
14 Systems, including their airbags and seatbelt pretensioners could fail in the event of
15 a crash due to the ACU Defect.

16 3930. The ZF and ST Defendants intended for the North Carolina Plaintiffs
17 and North Carolina State Class members to rely on their omissions—which they did
18 by purchasing and leasing the Class Vehicles at the prices they paid believing that
19 the Occupant Restraint Systems in their Class Vehicles would function properly.

20 3931. That reliance was reasonable, because a reasonable consumer would
21 not have expected that the Class Vehicles contained a safety defect that poses such
22 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
23 that their vehicle has working airbags and seatbelt pretensioners and would rely on
24 those facts in deciding whether to purchase, lease, or retain a new or used motor
25 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
26 manufacturer stands behind its products, are material concerns to a consumer.
27 Especially here when at least nine people have already died due to the ACU Defect,
28 and many more have been injured.

1 3932. Additionally, the ZF and ST Defendants ensured that the North
2 Carolina Plaintiffs and North Carolina State Class members did not discover this
3 information by actively concealing and misrepresenting the true nature of the Class
4 Vehicles' Occupant Restraint Systems to consumers and NHTSA.

5 3933. The ZF and ST Defendants actively concealed and suppressed these
6 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
7 protect profits, and to avoid costly recalls that would expose them to liability for
8 those expenses and harm the commercial reputations of Defendants and their
9 products. They did so at the expense of the North Carolina Plaintiffs and North
10 Carolina State Class members.

11 3934. To this day, the ZF and ST Defendants have not fully and adequately
12 disclosed the ACU Defect, and they continue to conceal material information about
13 the defect from consumers and NHTSA. The omitted and concealed facts were
14 material because a reasonable person would find them important in purchasing,
15 leasing, or retaining a new or used motor vehicle, and because they directly impact
16 the value of the Class Vehicles purchased or leased by the North Carolina Plaintiffs
17 and North Carolina State Class members.

18 3935. Had they been aware of the ACU Defect in the Class Vehicles, and the
19 ZF and ST Defendants' callous disregard for safety, the North Carolina Plaintiffs
20 and North Carolina State Class members either would not have paid as much as
21 they did for their Class Vehicles, or they would not have purchased or leased them.

22 3936. As alleged in Section V above, if the ZF and ST Defendants had fully
23 and adequately disclosed the ACU Defect to consumers and NHTSA, the North
24 Carolina Plaintiffs and North Carolina State Class members would have seen such a
25 disclosure.

26 3937. Accordingly, the ZF and ST Defendants are liable to the North
27 Carolina Plaintiffs and North Carolina State Class members for their damages in an
28

1 amount to be proven at trial, including, but not limited to, their lost overpayment
2 for the Class Vehicles at the time of purchase or lease.

3 3938. The ZF and ST Defendants' acts were done maliciously, oppressively,
4 deliberately, with intent to defraud; in reckless disregard of the North Carolina
5 Plaintiffs' and North Carolina State Class members' rights and well-being; and to
6 enrich themselves. The ZF and ST Defendants' misconduct warrants an assessment
7 of punitive damages, as permitted by law, in an amount sufficient to deter such
8 conduct in the future, which amount shall be determined according to proof at trial.

9 **f. North Carolina Count 6: Unjust Enrichment Against Honda**
10 **Japan, Honda Engineering USA, and Honda USA**

11 3939. Plaintiffs reallege and incorporate by reference all allegations in
12 Sections I- VI above as though fully set forth herein.

13 3940. Plaintiff Tonya McNeely (for purposes of this count, the "North
14 Carolina Plaintiff"), brings this count individually and on behalf of members of the
15 North Carolina State Class who purchased or leased Honda Class Vehicles, against
16 Honda Japan, Honda Engineering USA, and Honda USA.

17 3941. The North Carolina Plaintiff and North Carolina State Class members
18 conferred tangible and material monetary benefits upon Honda Japan, Honda
19 Engineering USA, and Honda USA when they purchased or leased the Honda Class
20 Vehicles. Honda Japan, Honda Engineering USA, and Honda USA readily accepted
21 and retained these benefits.

22 3942. The North Carolina Plaintiff and North Carolina State Class members
23 would not have purchased or leased the Honda Class Vehicles, or would have paid
24 less for them, had they known of the ACU Defect at the time of purchase or lease.
25 Therefore, Honda Japan, Honda Engineering USA, and Honda USA profited from
26 the sale and lease of the Honda Class Vehicles to the detriment and expense of the
27 North Carolina Plaintiff and North Carolina State Class members.

28

1 3943. Honda Japan, Honda Engineering USA, and Honda USA appreciated
2 these monetary benefits. These benefits were the expected result of Honda Japan,
3 Honda Engineering USA, and Honda USA acting in their pecuniary interest at the
4 expense of their customers. Honda Japan, Honda Engineering USA, and Honda
5 USA knew of these benefits because they were aware of the ACU Defect, yet they
6 failed to disclose this knowledge and misled the North Carolina Plaintiff and North
7 Carolina State Class members regarding the nature and quality of the Honda Class
8 Vehicles while profiting from this deception.

9 3944. It would be unjust, inequitable, and unconscionable for Honda Japan,
10 Honda Engineering USA, and Honda USA to retain these monetary benefits,
11 including because they were procured as a result of Honda Japan's, Honda
12 Engineering USA's, and Honda USA's wrongful conduct alleged above.

13 3945. The North Carolina Plaintiff and North Carolina State Class members
14 are entitled to restitution of the benefits Honda Japan, Honda Engineering USA,
15 and Honda USA unjustly retained and/or any amounts necessary to return the North
16 Carolina Plaintiff and North Carolina State Class members to the position they
17 occupied prior to dealing with Honda Japan, Honda Engineering USA, and Honda
18 USA, with such amounts to be determined at trial.

19 3946. The North Carolina Plaintiff pleads this claim separately as well as in
20 the alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if
21 the North Carolina Plaintiff's claims for damages are dismissed or judgment is
22 entered in favor of Defendants, the North Carolina Plaintiff would have no adequate
23 legal remedy.

24 **18. Oklahoma**

25 **a. Oklahoma Count 1: Breach of Express Warranty (Okla.**
26 **Stat. Ann. tit. 12A, §§ 2-313 and 2A-210) Against FCA**

27 3947. Plaintiffs reallege and incorporate by reference all preceding
28 allegations as though fully set forth herein.

1 3948. Plaintiff James Dean (hereinafter, “Oklahoma Plaintiff”) brings this
2 count individually and on behalf of members of the Oklahoma State Class who
3 purchased or leased FCA Class Vehicles, against FCA.

4 3949. FCA is and was at all relevant times a “merchant” with respect to
5 motor vehicles under Okla. Stat. Ann. tit. 12A, §§ 2-104(1) and 2-A-103(3), and a
6 “seller” of motor vehicles under § 2-103(1)(c).

7 3950. With respect to leases, FCA is and was at all relevant times a “lessor”
8 of motor vehicles under Okla. Stat. Ann. tit. 12A, § 2A-103(1)(p).

9 3951. All Oklahoma State Class members who purchased FCA Class
10 Vehicles in Oklahoma are “buyers” within the meaning of Okla. Stat. Ann. tit. 12A,
11 § 2-103(1)(a).

12 3952. All Oklahoma State Class members who leased FCA Class Vehicles in
13 Oklahoma are “lessees” within the meaning of Okla. Stat. Ann. tit. 12A, § 2A-
14 103(1)(n).

15 3953. The FCA Class Vehicles are and were at all relevant times “goods”
16 within the meaning of Okla. Stat. Ann. tit. 12A, §§ 2-105(1) and 2A-103(1)(h).

17 3954. In connection with the purchase or lease of FCA Class Vehicles, FCA
18 provided the Oklahoma Plaintiff and Oklahoma State Class members with
19 warranties in the form of: (a) written express warranties covering the repair or
20 replacement of components that are defective in materials or workmanship, and (b)
21 descriptions of the FCA Class Vehicles as safe and reliable, and that their Occupant
22 Restraint Systems, including their airbags and seatbelt pretensioners, would
23 function properly in the event of a crash.

24 3955. However, FCA knew or should have known that the warranties were
25 false and/or misleading. Specifically, FCA was aware of the ACU Defect in the
26 FCA Class Vehicles, which made the vehicles inherently defective and dangerous
27 at the time that they were sold and leased to the Oklahoma Plaintiff and Oklahoma
28 State Class members.

1 3956. The Oklahoma Plaintiff and Oklahoma State Class members were
2 aware the Honda Class Vehicles were covered by express warranties, and those
3 warranties were an essential part of the bargain between them and FCA when the
4 Oklahoma Plaintiff and Oklahoma State Class members unknowingly purchased
5 and leased FCA Class Vehicles that came equipped with defective ACUs and
6 ASICs.

7 3957. FCA misrepresented the FCA Class Vehicles as safe and reliable while
8 concealing that they contained the ACU Defect, the Oklahoma Plaintiff and
9 Oklahoma State Class members were exposed to those misrepresentations, and the
10 Oklahoma Plaintiff and Oklahoma State Class members had no way of discerning
11 that FCA's representations were false and misleading or otherwise learning the
12 material facts that FCA had concealed or failed to disclose. Accordingly, the
13 Oklahoma Plaintiff and Oklahoma State Class members reasonably relied on the
14 FCA's express warranties when purchasing or leasing their FCA Class Vehicles.
15 Plaintiffs allege the information they relied upon in Section II.B above. To aid
16 review of this information, Exhibit 19 provides paragraph numbers for each
17 Plaintiff.

18 3958. FCA knowingly breached its express warranties to repair defects in
19 materials and workmanship by failing to repair the ACU Defect or replace the
20 defective ACUs and ASICs in the FCA Class Vehicles. FCA also breached its
21 express warranties by selling and leasing FCA Class Vehicles with a defect that
22 was never disclosed to the Oklahoma Plaintiff and Oklahoma State Class members.

23 3959. The Oklahoma Plaintiff and Oklahoma State Class members have
24 provided FCA with reasonable notice and opportunity to cure the breaches of their
25 express warranties by way of the numerous NHTSA complaints filed against it, and
26 the individual notice letters sent by Oklahoma State Class members within a
27 reasonable amount of time after the ACU Defect became public. Additionally, on
28

1 April 24, 2020, a notice letter was sent on behalf of the Oklahoma Plaintiff and
2 Oklahoma State Class members to FCA.

3 3960. Alternatively, the Oklahoma Plaintiff and Oklahoma State Class
4 members were excused from providing FCA with notice and an opportunity to cure
5 the breach, because it would have been futile. As alleged above, FCA has long
6 known that the FCA Class Vehicles contained the ACU Defect, and that the ACU
7 Defect has caused ACUs and ASICs to malfunction in crashes involving Class
8 Vehicles; however, to date, FCA has not instituted a recall or any other repair
9 program with respect to the unrecalled FCA Class Vehicles, or even acknowledged
10 that the ACU Defect exists in all FCA Class Vehicles, including the recalled FCA
11 Class Vehicles—even though FCA Class Vehicles are subject to the NHTSA
12 investigation. Therefore, the Oklahoma Plaintiff and Oklahoma State Class
13 members had no reason to believe that FCA would have repaired the ACU Defect if
14 the Oklahoma Plaintiff and Oklahoma State Class members presented their Class
15 Vehicles to it for repair.

16 3961. As a direct and proximate result of FCA’s breach of their express
17 warranties, the FCA Class Vehicles were and are defective and the ACU Defect in
18 the Oklahoma Plaintiff’s and Oklahoma State Class members’ FCA Class Vehicles
19 was not remedied. Therefore, the Oklahoma Plaintiff and Oklahoma State Class
20 members have been damaged, in an amount to be proven at trial, through their
21 overpayment at the time of purchase or lease for FCA Class Vehicles with an
22 undisclosed safety defect that would not be remedied.

23 **b. Oklahoma Count 2: Breach of Implied Warranty of**
24 **Merchantability (Okla. Stat. Ann. tit. 12A, §§ 2-314 and 2A-**
25 **212) Against FCA**

26 3962. Plaintiffs reallege and incorporate by reference all preceding
27 allegations as though fully set forth herein.
28

1 3963. The Oklahoma Plaintiff brings this count individually and on behalf of
2 members of the Oklahoma State Class who purchased or leased FCA Class
3 Vehicles, against FCA.

4 3964. A warranty that the FCA Class Vehicles were in merchantable
5 condition and fit for the ordinary purpose for which such goods are used is implied
6 by law pursuant to Okla. Stat. Ann. tit. 12A, §§ 2-314 and 2A-212.

7 3965. FCA is and was at all relevant times a “merchant” with respect to
8 motor vehicles under Okla. Stat. Ann. tit. 12A, §§ 2-104(1) and 2-A-103(3), and a
9 “seller” of motor vehicles under § 2-103(1)(c).

10 3966. With respect to leases, FCA is and was at all relevant times a “lessor”
11 of motor vehicles under Okla. Stat. Ann. tit. 12A, § 2A-103(1)(p).

12 3967. All Oklahoma State Class members who purchased FCA Class
13 Vehicles in Oklahoma are “buyers” within the meaning of Okla. Stat. Ann. tit. 12A,
14 § 2-103(1)(a).

15 3968. All Oklahoma State Class members who leased FCA Class Vehicles in
16 Oklahoma are “lessees” within the meaning of Okla. Stat. Ann. tit. 12A, § 2A-
17 103(1)(n).

18 3969. The FCA Class Vehicles were at all relevant times “goods” within the
19 meaning of Okla. Stat. Ann. tit. 12A, §§ 2-105(1) and 2A-103(1)(h).

20 3970. The FCA Class Vehicles did not comply with the implied warranty of
21 merchantability because, at the time of sale and lease and at all times thereafter,
22 they were defective and not in merchantable condition, would not pass without
23 objection in the trade, and were not fit for the ordinary purpose for which vehicles
24 were used. Specifically, at the time they were sold and leased, the FCA Class
25 Vehicles contained the ACU Defect, which may cause the airbags and seatbelt
26 pretensioners to fail to deploy during a crash, the failure to unlock doors
27 automatically after a crash, the failure to turn off a fuel supply or high-voltage
28

1 battery after a crash, or the airbags to inadvertently deploy, all of which render the
2 FCA Class Vehicles inherently defective and dangerous.

3 3971. The Oklahoma Plaintiff and Oklahoma State Class members have
4 provided FCA with reasonable notice and opportunity to cure the breaches of its
5 implied warranties by way of the numerous NHTSA complaints filed against it, and
6 the individual notice letters sent by Oklahoma State Class members within a
7 reasonable amount of time after the ACU Defect became public. Additionally, on
8 April 24, 2020, a notice letter was sent on behalf of the Oklahoma Plaintiff and
9 Oklahoma State Class members to FCA.

10 3972. Alternatively, the Oklahoma Plaintiff and Oklahoma State Class
11 members were excused from providing FCA with notice and an opportunity to cure
12 the breach, because it would have been futile. As alleged above, FCA has long
13 known that the FCA Class Vehicles contained the ACU Defect, and that the ACU
14 Defect has caused ACUs and ASICs to malfunction in crashes involving Class
15 Vehicles; however, to date, FCA has not instituted a recall or any other repair
16 program with respect to the unrecalled FCA Class Vehicles, or even acknowledged
17 that the ACU Defect exists in all FCA Class Vehicles, including the recalled FCA
18 Class Vehicles—even though FCA Class Vehicles are subject to the NHTSA
19 investigation. Therefore, the Oklahoma Plaintiff and Oklahoma State Class
20 members had no reason to believe that FCA would have repaired the ACU Defect if
21 the Oklahoma Plaintiff and Oklahoma State Class members presented their Class
22 Vehicles to it for repair.

23 3973. As a direct and proximate result of FCA's breach of the implied
24 warranty of merchantability, the Oklahoma Plaintiff and Oklahoma State Class
25 members have been damaged through their overpayment at the time of purchase or
26 lease for FCA Class Vehicles with an undisclosed safety defect in an amount to be
27 proven at trial.

28

1 **c. Oklahoma Count 3: Violation of the Oklahoma Consumer**
2 **Protection Act (Okla. Stat. Ann. tit. 15, § 751, et seq.)**
3 **Against FCA¹⁷**

4 3974. Plaintiffs reallege and incorporate by reference all preceding
5 allegations as though fully set forth herein.

6 3975. The Oklahoma Plaintiff brings this count individually and on behalf of
7 members of the Oklahoma State Class who purchased or leased FCA Class
8 Vehicles, against FCA.

9 3976. FCA, the Oklahoma Plaintiff, and the Oklahoma State Class members
10 are “persons” within the meaning of Okla. Stat. tit. 15, § 752(1).

11 3977. FCA is and was engaged in “consumer transactions” within the
12 meaning of Okla. Stat. tit. 15, § 752(2).

13 3978. The FCA Class Vehicles and ACUs installed in them are
14 “merchandise” within the meaning of Okla. Stat. tit. 15, § 752(7).

15 3979. The Oklahoma Consumer Protection Act (“Oklahoma CPA”) prohibits
16 deceptive and unfair trade practices.

17 3980. In the course of its business, FCA, through its agents, employees,
18 and/or subsidiaries, violated the Oklahoma CPA by knowingly and intentionally
19 misrepresenting, omitting, concealing, and/or failing to disclose material facts
20 regarding the reliability, safety, and performance of the FCA Class Vehicles, the
21 safety of their Occupant Restraint Systems, and the ACU Defect, as detailed above.

22 3981. FCA had an ongoing duty to the Oklahoma Plaintiff and Oklahoma
23 State Class members to refrain from unfair or deceptive practices under the
24 Oklahoma CPA in the course of its business. Specifically, FCA owed the Oklahoma
25 Plaintiff and Oklahoma State Class members a duty to disclose all the material facts
26 concerning the ACU Defect in the FCA Class Vehicles because it possessed
27 exclusive knowledge, it intentionally concealed the ACU Defect from the

28 ¹⁷ The Court held in its February 9, 2022 Order that the Oklahoma Plaintiff had
 sufficiently plead an Oklahoma Consumer Protection Act claim against FCA. *See*
 ECF No. 396 at 113.

1 Oklahoma Plaintiff and Oklahoma State Class members, and/or it made
2 misrepresentations that were rendered misleading because they were contradicted
3 by withheld facts.

4 3982. By misrepresenting the FCA Class Vehicles as safe and reliable and
5 the defective ACU and ASICs installed in them as properly-functioning and free
6 from defects, and by failing to disclose and actively concealing the dangers and risk
7 posed by the ACU Defect to both consumers and NHTSA, FCA engaged in one or
8 more of the following unfair or deceptive business practices prohibited by Okla.
9 Stat. tit. 15, § 753:

- 10 a. Representing that the FCA Class Vehicles and/or the defective
11 ACUs installed in them are approved and certified as safe and
12 reliable;
- 13 b. Representing that the FCA Class Vehicles and/or the defective
14 ACUs installed in them are of a particular standard, quality, and
15 grade when they are not;
- 16 c. Advertising the FCA Class Vehicles and/or the defective ACUs
17 installed in them as safe and free from defects, with the intent
18 not to sell or lease them as advertised; and
- 19 d. Engaging in the immoral, unethical, oppressive, unscrupulous,
20 or substantially injurious to consumers described above, which
21 offends established public policy.

22 Okla. Stat. tit. 15, §§ 753(5), (7), (8), and (20).

23 3983. FCA's unfair and deceptive acts or practices, including their
24 misrepresentations, concealments, omissions, and suppressions of material facts,
25 were designed to mislead and had a tendency or capacity to mislead and create a
26 false impression in consumers that the FCA Class Vehicles had properly-
27 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
28 System did not contain the ACU Defect and would perform its intended function of

1 activating the seatbelts and airbags during a collision. Indeed, those
2 misrepresentations, concealments, omissions, and suppressions of material facts did
3 in fact deceive reasonable consumers, including the Oklahoma Plaintiff and
4 Oklahoma State Class members, about the true safety and reliability of FCA Class
5 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
6 FCA Class Vehicles, and the true value of the FCA Class Vehicles.

7 3984. FCA's misrepresentations, concealments, omissions, and suppressions
8 of material facts regarding the ACU Defect and true characteristics of the Occupant
9 Restraint Systems in the FCA Class Vehicles were material to the decisions of the
10 Oklahoma Plaintiff and Oklahoma State Class members to purchase and lease those
11 vehicles, as FCA intended. The Oklahoma Plaintiff and Oklahoma State Class
12 members were exposed to those misrepresentations, concealments, omissions, and
13 suppressions of material facts, and relied on FCA's misrepresentations that the FCA
14 Class Vehicles and their Occupant Restraint Systems were safe and reliable in
15 deciding to purchase and lease FCA Class Vehicles. Plaintiffs allege the
16 information they relied upon in Section II.B above. To aid review of this
17 information, Exhibit 19 provides paragraph numbers for each Plaintiff.

18 3985. The Oklahoma Plaintiff's and Oklahoma State Class members'
19 reliance was reasonable, as they had no way of discerning that FCA's
20 representations were false and misleading, or otherwise learning the facts that FCA
21 had concealed or failed to disclose. The Oklahoma Plaintiff and Oklahoma State
22 Class members did not, and could not, unravel FCA's deception on their own.

23 3986. Had the Oklahoma Plaintiff and Oklahoma State Class members
24 known the truth about the ACU Defect, the Oklahoma Plaintiff and Oklahoma State
25 Class members would not have purchased or leased FCA Class Vehicles, or would
26 have paid significantly less for them.

27 3987. The Oklahoma Plaintiff and Oklahoma State Class members suffered
28 ascertainable losses and actual damages through their overpayment at the time of

1 purchase and lease for FCA Class Vehicles with an undisclosed safety defect as a
2 direct and proximate result of FCA’s concealment, misrepresentations, and/or
3 failure to disclose material information.

4 3988. FCA’s violations present a continuing risk to the Oklahoma Plaintiff
5 and Oklahoma State Class members, as well as to the general public, because the
6 Class Vehicles remain unsafe due to the defective ACUs and ASICs therein.
7 Additionally, FCA’s unlawful acts and practices complained of herein affect the
8 public interest.

9 3989. Pursuant to Okla. Stat. tit. 15, § 761.1, the Oklahoma Plaintiff and
10 Oklahoma State Class members seek an order enjoining the FCA’s unfair or
11 deceptive acts or practices and awarding damages and any other just and proper
12 relief available under the Oklahoma CPA.

13 **d. Oklahoma Count 4: Violation of the Oklahoma Consumer**
14 **Protection Act (Okla. Stat. Ann. tit. 15, § 751, et seq.)**
15 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
16 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
17 **ST USA, and ST Malaysia.**

18 3990. Plaintiffs reallege and incorporate by reference all preceding
19 allegations as though fully set forth herein.

20 3991. The Oklahoma Plaintiff brings this count individually and on behalf of
21 members of the Oklahoma State Class against ZF Electronics USA, ZF Passive
22 Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively,
23 the “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the
24 “ST Defendants”).

25 3992. The ZF Defendants, the ST Defendants, the Oklahoma Plaintiff, and
26 Oklahoma State Class members are “persons” within the meaning of Okla. Stat. tit.
27 15, § 752(1).

28 3993. The ZF and ST Defendants were and are engaged in “consumer
transactions” within the meaning of Okla. Stat. tit. 15, § 752(2).

1 3994. The Class Vehicles and ACUs installed in them are “merchandise”
2 within the meaning of Okla. Stat. tit. 15, § 752(7).

3 3995. The Oklahoma CPA prohibits deceptive and unfair trade practices.

4 3996. In the course of their business, the ZF and ST Defendants, through
5 their agents, employees, and/or subsidiaries, violated the Oklahoma CPA by
6 knowingly and intentionally omitting, concealing, and failing to disclose material
7 facts regarding the existence, nature, and scope of the defective ACU and ASIC
8 installed in the Class Vehicles, as detailed above.

9 3997. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
10 Automotive USA through their agents, employees, and/or subsidiaries, violated the
11 Oklahoma CPA when they knowingly and intentionally misrepresented the Class
12 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
13 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
14 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
15 Manufacturer Defendants on the design and inclusion of the airbag readiness
16 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
17 Members that the Occupant Restraint Systems in the Class Vehicles would function
18 properly in a crash.

19 3998. By misrepresenting, failing to disclose, and actively concealing the
20 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
21 ST Defendants engaged in deceptive acts or practices prohibited by Okla. Stat. tit.
22 15, § 753.

23 3999. The ZF and ST Defendants’ unfair or deceptive acts or practices,
24 including their misrepresentations, concealments, omissions, and suppressions of
25 material facts, were designed to mislead and had a tendency or capacity to mislead
26 and create a false impression in consumers that the Class Vehicles had properly-
27 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
28 System did not contain the ACU Defect and would perform its intended function of

1 activating the seatbelts and airbags during a collision. Indeed, those
2 misrepresentations, concealments, omissions, and suppressions of material facts did
3 in fact deceive reasonable consumers, including the Oklahoma Plaintiff and
4 Oklahoma State Class members, about the true safety and reliability of Class
5 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
6 Class Vehicles, and the true value of the Class Vehicles.

7 4000. The Oklahoma Plaintiff and Oklahoma State Class members justifiably
8 relied on the ZF and ST Defendants' misrepresentations, omissions, and
9 concealment, as they had no way of discerning that the Class Vehicles contained
10 the ACU Defect, as alleged above. The Oklahoma Plaintiff and Oklahoma State
11 Class members did not, and could not, unravel the ZF and ST Defendants'
12 deception on their own

13 4001. The ZF and ST Defendants' misrepresentations and concealment of the
14 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
15 Vehicles were material to the decisions of the Oklahoma Plaintiff and Oklahoma
16 State Class members to purchase and lease Class Vehicles, as the ZF and ST
17 Defendants intended. Had they known the truth, the Oklahoma Plaintiff and
18 Oklahoma State Class members would not have purchased or leased the Class
19 Vehicles, or would have paid significantly less for them.

20 4002. The Oklahoma Plaintiff and Oklahoma State Class members suffered
21 ascertainable losses and actual damages as a direct and proximate result of the ZF
22 and ST Defendants' misrepresentations, concealment and/or failure to disclose
23 material information.

24 4003. The ZF and ST Defendants' violations present a continuing risk to the
25 Oklahoma Plaintiff and Oklahoma State Class members, as well as to the general
26 public, because the Class Vehicles remain unsafe due to the defective ACUs and
27 ASICs therein. The ZF and ST Defendants' unlawful acts and practices complained
28 of herein affect the public interest.

1 4004. Pursuant to Okla. Stat. tit. 15, § 761.1, the Oklahoma Plaintiff and
2 Oklahoma State Class members seek an order enjoining the ZF and ST Defendants’
3 unfair or deceptive acts or practices and awarding damages and any other just and
4 proper relief available under the Oklahoma CPA.

5 **e. Oklahoma Count 5: Fraud by Omission and Concealment**
6 **Against FCA**

7 4005. Plaintiffs reallege and incorporate by reference all preceding
8 allegations as though fully set forth herein.

9 4006. The Oklahoma Plaintiff brings this count individually and on behalf of
10 members of the Oklahoma State Class who purchased or leased FCA Class
11 Vehicles, against FCA.

12 4007. FCA is liable for both fraudulent concealment and non-disclosure. *See,*
13 *e.g.,* Restatement (Second) of Torts §§ 550-51 (1977).

14 4008. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
15 serious risks to vehicle occupants, including that it can cause: (1) airbags and
16 seatbelts not to activate during a crash because crashes can sometimes release
17 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
18 vehicle has not crashed, which is dangerous because it is shocking and difficult for
19 the driver to operate a vehicle when the airbag deploys without warning; and (3)
20 failures of other important post-crash operations of the safety system, such as
21 unlocking doors to facilitate escape or extraction of drivers and passengers by
22 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

23 4009. FCA had a duty to disclose the ACU Defect to the Oklahoma Plaintiff
24 and Oklahoma State Class members because:

- 25 a. FCA had exclusive access to and far superior knowledge about
26 technical facts regarding the ACU Defect;
- 27 b. Given the ACU Defect’s hidden and technical nature, the
28 Oklahoma Plaintiff and Oklahoma State Class members lack the

1 sophisticated expertise in vehicle components and electrical
2 phenomena that would be necessary to discover the ACU Defect
3 on their own;

4 c. FCA knew that the ACU Defect gave rise to serious safety
5 concerns for the consumers who use the vehicles, and the FCA
6 Class Vehicles containing the ACU Defect would have been a
7 material fact to the Oklahoma Plaintiff's and Oklahoma State
8 Class members' decisions to buy or lease FCA Class Vehicles;
9 and

10 d. FCA made incomplete representations about the safety and
11 reliability of the FCA Class Vehicles and their Occupant
12 Restraint System, while purposefully withholding material facts
13 about a known safety defect. In uniform advertising and
14 materials provided with each Class Vehicle, FCA intentionally
15 concealed, suppressed, and failed to disclose to the Oklahoma
16 Plaintiff and Oklahoma State Class members that the FCA Class
17 Vehicles contained the ACU Defect. Because they volunteered
18 to provide information about the FCA Class Vehicles that they
19 marketed and offered for sale and lease to the Oklahoma
20 Plaintiff and Oklahoma State Class members, FCA had the duty
21 to disclose the whole truth.

22 4010. In breach of its duties, FCA failed to disclose that the FCA Class
23 Vehicles were not safe and reliable, and that their Occupant Restraint Systems,
24 including their airbags and seatbelt pretensioners could fail in the event of a crash
25 due to the ACU Defect.

26 4011. FCA intended for the Oklahoma Plaintiff and Oklahoma State Class
27 members to rely on its omissions—which they did by purchasing and leasing the
28

1 FCA Class Vehicles at the prices they paid believing that the Occupant Restraint
2 Systems in their Class Vehicles would function properly.

3 4012. That reliance was reasonable, because a reasonable consumer would
4 not have expected that the FCA Class Vehicles contained a safety defect that poses
5 such a serious risk. FCA knew that reasonable consumers expect that their vehicle
6 has working airbags and seatbelt pretensioners and would rely on those facts in
7 deciding whether to purchase, lease, or retain a new or used motor vehicle. Whether
8 a manufacturer's products are safe and reliable, and whether that manufacturer
9 stands behind its products, are material concerns to a consumer. Especially here
10 when at least nine people have already died due to the ACU Defect, and many more
11 have been injured.

12 4013. Additionally, FCA ensured that the Oklahoma Plaintiff and Oklahoma
13 State Class members did not discover this information by actively concealing and
14 misrepresenting the true nature of the FCA Class Vehicles' Occupant Restraint
15 Systems to consumers and NHTSA.

16 4014. FCA actively concealed and suppressed these material facts, in whole
17 or in part, to maintain a market for its Class Vehicles, to protect profits, and to
18 avoid costly recalls that would expose them to liability for those expenses and harm
19 the commercial reputations of Defendants and their products. It did so at the
20 expense of the Oklahoma Plaintiff and Oklahoma State Class members.

21 4015. To this day, FCA has not fully and adequately disclosed the ACU
22 Defect, and they continue to conceal material information about the defect from
23 consumers and NHTSA. The omitted and concealed facts were material because a
24 reasonable person would find them important in purchasing, leasing, or retaining a
25 new or used motor vehicle, and because they directly impact the value of the FCA
26 Class Vehicles purchased or leased by the Oklahoma Plaintiff and Oklahoma State
27 Class members.

28

1 4016. Had they been aware of the ACU Defect in the FCA Class Vehicles,
2 and FCA’s callous disregard for safety, the Oklahoma Plaintiff and Oklahoma State
3 Class members either would not have paid as much as they did for their Class
4 Vehicles, or they would not have purchased or leased them.

5 4017. As alleged in Section V above, FCA had fully and adequately
6 disclosed the ACU Defect to consumers and NHTSA, the Oklahoma Plaintiff and
7 Oklahoma State Class members would have seen such a disclosure.

8 4018. Accordingly, FCA is liable to the Oklahoma Plaintiff and Oklahoma
9 State Class members for their damages in an amount to be proven at trial, including,
10 but not limited to, their lost overpayment for the FCA Class Vehicles at the time of
11 purchase or lease.

12 4019. FCA’s acts were done maliciously, oppressively, deliberately, with
13 intent to defraud; in reckless disregard of the Oklahoma Plaintiff’s and Oklahoma
14 State Class members’ rights and well-being; and to enrich themselves. FCA’s
15 misconduct warrants an assessment of punitive damages, as permitted by law, in an
16 amount sufficient to deter such conduct in the future, which amount shall be
17 determined according to proof at trial.

18 **f. Oklahoma Count 6: Fraud by Omission and Concealment**
19 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
20 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
21 **ST USA, and ST Malaysia**

22 4020. Plaintiffs reallege and incorporate by reference all preceding
23 allegations as though fully set forth herein.

24 4021. The Oklahoma Plaintiff brings this count individually and on behalf of
25 members of the Oklahoma State Class who purchased or leased Class Vehicles,
26 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
27 TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST
28 Malaysia, and ST USA (collectively, the “ST Defendants”).

1 4022. The ZF and ST Defendants are liable for both fraudulent concealment
2 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

3 4023. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
4 serious risks to vehicle occupants, including that it can cause: (1) airbags and
5 seatbelts not to activate during a crash because crashes can sometimes release
6 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
7 vehicle has not crashed, which is dangerous because it is shocking and difficult for
8 the driver to operate a vehicle when the airbag deploys without warning; and (3)
9 failures of other important post-crash operations of the safety system, such as
10 unlocking doors to facilitate escape or extraction of drivers and passengers by
11 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

12 4024. The ZF and ST Defendants had a duty to disclose the ACU Defect to
13 the Oklahoma Plaintiff and Oklahoma State Class members because:

- 14 a. The ZF and ST Defendants had exclusive access to and far
15 superior knowledge about technical facts regarding the ACU
16 Defect;
- 17 b. Given the ACU Defect’s hidden and technical nature, the
18 Oklahoma Plaintiff and Oklahoma State Class members lack the
19 sophisticated expertise in vehicle components and electrical
20 phenomena that would be necessary to discover the ACU Defect
21 on their own;
- 22 c. The ZF and ST Defendants knew that the ACU Defect gave rise
23 to serious safety concerns for the consumers who use the
24 vehicles, and the Class Vehicles containing the ACU Defect
25 would have been a material fact to the Oklahoma Plaintiff’s and
26 Oklahoma State Class members’ decisions to buy or lease Class
27 Vehicles; and
28

1 d. The ZF Defendants made incomplete representations about the
2 safety and reliability of the Class Vehicles and their Occupant
3 Restraint System, while purposefully withholding material facts
4 about a known safety defect, creating a duty to disclose the
5 whole truth. Specifically, ZF Electronics USA, ZF Passive
6 Safety USA, and ZF Automotive USA worked with the Vehicle
7 Manufacturer Defendants on the design and inclusion of the
8 airbag readiness indicators in the Class Vehicles, which falsely
9 assured Plaintiffs and Class Members that the Occupant
10 Restraint Systems in the Class Vehicles would function properly
11 in a crash.

12 4025. In breach of their duties, the ZF and ST Defendants failed to disclose
13 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
14 Systems, including their airbags and seatbelt pretensioners could fail in the event of
15 a crash due to the ACU Defect.

16 4026. The ZF and ST Defendants intended for the Oklahoma Plaintiff and
17 Oklahoma State Class members to rely on their omissions—which they did by
18 purchasing and leasing the Class Vehicles at the prices they paid believing that the
19 Occupant Restraint Systems in their Class Vehicles would function properly.

20 4027. That reliance was reasonable, because a reasonable consumer would
21 not have expected that the Class Vehicles contained a safety defect that poses such
22 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
23 that their vehicle has working airbags and seatbelt pretensioners and would rely on
24 those facts in deciding whether to purchase, lease, or retain a new or used motor
25 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
26 manufacturer stands behind its products, are material concerns to a consumer.
27 Especially here when at least nine people have already died due to the ACU Defect,
28 and many more have been injured.

1 4028. Additionally, the ZF and ST Defendants ensured that the Oklahoma
2 Plaintiff and Oklahoma State Class members did not discover this information by
3 actively concealing and misrepresenting the true nature of the Class Vehicles’
4 Occupant Restraint Systems to consumers and NHTSA.

5 4029. The ZF and ST Defendants actively concealed and suppressed these
6 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
7 protect profits, and to avoid costly recalls that would expose them to liability for
8 those expenses and harm the commercial reputations of Defendants and their
9 products. They did so at the expense of the Oklahoma Plaintiff and Oklahoma State
10 Class members.

11 4030. To this day, the ZF and ST Defendants have not fully and adequately
12 disclosed the ACU Defect, and they continue to conceal material information about
13 the defect from consumers and NHTSA. The omitted and concealed facts were
14 material because a reasonable person would find them important in purchasing,
15 leasing, or retaining a new or used motor vehicle, and because they directly impact
16 the value of the Class Vehicles purchased or leased by the Oklahoma Plaintiff and
17 Oklahoma State Class members.

18 4031. Had they been aware of the ACU Defect in the Class Vehicles, and the
19 ZF and ST Defendants’ callous disregard for safety, the Oklahoma Plaintiff and
20 Oklahoma State Class members either would not have paid as much as they did for
21 their Class Vehicles, or they would not have purchased or leased them.

22 4032. As alleged in Section V above, if the ZF and ST Defendants had fully
23 and adequately disclosed the ACU Defect to consumers and NHTSA, the
24 Oklahoma Plaintiff and Oklahoma State Class members would have seen such a
25 disclosure.

26 4033. Accordingly, the ZF and ST Defendants are liable to the Oklahoma
27 Plaintiff and Oklahoma State Class members for their damages in an amount to be
28

1 proven at trial, including, but not limited to, their lost overpayment for the Class
2 Vehicles at the time of purchase or lease.

3 4034. The ZF and ST Defendants' acts were done maliciously, oppressively,
4 deliberately, with intent to defraud; in reckless disregard of the Oklahoma
5 Plaintiff's and Oklahoma State Class members' rights and well-being; and to enrich
6 themselves. The ZF and ST Defendants' misconduct warrants an assessment of
7 punitive damages, as permitted by law, in an amount sufficient to deter such
8 conduct in the future, which amount shall be determined according to proof at trial.

9 **g. Oklahoma Count 7: Unjust Enrichment Against FCA**

10 4035. Plaintiffs reallege and incorporate by reference all allegations in
11 Sections I-VI above as though fully set forth herein.

12 4036. The Oklahoma Plaintiff brings this count individually and on behalf of
13 members of the Oklahoma State Class who purchased or leased FCA Class
14 Vehicles, against FCA.

15 4037. The Oklahoma Plaintiff and Oklahoma State Class members conferred
16 tangible and material monetary benefits upon FCA when they purchased or leased
17 the FCA Class Vehicles. FCA readily accepted and retained these benefits.

18 4038. The Oklahoma Plaintiff and Oklahoma State Class members would not
19 have purchased or leased the FCA Class Vehicles, or would have paid less for
20 them, had they known of the ACU Defect at the time of purchase or lease.
21 Therefore, FCA profited from the sale and lease of the FCA Class Vehicles to the
22 detriment and expense of the Oklahoma Plaintiff and Oklahoma State Class
23 members.

24 4039. FCA appreciated these monetary benefits. These benefits were the
25 expected result of FCA acting in its pecuniary interest at the expense of its
26 customers. FCA knew of these benefits because it was aware of the ACU Defect,
27 yet it failed to disclose this knowledge and misled the Oklahoma Plaintiff and
28

1 Oklahoma State Class members regarding the nature and quality of the FCA Class
2 Vehicles while profiting from this deception.

3 4040. It would be unjust, inequitable, and unconscionable for FCA to retain
4 these monetary benefits, including because they were procured as a result of FCA's
5 wrongful conduct alleged above.

6 4041. The Oklahoma Plaintiff and Oklahoma State Class members are
7 entitled to restitution of the benefits FCA unjustly retained and/or any amounts
8 necessary to return the Oklahoma Plaintiff and Oklahoma State Class members to
9 the position they occupied prior to dealing with FCA, with such amounts to be
10 determined at trial.

11 4042. The Oklahoma Plaintiff pleads this claim separately as well as in the
12 alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
13 Oklahoma Plaintiff's claims for damages are dismissed or judgment is entered in
14 favor of Defendants, the Oklahoma Plaintiff would have no adequate legal remedy.

15 **19. Pennsylvania**

16 **a. Pennsylvania Count 1: Breach of Express Warranty (13 Pa.**
17 **Cons. Stat. §§ 2313 and 2A210) Against Hyundai Korea,**
Hyundai USA, Kia Korea, and Kia USA

18 4043. Plaintiffs reallege and incorporate by reference all preceding
19 allegations as though fully set forth herein.

20 4044. Plaintiff Larae Angel brings this count individually and on behalf of
21 members of the Pennsylvania State Class who purchased or leased Hyundai Class
22 Vehicles, against the Hyundai Korea and Hyundai USA.

23 4045. Plaintiff Richard Kintzel brings this count individually and on behalf
24 of members of the Pennsylvania State Class who purchased or leased Kia Class
25 Vehicles, against Kia Korea and Kia USA.

26 4046. For purposes of this count, Plaintiffs Angel and Kintzel shall be
27 referred to as the "Pennsylvania Plaintiffs."
28

1 4047. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA are and were
2 at all relevant times “merchants” with respect to motor vehicles under 13 Pa. Cons.
3 Stat. §§ 2104 and 2A103(c), and “sellers” of motor vehicles under § 2103(a).

4 4048. With respect to leases, Hyundai Korea, Hyundai USA, Kia Korea, and
5 Kia USA are and were at all relevant times “lessors” of motor vehicles under 13 Pa.
6 Cons. Stat. § 2A103(a).

7 4049. All Pennsylvania State Class members who purchased Hyundai and
8 Kia Class Vehicles in Pennsylvania are “buyers” within the meaning of 13 Pa.
9 Cons. Stat. § 2103(a).

10 4050. All Pennsylvania State Class members who leased Hyundai and Kia
11 Class Vehicles in Pennsylvania are “lessees” within the meaning of 13 Pa. Cons.
12 Stat. § 2A103(a).

13 4051. The Hyundai and Kia Class Vehicles are and were at all relevant times
14 “goods” within the meaning of 13 Pa. Cons. Stat. §§ 2105(a) and 2A103(a).

15 4052. In connection with the purchase or lease of Hyundai and Kia Class
16 Vehicles, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA provided the
17 Pennsylvania Plaintiffs and Pennsylvania State Class members with warranties in
18 the form of: (a) written express warranties covering the repair or replacement of
19 components that are defective in materials or workmanship, and (b) descriptions of
20 the Hyundai and Kia Class Vehicles as safe and reliable, and that their Occupant
21 Restraint Systems, including their airbags and seatbelt pretensioners, would
22 function properly in the event of a crash.

23 4053. However, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
24 knew or should have known that the warranties were false and/or misleading.
25 Specifically, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA were aware
26 of the ACU Defect in the Hyundai and Kia Class Vehicles, which made the vehicles
27 inherently defective and dangerous at the time that they were sold and leased to the
28 Pennsylvania Plaintiffs and Pennsylvania State Class members.

1 4054. The Pennsylvania Plaintiffs and Pennsylvania State Class members
2 were aware the Hyundai and Kia Class Vehicles were covered by express
3 warranties, and those warranties were an essential part of the bargain between them,
4 Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA when the Pennsylvania
5 Plaintiffs and Pennsylvania State Class members unknowingly purchased and
6 leased Hyundai and Kia Class Vehicles that came equipped with defective ACUs
7 and ASICs.

8 4055. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
9 misrepresented the Hyundai and Kia Class Vehicles as safe and reliable while
10 concealing that they contained the ACU Defect, the Pennsylvania Plaintiffs and
11 Pennsylvania State Class members were exposed to those misrepresentations, and
12 the Pennsylvania Plaintiffs and Pennsylvania State Class members had no way of
13 discerning that Hyundai Korea's, Hyundai USA's, Kia Korea's, and Kia USA's
14 representations were false and misleading or otherwise learning the material facts
15 that Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA had concealed or
16 failed to disclose. Accordingly, the Pennsylvania Plaintiffs and Pennsylvania State
17 Class members reasonably relied on Hyundai Korea's, Hyundai USA's, Kia
18 Korea's, and Kia USA's express warranties when purchasing or leasing their
19 Hyundai and Kia Class Vehicles. Plaintiffs allege the information they relied upon
20 in Section II.B above. To aid review of this information, Exhibit 19 provides
21 paragraph numbers for each Plaintiff.

22 4056. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA knowingly
23 breached their express warranties to repair defects in materials and workmanship by
24 failing to repair the ACU Defect or replace the defective ACUs and ASICs in the
25 Hyundai and Kia Class Vehicles. Hyundai Korea, Hyundai USA, Kia Korea, and
26 Kia USA also breached their express warranties by selling and leasing Hyundai and
27 Kia Class Vehicles with a defect that was never disclosed to the Pennsylvania
28 Plaintiffs and Pennsylvania State Class members.

1 4057. The Pennsylvania Plaintiffs and Pennsylvania State Class members
2 have provided Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA with
3 reasonable notice and opportunity to cure the breaches of their express warranties
4 by way of the numerous NHTSA complaints filed against them, and individual
5 notice letters sent by the Pennsylvania State Class members within a reasonable
6 amount of time after the ACU Defect became public. Additionally, on April 24,
7 2020, a notice letter was sent on behalf of the Pennsylvania Plaintiffs and
8 Pennsylvania State Class members to Hyundai Korea, Hyundai USA, Kia Korea,
9 and Kia USA.

10 4058. Alternatively, the Pennsylvania Plaintiffs and Pennsylvania State Class
11 members were excused from providing Hyundai Korea, Hyundai USA, Kia Korea,
12 and Kia USA with notice and an opportunity to cure the breach, because it would
13 have been futile. As alleged above, Hyundai Korea and Hyundai USA have long
14 known that the Hyundai Class Vehicles contained the ACU Defect, and that the
15 ACU Defect has caused ACUs and ASICs to malfunction in crashes involving
16 Class Vehicles; however, to date, Hyundai Korea and Hyundai USA have not
17 instituted a recall or any other repair program with respect to the unrecalled
18 Hyundai Class Vehicles, or even acknowledged that the ACU Defect exists in all
19 Hyundai Class Vehicles, including the recalled Hyundai Class Vehicles—even
20 though all of the Hyundai Class Vehicles are subject to the NHTSA investigation.
21 Similarly, to date, Kia Korea and Kia USA have not instituted a recall or any other
22 repair program with respect to the unrecalled Kia Class Vehicles, or even
23 acknowledged that the ACU Defect exists in all Kia Class Vehicles, including the
24 recalled Kia Class Vehicles—even though all of the Kia Class Vehicles are subject
25 to the NHTSA investigation. Therefore, the Pennsylvania Plaintiffs and
26 Pennsylvania State Class members had no reason to believe that Hyundai Korea,
27 Hyundai USA, Kia Korea, and Kia USA would have repaired the ACU Defect if
28

1 the Pennsylvania Plaintiffs and Pennsylvania State Class members presented their
2 Class Vehicles to them for repair.

3 4059. As a direct and proximate result of Hyundai Korea's, Hyundai USA's,
4 Kia Korea's, and Kia USA's breach of their express warranties, the Hyundai and
5 Kia Class Vehicles were and are defective and the ACU Defect in the Pennsylvania
6 Plaintiffs' and Pennsylvania State Class members' Hyundai and Kia Class Vehicles
7 was not remedied. Therefore, the Pennsylvania Plaintiffs and Pennsylvania State
8 Class members have been damaged, in an amount to be proven at trial, through
9 their overpayment at the time of purchase or lease for Hyundai and Kia Class
10 Vehicles with an undisclosed safety defect that would not be remedied.

11 **b. Pennsylvania Count 2: Breach of Implied Warranty of**
12 **Merchantability (13 Pa. Cons. Stat. §§ 2314 and 2A212)**
13 **Against Hyundai USA and Kia USA**

14 4060. Plaintiffs reallege and incorporate by reference all preceding
15 allegations as though fully set forth herein.

16 4061. Plaintiff Larae Angel brings this count individually and on behalf of
17 members of the Pennsylvania State Class who purchased or leased Hyundai Class
18 Vehicles, against Hyundai USA.

19 4062. Plaintiff Richard Kintzel brings this count individually and on behalf
20 of members of the Pennsylvania State Class who purchased or leased Kia Class
21 Vehicles, against Kia USA.

22 4063. For purposes of this count, Plaintiffs Angel and Kintzel shall be
23 referred to as the "Pennsylvania Plaintiffs."

24 4064. A warranty that the Hyundai and Kia Class Vehicles were in
25 merchantable condition and fit for the ordinary purpose for which such goods are
26 used is implied by law pursuant to 13 Pa. Cons. Stat. §§ 2314 and 2A212.

27 4065. Hyundai USA and Kia USA are and were at all relevant times
28 "merchants" with respect to motor vehicles under 13 Pa. Cons. Stat. §§ 2104 and
2A103(c), and "sellers" of motor vehicles under § 2103(a).

1 4066. With respect to leases, Hyundai USA and Kia USA are and were at all
2 relevant times “lessors” of motor vehicles under 13 Pa. Cons. Stat. § 2A103(a).

3 4067. All Pennsylvania State Class members who purchased Class Vehicles
4 in Pennsylvania are “buyers” within the meaning of 13 Pa. Cons. Stat. § 2103(a).

5 4068. All Pennsylvania State Class members who leased Class Vehicles in
6 Pennsylvania are “lessees” within the meaning of 13 Pa. Cons. Stat. § 2A103(a).

7 4069. The Class Vehicles are and were at all relevant times “goods” within
8 the meaning of 13 Pa. Cons. Stat. §§ 2105(a) and 2A103(a).

9 4070. The Hyundai and Kia Class Vehicles did not comply with the implied
10 warranty of merchantability because, at the time of sale and lease and at all times
11 thereafter, they were defective and not in merchantable condition, would not pass
12 without objection in the trade, and were not fit for the ordinary purpose for which
13 vehicles were used. Specifically, at the time they were sold and leased, the Hyundai
14 and Kia Class Vehicles contained the ACU Defect, which may cause the airbags
15 and seatbelt pretensioners to fail to deploy during a crash, the failure to unlock
16 doors automatically after a crash, the failure to turn off a fuel supply or high-
17 voltage battery after a crash, or the airbags to inadvertently deploy, all of which
18 render the Hyundai and Kia Class Vehicles inherently defective and dangerous.

19 4071. The Pennsylvania Plaintiffs and Pennsylvania State Class members
20 have provided Hyundai USA and Kia USA with reasonable notice and opportunity
21 to cure the breaches of its implied warranty by way of the numerous NHTSA
22 complaints filed against it, and the individual notice letters sent by Pennsylvania
23 State Class members within a reasonable amount of time after the ACU Defect
24 became public. Additionally, on April 24, 2020, a notice letter was sent on behalf of
25 the Pennsylvania Plaintiffs and Pennsylvania State Class members to Hyundai USA
26 and Kia USA.

27 4072. Alternatively, the Pennsylvania Plaintiffs and Pennsylvania State Class
28 members were excused from providing Hyundai USA and Kia USA with notice and

1 an opportunity to cure the breach, because it would have been futile. As alleged
2 above, Hyundai USA has long known that the Hyundai Class Vehicles contained
3 the ACU Defect, and that the ACU Defect has caused ACUs and ASICs to
4 malfunction in crashes involving Class Vehicles; however, to date, Hyundai USA
5 has not instituted a recall or any other repair program with respect to the unrecalled
6 Hyundai Class Vehicles, or even acknowledged that the ACU Defect exists in all
7 Hyundai Class Vehicles, including the recalled Hyundai Class Vehicles—even
8 though all of the Hyundai Class Vehicles are subject to the NHTSA investigation.
9 Similarly, to date, Kia USA has not instituted a recall or any other repair program
10 with respect to the unrecalled Kia Class Vehicles, or even acknowledged that the
11 ACU Defect exists in all Kia Class Vehicles, including the recalled Kia Class
12 Vehicles—even though all of the Kia Class Vehicles are subject to the NHTSA
13 investigation. Therefore, the Pennsylvania Plaintiffs and Pennsylvania State Class
14 members had no reason to believe that Hyundai USA and Kia USA would have
15 repaired the ACU Defect if the Pennsylvania Plaintiffs and Pennsylvania State
16 Class members presented their Class Vehicles to them for repair.

17 4073. As a direct and proximate result of Hyundai USA’s and Kia USA’s
18 breach of the implied warranty of merchantability, the Pennsylvania Plaintiff and
19 Pennsylvania State Class members have been damaged through their overpayment
20 at the time of purchase or lease for Hyundai and Kia Class Vehicles with an
21 undisclosed safety defect in an amount to be proven at trial.

22 c. **Pennsylvania Count 3: Violation of the Pennsylvania Unfair**
23 **Trade Practices and Consumer Protection Law (73 Pa.**
24 **Cons. Stat. §§ 201-1, et seq.) Against Hyundai Korea,**
Hyundai USA, Kia Korea, and Kia USA¹⁸

25 4074. Plaintiffs reallege and incorporate by reference all preceding
26 allegations as though fully set forth herein.

27 ¹⁸ The Court held in its February 9, 2022 Order that the Pennsylvania Plaintiffs
28 stated a claim under the Pennsylvania Unfair Trade Practices and Consumer

1 4075. Plaintiff Larae Angel brings this count individually and on behalf of
2 members of the Pennsylvania State Class who purchased or leased Hyundai Class
3 Vehicles, against Hyundai Korea and Hyundai USA.

4 4076. Plaintiff Richard Kintzel brings this count individually and on behalf
5 of members of the Pennsylvania State Class who purchased or leased Kia Class
6 Vehicles, against Kia Korea and Kia USA.

7 4077. For purposes of this count, Plaintiffs Angel and Kintzel shall be
8 referred to as the “Pennsylvania Plaintiffs.”

9 4078. Hyundai Korea, Hyundai USA, Kia Korea, Kia USA, the Pennsylvania
10 Plaintiffs, and Pennsylvania State Class members are “persons” within the meaning
11 of 73 Pa. Cons. Stat. § 201-2(2).

12 4079. The Pennsylvania Plaintiffs and Pennsylvania State Class Members
13 purchased their Hyundai and Kia Class Vehicles and the ACUs installed in them
14 primarily for personal, family, or household purposes within the meaning of 73 Pa.
15 Cons. Stat. § 201-9.2(a).

16 4080. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA were and are
17 engaged in “trade” or “commerce” within the meaning of 73 Pa. Cons. Stat. § 201-
18 2(3).

19 4081. The Pennsylvania Unfair Trade Practices and Consumer Protection
20 Law (“Pennsylvania CPL”) prohibits “unfair or deceptive acts or practices in the
21 conduct of any trade or commerce[.]” 73 Pa. Cons. Stat. § 201-3.

22 4082. In the course of their business, Hyundai Korea, Hyundai USA, Kia
23 Korea, and Kia USA, through their agents, employees, and/or subsidiaries, violated
24 the Pennsylvania CPL by knowingly and intentionally misrepresenting, omitting,
25 concealing, and/or failing to disclose material facts regarding the reliability, safety,
26 and performance of the Hyundai and Kia Class Vehicles, the safety of their
27 Occupant Restraint Systems, and the ACU Defect, as detailed above.

28 _____
Protection Law against Hyundai USA and Kia USA. *See* ECF No. 396 at 114-15.

1 4083. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA had an
2 ongoing duty to the Pennsylvania Plaintiffs and Pennsylvania State Class members
3 to refrain from unfair or deceptive practices under the Pennsylvania CPL in the
4 course of their business. Specifically, Hyundai Korea, Hyundai USA, Kia Korea,
5 and Kia USA owed the Pennsylvania Plaintiffs and Pennsylvania State Class
6 members a duty to disclose all the material facts concerning the ACU Defect in the
7 Hyundai and Kia Class Vehicles because they possessed exclusive knowledge, they
8 intentionally concealed the ACU Defect from the Pennsylvania Plaintiffs and
9 Pennsylvania State Class members, and/or they made misrepresentations that were
10 rendered misleading because they were contradicted by withheld facts.

11 4084. By misrepresenting the Hyundai and Kia Class Vehicles as safe and
12 reliable and the defective ACU and ASICs installed in them as properly-functioning
13 and free from defects, and by failing to disclose and actively concealing the dangers
14 and risk posed by the ACU Defect to both consumers and NHTSA, Hyundai Korea,
15 Hyundai USA, Kia Korea, and Kia USA engaged in one or more of the following
16 unfair or deceptive business practices prohibited by 73 Pa. Cons. Stat. § 201-2(3):

- 17 a. Representing that the Hyundai and Kia Class Vehicles and/or the
18 defective ACUs installed in them have characteristics, uses,
19 benefits, and qualities which they do not have.
- 20 b. Representing that the Hyundai and Kia Class Vehicles and/or the
21 defective ACUs installed in them are of a particular standard,
22 quality, and grade when they are not.
- 23 c. Advertising the Hyundai and Kia Class Vehicles and/or the
24 defective ACUs installed in them with the intent not to sell or
25 lease them as advertised.
- 26 d. Engaging in any other fraudulent or deceptive conduct which
27 creates a likelihood of confusion or of misunderstanding.

28 73 Pa. Cons. Stat. § 201-2(4)(v), (vii), (ix) and (xxi).

1 4085. Hyundai Korea’s, Hyundai USA’s, Kia Korea’s, and Kia USA’s unfair
2 and deceptive acts or practices, including their misrepresentations, concealments,
3 omissions, and suppressions of material facts, were designed to mislead and had a
4 tendency or capacity to mislead and create a false impression in consumers that the
5 Hyundai and Kia Class Vehicles had properly-functioning and reliable airbags and
6 seatbelts, and that the Occupant Restraint System did not contain the ACU Defect
7 and would perform its intended function of activating the seatbelts and airbags
8 during a collision. Indeed, those misrepresentations, concealments, omissions, and
9 suppressions of material facts did in fact deceive reasonable consumers, including
10 the Pennsylvania Plaintiffs and Pennsylvania State Class members, about the true
11 safety and reliability of Hyundai and Kia Class Vehicles and/or the defective ACUs
12 and ASICs installed in them, the quality of the Hyundai and Kia Class Vehicles,
13 and the true value of the Hyundai and Kia Class Vehicles.

14 4086. Hyundai Korea’s, Hyundai USA’s, Kia Korea’s, and Kia USA’s
15 misrepresentations, concealments, omissions, and suppressions of material facts
16 regarding the ACU Defect and true characteristics of the Occupant Restraint
17 Systems in the Hyundai and Kia Class Vehicles were material to the decisions of
18 the Pennsylvania Plaintiffs and Pennsylvania State Class members to purchase and
19 lease those vehicles, as Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
20 intended. The Pennsylvania Plaintiffs and Pennsylvania State Class members were
21 exposed to those misrepresentations, concealments, omissions, and suppressions of
22 material facts, and relied on Hyundai Korea’s, Hyundai USA’s, Kia Korea’s, and
23 Kia USA’s misrepresentations that the Hyundai-Kia Vehicles and their Occupant
24 Restraint Systems were safe and reliable in deciding to purchase and lease Hyundai
25 and Kia Class Vehicles. Plaintiffs allege the information they relied upon in Section
26 II.B above. To aid review of this information, Exhibit 19 provides paragraph
27 numbers for each Plaintiff.
28

1 4087. The Pennsylvania Plaintiffs' and Pennsylvania State Class members'
2 reliance was reasonable, as they had no way of discerning that Hyundai Korea's,
3 Hyundai USA's, Kia Korea's, and Kia USA's representations were false and
4 misleading, or otherwise learning the facts that Hyundai Korea, Hyundai USA, Kia
5 Korea, and Kia USA had concealed or failed to disclose. The Pennsylvania
6 Plaintiffs and Pennsylvania State Class members did not, and could not, unravel
7 Hyundai Korea's, Hyundai USA's, Kia Korea's, and Kia USA's deception on their
8 own.

9 4088. Had the Pennsylvania Plaintiffs and Pennsylvania State Class members
10 known the truth about the ACU Defect, the Pennsylvania Plaintiffs and
11 Pennsylvania State Class members would not have purchased or leased Hyundai
12 and Kia Class Vehicles, or would have paid significantly less for them.

13 4089. The Pennsylvania Plaintiffs and Pennsylvania State Class members
14 suffered ascertainable losses and actual damages through their overpayment at the
15 time of purchase and lease for Hyundai and Kia Class Vehicles with an undisclosed
16 safety defect as a direct and proximate result of Hyundai Korea's, Hyundai USA's,
17 Kia Korea's, and Kia USA's concealment, misrepresentations, and/or failure to
18 disclose material information.

19 4090. Hyundai Korea's, Hyundai USA's, Kia Korea's, and Kia USA's
20 violations present a continuing risk to the Pennsylvania Plaintiffs and Pennsylvania
21 State Class members, as well as to the general public, because the Class Vehicles
22 remain unsafe due to the defective ACUs and ASICs therein. Additionally, their
23 unlawful acts and practices complained of herein affect the public interest.

24 4091. Pursuant to 73 Pa. Cons. Stat. § 201-9.2(a), the Pennsylvania Plaintiffs
25 and Pennsylvania State Class members seek an order enjoining the Hyundai
26 Korea's, Hyundai USA's, Kia Korea's, and Kia USA's unfair or deceptive acts or
27 practices and awarding damages and any other just and proper relief available under
28 the Pennsylvania CPL.

1 **d. Pennsylvania Count 4: Violation of the Pennsylvania Unfair**
2 **Trade Practices and Consumer Protection Law (73 Pa.**
3 **Cons. Stat. §§ 201-1, et seq.) Against ZF Electronics USA, ZF**
4 **Passive Safety USA, ZF Automotive USA, ZF TRW Corp.,**
5 **ZF Germany, ST Italy, ST USA, and ST Malaysia**

6 4092. Plaintiffs reallege and incorporate by reference all preceding
7 allegations as though fully set forth herein.

8 4093. Plaintiffs Larae Angel and Richard Kintzel bring this count
9 individually and on behalf of members of the Pennsylvania State Class against ZF
10 Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF TRW Corp.,
11 and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST Malaysia,
12 and ST USA (collectively, the “ST Defendants”).

13 4094. For purposes of this count, Plaintiffs Angel and Kintzel shall be
14 referred to as the “Pennsylvania Plaintiffs.”

15 4095. The ZF Defendants, the ST Defendants, the Pennsylvania Plaintiffs,
16 and Pennsylvania State Class members are “persons” within the meaning of 73 Pa.
17 Cons. Stat. § 201-2(2).

18 4096. The Pennsylvania Plaintiffs and Pennsylvania State Class Members
19 purchased their Class Vehicles and the ACUs installed in them primarily for
20 personal, family, or household purposes within the meaning of 73 Pa. Cons. Stat.
21 § 201-9.2(a).

22 4097. The ZF and ST Defendants were and are engaged in “trade” or
23 “commerce” within the meaning of 73 Pa. Cons. Stat. § 201-2(3).

24 4098. The Pennsylvania Unfair Trade Practices and Consumer Protection
25 Law (“Pennsylvania CPL”) prohibits “unfair or deceptive acts or practices in the
26 conduct of any trade or commerce[.]” 73 Pa. Cons. Stat. § 201-3.

27 4099. The ZF and ST Defendants had an ongoing duty to the Pennsylvania
28 Plaintiffs and Pennsylvania State Class members to refrain from unfair or deceptive
 practices under the Pennsylvania CPL in the course of their business. Specifically,
 the ZF and ST Defendants owed the Pennsylvania Plaintiffs and Pennsylvania State

1 Class members a duty to disclose all the material facts concerning the ACU Defect
2 in the Class Vehicles because they possessed exclusive knowledge and they
3 intentionally concealed the ACU Defect from the Pennsylvania Plaintiffs and
4 Pennsylvania State Class members.

5 4100. In the course of their business, the ZF and ST Defendants, through
6 their agents, employees, and/or subsidiaries, violated the Pennsylvania CPL by
7 knowingly and intentionally omitting, concealing, and failing to disclose material
8 facts regarding the existence, nature, and scope of the defective ACU and ASIC
9 installed in the Class Vehicles, as detailed above.

10 4101. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
11 Automotive USA through their agents, employees, and/or subsidiaries, violated the
12 Pennsylvania CPL when they knowingly and intentionally misrepresented the Class
13 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
14 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
15 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
16 Manufacturer Defendants on the design and inclusion of the airbag readiness
17 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
18 Members that the Occupant Restraint Systems in the Class Vehicles would function
19 properly in a crash.

20 4102. By misrepresenting, failing to disclose, and actively concealing the
21 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
22 ST Defendants engaged in deceptive acts or practices prohibited by 73 Pa. Cons.
23 Stat. § 201-3.

24 4103. The ZF and ST Defendants' unfair or deceptive acts or practices,
25 including their misrepresentations, concealments, omissions, and suppressions of
26 material facts, were designed to mislead and had a tendency or capacity to mislead
27 and create a false impression in consumers that the Class Vehicles had properly-
28 functioning and reliable airbags and seatbelts, and that the Occupant Restraint

1 System did not contain the ACU Defect and would perform its intended function of
2 activating the seatbelts and airbags during a collision. Indeed, those
3 misrepresentations, concealments, omissions, and suppressions of material facts did
4 in fact deceive reasonable consumers, including the Pennsylvania Plaintiffs and
5 Pennsylvania State Class members, about the true safety and reliability of Class
6 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
7 Class Vehicles, and the true value of the Class Vehicles.

8 4104. The Pennsylvania Plaintiffs and Pennsylvania State Class members
9 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
10 concealment, as they had no way of discerning that the Class Vehicles contained
11 the ACU Defect, as alleged above. The Pennsylvania Plaintiffs and Pennsylvania
12 State Class members did not, and could not, unravel the ZF and ST Defendants'
13 deception on their own

14 4105. The ZF and ST Defendants' misrepresentations and concealment of the
15 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
16 Vehicles were material to the decisions of the Pennsylvania Plaintiffs and
17 Pennsylvania State Class members to purchase and lease Class Vehicles, as the ZF
18 and ST Defendants intended. Had they known the truth, the Pennsylvania Plaintiffs
19 and Pennsylvania State Class members would not have purchased or leased the
20 Class Vehicles, or would have paid significantly less for them.

21 4106. The Pennsylvania Plaintiffs and Pennsylvania State Class members
22 suffered ascertainable losses and actual damages as a direct and proximate result of
23 the ZF and ST Defendants' misrepresentations, concealment and/or failure to
24 disclose material information.

25 4107. The ZF and ST Defendants' violations present a continuing risk to the
26 Pennsylvania Plaintiffs and Pennsylvania State Class members, as well as to the
27 general public, because the Class Vehicles remain unsafe due to the defective
28

1 ACUs and ASICs therein. The ZF and ST Defendants’ unlawful acts and practices
2 complained of herein affect the public interest.

3 4108. Pursuant to 73 Pa. Cons. Stat. § 201-9.2(a), the Pennsylvania Plaintiffs
4 and Pennsylvania State Class members seek an order enjoining the ZF and ST
5 Defendants’ unfair or deceptive acts or practices and awarding damages and any
6 other just and proper relief available under the Pennsylvania CPL.

7 e. **Pennsylvania Count 5: Fraud by Omission and Concealment**
8 **Against Hyundai Korea, Hyundai USA, Kia Korea, and Kia**
9 **USA**

10 4109. Plaintiffs reallege and incorporate by reference all preceding
11 allegations as though fully set forth herein.

12 4110. Plaintiff Larae Angel brings this count individually and on behalf of
13 members of the Pennsylvania State Class who purchased or leased Hyundai Class
14 Vehicles, against Hyundai Korea and Hyundai USA.

15 4111. Plaintiff Richard Kintzel brings this count individually and on behalf
16 of members of the Pennsylvania State Class who purchased or leased Kia Class
17 Vehicles, against Kia Korea and Kia USA.

18 4112. For purposes of this count, Plaintiffs Angel and Kintzel shall be
19 referred to as the “Pennsylvania Plaintiffs.”

20 4113. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA are liable for
21 both fraudulent concealment and non-disclosure. *See, e.g.*, Restatement (Second) of
22 Torts §§ 550-51 (1977).

23 4114. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
24 serious risks to vehicle occupants, including that it can cause: (1) airbags and
25 seatbelts not to activate during a crash because crashes can sometimes release
26 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
27 vehicle has not crashed, which is dangerous because it is shocking and difficult for
28 the driver to operate a vehicle when the airbag deploys without warning; and (3)
failures of other important post-crash operations of the safety system, such as

1 unlocking doors to facilitate escape or extraction of drivers and passengers by
2 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

3 4115. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA had a duty to
4 disclose the ACU Defect to the Pennsylvania Plaintiffs and Pennsylvania State
5 Class members because:

- 6 a. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA had
7 exclusive access to and far superior knowledge about technical
8 facts regarding the ACU Defect;
- 9 b. Given the ACU Defect's hidden and technical nature, the
10 Pennsylvania Plaintiffs and Pennsylvania State Class members
11 lack the sophisticated expertise in vehicle components and
12 electrical phenomena that would be necessary to discover the
13 ACU Defect on their own;
- 14 c. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA knew
15 that the ACU Defect gave rise to serious safety concerns for the
16 consumers who use the vehicles, and the Hyundai and Kia Class
17 Vehicles containing the ACU Defect would have been a material
18 fact to the Pennsylvania Plaintiffs' and Pennsylvania State Class
19 members' decisions to buy or lease Hyundai and Kia Class
20 Vehicles; and
- 21 d. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA made
22 incomplete representations about the safety and reliability of the
23 Hyundai and Kia Class Vehicles and their Occupant Restraint
24 System, while purposefully withholding material facts about a
25 known safety defect. In uniform advertising and materials
26 provided with each Class Vehicle, Hyundai Korea, Hyundai
27 USA, Kia Korea, and Kia USA intentionally concealed,
28 suppressed, and failed to disclose to the Pennsylvania Plaintiffs

1 and Pennsylvania State Class members that the Hyundai and Kia
2 Class Vehicles contained the ACU Defect. Because they
3 volunteered to provide information about the Hyundai and Kia
4 Class Vehicles that they marketed and offered for sale and lease
5 to the Pennsylvania Plaintiffs and Pennsylvania State Class
6 members, Hyundai Korea, Hyundai USA, Kia Korea, and Kia
7 USA had the duty to disclose the whole truth.

8 4116. In breach of their duties, Hyundai Korea, Hyundai USA, Kia Korea,
9 and Kia USA failed to disclose that the Hyundai and Kia Class Vehicles were not
10 safe and reliable, and that their Occupant Restraint Systems, including their airbags
11 and seatbelt pretensioners could fail in the event of a crash due to the ACU Defect.

12 4117. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA intended for
13 the Pennsylvania Plaintiffs and Pennsylvania State Class members to rely on their
14 omissions—which they did by purchasing and leasing the Hyundai and Kia Class
15 Vehicles at the prices they paid believing that the Occupant Restraint Systems in
16 their Class Vehicles would function properly.

17 4118. That reliance was reasonable, because a reasonable consumer would
18 not have expected that the Hyundai and Kia Class Vehicles contained a safety
19 defect that poses such a serious risk. Hyundai Korea, Hyundai USA, Kia Korea, and
20 Kia USA knew that reasonable consumers expect that their vehicle has working
21 airbags and seatbelt pretensioners and would rely on those facts in deciding whether
22 to purchase, lease, or retain a new or used motor vehicle. Whether a manufacturer's
23 products are safe and reliable, and whether that manufacturer stands behind its
24 products, are material concerns to a consumer. Especially here when at least nine
25 people have already died due to the ACU Defect, and many more have been
26 injured.

27 4119. Additionally, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
28 ensured that the Pennsylvania Plaintiffs and Pennsylvania State Class members did

1 not discover this information by actively concealing and misrepresenting the true
2 nature of the Hyundai and Kia Class Vehicles' Occupant Restraint Systems to
3 consumers and NHTSA.

4 4120. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA actively
5 concealed and suppressed these material facts, in whole or in part, to maintain a
6 market for their Class Vehicles, to protect profits, and to avoid costly recalls that
7 would expose them to liability for those expenses and harm the commercial
8 reputations of Defendants and their products. They did so at the expense of the
9 Pennsylvania Plaintiffs and Pennsylvania State Class members.

10 4121. To this day, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
11 have not fully and adequately disclosed the ACU Defect, and they continue to
12 conceal material information about the defect from consumers and NHTSA. The
13 omitted and concealed facts were material because a reasonable person would find
14 them important in purchasing, leasing, or retaining a new or used motor vehicle,
15 and because they directly impact the value of the Hyundai and Kia Class Vehicles
16 purchased or leased by the Pennsylvania Plaintiffs and Pennsylvania State Class
17 members.

18 4122. Had they been aware of the ACU Defect in the Hyundai and Kia Class
19 Vehicles, and Hyundai Korea's, Hyundai USA's, Kia Korea's, and Kia USA's
20 callous disregard for safety, the Pennsylvania Plaintiffs and Pennsylvania State
21 Class members either would not have paid as much as they did for their Class
22 Vehicles, or they would not have purchased or leased them.

23 4123. As alleged in Section V above, if Hyundai Korea, Hyundai USA, Kia
24 Korea, and Kia USA had fully and adequately disclosed the ACU Defect to
25 consumers and NHTSA, the Pennsylvania Plaintiffs and Pennsylvania State Class
26 members would have seen such a disclosure.

27 4124. Accordingly, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
28 are liable to the Pennsylvania Plaintiffs and Pennsylvania State Class members for

1 their damages in an amount to be proven at trial, including, but not limited to, their
2 lost overpayment for the Hyundai and Kia Class Vehicles at the time of purchase or
3 lease.

4 4125. Hyundai Korea's, Hyundai USA's, Kia Korea's, and Kia USA's acts
5 were done maliciously, oppressively, deliberately, with intent to defraud; in
6 reckless disregard of the Pennsylvania Plaintiffs' and Pennsylvania State Class
7 members' rights and well-being; and to enrich themselves. Hyundai Korea's,
8 Hyundai USA's, Kia Korea's, and Kia USA's misconduct warrants an assessment
9 of punitive damages, as permitted by law, in an amount sufficient to deter such
10 conduct in the future, which amount shall be determined according to proof at trial.

11 **f. Pennsylvania Count 6: Fraud by Omission and Concealment**
12 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
13 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
14 **ST USA, and ST Malaysia**

14 4126. Plaintiffs reallege and incorporate by reference all preceding
15 allegations as though fully set forth herein.

16 4127. The Pennsylvania Plaintiffs bring this count individually and on behalf
17 of members of the Pennsylvania State Class who purchased or leased Class
18 Vehicles, against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive
19 USA, ZF TRW Corp., and ZF Germany (collectively, the "ZF Defendants"), and
20 ST Italy, ST Malaysia, and ST USA (collectively, the "ST Defendants").

21 4128. The ZF and ST Defendants are liable for both fraudulent concealment
22 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

23 4129. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
24 serious risks to vehicle occupants, including that it can cause: (1) airbags and
25 seatbelts not to activate during a crash because crashes can sometimes release
26 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
27 vehicle has not crashed, which is dangerous because it is shocking and difficult for
28 the driver to operate a vehicle when the airbag deploys without warning; and (3)

1 failures of other important post-crash operations of the safety system, such as
2 unlocking doors to facilitate escape or extraction of drivers and passengers by
3 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

4 4130. The ZF and ST Defendants had a duty to disclose the ACU Defect to
5 the Pennsylvania Plaintiffs and Pennsylvania State Class members because:

- 6 a. The ZF and ST Defendants had exclusive access to and far
7 superior knowledge about technical facts regarding the ACU
8 Defect;
- 9 b. Given the ACU Defect’s hidden and technical nature, the
10 Pennsylvania Plaintiffs and Pennsylvania State Class members
11 lack the sophisticated expertise in vehicle components and
12 electrical phenomena that would be necessary to discover the
13 ACU Defect on their own;
- 14 c. The ZF and ST Defendants knew that the ACU Defect gave rise
15 to serious safety concerns for the consumers who use the
16 vehicles, and the Class Vehicles containing the ACU Defect
17 would have been a material fact to the Pennsylvania Plaintiffs’
18 and Pennsylvania State Class members’ decisions to buy or
19 lease Class Vehicles; and
- 20 d. The ZF Defendants made incomplete representations about the
21 safety and reliability of the Class Vehicles and their Occupant
22 Restraint System, while purposefully withholding material facts
23 about a known safety defect, creating a duty to disclose the
24 whole truth. Specifically, ZF Electronics USA, ZF Passive
25 Safety USA, and ZF Automotive USA worked with the Vehicle
26 Manufacturer Defendants on the design and inclusion of the
27 airbag readiness indicators in the Class Vehicles, which falsely
28 assured Plaintiffs and Class Members that the Occupant

1 Restraint Systems in the Class Vehicles would function properly
2 in a crash.

3 4131. In breach of their duties, the ZF and ST Defendants failed to disclose
4 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
5 Systems, including their airbags and seatbelt pretensioners could fail in the event of
6 a crash due to the ACU Defect.

7 4132. The ZF and ST Defendants intended for the Pennsylvania Plaintiffs
8 and Pennsylvania State Class members to rely on their omissions—which they did
9 by purchasing and leasing the Class Vehicles at the prices they paid believing that
10 the Occupant Restraint Systems in their Class Vehicles would function properly.

11 4133. That reliance was reasonable, because a reasonable consumer would
12 not have expected that the Class Vehicles contained a safety defect that poses such
13 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
14 that their vehicle has working airbags and seatbelt pretensioners and would rely on
15 those facts in deciding whether to purchase, lease, or retain a new or used motor
16 vehicle. Whether a manufacturer's products are safe and reliable, and whether that
17 manufacturer stands behind its products, are material concerns to a consumer.
18 Especially here when at least nine people have already died due to the ACU Defect,
19 and many more have been injured.

20 4134. Additionally, the ZF and ST Defendants ensured that the Pennsylvania
21 Plaintiffs and Pennsylvania State Class members did not discover this information
22 by actively concealing and misrepresenting the true nature of the Class Vehicles'
23 Occupant Restraint Systems to consumers and NHTSA.

24 4135. The ZF and ST Defendants actively concealed and suppressed these
25 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
26 protect profits, and to avoid costly recalls that would expose them to liability for
27 those expenses and harm the commercial reputations of Defendants and their
28

1 products. They did so at the expense of the Pennsylvania Plaintiffs and
2 Pennsylvania State Class members.

3 4136. To this day, the ZF and ST Defendants have not fully and adequately
4 disclosed the ACU Defect, and they continue to conceal material information about
5 the defect from consumers and NHTSA. The omitted and concealed facts were
6 material because a reasonable person would find them important in purchasing,
7 leasing, or retaining a new or used motor vehicle, and because they directly impact
8 the value of the Class Vehicles purchased or leased by the Pennsylvania Plaintiffs
9 and Pennsylvania State Class members.

10 4137. Had they been aware of the ACU Defect in the Class Vehicles, and the
11 ZF and ST Defendants' callous disregard for safety, the Pennsylvania Plaintiffs and
12 Pennsylvania State Class members either would not have paid as much as they did
13 for their Class Vehicles, or they would not have purchased or leased them.

14 4138. As alleged in Section V above, if the ZF and ST Defendants had fully
15 and adequately disclosed the ACU Defect to consumers and NHTSA, the
16 Pennsylvania Plaintiffs and Pennsylvania State Class members would have seen
17 such a disclosure.

18 4139. Accordingly, the ZF and ST Defendants are liable to the Pennsylvania
19 Plaintiffs and Pennsylvania State Class members for their damages in an amount to
20 be proven at trial, including, but not limited to, their lost overpayment for the Class
21 Vehicles at the time of purchase or lease.

22 4140. The ZF and ST Defendants' acts were done maliciously, oppressively,
23 deliberately, with intent to defraud; in reckless disregard of the Pennsylvania
24 Plaintiffs' and Pennsylvania State Class members' rights and well-being; and to
25 enrich themselves. The ZF and ST Defendants' misconduct warrants an assessment
26 of punitive damages, as permitted by law, in an amount sufficient to deter such
27 conduct in the future, which amount shall be determined according to proof at trial.
28

1 **g. Pennsylvania Count 7: Unjust Enrichment Against Hyundai**
2 **Korea, Hyundai USA, Kia Korea, and Kia USA**

3 4141. Plaintiffs reallege and incorporate by reference all allegations in
4 Sections I-VI above as though fully set forth herein.

5 4142. Plaintiff Larae Angel brings this count individually and on behalf of
6 members of the Pennsylvania State Class who purchased or leased Hyundai Class
7 Vehicles, against Hyundai Korea and Hyundai USA.

8 4143. Plaintiff Richard Kintzel brings this count individually and on behalf
9 of members of the Pennsylvania State Class who purchased or leased Kia Class
10 Vehicles, against Kia Korea and Kia USA.

11 4144. For purposes of this count, Plaintiffs Angel and Kintzel shall be
12 referred to as the “Pennsylvania Plaintiffs.”

13 4145. The Pennsylvania Plaintiffs and Pennsylvania State Class members
14 conferred tangible and material monetary benefits upon Hyundai Korea, Hyundai
15 USA, Kia Korea, and Kia USA when they purchased or leased the Hyundai and Kia
16 Class Vehicles. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA readily
17 accepted and retained these benefits.

18 4146. The Pennsylvania Plaintiffs and Pennsylvania State Class members
19 would not have purchased or leased the Hyundai and Kia Class Vehicles, or would
20 have paid less for them, had they known of the ACU Defect at the time of purchase
21 or lease. Therefore, Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA
22 profited from the sale and lease of the Hyundai and Kia Class Vehicles to the
23 detriment and expense of the Pennsylvania Plaintiffs and Pennsylvania State Class
24 members.

25 4147. Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA appreciated
26 these monetary benefits. These benefits were the expected result of Hyundai Korea,
27 Hyundai USA, Kia Korea, and Kia USA acting in their pecuniary interest at the
28 expense of their customers. Hyundai Korea, Hyundai USA, Kia Korea, and Kia

1 USA knew of these benefits because they were aware of the ACU Defect, yet they
2 failed to disclose this knowledge and misled the Pennsylvania Plaintiffs and
3 Pennsylvania State Class members regarding the nature and quality of the Hyundai
4 and Kia Class Vehicles while profiting from this deception.

5 4148. It would be unjust, inequitable, and unconscionable for Hyundai
6 Korea, Hyundai USA, Kia Korea, and Kia USA to retain these monetary benefits,
7 including because they were procured as a result of Hyundai Korea's, Hyundai
8 USA's, Kia Korea's, and Kia USA's wrongful conduct alleged above.

9 4149. The Pennsylvania Plaintiffs and Pennsylvania State Class members are
10 entitled to restitution of the benefits Hyundai Korea, Hyundai USA, Kia Korea, and
11 Kia USA unjustly retained and/or any amounts necessary to return the Pennsylvania
12 Plaintiffs and Pennsylvania State Class members to the position they occupied prior
13 to dealing with Hyundai Korea, Hyundai USA, Kia Korea, and Kia USA, with such
14 amounts to be determined at trial.

15 4150. The Pennsylvania Plaintiffs pleads this claim separately as well as in
16 the alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if
17 the Pennsylvania Plaintiffs' claims for damages are dismissed or judgment is
18 entered in favor of Defendants, the Pennsylvania Plaintiffs would have no adequate
19 legal remedy.

20 **20. South Carolina**

21 **a. South Carolina Count 1: Breach of Express Warranty (S.C.**
22 **Code Ann. §§ 36-2-313 and 36-2A-210) Toyota Sales USA¹⁹**

23 4151. Plaintiffs reallege and incorporate by reference all preceding
24 allegations as though fully set forth herein.

25

26

27

28

¹⁹ The Court held in its February 9, 2022 Order that the South Carolina Plaintiff stated a claim for breach of express warranty. *See* ECF No. 396 at 160-61.

1 4152. Plaintiff Michael Hines (hereinafter, “South Carolina Plaintiff”) brings
2 this count individually and on behalf of members of the South Carolina State Class
3 who purchased Toyota Class Vehicles, against Toyota Sales USA.

4 4153. Toyota Sales USA is and was at all relevant times a “merchant” with
5 respect to motor vehicles under S.C. Code Ann. §§ 36-2-104(1) and 36-2A-103(3),
6 and a “seller” of motor vehicles under § 36-2-103(1)(d).

7 4154. With respect to leases, Toyota Sales USA is and was at all relevant
8 times a “lessor” of motor vehicles under S.C. Code Ann. § 36-2A-103(1)(p).

9 4155. All South Carolina State Class members who purchased Toyota Class
10 Vehicles in South Carolina are “buyers” within the meaning of S.C. Code Ann.
11 § 36-2-103(1)(a).

12 4156. All South Carolina State Class members who leased Toyota Class
13 Vehicles in South Carolina are “lessees” within the meaning of S.C. Code Ann.
14 § 36-2A-103(1)(n).

15 4157. The Toyota Class Vehicles are and were at all relevant times “goods”
16 within the meaning of S.C. Code Ann. §§ 36-2-105(1) and 36-2A-103(1)(h).

17 4158. In connection with the purchase or lease of Toyota Class Vehicles,
18 Toyota Sales USA provided the South Carolina Plaintiff and South Carolina State
19 Class members with warranties in the form of: (a) written express warranties
20 covering the repair or replacement of components that are defective in materials or
21 workmanship, and (b) descriptions of the Toyota Class Vehicles as safe and
22 reliable, and that their Occupant Restraint Systems, including their airbags and
23 seatbelt pretensioners, would function properly in the event of a crash

24 4159. However, Toyota Sales USA knew or should have known that the
25 warranties were false and/or misleading. Specifically, Toyota Sales USA was aware
26 of the ACU Defect in the Toyota Class Vehicles, which made the vehicles
27 inherently defective and dangerous at the time that they were sold and leased to the
28 South Carolina Plaintiff and South Carolina State Class members.

1 4160. The South Carolina Plaintiff and South Carolina State Class members
2 were aware the Toyota Class Vehicles were covered by express warranties, and
3 those warranties were an essential part of the bargain between them and Toyota
4 Sales USA when the South Carolina Plaintiff and South Carolina State Class
5 members unknowingly purchased and leased Toyota Class Vehicles that came
6 equipped with defective ACUs and ASICs.

7 4161. Toyota Sales USA misrepresented the Toyota Class Vehicles as safe
8 and reliable while concealing that they contained the ACU Defect, the South
9 Carolina Plaintiff and South Carolina State Class members were exposed to those
10 misrepresentations, and the South Carolina Plaintiff and South Carolina State Class
11 members had no way of discerning that Toyota Sales USA's representations were
12 false and misleading or otherwise learning the material facts that Toyota Sales USA
13 had concealed or failed to disclose. Accordingly, the South Carolina Plaintiff and
14 South Carolina State Class members reasonably relied on Toyota Sales USA's
15 express warranties when purchasing or leasing their Toyota Class Vehicles.
16 Plaintiffs allege the information they relied upon in Section II.B above. To aid
17 review of this information, Exhibit 19 provides paragraph numbers for each
18 Plaintiff.

19 4162. Toyota Sales USA knowingly breached its express warranties to repair
20 defects in materials and workmanship by failing to repair the ACU Defect or
21 replace the defective ACUs and ASICs in the Toyota Class Vehicles. Toyota Sales
22 USA also breached its express warranties by selling and leasing Toyota Class
23 Vehicles with a defect that was never disclosed to the South Carolina Plaintiff and
24 South Carolina State Class members.

25 4163. The South Carolina Plaintiff and South Carolina State Class members
26 have provided Toyota Sales USA with reasonable notice and opportunity to cure
27 the breaches of its express warranties by way of the numerous NHTSA complaints
28 filed against them, and the individual notice letters sent by South Carolina State

1 Class members within a reasonable amount of time after the ACU Defect became
2 public. Additionally, on April 24, 2020, a notice letter was sent on behalf of the
3 South Carolina Plaintiff and South Carolina State Class members to Toyota Sales
4 USA.

5 4164. Alternatively, the South Carolina Plaintiff and South Carolina State
6 Class members were excused from providing Toyota Sales USA with notice and an
7 opportunity to cure the breach, because it would have been futile. As alleged above,
8 Toyota Sales USA has long known that the Toyota Class Vehicles contained the
9 ACU Defect, and that the ACU Defect has caused ACUs and ASICs to malfunction
10 in crashes involving Class Vehicles; however, to date, Toyota Sales USA has not
11 instituted a recall or any other repair program with respect to the unrecalled Toyota
12 Class Vehicles, or even acknowledged that the ACU Defect exists in all Toyota
13 Class Vehicles, including the recalled Toyota Class Vehicles—even though Toyota
14 Class Vehicles are subject to the NHTSA investigation. Therefore, the South
15 Carolina Plaintiff and South Carolina State Class members had no reason to believe
16 that Toyota Sales USA would have repaired the ACU Defect if the South Carolina
17 Plaintiff and South Carolina State Class members presented their Class Vehicles to
18 it for repair.

19 4165. As a direct and proximate result of Toyota Sales USA's breach of its
20 express warranties, the Toyota Class Vehicles were and are defective and the ACU
21 Defect in the South Carolina Plaintiff's and South Carolina State Class members'
22 Toyota Class Vehicles was not remedied. Therefore, the South Carolina Plaintiff
23 and South Carolina State Class members have been damaged, in an amount to be
24 proven at trial, through their overpayment at the time of purchase or lease for
25 Toyota Class Vehicles with an undisclosed safety defect that would not be
26 remedied.

27
28

1 **b. South Carolina Count 2: Breach of Implied Warranty of**
2 **Merchantability (S.C. Code Ann. §§ 36-2-314 and 36-2A-**
3 **212) Against Toyota Sales USA**²⁰

4 4166. Plaintiffs reallege and incorporate by reference all preceding
5 allegations as though fully set forth herein.

6 4167. The South Carolina Plaintiff brings this count individually and on
7 behalf of members of the South Carolina State Class who purchased Toyota Class
8 Vehicles, against Toyota Sales USA.

9 4168. A warranty that the Toyota Class Vehicles were in merchantable
10 condition and fit for the ordinary purpose for which such goods are used is implied
11 by law pursuant to S.C. Code Ann. §§ 36-2-314 and 36-2A-212.

12 4169. Toyota Sales USA is and was at all relevant times a “merchant” with
13 respect to motor vehicles under S.C. Code Ann. §§ 36-2-104(1) and 36-2A-103(3),
14 and a “seller” of motor vehicles under § 36-2-103(1)(d).

15 4170. With respect to leases, Toyota Sales USA is and was at all relevant
16 times a “lessor” of motor vehicles under S.C. Code Ann. § 36-2A-103(1)(p).

17 4171. All South Carolina State Class members who purchased Toyota Class
18 Vehicles in South Carolina are “buyers” within the meaning of S.C. Code Ann.
19 § 36-2-103(1)(a).

20 4172. All South Carolina State Class members who leased Toyota Class
21 Vehicles in South Carolina are “lessees” within the meaning of S.C. Code Ann.
22 § 36-2A-103(1)(n).

23 4173. The Toyota Class Vehicles are and were at all relevant times “goods”
24 within the meaning of S.C. Code Ann. §§ 36-2-105(1) and 36-2A-103(1)(h).

25 4174. The Toyota Class Vehicles did not comply with the implied warranty
26 of merchantability because, at the time of sale and lease and at all times thereafter,
27 they were defective and not in merchantable condition, would not pass without
28 objection in the trade, and were not fit for the ordinary purpose for which vehicles

²⁰ *Id.*

1 were used. Specifically, at the time they were sold and leased, the Toyota Class
2 Vehicles contained the ACU Defect, which may cause the airbags and seatbelt
3 pretensioners to fail to deploy during a crash, the failure to unlock doors
4 automatically after a crash, the failure to turn off a fuel supply or high-voltage
5 battery after a crash, or the airbags to inadvertently deploy, all of which render the
6 Toyota Class Vehicles inherently defective and dangerous.

7 4175. The South Carolina Plaintiff and South Carolina Plaintiff State Class
8 members have provided Toyota Sales USA with reasonable notice and opportunity
9 to cure the breaches of its implied warranties by way of the numerous NHTSA
10 complaints filed against it, and the individual notice letters sent by South Carolina
11 State Class members within a reasonable amount of time after the ACU Defect
12 became public. Additionally, on April 24, 2020, a notice letter was sent on behalf of
13 the South Carolina Plaintiff and South Carolina State Class members to Toyota
14 Sales USA.

15 4176. Alternatively, the South Carolina Plaintiff and South Carolina State
16 Class members were excused from providing Toyota Sales USA with notice and an
17 opportunity to cure the breach, because it would have been futile. As alleged above,
18 Toyota Sales USA has long known that the Toyota Class Vehicles contained the
19 ACU Defect, and that the ACU Defect has caused ACUs and ASICs to malfunction
20 in crashes involving Class Vehicles; however, to date, Toyota Sales USA has not
21 instituted a recall or any other repair program with respect to the unrecalled Toyota
22 Class Vehicles, or even acknowledged that the ACU Defect exists in all Toyota
23 Class Vehicles, including the recalled Toyota Class Vehicles—even though Toyota
24 Class Vehicles are subject to the NHTSA investigation. Therefore, the South
25 Carolina Plaintiff and South Carolina State Class members had no reason to believe
26 that Toyota Sales USA would have repaired the ACU Defect if the South Carolina
27 Plaintiff and South Carolina State Class members presented their Class Vehicles to
28 it for repair.

1 4177. As a direct and proximate result of Toyota Sales USA’s breach of the
2 implied warranty of merchantability, the South Carolina Plaintiff and South
3 Carolina Plaintiff State Class members have been damaged through their
4 overpayment at the time of purchase or lease for Toyota Class Vehicles with an
5 undisclosed safety defect in an amount to be proven at trial.

6 **c. South Carolina Count 3: Violation of the South Carolina**
7 **Unfair Trade Practices Act (S.C. Code Ann. § 39-5-10, et**
8 **seq.) Against Toyota USA and Toyota Sales USA**

9 4178. Plaintiffs reallege and incorporate by reference all preceding
10 allegations as though fully set forth herein.

11 4179. The South Carolina Plaintiff brings this count individually and on
12 behalf of members of the South Carolina State Class who purchased Toyota Class
13 Vehicles, against Toyota USA and Toyota Sales USA.

14 4180. Toyota USA Toyota Sales USA, the South Carolina Plaintiff, and the
15 South Carolina State Class members are “persons” within the meaning of S.C. Code
16 Ann. § 39-5-10(a).

17 4181. Toyota USA and Toyota Sales USA were and are engaged in “trade”
18 or “commerce” within the meaning of S.C. Code Ann. § 39-5-10(b).

19 4182. The South Carolina Unfair Trade Practices Act (“South Carolina
20 UTPA”) prohibits “unfair or deceptive acts or practices in the conduct of any trade
21 or commerce[.]” S.C. Code Ann. § 39-5-20(a).

22 4183. In the course of their business, Toyota USA and Toyota Sales USA,
23 through their agents, employees, and/or subsidiaries, violated the South Carolina
24 UTPA by knowingly and intentionally misrepresenting, omitting, concealing,
25 and/or failing to disclose material facts regarding the reliability, safety, and
26 performance of the Toyota Class Vehicles, the safety of their Occupant Restraint
27 Systems, and the ACU Defect, as detailed above.

28 4184. Toyota USA and Toyota Sales USA had an ongoing duty to the South
Carolina Plaintiff and South Carolina State Class members to refrain from unfair or

1 deceptive practices under the South Carolina UTPA in the course of their business.
2 Specifically, Toyota USA and Toyota Sales USA owed the South Carolina Plaintiff
3 and South Carolina State Class members a duty to disclose all the material facts
4 concerning the ACU Defect in the Toyota Class Vehicles because they possessed
5 exclusive knowledge, they intentionally concealed the ACU Defect from the South
6 Carolina Plaintiff and South Carolina State Class members, and/or they made
7 misrepresentations that were rendered misleading because they were contradicted
8 by withheld facts.

9 4185. By misrepresenting the Toyota Class Vehicles as safe and reliable and
10 the defective ACU and ASICs installed in them as properly-functioning and free
11 from defects, and by failing to disclose and actively concealing the dangers and risk
12 posed by the ACU Defect to both consumers and NHTSA, Toyota USA and Toyota
13 Sales USA engaged in unfair or deceptive business practices prohibited by S.C.
14 Code Ann. § 39-5-20(a).

15 4186. Toyota USA's and Toyota Sales USA's unfair and deceptive acts or
16 practices, including their misrepresentations, concealments, omissions, and
17 suppressions of material facts, were designed to mislead and had a tendency or
18 capacity to mislead and create a false impression in consumers that the Toyota
19 Class Vehicles had properly-functioning and reliable airbags and seatbelts, and that
20 the Occupant Restraint System did not contain the ACU Defect and would perform
21 its intended function of activating the seatbelts and airbags during a collision.
22 Indeed, those misrepresentations, concealments, omissions, and suppressions of
23 material facts did in fact deceive reasonable consumers, including the South
24 Carolina Plaintiff and South Carolina State Class members, about the true safety
25 and reliability of Toyota Class Vehicles and/or the defective ACUs and ASICs
26 installed in them, the quality of the Toyota Class Vehicles, and the true value of the
27 Toyota Class Vehicles.

28

1 4187. Toyota USA’s and Toyota Sales USA’s misrepresentations,
2 concealments, omissions, and suppressions of material facts regarding the ACU
3 Defect and true characteristics of the Occupant Restraint Systems in the Toyota
4 Class Vehicles were material to the decisions of the South Carolina Plaintiff and
5 South Carolina State Class members to purchase and lease those vehicles, as
6 Toyota USA and Toyota Sales USA intended. The South Carolina Plaintiff and
7 South Carolina State Class members were exposed to those misrepresentations,
8 concealments, omissions, and suppressions of material facts, and relied on Toyota
9 USA’s and Toyota Sales USA’s misrepresentations that the Toyota Class Vehicles
10 and their Occupant Restraint Systems were safe and reliable in deciding to purchase
11 and lease Toyota Class Vehicles. Plaintiffs allege the information they relied upon
12 in Section II.B above. To aid review of this information, Exhibit 19 provides
13 paragraph numbers for each Plaintiff.

14 4188. The South Carolina Plaintiff’s and South Carolina State Class
15 members’ reliance was reasonable, as they had no way of discerning that Toyota
16 USA’s and Toyota Sales USA’s representations were false and misleading, or
17 otherwise learning the facts that Toyota USA and Toyota Sales USA had concealed
18 or failed to disclose. The South Carolina Plaintiff and South Carolina State Class
19 members did not, and could not, unravel Toyota USA’s and Toyota Sales USA’s
20 deception on their own.

21 4189. Had the South Carolina Plaintiff and South Carolina State Class
22 members known the truth about the ACU Defect, the South Carolina Plaintiff and
23 South Carolina State Class members would not have purchased or leased Toyota
24 Class Vehicles, or would have paid significantly less for them.

25 4190. The South Carolina Plaintiff and South Carolina State Class members
26 suffered ascertainable losses and actual damages through their overpayment at the
27 time of purchase and lease for Toyota Class Vehicles with an undisclosed safety
28

1 defect as a direct and proximate result of Toyota USA’s and Toyota Sales USA’s
2 concealment, misrepresentations, and/or failure to disclose material information.

3 4191. Toyota USA’s and Toyota Sales USA’s violations present a continuing
4 risk to the South Carolina Plaintiff and South Carolina State Class members, as well
5 as to the general public, because the Class Vehicles remain unsafe due to the
6 defective ACUs and ASICs therein. Additionally, their unlawful acts and practices
7 complained of herein affect the public interest.

8 4192. Pursuant to S.C. Code Ann. § 39-5-140(a), the South Carolina Plaintiff
9 and South Carolina State Class members seek an order enjoining Toyota USA’s and
10 Toyota Sales USA’s unfair or deceptive acts or practices and awarding damages
11 and any other just and proper relief available under the South Carolina UTPA.

12 **d. South Carolina Count 4: Violation of the South Carolina**
13 **Unfair Trade Practices Act (S.C. Code Ann. § 39-5-10, et**
14 **seq.) Against ZF Electronics USA, ZF Passive Safety USA,**
ZF Automotive USA, ZF TRW Corp., ZF Germany, ST
Italy, ST USA, and ST Malaysia

15 4193. Plaintiffs reallege and incorporate by reference all preceding
16 allegations as though fully set forth herein.

17 4194. The South Carolina Plaintiff brings this count individually and on
18 behalf of members of the South Carolina State Class against ZF Electronics USA,
19 ZF Passive Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany
20 (collectively, the “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA
21 (collectively, the “ST Defendants”).

22 4195. The ZF Defendants, the ST Defendants, the South Carolina Plaintiff,
23 and South Carolina State Class members are “persons” within the meaning of S.C.
24 Code Ann. § 39-5-10(a).

25 4196. The ZF and ST Defendants were and are engaged in “trade” or
26 “commerce” within the meaning of S.C. Code Ann. § 39-5-10(b).

27
28

1 4197. The South Carolina Unfair Trade Practices Act (“South Carolina
2 UTPA”) prohibits “unfair or deceptive acts or practices in the conduct of any trade
3 or commerce[.]” S.C. Code Ann. § 39-5-20(a).

4 4198. The ZF and ST Defendants had an ongoing duty to the South Carolina
5 Plaintiff and South Carolina State Class members to refrain from unfair or
6 deceptive practices under the South Carolina UTPA in the course of their business.
7 Specifically, the ZF and ST Defendants owed the South Carolina Plaintiff and
8 South Carolina State Class members a duty to disclose all the material facts
9 concerning the ACU Defect in the Class Vehicles because they possessed exclusive
10 knowledge and they intentionally concealed the ACU Defect from the South
11 Carolina Plaintiff and South Carolina State Class members.

12 4199. In the course of their business, the ZF and ST Defendants, through
13 their agents, employees, and/or subsidiaries, violated the South Carolina UTPA by
14 knowingly and intentionally omitting, concealing, and failing to disclose material
15 facts regarding the existence, nature, and scope of the defective ACU and ASIC
16 installed in the Class Vehicles, as detailed above.

17 4200. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
18 Automotive USA through their agents, employees, and/or subsidiaries, violated the
19 South Carolina UTPA when they knowingly and intentionally misrepresented the
20 Class Vehicles as safe and reliable and the defective ACU and ASICs installed in
21 them as properly-functioning and free from defects. Specifically, ZF Electronics
22 USA, ZF Passive Safety USA, and ZF Automotive USA worked with the Vehicle
23 Manufacturer Defendants on the design and inclusion of the airbag readiness
24 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
25 Members that the Occupant Restraint Systems in the Class Vehicles would function
26 properly in a crash.

27 4201. By misrepresenting, failing to disclose, and actively concealing the
28 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and

1 ST Defendants engaged in deceptive acts or practices prohibited by S.C. Code Ann.
2 § 39-5-20(a).

3 4202. The ZF and ST Defendants' unfair or deceptive acts or practices,
4 including their misrepresentations, concealments, omissions, and suppressions of
5 material facts, were designed to mislead and had a tendency or capacity to mislead
6 and create a false impression in consumers that the Class Vehicles had properly-
7 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
8 System did not contain the ACU Defect and would perform its intended function of
9 activating the seatbelts and airbags during a collision. Indeed, those
10 misrepresentations, concealments, omissions, and suppressions of material facts did
11 in fact deceive reasonable consumers, including the South Carolina Plaintiff and
12 South Carolina State Class members, about the true safety and reliability of Class
13 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
14 Class Vehicles, and the true value of the Class Vehicles.

15 4203. The South Carolina Plaintiff and South Carolina State Class members
16 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
17 concealment, as they had no way of discerning that the Class Vehicles contained
18 the ACU Defect, as alleged above. The South Carolina Plaintiff and South Carolina
19 State Class members did not, and could not, unravel the ZF and ST Defendants'
20 deception on their own

21 4204. The ZF and ST Defendants' misrepresentations and concealment of the
22 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
23 Vehicles were material to the decisions of the South Carolina Plaintiff and South
24 Carolina State Class members to purchase and lease Class Vehicles, as the ZF and
25 ST Defendants intended. Had they known the truth, the South Carolina Plaintiff and
26 South Carolina State Class members would not have purchased or leased the Class
27 Vehicles, or would have paid significantly less for them.

28

1 4205. The South Carolina Plaintiff and South Carolina State Class members
2 suffered ascertainable losses and actual damages as a direct and proximate result of
3 the ZF and ST Defendants' misrepresentations, concealment and/or failure to
4 disclose material information.

5 4206. The ZF and ST Defendants' violations present a continuing risk to the
6 South Carolina Plaintiff and South Carolina State Class members, as well as to the
7 general public, because the Class Vehicles remain unsafe due to the defective
8 ACUs and ASICs therein. The ZF and ST Defendants' unlawful acts and practices
9 complained of herein affect the public interest.

10 4207. Pursuant to S.C. Code Ann. § 39-5-140(a), the South Carolina Plaintiff
11 and South Carolina State Class members seek an order enjoining the ZF and ST
12 Defendants' unfair or deceptive acts or practices and awarding damages and any
13 other just and proper relief available under the South Carolina UTPA.

14 e. **South Carolina Count 5: Fraud by Omission and**
15 **Concealment Against Toyota USA and Toyota Sales USA**

16 4208. Plaintiffs reallege and incorporate by reference all preceding
17 allegations as though fully set forth herein.

18 4209. The South Carolina Plaintiff brings this count individually and on
19 behalf of members of the South Carolina State Class who purchased or leased
20 Toyota Class Vehicles, against Toyota USA and Toyota Sales USA.

21 4210. Toyota USA and Toyota Sales USA are liable for both fraudulent
22 concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-
23 51 (1977).

24 4211. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
25 serious risks to vehicle occupants, including that it can cause: (1) airbags and
26 seatbelts not to activate during a crash because crashes can sometimes release
27 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
28 vehicle has not crashed, which is dangerous because it is shocking and difficult for

1 the driver to operate a vehicle when the airbag deploys without warning; and (3)
2 failures of other important post-crash operations of the safety system, such as
3 unlocking doors to facilitate escape or extraction of drivers and passengers by
4 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

5 4212. Toyota USA and Toyota Sales USA had a duty to disclose the ACU
6 Defect to the South Carolina Plaintiff and South Carolina State Class members
7 because:

- 8 a. Toyota USA and Toyota Sales USA had exclusive access to and
9 far superior knowledge about technical facts regarding the ACU
10 Defect;
- 11 b. Given the ACU Defect's hidden and technical nature, the South
12 Carolina Plaintiff and South Carolina State Class members lack
13 the sophisticated expertise in vehicle components and electrical
14 phenomena that would be necessary to discover the ACU Defect
15 on their own;
- 16 c. Toyota USA and Toyota Sales USA knew that the ACU Defect
17 gave rise to serious safety concerns for the consumers who use
18 the vehicles, and the Toyota Class Vehicles containing the ACU
19 Defect would have been a material fact to the South Carolina
20 Plaintiff's and South Carolina State Class members' decisions to
21 buy or lease Toyota Class Vehicles; and
- 22 d. Toyota USA and Toyota Sales USA made incomplete
23 representations about the safety and reliability of the Toyota
24 Class Vehicles and their Occupant Restraint System, while
25 purposefully withholding material facts about a known safety
26 defect. In uniform advertising and materials provided with each
27 Class Vehicle, Toyota USA and Toyota Sales USA intentionally
28 concealed, suppressed, and failed to disclose to the South

1 Carolina Plaintiff and South Carolina State Class members that
2 the Toyota Class Vehicles contained the ACU Defect. Because
3 they volunteered to provide information about the Toyota Class
4 Vehicles that they marketed and offered for sale and lease to the
5 South Carolina Plaintiff and South Carolina State Class
6 members, Toyota USA and Toyota Sales USA had the duty to
7 disclose the whole truth.

8 4213. In breach of their duties, Toyota USA and Toyota Sales USA failed to
9 disclose that the Toyota Class Vehicles were not safe and reliable, and that their
10 Occupant Restraint Systems, including their airbags and seatbelt pretensioners
11 could fail in the event of a crash due to the ACU Defect.

12 4214. Toyota USA and Toyota Sales USA intended for the South Carolina
13 Plaintiff and South Carolina State Class members to rely on their omissions—
14 which they did by purchasing and leasing the Toyota Class Vehicles at the prices
15 they paid believing that the Occupant Restraint Systems in their Class Vehicles
16 would function properly.

17 4215. That reliance was reasonable, because a reasonable consumer would
18 not have expected that the Toyota Class Vehicles contained a safety defect that
19 poses such a serious risk. Toyota USA and Toyota Sales USA knew that reasonable
20 consumers expect that their vehicle has working airbags and seatbelt pretensioners
21 and would rely on those facts in deciding whether to purchase, lease, or retain a
22 new or used motor vehicle. Whether a manufacturer's products are safe and
23 reliable, and whether that manufacturer stands behind its products, are material
24 concerns to a consumer. Especially here when at least nine people have already
25 died due to the ACU Defect, and many more have been injured.

26 4216. Additionally, Toyota USA and Toyota Sales USA ensured that the
27 South Carolina Plaintiff and South Carolina State Class members did not discover
28

1 this information by actively concealing and misrepresenting the true nature of the
2 Toyota Class Vehicles' Occupant Restraint Systems to consumers and NHTSA.

3 4217. Toyota USA and Toyota Sales USA actively concealed and suppressed
4 these material facts, in whole or in part, to maintain a market for their Class
5 Vehicles, to protect profits, and to avoid costly recalls that would expose them to
6 liability for those expenses and harm the commercial reputations of Defendants and
7 their products. They did so at the expense of the South Carolina Plaintiff and South
8 Carolina State Class members.

9 4218. To this day, Toyota USA and Toyota Sales USA have not fully and
10 adequately disclosed the ACU Defect, and they continue to conceal material
11 information about the defect from consumers and NHTSA. The omitted and
12 concealed facts were material because a reasonable person would find them
13 important in purchasing, leasing, or retaining a new or used motor vehicle, and
14 because they directly impact the value of the Toyota Class Vehicles purchased or
15 leased by the South Carolina Plaintiff and South Carolina State Class members.

16 4219. Had they been aware of the ACU Defect in the Toyota Class Vehicles,
17 and Toyota USA's and Toyota Sales USA's callous disregard for safety, the South
18 Carolina Plaintiff and South Carolina State Class members either would not have
19 paid as much as they did for their Class Vehicles, or they would not have purchased
20 or leased them.

21 4220. As alleged in Section V above, if Toyota USA and Toyota Sales USA
22 had fully and adequately disclosed the ACU Defect to consumers and NHTSA, the
23 South Carolina Plaintiff and South Carolina State Class members would have seen
24 such a disclosure.

25 4221. Accordingly, Toyota USA and Toyota Sales USA are liable to the
26 South Carolina Plaintiff and South Carolina State Class members for their damages
27 in an amount to be proven at trial, including, but not limited to, their lost
28 overpayment for the Toyota Class Vehicles at the time of purchase or lease.

1 4222. Toyota USA’s and Toyota Sales USA’s acts were done maliciously,
2 oppressively, deliberately, with intent to defraud; in reckless disregard of the South
3 Carolina Plaintiff’s and South Carolina State Class members’ rights and well-being;
4 and to enrich themselves. Toyota USA’s and Toyota Sales USA’s misconduct
5 warrants an assessment of punitive damages, as permitted by law, in an amount
6 sufficient to deter such conduct in the future, which amount shall be determined
7 according to proof at trial.

8 **f. South Carolina Count 6: Fraud by Omission and**
9 **Concealment Against ZF Electronics USA, ZF Passive**
10 **Safety USA, ZF Automotive USA, ZF TRW Corp., ZF**
11 **Germany, ST Italy, ST USA, and ST Malaysia**

11 4223. Plaintiffs reallege and incorporate by reference all preceding
12 allegations as though fully set forth herein.

13 4224. The South Carolina Plaintiff brings this count individually and on
14 behalf of members of the South Carolina State Class who purchased or leased Class
15 Vehicles, against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive
16 USA, ZF TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and
17 ST Italy, ST Malaysia, and ST USA (collectively, the “ST Defendants”).

18 4225. The ZF and ST Defendants are liable for both fraudulent concealment
19 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

20 4226. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
21 serious risks to vehicle occupants, including that it can cause: (1) airbags and
22 seatbelts not to activate during a crash because crashes can sometimes release
23 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
24 vehicle has not crashed, which is dangerous because it is shocking and difficult for
25 the driver to operate a vehicle when the airbag deploys without warning; and (3)
26 failures of other important post-crash operations of the safety system, such as
27 unlocking doors to facilitate escape or extraction of drivers and passengers by
28 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

1 4227. The ZF and ST Defendants had a duty to disclose the ACU Defect to
2 the South Carolina Plaintiff and South Carolina State Class members because:

- 3 a. The ZF and ST Defendants had exclusive access to and far
4 superior knowledge about technical facts regarding the ACU
5 Defect;
- 6 b. Given the ACU Defect’s hidden and technical nature, the South
7 Carolina Plaintiff and South Carolina State Class members lack
8 the sophisticated expertise in vehicle components and electrical
9 phenomena that would be necessary to discover the ACU Defect
10 on their own;
- 11 c. The ZF and ST Defendants knew that the ACU Defect gave rise
12 to serious safety concerns for the consumers who use the
13 vehicles, and the Class Vehicles containing the ACU Defect
14 would have been a material fact to the South Carolina Plaintiff’s
15 and South Carolina State Class members’ decisions to buy or
16 lease Class Vehicles; and
- 17 d. The ZF Defendants made incomplete representations about the
18 safety and reliability of the Class Vehicles and their Occupant
19 Restraint System, while purposefully withholding material facts
20 about a known safety defect, creating a duty to disclose the
21 whole truth. Specifically, ZF Electronics USA, ZF Passive
22 Safety USA, and ZF Automotive USA worked with the Vehicle
23 Manufacturer Defendants on the design and inclusion of the
24 airbag readiness indicators in the Class Vehicles, which falsely
25 assured Plaintiffs and Class Members that the Occupant
26 Restraint Systems in the Class Vehicles would function properly
27 in a crash.
28

1 4228. In breach of their duties, the ZF and ST Defendants failed to disclose
2 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
3 Systems, including their airbags and seatbelt pretensioners could fail in the event of
4 a crash due to the ACU Defect.

5 4229. The ZF and ST Defendants intended for the South Carolina Plaintiff
6 and South Carolina State Class members to rely on their omissions—which they did
7 by purchasing and leasing the Class Vehicles at the prices they paid believing that
8 the Occupant Restraint Systems in their Class Vehicles would function properly.

9 4230. That reliance was reasonable, because a reasonable consumer would
10 not have expected that the Class Vehicles contained a safety defect that poses such
11 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
12 that their vehicle has working airbags and seatbelt pretensioners and would rely on
13 those facts in deciding whether to purchase, lease, or retain a new or used motor
14 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
15 manufacturer stands behind its products, are material concerns to a consumer.
16 Especially here when at least nine people have already died due to the ACU Defect,
17 and many more have been injured.

18 4231. Additionally, the ZF and ST Defendants ensured that the South
19 Carolina Plaintiff and South Carolina State Class members did not discover this
20 information by actively concealing and misrepresenting the true nature of the Class
21 Vehicles’ Occupant Restraint Systems to consumers and NHTSA.

22 4232. The ZF and ST Defendants actively concealed and suppressed these
23 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
24 protect profits, and to avoid costly recalls that would expose them to liability for
25 those expenses and harm the commercial reputations of Defendants and their
26 products. They did so at the expense of the South Carolina Plaintiff and South
27 Carolina State Class members.

28

1 4233. To this day, the ZF and ST Defendants have not fully and adequately
2 disclosed the ACU Defect, and they continue to conceal material information about
3 the defect from consumers and NHTSA. The omitted and concealed facts were
4 material because a reasonable person would find them important in purchasing,
5 leasing, or retaining a new or used motor vehicle, and because they directly impact
6 the value of the Class Vehicles purchased or leased by the South Carolina Plaintiff
7 and South Carolina State Class members.

8 4234. Had they been aware of the ACU Defect in the Class Vehicles, and the
9 ZF and ST Defendants' callous disregard for safety, the South Carolina Plaintiff
10 and South Carolina State Class members either would not have paid as much as
11 they did for their Class Vehicles, or they would not have purchased or leased them.

12 4235. As alleged in Section V above, if the ZF and ST Defendants had fully
13 and adequately disclosed the ACU Defect to consumers and NHTSA, the South
14 Carolina Plaintiff and South Carolina State Class members would have seen such a
15 disclosure.

16 4236. Accordingly, the ZF and ST Defendants are liable to the South
17 Carolina Plaintiff and South Carolina State Class members for their damages in an
18 amount to be proven at trial, including, but not limited to, their lost overpayment
19 for the Class Vehicles at the time of purchase or lease.

20 4237. The ZF and ST Defendants' acts were done maliciously, oppressively,
21 deliberately, with intent to defraud; in reckless disregard of the South Carolina
22 Plaintiff's and South Carolina State Class members' rights and well-being; and to
23 enrich themselves. The ZF and ST Defendants' misconduct warrants an assessment
24 of punitive damages, as permitted by law, in an amount sufficient to deter such
25 conduct in the future, which amount shall be determined according to proof at trial.

26
27
28

1 **21. South Dakota**

2 **a. South Dakota Count 1: Breach of Express Warranty (S.D. Codified Laws §§ 57A-2-313 and 57A-2A-210) Against FCA**

3
4 4238. Plaintiffs reallege and incorporate by reference all preceding
5 allegations as though fully set forth herein.

6 4239. Plaintiff Desiree Meyer (hereinafter, “South Dakota Plaintiff”) brings
7 this count individually and on behalf of members of the South Dakota State Class
8 who purchased or leased FCA Class Vehicles, against FCA.

9 4240. FCA is and was at all relevant times a “merchant” with respect to
10 motor vehicles under S.D. Codified Laws §§ 57A-2-104(1) and 57A-2A-103(3),
11 and a “seller” of motor vehicles under § 57A-2-103(1)(d).

12 4241. With respect to leases, FCA is and was at all relevant times a “lessor”
13 of motor vehicles under S.D. Codified Laws § 57A-2A-103(1)(p).

14 4242. All South Dakota State Class members who purchased FCA Class
15 Vehicles in South Dakota are “buyers” within the meaning of S.D. Codified Laws
16 § 57A-2-103(1)(a).

17 4243. All South Dakota State Class members who leased FCA Class
18 Vehicles in South Dakota are “lessees” within the meaning of S.D. Codified Laws
19 § 57A-2A-103(1)(n).

20 4244. The FCA Class Vehicles are and were at all relevant times “goods”
21 within the meaning of S.D. Codified Laws §§ 57A-2-105(1) and 57A-2A-
22 103(1)(h).

23 4245. In connection with the purchase or lease of FCA Class Vehicles, FCA
24 provided the South Dakota Plaintiff and South Dakota State Class members with
25 warranties in the form of: (a) written express warranties covering the repair or
26 replacement of components that are defective in materials or workmanship, and (b)
27 descriptions of the FCA Class Vehicles as safe and reliable, and that their Occupant
28

1 Restraint Systems, including their airbags and seatbelt pretensioners, would
2 function properly in the event of a crash

3 4246. However, FCA knew or should have known that the warranties were
4 false and/or misleading. Specifically, FCA was aware of the ACU Defect in the
5 FCA Class Vehicles, which made the vehicles inherently defective and dangerous
6 at the time that they were sold and leased to the South Dakota Plaintiff and South
7 Dakota State Class members.

8 4247. The South Dakota Plaintiff and South Dakota State Class members
9 were aware the FCA Class Vehicles were covered by express warranties, and those
10 warranties were an essential part of the bargain between them and FCA when the
11 South Dakota Plaintiff and South Dakota State Class members unknowingly
12 purchased and leased FCA Class Vehicles that came equipped with defective ACUs
13 and ASICs.

14 4248. FCA misrepresented the FCA Class Vehicles as safe and reliable while
15 concealing that they contained the ACU Defect, the South Dakota Plaintiff and
16 South Dakota State Class members were exposed to those misrepresentations, and
17 the South Dakota Plaintiff and South Dakota State Class members had no way of
18 discerning that FCA's representations were false and misleading or otherwise
19 learning the material facts that FCA had concealed or failed to disclose.

20 Accordingly, the South Dakota Plaintiff and South Dakota State Class members
21 reasonably relied on FCA's express warranties when purchasing or leasing their
22 FCA Class Vehicles. Plaintiffs allege the information they relied upon in Section
23 II.B above. To aid review of this information, Exhibit 19 provides paragraph
24 numbers for each Plaintiff.

25 4249. FCA knowingly breached its express warranties to repair defects in
26 materials and workmanship by failing to repair the ACU Defect or replace the
27 defective ACUs and ASICs in the FCA Class Vehicles. FCA also breached its
28 express warranties by selling and leasing FCA Class Vehicles with a defect that

1 was never disclosed to the South Dakota Plaintiff and South Dakota State Class
2 members.

3 4250. The South Dakota Plaintiff and South Dakota State Class members
4 have provided FCA with reasonable notice and opportunity to cure the breaches of
5 its express warranties by way of the numerous NHTSA complaints filed against it,
6 and the individual notice letters sent by South Dakota State Class members within a
7 reasonable amount of time after the ACU Defect became public. Additionally, on
8 April 24, 2020, a notice letter was sent on behalf of the South Dakota Plaintiff and
9 South Dakota State Class members to FCA.

10 4251. Alternatively, the South Dakota Plaintiff and South Dakota State Class
11 members were excused from providing FCA with notice and an opportunity to cure
12 the breach, because it would have been futile. As alleged above, FCA has long
13 known that the FCA Class Vehicles contained the ACU Defect, and that the ACU
14 Defect has caused ACUs and ASICs to malfunction in crashes involving Class
15 Vehicles; however, to date, FCA has not instituted a recall or any other repair
16 program with respect to the unrecalled FCA Class Vehicles, or even acknowledged
17 that the ACU Defect exists in all FCA Class Vehicles, including the recalled FCA
18 Class Vehicles—even though FCA Class Vehicles are subject to the NHTSA
19 investigation. Therefore, the South Dakota Plaintiff and South Dakota State Class
20 members had no reason to believe that FCA would have repaired the ACU Defect if
21 the South Dakota Plaintiff and South Dakota State Class members presented their
22 Class Vehicles to it for repair.

23 4252. As a direct and proximate result of FCA's breach of its express
24 warranties, the FCA Class Vehicles were and are defective and the ACU Defect in
25 the South Dakota Plaintiff's and South Dakota State Class members' FCA Class
26 Vehicles was not remedied. Therefore, the South Dakota Plaintiff and South Dakota
27 State Class members have been damaged, in an amount to be proven at trial,
28

1 through their overpayment at the time of purchase or lease for FCA Class Vehicles
2 with an undisclosed safety defect that would not be remedied.

3 **b. South Dakota Count 2: Breach of Implied Warranty of**
4 **Merchantability (S.D. Codified Laws §§ 57A-2-314 and 57A-**
5 **2A-212) Against FCA**

6 4253. Plaintiffs reallege and incorporate by reference all preceding
7 allegations as though fully set forth herein.

8 4254. The South Dakota Plaintiff brings this count individually and on behalf
9 of members of the South Dakota State Class who purchased or leased FCA Class
10 Vehicles, against FCA.

11 4255. A warranty that the FCA Class Vehicles were in merchantable
12 condition and fit for the ordinary purpose for which such goods are used is implied
13 by law pursuant to S.D. Codified Laws §§ 57A-2-314 and 57A-2A-212.

14 4256. FCA is and was at all relevant times a “merchant” with respect to
15 motor vehicles under S.D. Codified Laws §§ 57A-2-104(1) and 57A-2A-103(3),
16 and a “seller” of motor vehicles under § 57A-2-103(1)(d).

17 4257. With respect to leases, FCA is and was at all relevant times a “lessor”
18 of motor vehicles under S.D. Codified Laws § 57A-2A-103(1)(p).

19 4258. All South Dakota State Class members who purchased FCA Class
20 Vehicles in South Dakota are “buyers” within the meaning of S.D. Codified Laws
21 § 57A-2-103(1)(a).

22 4259. All South Dakota State Class members who leased FCA Class
23 Vehicles in South Dakota are “lessees” within the meaning of S.D. Codified Laws
24 § 57A-2A-103(1)(n).

25 4260. The FCA Class Vehicles are and were at all relevant times “goods”
26 within the meaning of S.D. Codified Laws §§ 57A-2-105(1) and 57A-2A-
27 103(1)(h).

28 4261. The FCA Class Vehicles did not comply with the implied warranty of
merchantability because, at the time of sale and lease and at all times thereafter,

1 they were defective and not in merchantable condition, would not pass without
2 objection in the trade, and were not fit for the ordinary purpose for which vehicles
3 were used. Specifically, at the time they were sold and leased, the FCA Class
4 Vehicles contained the ACU Defect, which may cause the airbags and seatbelt
5 pretensioners to fail to deploy during a crash, the failure to unlock doors
6 automatically after a crash, the failure to turn off a fuel supply or high-voltage
7 battery after a crash, or the airbags to inadvertently deploy, all of which render the
8 FCA Class Vehicles inherently defective and dangerous.

9 4262. The South Dakota Plaintiff and South Dakota State Class members
10 have provided FCA with reasonable notice and opportunity to cure the breaches of
11 its implied warranties by way of the numerous NHTSA complaints filed against it,
12 and the individual notice letters sent by South Dakota State Class members within a
13 reasonable amount of time after the ACU Defect became public. Additionally, on
14 April 24, 2020, a notice letter was sent on behalf of the South Dakota Plaintiff and
15 South Dakota State Class members to FCA.

16 4263. Alternatively, the South Dakota Plaintiff and South Dakota State Class
17 members were excused from providing FCA with notice and an opportunity to cure
18 the breach, because it would have been futile. As alleged above, FCA has long
19 known that the FCA Class Vehicles contained the ACU Defect, and that the ACU
20 Defect has caused ACUs and ASICs to malfunction in crashes involving Class
21 Vehicles; however, to date, FCA has not instituted a recall or any other repair
22 program with respect to the unrecalled FCA Class Vehicles, or even acknowledged
23 that the ACU Defect exists in all FCA Class Vehicles, including the recalled FCA
24 Class Vehicles—even though FCA Class Vehicles are subject to the NHTSA
25 investigation. Therefore, the South Dakota Plaintiff and South Dakota State Class
26 members had no reason to believe that FCA would have repaired the ACU Defect if
27 the South Dakota Plaintiff and South Dakota State Class members presented their
28 Class Vehicles to it for repair.

1 4264. As a direct and proximate result of Honda USA’s breach of the
2 implied warranty of merchantability, the South Dakota Plaintiff and South Dakota
3 State Class members have been damaged through their overpayment at the time of
4 purchase or lease for FCA Class Vehicles with an undisclosed safety defect in an
5 amount to be proven at trial.

6 **c. South Dakota Count 3: Violation of the South Dakota**
7 **Deceptive Trade Practices and Consumer Protection Law**
8 **(S.D. Codified Laws § 37-24-1, et seq.) Against FCA**

9 4265. Plaintiffs reallege and incorporate by reference all preceding
10 allegations as though fully set forth herein.

11 4266. The South Dakota Plaintiff brings this count individually and on behalf
12 of members of the South Dakota State Class who purchased or leased FCA Class
13 Vehicles, against FCA.

14 4267. FCA, the South Dakota Plaintiff, and the South Dakota State Class
15 members are “persons” within the meaning of S.D. Codified Laws § 37-24-1(8).

16 4268. The FCA Class Vehicles and ACUs installed in them are
17 “merchandise” within the meaning of S.D. Codified Laws § 37-24-1(7).

18 4269. FCA is and was engaged in “trade” or “commerce” within the meaning
19 of S.D. Codified Laws § 37-24-1(13).

20 4270. The South Dakota Deceptive Trade Practices and Consumer Protection
21 Law (“South Dakota CPA”) prohibits “deceptive acts or practices.” S.D. Codified
22 Laws § 37-24-6(1).

23 4271. In the course of its business, FCA, through its agents, employees,
24 and/or subsidiaries, violated the South Dakota CPA by knowingly and intentionally
25 misrepresenting, omitting, concealing, and/or failing to disclose material facts
26 regarding the reliability, safety, and performance of the FCA Class Vehicles, the
27 safety of their Occupant Restraint Systems, and the ACU Defect, as detailed above.

28 4272. FCA had an ongoing duty to the South Dakota Plaintiff and South
Dakota State Class members to refrain from unfair or deceptive practices under the

1 South Dakota CPA in the course of its business. Specifically, FCA owed the South
2 Dakota Plaintiff and South Dakota State Class members a duty to disclose all the
3 material facts concerning the ACU Defect in the FCA Class Vehicles because it
4 possessed exclusive knowledge, it intentionally concealed the ACU Defect from the
5 South Dakota Plaintiff and South Dakota State Class members, and/or it made
6 misrepresentations that were rendered misleading because they were contradicted
7 by withheld facts.

8 4273. By misrepresenting the FCA Class Vehicles as safe and reliable and
9 the defective ACU and ASICs installed in them as properly-functioning and free
10 from defects, and by failing to disclose and actively concealing the dangers and risk
11 posed by the ACU Defect to both consumers and NHTSA, FCA engaged in unfair
12 or deceptive business practices prohibited by S.D. Codified Laws § 37-24-6(1).

13 4274. FCA's unfair and deceptive acts or practices, including its
14 misrepresentations, concealments, omissions, and suppressions of material facts,
15 were designed to mislead and had a tendency or capacity to mislead and create a
16 false impression in consumers that the FCA Class Vehicles had properly-
17 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
18 System did not contain the ACU Defect and would perform its intended function of
19 activating the seatbelts and airbags during a collision. Indeed, those
20 misrepresentations, concealments, omissions, and suppressions of material facts did
21 in fact deceive reasonable consumers, including the South Dakota Plaintiff and
22 South Dakota State Class members, about the true safety and reliability of FCA
23 Class Vehicles and/or the defective ACUs and ASICs installed in them, the quality
24 of the FCA Class Vehicles, and the true value of the FCA Class Vehicles.

25 4275. FCA's misrepresentations, concealments, omissions, and suppressions
26 of material facts regarding the ACU Defect and true characteristics of the Occupant
27 Restraint Systems in the FCA Class Vehicles were material to the decisions of the
28 South Dakota Plaintiff and South Dakota State Class members to purchase and

1 lease those vehicles, as FCA intended. The South Dakota Plaintiff and South
2 Dakota State Class members were exposed to those misrepresentations,
3 concealments, omissions, and suppressions of material facts, and relied on FCA's
4 misrepresentations that the FCA Class Vehicles and their Occupant Restraint
5 Systems were safe and reliable in deciding to purchase and lease FCA Class
6 Vehicles. Plaintiffs allege the information they relied upon in Section II.B above.
7 To aid review of this information, Exhibit 19 provides paragraph numbers for each
8 Plaintiff.

9 4276. The South Dakota Plaintiff's and South Dakota State Class members'
10 reliance was reasonable, as they had no way of discerning that FCA's
11 representations were false and misleading, or otherwise learning the facts that FCA
12 had concealed or failed to disclose. The South Dakota Plaintiff and South Dakota
13 State Class members did not, and could not, unravel FCA's deception on their own.

14 4277. Had the South Dakota Plaintiff and South Dakota State Class members
15 known the truth about the ACU Defect, the South Dakota Plaintiff and South
16 Dakota State Class members would not have purchased or leased FCA Class
17 Vehicles, or would have paid significantly less for them.

18 4278. The South Dakota Plaintiff and South Dakota State Class members
19 suffered ascertainable losses and actual damages through their overpayment at the
20 time of purchase and lease for FCA Class Vehicles with an undisclosed safety
21 defect as a direct and proximate result of FCA's concealment, misrepresentations,
22 and/or failure to disclose material information.

23 4279. FCA's violations present a continuing risk to the South Dakota
24 Plaintiff and South Dakota State Class members, as well as to the general public,
25 because the Class Vehicles remain unsafe due to the defective ACUs and ASICs
26 therein. Additionally, FCA's unlawful acts and practices complained of herein
27 affect the public interest.

28

1 4280. Pursuant to S.D. Codified Laws § 37-24-31, the South Dakota Plaintiff
2 and South Dakota State Class members seek an order enjoining FCA’s unfair or
3 deceptive acts or practices and awarding damages and any other just and proper
4 relief available under the South Dakota CPA.

5 **d. South Dakota Count 4: Violation of the South Dakota**
6 **Deceptive Trade Practices and Consumer Protection Law**
7 **(S.D. Codified Laws § 37-24-1, et seq.) Against ZF**
8 **Electronics USA, ZF Passive Safety USA, ZF Automotive**
9 **USA, ZF TRW Corp., ZF Germany, ST Italy, ST USA, and**
10 **ST Malaysia**

11 4281. Plaintiffs reallege and incorporate by reference all preceding
12 allegations as though fully set forth herein.

13 4282. The South Dakota Plaintiff brings this count individually and on behalf
14 members of the South Dakota State Class against ZF Electronics USA, ZF Passive
15 Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively,
16 the “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the
17 “ST Defendants”).

18 4283. The ZF Defendants, the ST Defendants, the South Dakota Plaintiff,
19 and South Dakota State Class members are “persons” within the meaning of S.D.
20 Codified Laws § 37-24-1(8).

21 4284. The Class Vehicles and ACUs installed in them are “merchandise”
22 within the meaning of S.D. Codified Laws § 37-24-1(7).

23 4285. The ZF and ST Defendants were and are engaged in “trade” or
24 “commerce” within the meaning of S.D. Codified Laws § 37-24-1(13).

25 4286. The South Dakota Deceptive Trade Practices and Consumer Protection
26 Law (“South Dakota CPA”) prohibits “deceptive acts or practices.” S.D. Codified
27 Laws § 37-24-6(1).

28 4287. The ZF and ST Defendants had an ongoing duty to the South Dakota
Plaintiff and South Dakota State Class members to refrain from unfair or deceptive
practices under the South Dakota CPA in the course of their business. Specifically,

1 the ZF and ST Defendants owed the South Dakota Plaintiff and South Dakota State
2 Class members a duty to disclose all the material facts concerning the ACU Defect
3 in the Class Vehicles because they possessed exclusive knowledge and they
4 intentionally concealed the ACU Defect from the South Dakota Plaintiff and South
5 Dakota State Class members.

6 4288. In the course of their business, the ZF and ST Defendants, through
7 their agents, employees, and/or subsidiaries, violated the South Dakota CPA by
8 knowingly and intentionally omitting, concealing, and failing to disclose material
9 facts regarding the existence, nature, and scope of the defective ACU and ASIC
10 installed in the Class Vehicles, as detailed above.

11 4289. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
12 Automotive USA through their agents, employees, and/or subsidiaries, violated the
13 South Dakota CPA when they knowingly and intentionally misrepresented the
14 Class Vehicles as safe and reliable and the defective ACU and ASICs installed in
15 them as properly-functioning and free from defects. Specifically, ZF Electronics
16 USA, ZF Passive Safety USA, and ZF Automotive USA worked with the Vehicle
17 Manufacturer Defendants on the design and inclusion of the airbag readiness
18 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
19 Members that the Occupant Restraint Systems in the Class Vehicles would function
20 properly in a crash.

21 4290. By misrepresenting, failing to disclose, and actively concealing the
22 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and
23 ST Defendants engaged in deceptive acts or practices prohibited by S.D. Codified
24 Laws § 37-24-6, including acting, using, or employing deceptive acts or practices
25 and fraud, and/or concealing, suppressing, or omitting material facts.

26 4291. The ZF and ST Defendants' unfair or deceptive acts or practices,
27 including their misrepresentations, concealments, omissions, and suppressions of
28 material facts, were designed to mislead and had a tendency or capacity to mislead

1 and create a false impression in consumers that the Class Vehicles had properly-
2 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
3 System did not contain the ACU Defect and would perform its intended function of
4 activating the seatbelts and airbags during a collision. Indeed, those
5 misrepresentations, concealments, omissions, and suppressions of material facts did
6 in fact deceive reasonable consumers, including the South Dakota Plaintiff and
7 South Dakota State Class members, about the true safety and reliability of Class
8 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
9 Class Vehicles, and the true value of the Class Vehicles.

10 4292. The South Dakota Plaintiff and South Dakota State Class members
11 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
12 concealment, as they had no way of discerning that the Class Vehicles contained
13 the ACU Defect, as alleged above. The South Dakota Plaintiff and South Dakota
14 State Class members did not, and could not, unravel the ZF and ST Defendants'
15 deception on their own

16 4293. The ZF and ST Defendants' misrepresentations and concealment of the
17 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
18 Vehicles were material to the decisions of the South Dakota Plaintiff and South
19 Dakota State Class members to purchase and lease Class Vehicles, as the ZF and
20 ST Defendants intended. Had they known the truth, the South Dakota Plaintiff and
21 South Dakota State Class members would not have purchased or leased the Class
22 Vehicles, or would have paid significantly less for them.

23 4294. The South Dakota Plaintiff and South Dakota State Class members
24 suffered ascertainable losses and actual damages as a direct and proximate result of
25 the ZF and ST Defendants' misrepresentations, concealment and/or failure to
26 disclose material information.

27 4295. The ZF and ST Defendants' violations present a continuing risk to the
28 South Dakota Plaintiff and South Dakota State Class members, as well as to the

1 general public, because the Class Vehicles remain unsafe due to the defective
2 ACUs and ASICs therein. The ZF and ST Defendants' unlawful acts and practices
3 complained of herein affect the public interest.

4 4296. Pursuant to S.D. Codified Laws § 37-24-31, the South Dakota Plaintiff
5 and South Dakota State Class members seek an order enjoining the ZF and ST
6 Defendants' unfair or deceptive acts or practices and awarding damages and any
7 other just and proper relief available under the South Dakota CPA.

8 **e. South Dakota Count 5: Fraud by Omission and**
9 **Concealment Against FCA**

10 4297. Plaintiffs reallege and incorporate by reference all preceding
11 allegations as though fully set forth herein.

12 4298. The South Dakota Plaintiff brings this count individually and on behalf
13 of members of the South Dakota State Class who purchased or leased FCA Class
14 Vehicles, against FCA.

15 4299. FCA is liable for both fraudulent concealment and non-disclosure. *See,*
16 *e.g.,* Restatement (Second) of Torts §§ 550-51 (1977).

17 4300. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
18 serious risks to vehicle occupants, including that it can cause: (1) airbags and
19 seatbelts not to activate during a crash because crashes can sometimes release
20 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
21 vehicle has not crashed, which is dangerous because it is shocking and difficult for
22 the driver to operate a vehicle when the airbag deploys without warning; and (3)
23 failures of other important post-crash operations of the safety system, such as
24 unlocking doors to facilitate escape or extraction of drivers and passengers by
25 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

26 4301. FCA had a duty to disclose the ACU Defect to the South Dakota
27 Plaintiff and South Dakota State Class members because:

28

- a. FCA had exclusive access to and far superior knowledge about technical facts regarding the ACU Defect;
- b. Given the ACU Defect’s hidden and technical nature, the South Dakota Plaintiff and South Dakota State Class members lack the sophisticated expertise in vehicle components and electrical phenomena that would be necessary to discover the ACU Defect on their own;
- c. FCA knew that the ACU Defect gave rise to serious safety concerns for the consumers who use the vehicles, and the FCA Class Vehicles containing the ACU Defect would have been a material fact to the South Dakota Plaintiff’s and South Dakota State Class members’ decisions to buy or lease FCA Class Vehicles; and
- d. FCA made incomplete representations about the safety and reliability of the FCA Class Vehicles and their Occupant Restraint System, while purposefully withholding material facts about a known safety defect. In uniform advertising and materials provided with each Class Vehicle, FCA intentionally concealed, suppressed, and failed to disclose to the South Dakota Plaintiff and South Dakota State Class members that the FCA Class Vehicles contained the ACU Defect. Because they volunteered to provide information about the FCA Class Vehicles that they marketed and offered for sale and lease to the South Dakota Plaintiff and South Dakota State Class members, FCA had the duty to disclose the whole truth.

4302. In breach of its duties, FCA failed to disclose that the FCA Class Vehicles were not safe and reliable, and that their Occupant Restraint Systems,

1 including their airbags and seatbelt pretensioners could fail in the event of a crash
2 due to the ACU Defect.

3 4303. FCA intended for the South Dakota Plaintiff and South Dakota State
4 Class members to rely on its omissions—which they did by purchasing and leasing
5 the FCA Class Vehicles at the prices they paid believing that the Occupant
6 Restraint Systems in their Class Vehicles would function properly.

7 4304. That reliance was reasonable, because a reasonable consumer would
8 not have expected that the FCA Class Vehicles contained a safety defect that poses
9 such a serious risk. FCA knew that reasonable consumers expect that their vehicle
10 has working airbags and seatbelt pretensioners and would rely on those facts in
11 deciding whether to purchase, lease, or retain a new or used motor vehicle. Whether
12 a manufacturer's products are safe and reliable, and whether that manufacturer
13 stands behind its products, are material concerns to a consumer. Especially here
14 when at least nine people have already died due to the ACU Defect, and many more
15 have been injured.

16 4305. Additionally, FCA ensured that the South Dakota Plaintiff and South
17 Dakota State Class members did not discover this information by actively
18 concealing and misrepresenting the true nature of the FCA Class Vehicles'
19 Occupant Restraint Systems to consumers and NHTSA.

20 4306. FCA actively concealed and suppressed these material facts, in whole
21 or in part, to maintain a market for its Class Vehicles, to protect profits, and to
22 avoid costly recalls that would expose them to liability for those expenses and harm
23 the commercial reputations of Defendants and their products. It did so at the
24 expense of the South Dakota Plaintiff and South Dakota State Class members.

25 4307. To this day, FCA has not fully and adequately disclosed the ACU
26 Defect, and they continue to conceal material information about the defect from
27 consumers and NHTSA. The omitted and concealed facts were material because a
28 reasonable person would find them important in purchasing, leasing, or retaining a

1 new or used motor vehicle, and because they directly impact the value of the FCA
2 Class Vehicles purchased or leased by the South Dakota Plaintiff and South Dakota
3 State Class members.

4 4308. Had they been aware of the ACU Defect in the FCA Class Vehicles,
5 and FCA's callous disregard for safety, the South Dakota Plaintiff and South
6 Dakota State Class members either would not have paid as much as they did for
7 their Class Vehicles, or they would not have purchased or leased them.

8 4309. As alleged in Section V above, if FCA had fully and adequately
9 disclosed the ACU Defect to consumers and NHTSA, the South Dakota Plaintiff
10 and South Dakota State Class members would have seen such a disclosure.

11 4310. Accordingly, FCA is liable to the South Dakota Plaintiff and South
12 Dakota State Class members for their damages in an amount to be proven at trial,
13 including, but not limited to, their lost overpayment for the FCA Class Vehicles at
14 the time of purchase or lease.

15 4311. FCA's acts were done maliciously, oppressively, deliberately, with
16 intent to defraud; in reckless disregard of the South Dakota Plaintiff's and South
17 Dakota State Class members' rights and well-being; and to enrich themselves.
18 FCA's misconduct warrants an assessment of punitive damages, as permitted by
19 law, in an amount sufficient to deter such conduct in the future, which amount shall
20 be determined according to proof at trial.

21 **f. South Dakota Count 6: Fraud by Omission and**
22 **Concealment Against ZF Electronics USA, ZF Passive**
23 **Safety USA, ZF Automotive USA, ZF TRW Corp., ZF**
Germany, ST Italy, ST USA, and ST Malaysia

24 4312. Plaintiffs reallege and incorporate by reference all preceding
25 allegations as though fully set forth herein.

26 4313. The South Dakota Plaintiff brings this count individually and on behalf
27 of members of the South Dakota State Class who purchased or leased Class
28 Vehicles, against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive

1 USA, ZF TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and
2 ST Italy, ST Malaysia, and ST USA (collectively, the “ST Defendants”).

3 4314. The ZF and ST Defendants are liable for both fraudulent concealment
4 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

5 4315. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
6 serious risks to vehicle occupants, including that it can cause: (1) airbags and
7 seatbelts not to activate during a crash because crashes can sometimes release
8 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
9 vehicle has not crashed, which is dangerous because it is shocking and difficult for
10 the driver to operate a vehicle when the airbag deploys without warning; and (3)
11 failures of other important post-crash operations of the safety system, such as
12 unlocking doors to facilitate escape or extraction of drivers and passengers by
13 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

14 4316. The ZF and ST Defendants had a duty to disclose the ACU Defect to
15 the South Dakota Plaintiff and South Dakota State Class members because:

- 16 a. The ZF and ST Defendants had exclusive access to and far
17 superior knowledge about technical facts regarding the ACU
18 Defect;
- 19 b. Given the ACU Defect’s hidden and technical nature, the South
20 Dakota Plaintiff and South Dakota State Class members lack the
21 sophisticated expertise in vehicle components and electrical
22 phenomena that would be necessary to discover the ACU Defect
23 on their own;
- 24 c. The ZF and ST Defendants knew that the ACU Defect gave rise
25 to serious safety concerns for the consumers who use the
26 vehicles, and the Class Vehicles containing the ACU Defect
27 would have been a material fact to the South Dakota Plaintiff’s
28

1 and South Dakota State Class members’ decisions to buy or
2 lease Class Vehicles; and
3 d. The ZF Defendants made incomplete representations about the
4 safety and reliability of the Class Vehicles and their Occupant
5 Restraint System, while purposefully withholding material facts
6 about a known safety defect, creating a duty to disclose the
7 whole truth. Specifically, ZF Electronics USA, ZF Passive
8 Safety USA, and ZF Automotive USA worked with the Vehicle
9 Manufacturer Defendants on the design and inclusion of the
10 airbag readiness indicators in the Class Vehicles, which falsely
11 assured Plaintiffs and Class Members that the Occupant
12 Restraint Systems in the Class Vehicles would function properly
13 in a crash.

14 4317. In breach of their duties, the ZF and ST Defendants failed to disclose
15 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
16 Systems, including their airbags and seatbelt pretensioners could fail in the event of
17 a crash due to the ACU Defect.

18 4318. The ZF and ST Defendants intended for the South Dakota Plaintiff and
19 South Dakota State Class members to rely on their omissions—which they did by
20 purchasing and leasing the Class Vehicles at the prices they paid believing that the
21 Occupant Restraint Systems in their Class Vehicles would function properly.

22 4319. That reliance was reasonable, because a reasonable consumer would
23 not have expected that the Class Vehicles contained a safety defect that poses such
24 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
25 that their vehicle has working airbags and seatbelt pretensioners and would rely on
26 those facts in deciding whether to purchase, lease, or retain a new or used motor
27 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
28 manufacturer stands behind its products, are material concerns to a consumer.

1 Especially here when at least nine people have already died due to the ACU Defect,
2 and many more have been injured.

3 4320. Additionally, the ZF and ST Defendants ensured that the South Dakota
4 Plaintiff and South Dakota State Class members did not discover this information
5 by actively concealing and misrepresenting the true nature of the Class Vehicles'
6 Occupant Restraint Systems to consumers and NHTSA.

7 4321. The ZF and ST Defendants actively concealed and suppressed these
8 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
9 protect profits, and to avoid costly recalls that would expose them to liability for
10 those expenses and harm the commercial reputations of Defendants and their
11 products. They did so at the expense of the South Dakota Plaintiff and South
12 Dakota State Class members.

13 4322. To this day, the ZF and ST Defendants have not fully and adequately
14 disclosed the ACU Defect, and they continue to conceal material information about
15 the defect from consumers and NHTSA. The omitted and concealed facts were
16 material because a reasonable person would find them important in purchasing,
17 leasing, or retaining a new or used motor vehicle, and because they directly impact
18 the value of the Class Vehicles purchased or leased by the South Dakota Plaintiff
19 and South Dakota State Class members.

20 4323. Had they been aware of the ACU Defect in the Class Vehicles, and the
21 ZF and ST Defendants' callous disregard for safety, the South Dakota Plaintiff and
22 South Dakota State Class members either would not have paid as much as they did
23 for their Class Vehicles, or they would not have purchased or leased them.

24 4324. As alleged in Section V above, if the ZF and ST Defendants had fully
25 and adequately disclosed the ACU Defect to consumers and NHTSA, the South
26 Dakota Plaintiff and South Dakota State Class members would have seen such a
27 disclosure.

28

1 4325. Accordingly, the ZF and ST Defendants are liable to the South Dakota
2 Plaintiff and South Dakota State Class members for their damages in an amount to
3 be proven at trial, including, but not limited to, their lost overpayment for the Class
4 Vehicles at the time of purchase or lease.

5 4326. The ZF and ST Defendants' acts were done maliciously, oppressively,
6 deliberately, with intent to defraud; in reckless disregard of the South Dakota
7 Plaintiff's and South Dakota State Class members' rights and well-being; and to
8 enrich themselves. The ZF and ST Defendants' misconduct warrants an assessment
9 of punitive damages, as permitted by law, in an amount sufficient to deter such
10 conduct in the future, which amount shall be determined according to proof at trial.

11 **g. South Dakota Count 7: Unjust Enrichment Against FCA**

12 4327. Plaintiffs reallege and incorporate by reference all allegations in
13 Sections I-VI above as though fully set forth herein.

14 4328. The South Dakota Plaintiff brings this count individually and on behalf
15 of members of the South Dakota State Class who purchased or leased FCA Class
16 Vehicles, against FCA.

17 4329. The South Dakota Plaintiff and South Dakota State Class members
18 conferred tangible and material monetary benefits upon FCA when they purchased
19 or leased the FCA Class Vehicles. FCA readily accepted and retained these
20 benefits.

21 4330. The South Dakota Plaintiff and South Dakota State Class members
22 would not have purchased or leased the FCA Class Vehicles, or would have paid
23 less for them, had they known of the ACU Defect at the time of purchase or lease.
24 Therefore, FCA profited from the sale and lease of the FCA Class Vehicles to the
25 detriment and expense of the South Dakota Plaintiff and South Dakota State Class
26 members.

27 4331. FCA appreciated these monetary benefits. These benefits were the
28 expected result of FCA acting in its pecuniary interest at the expense of its

1 customers. FCA knew of these benefits because it was aware of the ACU Defect,
2 yet it failed to disclose this knowledge and misled the South Dakota Plaintiff and
3 South Dakota State Class members regarding the nature and quality of the FCA
4 Class Vehicles while profiting from this deception.

5 4332. It would be unjust, inequitable, and unconscionable for FCA to retain
6 these monetary benefits, including because they were procured as a result of FCA's
7 wrongful conduct alleged above.

8 4333. The South Dakota Plaintiff and South Dakota State Class members are
9 entitled to restitution of the benefits FCA unjustly retained and/or any amounts
10 necessary to return the South Dakota Plaintiff and South Dakota State Class
11 members to the position they occupied prior to dealing with FCA, with such
12 amounts to be determined at trial.

13 4334. The South Dakota Plaintiff pleads this claim separately as well as in
14 the alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if
15 the South Dakota Plaintiff's claims for damages are dismissed or judgment is
16 entered in favor of Defendants, the South Dakota Plaintiff would have no adequate
17 legal remedy.

18 **22. Texas**

19 **a. Texas Count 1: Breach of Implied Warranty of**
20 **Merchantability (Tex. Bus. & Com. Code Ann. §§ 2.314 and**
21 **2A.212) Against Honda USA, Hyundai USA, and Toyota**
Sales USA²¹

22 4335. Plaintiffs reallege and incorporate by reference all preceding
23 allegations as though fully set forth herein.

24
25
26
27 ²¹ The Court held in its February 9, 2022 Order that Plaintiffs DeRouen, Hunt and
28 Green each have stated a claim for breach of implied warranty under Texas law. *See*
ECF No. 396 at 167.

1 4336. Plaintiff Angela Bowens brings this count individually and on behalf
2 of members of the Texas State Class who purchased or leased Honda Class
3 Vehicles, against Honda USA.

4 4337. Plaintiff Burton Reckles brings this count individually and on behalf of
5 members of the Texas State Class who purchased or leased Hyundai Class
6 Vehicles, against Hyundai USA.

7 4338. Plaintiffs Brent DeRouen, Danny Hunt, Evan Green, and Joy Davis
8 bring this count individually and on behalf of members of the Texas State Class
9 who purchased or leased Toyota Class Vehicles, against Toyota Sales USA.

10 4339. For purposes of this count, Plaintiffs Bowens, Reckles, DeRouen,
11 Hunt, Green, and Davis shall be referred to as the “Texas Plaintiffs.”

12 4340. A warranty that the Honda, Hyundai, and Toyota Class Vehicles were
13 in merchantable condition and fit for the ordinary purpose for which such goods are
14 used is implied by law pursuant to Tex. Bus. & Com. Code Ann. §§ 2.314 and
15 2A.212.

16 4341. Honda USA, Hyundai USA, and Toyota Sales USA are and were at all
17 relevant times “merchants” with respect to motor vehicles under Tex. Bus. & Com.
18 Code Ann. §§ 2.104(a) and 2A.103(c), and “sellers” of motor vehicles under
19 § 2.103(a)(4).

20 4342. With respect to leases, Honda USA, Hyundai USA, and Toyota Sales
21 USA are and were at all relevant times “lessors” of motor vehicles under Tex. Bus.
22 & Com. Code Ann. § 2A.103(a)(16).

23 4343. All Texas State Class members who purchased Honda, Hyundai, and
24 Toyota Class Vehicles in Texas are “buyers” within the meaning of Tex. Bus. &
25 Com. Code Ann. § 2.103(a).

26 4344. All Texas State Class members who leased Honda, Hyundai, and
27 Toyota Class Vehicles in Texas are “lessees” within the meaning of Tex. Bus. &
28 Com. Code Ann. § 2A.103(a)(14).

1 4345. The Class Vehicles are and were at all relevant times “goods” within
2 the meaning of Tex. Bus. & Com. Code Ann. §§ 2.105(a) and 2A.103(a)(8).

3 4346. The Honda, Hyundai, and Toyota Class Vehicles did not comply with
4 the implied warranty of merchantability because, at the time of sale and lease and at
5 all times thereafter, they were defective and not in merchantable condition, would
6 not pass without objection in the trade, and were not fit for the ordinary purpose for
7 which vehicles were used. Specifically, at the time they were sold and leased, the
8 Honda, Hyundai, and Toyota Class Vehicles contained the ACU Defect, which may
9 cause the airbags and seatbelt pretensioners to fail to deploy during a crash, the
10 failure to unlock doors automatically after a crash, the failure to turn off a fuel
11 supply or high-voltage battery after a crash, or the airbags to inadvertently deploy,
12 all of which render the Honda, Hyundai, and Toyota Class Vehicles inherently
13 defective and dangerous.

14 4347. The Texas Plaintiffs and Texas State Class members have provided
15 Honda USA, Hyundai USA, and Toyota Sales USA with reasonable notice and
16 opportunity to cure the breaches of their implied warranties by way of the numerous
17 NHTSA complaints filed against them, and the individual notice letters sent by
18 Texas State Class members within a reasonable amount of time after the ACU
19 Defect became public. Additionally, on April 24, 2020, a notice letter was sent on
20 behalf of the Texas Plaintiffs and Texas State Class members to Honda USA,
21 Hyundai USA, and Toyota Sales USA.

22 4348. Alternatively, the Texas Plaintiffs and Texas State Class members
23 were excused from providing Honda USA, Hyundai USA, and Toyota Sales USA
24 with notice and an opportunity to cure the breach, because it would have been
25 futile. As alleged above, Honda USA, Hyundai USA, and Toyota Sales USA have
26 long known that Class Vehicles contained the ACU Defect, and that the ACU
27 Defect has caused ACUs and ASICs to malfunction in crashes involving Class
28 Vehicles; however, to date, Hyundai USA and Toyota Sales USA have not

1 instituted a recall or any other repair program with respect to their unrecalled Class
2 Vehicles, or even acknowledged that the ACU Defect exists in all their Class
3 Vehicles, including the recalled Class Vehicles—even though Hyundai and Toyota
4 Class Vehicles are subject to the NHTSA investigation. Similarly, to date, Honda
5 USA has not instituted a recall or any other repair program, or even acknowledged
6 that the ACU Defect exists—even though Honda Class Vehicles are subject to the
7 NHTSA investigation. Therefore, the Texas Plaintiffs and Texas State Class
8 members had no reason to believe that Honda USA, Hyundai USA, and Toyota
9 Sales USA would have repaired the ACU Defect if the Texas Plaintiffs and Texas
10 State Class members presented their Class Vehicles to them for repair.

11 4349. As a direct and proximate result of Honda USA’s, Hyundai USA’s,
12 and Toyota Sales USA’s breach of the implied warranty of merchantability, the
13 Texas Plaintiffs and Texas State Class members have been damaged through their
14 overpayment at the time of purchase or lease for Toyota Class Vehicles with an
15 undisclosed safety defect in an amount to be proven at trial.

16 **b. Texas Count 2: Violation of the Deceptive Trade Practices-**
17 **Consumer Protection Act (Tex. Bus. & Com. Code Ann.**
18 **§ 17.41, et seq.) Against Honda Japan, Honda USA, Honda**
Engineering USA, Hyundai Korea, Hyundai USA, Toyota
USA, and Toyota Sales USA

19 4350. Plaintiffs reallege and incorporate by reference all preceding
20 allegations as though fully set forth herein.

21 4351. Plaintiff Angela Bowens brings this count individually and on behalf
22 of members of the Texas State Class who purchased or leased Honda Class
23 Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

24 4352. Plaintiff Burton Reckles brings this count individually and on behalf of
25 members of the Texas State Class who purchased or leased Hyundai Class
26 Vehicles, against Hyundai Korea and Hyundai USA.

27 4353. Plaintiffs Brent DeRouen, Danny Hunt, Evan Green, and Joy Davis
28 bring this count individually and on behalf of members of the Texas State Class

1 who purchased or leased Toyota Class Vehicles, against Toyota USA and Toyota
2 Sales USA.

3 4354. For purposes of this count, Plaintiffs Bowens, Reckles, DeRouen,
4 Hunt, Green, and Davis shall be referred to as the “Texas Plaintiffs.”

5 4355. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
6 Hyundai USA, Toyota USA, Toyota Sales USA, the Texas Plaintiffs, and Texas
7 State Class members are “persons” within the meaning of Tex. Bus. & Com. Code
8 Ann. § 17.45(3).

9 4356. The Texas Plaintiffs and Texas State Class members are “consumers”
10 within the meaning of Tex. Bus. & Com. Code Ann. § 17.45(4).

11 4357. The Honda, Hyundai, and Toyota Class Vehicles are “goods” within
12 the meaning of Tex. Bus. & Com. Code Ann. § 17.45(1).

13 4358. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
14 Hyundai USA, Toyota USA, and Toyota Sales USA were and are engaged in
15 “trade” or “commerce” within the meaning of Tex. Bus. & Com. Code Ann.
16 § 17.45(6).

17 4359. The Deceptive Trade Practices-Consumer Protection Act (“Texas
18 DTPA”) prohibits “[f]alse, misleading, or deceptive acts or practices in the conduct
19 of any trade or commerce[,]” Tex. Bus. & Com. Code Ann. § 17.46(a), and an
20 “unconscionable action or course of action[,]” Tex. Bus. & Com. Code Ann.
21 §§ 17.45(5) and 17.50(a)(3).

22 4360. In the course of their business, Honda Japan, Honda USA, Honda
23 Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales
24 USA, through their agents, employees, and/or subsidiaries, violated the Texas
25 DTPA by knowingly and intentionally misrepresenting, omitting, concealing,
26 and/or failing to disclose material facts regarding the reliability, safety, and
27 performance of the Honda, Hyundai, and Toyota Class Vehicles, the safety of their
28 Occupant Restraint Systems, and the ACU Defect, as detailed above.

1 4361. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
2 Hyundai USA, Toyota USA, and Toyota Sales USA had an ongoing duty to the
3 Texas Plaintiffs and Texas State Class members to refrain from unfair or deceptive
4 practices under the Texas DTPA in the course of their business. Specifically, Honda
5 Japan, Honda USA, Honda Engineering USA, Hyundai Korea, Hyundai USA,
6 Toyota USA, and Toyota Sales USA owed the Texas Plaintiffs and Texas State
7 Class members a duty to disclose all the material facts concerning the ACU Defect
8 in the Honda, Hyundai, and Toyota Class Vehicles because they possessed
9 exclusive knowledge, they intentionally concealed the ACU Defect from the Texas
10 Plaintiffs and Texas State Class members, and/or they made misrepresentations that
11 were rendered misleading because they were contradicted by withheld facts.

12 4362. By misrepresenting the Honda, Hyundai, and Toyota Class Vehicles as
13 safe and reliable and the defective ACU and ASICs installed in them as properly-
14 functioning and free from defects, and by failing to disclose and actively concealing
15 the dangers and risk posed by the ACU Defect to both consumers and NHTSA,
16 Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea, Hyundai
17 USA, Toyota USA, and Toyota Sales USA engaged in one or more of the following
18 unfair or deceptive business practices prohibited by Tex. Bus. & Com. Code Ann.
19 §§ 17.46:

- 20 a. Representing that the Class Vehicles and/or the defective ACUs
21 installed in them have characteristics, uses, benefits, and
22 qualities which they do not have;
- 23 b. Representing that the Class Vehicles and/or the defective ACUs
24 installed in them are of a particular standard, quality, and grade
25 when they are not; and
- 26 c. Advertising the Class Vehicles and/or the defective ACUs
27 installed in them with the intent not to sell or lease them as
28 advertised.

1 Tex. Bus. & Com. Code Ann. §§ 17.46(5), (7), and (9).

2 4363. Honda Japan's, Honda USA's, Honda Engineering USA's, Hyundai
3 Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's unfair and
4 deceptive acts or practices, including their misrepresentations, concealments,
5 omissions, and suppressions of material facts, were designed to mislead and had a
6 tendency or capacity to mislead and create a false impression in consumers that the
7 Honda, Hyundai, and Toyota Class Vehicles had properly-functioning and reliable
8 airbags and seatbelts, and that the Occupant Restraint System did not contain the
9 ACU Defect and would perform its intended function of activating the seatbelts and
10 airbags during a collision. Indeed, those misrepresentations, concealments,
11 omissions, and suppressions of material facts did in fact deceive reasonable
12 consumers, including the Texas Plaintiffs and Texas State Class members, about
13 the true safety and reliability of Honda, Hyundai, and Toyota Class Vehicles and/or
14 the defective ACUs and ASICs installed in them, the quality of the Honda,
15 Hyundai, and Toyota Class Vehicles, and the true value of the Honda, Hyundai, and
16 Toyota Class Vehicles.

17 4364. Honda Japan's, Honda USA's, Honda Engineering USA's, Hyundai
18 Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's
19 misrepresentations, concealments, omissions, and suppressions of material facts
20 regarding the ACU Defect and true characteristics of the Occupant Restraint
21 Systems in the Honda, Hyundai, and Toyota Class Vehicles were material to the
22 decisions of the Texas Plaintiffs and Texas State Class members to purchase and
23 lease those vehicles, as Honda Japan, Honda USA, Honda Engineering USA,
24 Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales USA intended. The
25 Texas Plaintiffs and Texas State Class members were exposed to those
26 misrepresentations, concealments, omissions, and suppressions of material facts,
27 and relied on Honda Japan's, Honda USA's, Honda Engineering USA's, Hyundai
28 Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's

1 misrepresentations that the Honda, Hyundai, and Toyota Class Vehicles and their
2 Occupant Restraint Systems were safe and reliable in deciding to purchase and
3 lease Honda, Hyundai, and Toyota Class Vehicles. Plaintiffs allege the information
4 they relied upon in Section II.B above. To aid review of this information, Exhibit
5 19 provides paragraph numbers for each Plaintiff.

6 4365. The Texas Plaintiffs' and Texas State Class members' reliance was
7 reasonable, as they had no way of discerning that Honda Japan's, Honda USA's,
8 Honda Engineering USA's, Hyundai Korea's, Hyundai USA's, Toyota USA's, and
9 Toyota Sales USA's representations were false and misleading, or otherwise
10 learning the facts that they had concealed or failed to disclose. The Texas Plaintiffs
11 and Texas State Class members did not, and could not, unravel Honda Japan's,
12 Honda USA's, Honda Engineering USA's, Hyundai Korea's, Hyundai USA's,
13 Toyota USA's, and Toyota Sales USA's deception on their own.

14 4366. Had the Texas Plaintiffs and Texas State Class members known the
15 truth about the ACU Defect, the Texas Plaintiffs and Texas State Class members
16 would not have purchased or leased Honda, Hyundai, and Toyota Class Vehicles, or
17 would have paid significantly less for them.

18 4367. The Texas Plaintiffs and Texas State Class members suffered
19 ascertainable losses and actual damages through their overpayment at the time of
20 purchase and lease for Honda, Hyundai, and Toyota Class Vehicles with an
21 undisclosed safety defect as a direct and proximate result of Honda Japan's, Honda
22 USA's, Honda Engineering USA's, Hyundai Korea's, Hyundai USA's, Toyota
23 USA's, and Toyota Sales USA's concealment, misrepresentations, and/or failure to
24 disclose material information.

25 4368. Honda Japan's, Honda USA's, Honda Engineering USA's, Hyundai
26 Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's violations
27 present a continuing risk to the Texas Plaintiffs and Texas State Class members, as
28 well as to the general public, because the Class Vehicles remain unsafe due to the

1 defective ACUs and ASICs therein. Additionally, their unlawful acts and practices
2 complained of herein affect the public interest.

3 4369. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
4 Hyundai USA, Toyota USA, and Toyota Sales USA were provided notice of the
5 issues raised in this count and this Complaint by the NHTSA investigations, the
6 numerous complaints filed against them, and the many individual notice letters sent
7 within a reasonable amount of time after the ACU Defect became public.
8 Additionally, on May 23, 2019, Texas State Class members sent them a notice letter
9 pursuant to Tex. Bus. & Com. Code Ann. § 17.505(a). Moreover, a second notice
10 letter was sent on behalf of the Texas Plaintiffs and Texas State Class members
11 pursuant to Tex. Bus. & Com. Code Ann. § 17.505(a) to Honda Japan, Honda USA,
12 Honda Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA, and Toyota
13 Sales USA on April 24, 2020. Because all of these Defendants failed to adequately
14 remedy their unlawful conduct within the requisite time period, the Texas Plaintiffs
15 seek all damages and relief to which the Texas Plaintiffs and Texas State Class
16 members are entitled.

17 4370. Alternatively, any requirement to give notice to the Defendants under
18 Tex. Bus. & Com. Code Ann. § 17.505(a) is excused because, *inter alia*, notice was
19 impracticable due to the necessity of filing suit in order to prevent the expiration of
20 the statute of limitations on certain Texas Plaintiffs and Texas State Class
21 Members' claims.

22 4371. Pursuant to Tex. Bus. & Com. Code Ann. § 17.50, the Texas Plaintiffs
23 and Texas State Class members seek an order enjoining Honda Japan's, Honda
24 USA's, Honda Engineering USA's, Hyundai Korea's, Hyundai USA's, Toyota
25 USA's, and Toyota Sales USA's unfair or deceptive acts or practices and awarding
26 damages and any other just and proper relief available under the Texas DTPA.

27
28

1 c. **Texas Count 3: Violation of the Deceptive Trade Practices-
2 Consumer Protection Act (Tex. Bus. & Com. Code Ann.
3 § 17.41, *et seq.*) Against ZF Electronics USA, ZF Passive
4 Safety USA, ZF Automotive USA, ZF Germany, ST Italy,
5 ST USA, and ST Malaysia**

6 4372. Plaintiffs reallege and incorporate by reference all preceding
7 allegations as though fully set forth herein.

8 4373. Plaintiffs Angela Bowens, Burton Reckles, Brent DeRouen, Danny
9 Hunt, Evan Green, and Joy Davis bring this count individually and on behalf of
10 members of the Texas State Class against ZF Electronics USA, ZF Passive Safety
11 USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively, the
12 “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the “ST
13 Defendants”).

14 4374. For purposes of this count, Plaintiffs Bowens, Reckles, DeRouen,
15 Hunt, Green, and Davis shall be referred to as the Texas Plaintiffs.

16 4375. The ZF Defendants, the ST Defendants, the Texas Plaintiffs, and
17 Texas State Class members are “persons” within the meaning of Tex. Bus. & Com.
18 Code Ann. § 17.45(3).

19 4376. The Texas Plaintiffs and Texas State Class members are “consumers”
20 within the meaning of Tex. Bus. & Com. Code Ann. § 17.45(4).

21 4377. The Class Vehicles are “goods” within the meaning of Tex. Bus. &
22 Com. Code Ann. § 17.45(1).

23 4378. The ZF and ST Defendants were and are engaged in “trade” or
24 “commerce” within the meaning of Tex. Bus. & Com. Code Ann. § 17.45(6).

25 4379. The Deceptive Trade Practices-Consumer Protection Act (“Texas
26 DTPA”) prohibits “[f]alse, misleading, or deceptive acts or practices in the conduct
27 of any trade or commerce[,]” Tex. Bus. & Com. Code Ann. § 17.46(a), and an
28 “unconscionable action or course of action[,]” Tex. Bus. & Com. Code Ann.
 §§ 17.45(5) and 17.50(a)(3).

1 4380. In the course of their business, the ZF and ST Defendants, through
2 their agents, employees, and/or subsidiaries, violated the Texas DTPA by
3 knowingly and intentionally omitting, concealing, and failing to disclose material
4 facts regarding the existence, nature, and scope of the defective ACU and ASIC
5 installed in the Class Vehicles, as detailed above.

6 4381. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
7 Automotive USA through their agents, employees, and/or subsidiaries, violated the
8 Texas DTPA when they knowingly and intentionally misrepresented the Class
9 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
10 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
11 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
12 Manufacturer Defendants on the design and inclusion of the airbag readiness
13 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
14 Members that the Occupant Restraint Systems in the Class Vehicles would function
15 properly in a crash.

16 4382. By misrepresenting, failing to disclose, and actively concealing the
17 dangers and risk posed by the Class Vehicles due to the ACU Defect, The ZF and
18 ST Defendants engaged in deceptive acts or practices prohibited by Tex. Bus. &
19 Com. Code Ann. §§ 17.46.

20 4383. The ZF and ST Defendants' unfair or deceptive acts or practices,
21 including their misrepresentations, concealments, omissions, and suppressions of
22 material facts, were designed to mislead and had a tendency or capacity to mislead
23 and create a false impression in consumers that the Class Vehicles had properly-
24 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
25 System did not contain the ACU Defect and would perform its intended function of
26 activating the seatbelts and airbags during a collision. Indeed, those
27 misrepresentations, concealments, omissions, and suppressions of material facts did
28 in fact deceive reasonable consumers, including the Texas Plaintiffs and Texas

1 State Class members, about the true safety and reliability of Class Vehicles and/or
2 the defective ACUs and ASICs installed in them, the quality of the Class Vehicles,
3 and the true value of the Class Vehicles.

4 4384. The Texas Plaintiffs and Texas State Class members justifiably relied
5 on the ZF and ST Defendants' misrepresentations, omissions, and concealment, as
6 they had no way of discerning that the Class Vehicles contained the ACU Defect, as
7 alleged above. The Texas Plaintiffs and Texas State Class members did not, and
8 could not, unravel the ZF and ST Defendants' deception on their own

9 4385. The ZF and ST Defendants' misrepresentations and concealment of the
10 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
11 Vehicles were material to the decisions of the Texas Plaintiffs and Texas State
12 Class members to purchase and lease Class Vehicles, as the ZF and ST Defendants
13 intended. Had they known the truth, the Texas Plaintiffs and Texas State Class
14 members would not have purchased or leased the Class Vehicles, or would have
15 paid significantly less for them.

16 4386. The Texas Plaintiffs and Texas State Class members suffered
17 ascertainable losses and actual damages as a direct and proximate result of the ZF
18 and ST Defendants' misrepresentations, concealment and/or failure to disclose
19 material information.

20 4387. The ZF and ST Defendants' violations present a continuing risk to the
21 Texas Plaintiffs and Texas State Class members, as well as to the general public,
22 because the Class Vehicles remain unsafe due to the defective ACUs and ASICs
23 therein. The ZF and ST Defendants' unlawful acts and practices complained of
24 herein affect the public interest.

25 4388. The ZF and ST Defendants were provided notice of the issues raised in
26 this count and this Complaint by the NHTSA investigations, the numerous
27 complaints filed against them, and the many individual notice letters sent within a
28 reasonable amount of time after the ACU Defect became public. A notice letter was

1 sent on behalf of the Texas Plaintiffs and Texas State Class members pursuant to
2 Tex. Bus. & Com. Code Ann. § 17.505(a) to the ZF Defendants on April 24, 2020,
3 ST USA on June 5, 2020, and ST Italy and ST Malaysia on May 25, 2022. Because
4 the ZF and ST Defendants failed to adequately remedy their unlawful conduct
5 within the requisite time period, the Texas Plaintiffs seek all damages and relief to
6 which the Texas Plaintiffs and Texas State Class members are entitled.

7 4389. Alternatively, any requirement to give notice to the ZF and ST
8 Defendants under Tex. Bus. & Com. Code Ann. § 17.505(a) is excused because,
9 *inter alia*, notice was impracticable due to the necessity of filing suit in order to
10 prevent the expiration of the statute of limitations on certain Texas Plaintiffs and
11 Texas State Class Members' claims.

12 4390. Pursuant to Tex. Bus. & Com. Code Ann. § 17.50, the Texas Plaintiffs
13 and Texas State Class members seek an order enjoining the ZF and ST Defendants'
14 unfair or deceptive acts or practices and awarding damages and any other just and
15 proper relief available under the Texas DTPA.

16 **d. Texas Count 4: Fraud by Omission and Concealment**
17 **Against Honda Japan, Honda USA, Honda Engineering**
18 **USA, Hyundai Korea, Hyundai USA, Toyota USA, and**
Toyota Sales USA

19 4391. Plaintiffs reallege and incorporate by reference all preceding
20 allegations as though fully set forth herein.

21 4392. Plaintiff Angela Bowens brings this count individually and on behalf
22 of members of the Texas State Class who purchased or leased Honda Class
23 Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

24 4393. Plaintiff Burton Reckles brings this count individually and on behalf of
25 members of the Texas State Class who purchased or leased Hyundai Class
26 Vehicles, against Hyundai Korea and Hyundai USA.

27 4394. Plaintiffs Brent DeRouen, Danny Hunt, Evan Green, and Joy Davis
28 bring this count individually and on behalf of members of the Texas State Class

1 who purchased or leased Toyota Class Vehicles, against Toyota USA and Toyota
2 Sales USA.

3 4395. For purposes of this count, Plaintiffs Bowens, Reckles, DeRouen,
4 Hunt, Green, and Davis shall be referred to as the “Texas Plaintiffs.”

5 4396. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
6 Hyundai USA, Toyota USA, and Toyota Sales USA are liable for both fraudulent
7 concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-
8 51 (1977).

9 4397. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
10 serious risks to vehicle occupants, including that it can cause: (1) airbags and
11 seatbelts not to activate during a crash because crashes can sometimes release
12 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
13 vehicle has not crashed, which is dangerous because it is shocking and difficult for
14 the driver to operate a vehicle when the airbag deploys without warning; and (3)
15 failures of other important post-crash operations of the safety system, such as
16 unlocking doors to facilitate escape or extraction of drivers and passengers by
17 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

18 4398. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
19 Hyundai USA, Toyota USA, and Toyota Sales USA had a duty to disclose the ACU
20 Defect to the Texas Plaintiffs and Texas State Class members because:

- 21 a. Honda Japan, Honda USA, Honda Engineering USA, Hyundai
22 Korea, Hyundai USA, Toyota USA, and Toyota Sales USA had
23 exclusive access to and far superior knowledge about technical
24 facts regarding the ACU Defect;
- 25 b. Given the ACU Defect’s hidden and technical nature, the Texas
26 Plaintiffs and Texas State Class members lack the sophisticated
27 expertise in vehicle components and electrical phenomena that
28 would be necessary to discover the ACU Defect on their own;

1 c. Honda Japan, Honda USA, Honda Engineering USA, Hyundai
2 Korea, Hyundai USA, Toyota USA, and Toyota Sales USA
3 knew that the ACU Defect gave rise to serious safety concerns
4 for the consumers who use the vehicles, and the Honda,
5 Hyundai, and Toyota Class Vehicles containing the ACU Defect
6 would have been a material fact to the Texas Plaintiffs' and
7 Texas State Class members' decisions to buy or lease Honda,
8 Hyundai, and Toyota Class Vehicles; and

9 d. Honda Japan, Honda USA, Honda Engineering USA, Hyundai
10 Korea, Hyundai USA, Toyota USA, and Toyota Sales USA
11 made incomplete representations about the safety and reliability
12 of the Honda, Hyundai, and Toyota Class Vehicles and their
13 Occupant Restraint System, while purposefully withholding
14 material facts about a known safety defect. In uniform
15 advertising and materials provided with each Class Vehicle,
16 Honda Japan, Honda USA, Honda Engineering USA, Hyundai
17 Korea, Hyundai USA, Toyota USA, and Toyota Sales USA
18 intentionally concealed, suppressed, and failed to disclose to the
19 Texas Plaintiffs and Texas State Class members that the Honda,
20 Hyundai, and Toyota Class Vehicles contained the ACU Defect.
21 Because they volunteered to provide information about the
22 Honda, Hyundai, and Toyota Class Vehicles that they marketed
23 and offered for sale and lease to the Texas Plaintiffs and Texas
24 State Class members, Honda Japan, Honda USA, Honda
25 Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA,
26 and Toyota Sales USA had the duty to disclose the whole truth.

27 4399. In breach of their duties, Honda Japan, Honda USA, Honda
28 Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales

1 USA failed to disclose that the Honda, Hyundai, and Toyota Class Vehicles were
2 not safe and reliable, and that their Occupant Restraint Systems, including their
3 airbags and seatbelt pretensioners could fail in the event of a crash due to the ACU
4 Defect.

5 4400. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
6 Hyundai USA, Toyota USA, and Toyota Sales USA intended for the Texas
7 Plaintiffs and Texas State Class members to rely on their omissions—which they
8 did by purchasing and leasing the Honda, Hyundai, and Toyota Class Vehicles at
9 the prices they paid believing that the Occupant Restraint Systems in their Class
10 Vehicles would function properly.

11 4401. That reliance was reasonable, because a reasonable consumer would
12 not have expected that the Honda, Hyundai, and Toyota Class Vehicles contained a
13 safety defect that poses such a serious risk. Honda Japan, Honda USA, Honda
14 Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales
15 USA knew that reasonable consumers expect that their vehicle has working airbags
16 and seatbelt pretensioners and would rely on those facts in deciding whether to
17 purchase, lease, or retain a new or used motor vehicle. Whether a manufacturer’s
18 products are safe and reliable, and whether that manufacturer stands behind its
19 products, are material concerns to a consumer. Especially here when at least nine
20 people have already died due to the ACU Defect, and many more have been
21 injured.

22 4402. Additionally, Honda Japan, Honda USA, Honda Engineering USA,
23 Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales USA ensured that
24 the Texas Plaintiffs and Texas State Class members did not discover this
25 information by actively concealing and misrepresenting the true nature of the
26 Honda, Hyundai, and Toyota Class Vehicles’ Occupant Restraint Systems to
27 consumers and NHTSA.

28

1 4403. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
2 Hyundai USA, Toyota USA, and Toyota Sales USA actively concealed and
3 suppressed these material facts, in whole or in part, to maintain a market for their
4 Class Vehicles, to protect profits, and to avoid costly recalls that would expose
5 them to liability for those expenses and harm the commercial reputations of
6 Defendants and their products. They did so at the expense of the Texas Plaintiffs
7 and Texas State Class members.

8 4404. To this day, Honda Japan, Honda USA, Honda Engineering USA,
9 Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales USA have not fully
10 and adequately disclosed the ACU Defect, and they continue to conceal material
11 information about the defect from consumers and NHTSA. The omitted and
12 concealed facts were material because a reasonable person would find them
13 important in purchasing, leasing, or retaining a new or used motor vehicle, and
14 because they directly impact the value of the Honda, Hyundai, and Toyota Class
15 Vehicles purchased or leased by the Texas Plaintiffs and Texas State Class
16 members.

17 4405. Had they been aware of the ACU Defect in the Honda, Hyundai, and
18 Toyota Class Vehicles, and Honda Japan's, Honda USA's, Honda Engineering
19 USA's, Hyundai Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's
20 callous disregard for safety, the Texas Plaintiffs and Texas State Class members
21 either would not have paid as much as they did for their Class Vehicles, or they
22 would not have purchased or leased them.

23 4406. As alleged in Section V above, if Honda Japan, Honda USA, Honda
24 Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales
25 USA had fully and adequately disclosed the ACU Defect to consumers and
26 NHTSA, the Texas Plaintiffs and Texas State Class members would have seen such
27 a disclosure.

28

1 4407. Accordingly, Honda Japan, Honda USA, Honda Engineering USA,
2 Hyundai Korea, Hyundai USA, Toyota USA, and Toyota Sales USA are liable to
3 the Texas Plaintiffs and Texas State Class members for their damages in an amount
4 to be proven at trial, including, but not limited to, their lost overpayment for the
5 Honda, Hyundai, and Toyota Class Vehicles at the time of purchase or lease.

6 4408. Honda Japan's, Honda USA's, Honda Engineering USA's, Hyundai
7 Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's acts were done
8 maliciously, oppressively, deliberately, with intent to defraud; in reckless disregard
9 of the Texas Plaintiffs' and Texas State Class members' rights and well-being; and
10 to enrich themselves. Honda Japan's, Honda USA's, Honda Engineering USA's,
11 Hyundai Korea's, Hyundai USA's, Toyota USA's, and Toyota Sales USA's
12 misconduct warrants an assessment of punitive damages, as permitted by law, in an
13 amount sufficient to deter such conduct in the future, which amount shall be
14 determined according to proof at trial.

15 e. **Texas Count 5: Fraud by Omission and Concealment**
16 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
17 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
ST USA, and ST Malaysia

18 4409. Plaintiffs reallege and incorporate by reference all preceding
19 allegations as though fully set forth herein.

20 4410. The Texas Plaintiffs bring this count individually and on behalf of
21 members of the Texas State Class who purchased or leased Class Vehicles, against
22 ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF TRW
23 Corp., and ZF Germany (collectively, the "ZF Defendants"), and ST Italy, ST
24 Malaysia, and ST USA (collectively, the "ST Defendants").

25 4411. The ZF and ST Defendants are liable for both fraudulent concealment
26 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

27 4412. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
28 serious risks to vehicle occupants, including that it can cause: (1) airbags and

1 seatbelts not to activate during a crash because crashes can sometimes release
2 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
3 vehicle has not crashed, which is dangerous because it is shocking and difficult for
4 the driver to operate a vehicle when the airbag deploys without warning; and (3)
5 failures of other important post-crash operations of the safety system, such as
6 unlocking doors to facilitate escape or extraction of drivers and passengers by
7 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

8 4413. The ZF and ST Defendants had a duty to disclose the ACU Defect to
9 the Texas Plaintiffs and Texas State Class members because:

- 10 a. The ZF and ST Defendants had exclusive access to and far
11 superior knowledge about technical facts regarding the ACU
12 Defect;
- 13 b. Given the ACU Defect's hidden and technical nature, the Texas
14 Plaintiffs and Texas State Class members lack the sophisticated
15 expertise in vehicle components and electrical phenomena that
16 would be necessary to discover the ACU Defect on their own;
- 17 c. The ZF and ST Defendants knew that the ACU Defect gave rise
18 to serious safety concerns for the consumers who use the
19 vehicles, and the Class Vehicles containing the ACU Defect
20 would have been a material fact to the Texas Plaintiffs' and
21 Texas State Class members' decisions to buy or lease Class
22 Vehicles; and
- 23 d. The ZF Defendants made incomplete representations about the
24 safety and reliability of the Class Vehicles and their Occupant
25 Restraint System, while purposefully withholding material facts
26 about a known safety defect, creating a duty to disclose the
27 whole truth. Specifically, ZF Electronics USA, ZF Passive
28 Safety USA, and ZF Automotive USA worked with the Vehicle

1 Manufacturer Defendants on the design and inclusion of the
2 airbag readiness indicators in the Class Vehicles, which falsely
3 assured Plaintiffs and Class Members that the Occupant
4 Restraint Systems in the Class Vehicles would function properly
5 in a crash.

6 4414. In breach of their duties, the ZF and ST Defendants failed to disclose
7 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
8 Systems, including their airbags and seatbelt pretensioners could fail in the event of
9 a crash due to the ACU Defect.

10 4415. The ZF and ST Defendants intended for the Texas Plaintiffs and Texas
11 State Class members to rely on their omissions—which they did by purchasing and
12 leasing the Class Vehicles at the prices they paid believing that the Occupant
13 Restraint Systems in their Class Vehicles would function properly.

14 4416. That reliance was reasonable, because a reasonable consumer would
15 not have expected that the Class Vehicles contained a safety defect that poses such
16 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
17 that their vehicle has working airbags and seatbelt pretensioners and would rely on
18 those facts in deciding whether to purchase, lease, or retain a new or used motor
19 vehicle. Whether a manufacturer’s products are safe and reliable, and whether that
20 manufacturer stands behind its products, are material concerns to a consumer.
21 Especially here when at least nine people have already died due to the ACU Defect,
22 and many more have been injured.

23 4417. Additionally, the ZF and ST Defendants ensured that the Texas
24 Plaintiffs and Texas State Class members did not discover this information by
25 actively concealing and misrepresenting the true nature of the Class Vehicles’
26 Occupant Restraint Systems to consumers and NHTSA.

27 4418. The ZF and ST Defendants actively concealed and suppressed these
28 material facts, in whole or in part, to maintain a market for the DS84 ACU, to

1 protect profits, and to avoid costly recalls that would expose them to liability for
2 those expenses and harm the commercial reputations of Defendants and their
3 products. They did so at the expense of the Texas Plaintiffs and Texas State Class
4 members.

5 4419. To this day, the ZF and ST Defendants have not fully and adequately
6 disclosed the ACU Defect, and they continue to conceal material information about
7 the defect from consumers and NHTSA. The omitted and concealed facts were
8 material because a reasonable person would find them important in purchasing,
9 leasing, or retaining a new or used motor vehicle, and because they directly impact
10 the value of the Class Vehicles purchased or leased by the Texas Plaintiffs and
11 Texas State Class members.

12 4420. Had they been aware of the ACU Defect in the Class Vehicles, and the
13 ZF and ST Defendants' callous disregard for safety, the Texas Plaintiffs and Texas
14 State Class members either would not have paid as much as they did for their Class
15 Vehicles, or they would not have purchased or leased them.

16 4421. As alleged in Section V above, if the ZF and ST Defendants had fully
17 and adequately disclosed the ACU Defect to consumers and NHTSA, the Texas
18 Plaintiffs and Texas State Class members would have seen such a disclosure.

19 4422. Accordingly, the ZF and ST Defendants are liable to the Texas
20 Plaintiffs and Texas State Class members for their damages in an amount to be
21 proven at trial, including, but not limited to, their lost overpayment for the Class
22 Vehicles at the time of purchase or lease.

23 4423. The ZF and ST Defendants' acts were done maliciously, oppressively,
24 deliberately, with intent to defraud; in reckless disregard of the Texas Plaintiffs'
25 and Texas State Class members' rights and well-being; and to enrich themselves.
26 The ZF and ST Defendants' misconduct warrants an assessment of punitive
27 damages, as permitted by law, in an amount sufficient to deter such conduct in the
28 future, which amount shall be determined according to proof at trial.

1 **f. Texas Count 6: Unjust Enrichment Against Honda Japan,**
2 **Honda USA, Honda Engineering USA, Hyundai Korea,**
3 **Hyundai USA, Toyota USA, and Toyota Sales USA, and**
4 **Toyota Engineering USA**

4 4424. Plaintiffs reallege and incorporate by reference all allegations in
5 Sections I-VI above as though fully set forth herein.

6 4425. Plaintiff Angela Bowens brings this count individually and on behalf
7 of members of the Texas State Class who purchased or leased Honda Class
8 Vehicles, against Honda Japan, Honda USA, and Honda Engineering USA.

9 4426. Plaintiff Burton Reckles brings this count individually and on behalf of
10 members of the Texas State Class who purchased or leased Hyundai Class
11 Vehicles, against Hyundai Korea and Hyundai USA.

12 4427. Plaintiffs Brent DeRouen, Danny Hunt, Evan Green, and Joy Davis
13 bring this count individually and on behalf of members of the Texas State Class
14 who purchased or leased Toyota Class Vehicles, against Toyota USA, Toyota Sales
15 USA, and Toyota Engineering USA.

16 4428. For purposes of this count, Plaintiffs Bowens, Reckles, DeRouen,
17 Hunt, Green, and Davis shall be referred to as the “Texas Plaintiffs.”

18 4429. The Texas Plaintiffs and Texas State Class members conferred
19 tangible and material monetary benefits upon Honda Japan, Honda USA, Honda
20 Engineering USA, Hyundai Korea, Hyundai USA, Toyota USA, Toyota Sales
21 USA, and Toyota Engineering USA when they purchased or leased the Honda,
22 Hyundai, and Toyota Class Vehicles. These Defendants readily accepted and
23 retained these benefits.

24 4430. The Texas Plaintiffs and Texas State Class members would not have
25 purchased or leased the Honda, Hyundai, and Toyota Class Vehicles, or would have
26 paid less for them, had they known of the ACU Defect at the time of purchase or
27 lease. Therefore, Honda Japan, Honda USA, Honda Engineering USA, Hyundai
28 Korea, Hyundai USA, Toyota USA, Toyota Sales USA, and Toyota Engineering

1 USA profited from the sale and lease of the Honda, Hyundai, and Toyota Class
2 Vehicles to the detriment and expense of the Texas Plaintiffs and Texas State Class
3 members.

4 4431. Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea,
5 Hyundai USA, Toyota USA, Toyota Sales USA, and Toyota Engineering USA
6 appreciated these monetary benefits. These benefits were the expected result of
7 these Defendants acting in their pecuniary interest at the expense of their customers.
8 Honda Japan, Honda USA, Honda Engineering USA, Hyundai Korea, Hyundai
9 USA, Toyota USA, Toyota Sales USA, and Toyota Engineering USA knew of
10 these benefits because they were aware of the ACU Defect, yet they failed to
11 disclose this knowledge and misled the Texas Plaintiffs and Texas State Class
12 members regarding the nature and quality of the Honda, Hyundai, and Toyota Class
13 Vehicles while profiting from this deception.

14 4432. It would be unjust, inequitable, and unconscionable for Honda Japan,
15 Honda USA, Honda Engineering USA, Hyundai Korea, Hyundai USA, Toyota
16 USA, Toyota Sales USA, and Toyota Engineering USA to retain these monetary
17 benefits, including because they were procured as a result of the wrongful conduct
18 alleged above.

19 4433. The Texas Plaintiffs and Texas State Class members are entitled to
20 restitution of the benefits Honda Japan, Honda USA, Honda Engineering USA,
21 Hyundai Korea, Hyundai USA, Toyota USA, Toyota Sales USA, and Toyota
22 Engineering USA unjustly retained and/or any amounts necessary to return the
23 Texas Plaintiffs and Texas State Class members to the position they occupied prior
24 to dealing with them, with such amounts to be determined at trial.

25 4434. The Texas Plaintiff pleads this claim separately as well as in the
26 alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
27 Texas Plaintiffs' claims for damages are dismissed or judgment is entered in favor
28 of Defendants, the Texas Plaintiffs would have no adequate legal remedy.

1 **23. Washington**

2 **a. Washington Count 1: Violation of the Washington**
3 **Consumer Protection Act (Wash. Rev. Code § 19.86.010, et**
4 **seq.) Against Toyota USA and Toyota Sales USA**

4 4435. Plaintiffs reallege and incorporate by reference all preceding
5 allegations as though fully set forth herein.

6 4436. Plaintiff Dee Roberts (hereinafter, “Washington Plaintiff”) brings this
7 count individually and on behalf of members of the Washington State Class who
8 purchased or leased Toyota Class Vehicles, against Toyota USA and Toyota Sales
9 USA.

10 4437. Toyota USA Toyota Sales USA, the Washington Plaintiff, and
11 Washington State Class members are “persons” within the meaning of Wash. Rev.
12 Code § 19.86.010(1).

13 4438. The Toyota Class Vehicles and defective ACUs installed in them are
14 “assets” within the meaning of Wash. Rev. Code § 19.86.010(3).

15 4439. Toyota USA and Toyota Sales USA are and were engaged in “trade”
16 or “commerce” within the meaning of Wash. Rev. Code § 19.86.010(2).

17 4440. The Washington Consumer Protection Act (“Washington CPA”)
18 prohibits “[u]nfair methods of competition and unfair or deceptive acts or practices
19 in the conduct of any trade or commerce[.]” Wash. Rev. Code § 19.86.020.

20 4441. In the course of their business, Toyota USA and Toyota Sales USA,
21 through their agents, employees, and/or subsidiaries, violated the Washington CPA
22 by knowingly and intentionally misrepresenting, omitting, concealing, and/or
23 failing to disclose material facts regarding the reliability, safety, and performance of
24 the Toyota Class Vehicles, the safety of their Occupant Restraint Systems, and the
25 ACU Defect, as detailed above.

26 4442. Toyota USA and Toyota Sales USA had an ongoing duty to the
27 Washington Plaintiff and Washington State Class members to refrain from unfair or
28 deceptive practices under the Washington CPA in the course of their business.

1 Specifically, Toyota USA and Toyota Sales USA owed the Washington Plaintiff
2 and Washington State Class members a duty to disclose all the material facts
3 concerning the ACU Defect in the Toyota Class Vehicles because they possessed
4 exclusive knowledge, they intentionally concealed the ACU Defect from the
5 Washington Plaintiff and Washington State Class members, and/or they made
6 misrepresentations that were rendered misleading because they were contradicted
7 by withheld facts.

8 4443. By misrepresenting the Toyota Class Vehicles as safe and reliable and
9 the defective ACU and ASICs installed in them as properly-functioning and free
10 from defects, and by failing to disclose and actively concealing the dangers and risk
11 posed by the ACU Defect to both consumers and NHTSA, Toyota USA and Toyota
12 Sales USA engaged in unfair or deceptive business practices prohibited by Wash.
13 Rev. Code § 19.86.020.

14 4444. Toyota USA's and Toyota Sales USA's unfair and deceptive acts or
15 practices, including their misrepresentations, concealments, omissions, and
16 suppressions of material facts, were designed to mislead and had a tendency or
17 capacity to mislead and create a false impression in consumers that the Toyota
18 Class Vehicles had properly-functioning and reliable airbags and seatbelts, and that
19 the Occupant Restraint System did not contain the ACU Defect and would perform
20 its intended function of activating the seatbelts and airbags during a collision.
21 Indeed, those misrepresentations, concealments, omissions, and suppressions of
22 material facts did in fact deceive reasonable consumers, including the Washington
23 Plaintiff and Washington State Class members, about the true safety and reliability
24 of Toyota Class Vehicles and/or the defective ACUs and ASICs installed in them,
25 the quality of the Toyota Class Vehicles, and the true value of the Toyota Class
26 Vehicles.

27 4445. Toyota USA's and Toyota Sales USA's misrepresentations,
28 concealments, omissions, and suppressions of material facts regarding the ACU

1 Defect and true characteristics of the Occupant Restraint Systems in the Toyota
2 Class Vehicles were material to the decisions of the Washington Plaintiff and
3 Washington State Class members to purchase and lease those vehicles, as Toyota
4 USA and Toyota Sales USA intended. The Washington Plaintiff and Washington
5 State Class members were exposed to those misrepresentations, concealments,
6 omissions, and suppressions of material facts, and relied on Toyota USA's and
7 Toyota Sales USA's misrepresentations that the Toyota Class Vehicles and their
8 Occupant Restraint Systems were safe and reliable in deciding to purchase and
9 lease Toyota Class Vehicles. Plaintiffs allege the information they relied upon in
10 Section II.B above. To aid review of this information, Exhibit 19 provides
11 paragraph numbers for each Plaintiff.

12 4446. The Washington Plaintiff's and Washington State Class members'
13 reliance was reasonable, as they had no way of discerning that Toyota USA's and
14 Toyota Sales USA's representations were false and misleading, or otherwise
15 learning the facts that Toyota USA and Toyota Sales USA had concealed or failed
16 to disclose. The Washington Plaintiff and Washington State Class members did not,
17 and could not, unravel Toyota USA's and Toyota Sales USA's deception on their
18 own.

19 4447. Had the Washington Plaintiff and Washington State Class members
20 known the truth about the ACU Defect, the Washington Plaintiff and Washington
21 State Class members would not have purchased or leased Toyota Class Vehicles, or
22 would have paid significantly less for them.

23 4448. The Washington Plaintiff and Washington State Class members
24 suffered ascertainable losses and actual damages through their overpayment at the
25 time of purchase and lease for Toyota Class Vehicles with an undisclosed safety
26 defect as a direct and proximate result of Toyota USA's and Toyota Sales USA's
27 concealment, misrepresentations, and/or failure to disclose material information.
28

1 4449. Toyota USA’s and Toyota Sales USA’s violations present a continuing
2 risk to the Washington Plaintiff and Washington State Class members, as well as to
3 the general public, because the Class Vehicles remain unsafe due to the defective
4 ACUs and ASICs therein. Additionally, their unlawful acts and practices
5 complained of herein affect the public interest.

6 4450. Pursuant to Wash. Rev. Code §§ 19.86.090, the Washington Plaintiff
7 and Washington State Class members seek an order enjoining Toyota USA’s and
8 Toyota Sales USA’s unfair or deceptive acts or practices and awarding damages
9 and any other just and proper relief available under the Washington CPA.

10 **b. Washington Count 2: Violation of the Washington**
11 **Consumer Protection Act (Wash. Rev. Code § 19.86.010, et**
12 **seq.) Against ZF Electronics USA, ZF Passive Safety USA,**
ZF Automotive USA, ZF TRW Corp., ZF Germany, ST
Italy, ST USA, and ST Malaysia.

13 4451. Plaintiffs reallege and incorporate by reference all preceding
14 allegations as though fully set forth herein.

15 4452. The Washington Plaintiff brings this count individually and on behalf
16 of members of the Washington State Class against ZF Electronics USA, ZF Passive
17 Safety USA, ZF Automotive USA, ZF TRW Corp., and ZF Germany (collectively,
18 the “ZF Defendants”), and ST Italy, ST Malaysia, and ST USA (collectively, the
19 “ST Defendants”).

20 4453. The ZF Defendants, the ST Defendants, the Washington Plaintiff, and
21 Washington State Class members are “persons” within the meaning of Wash. Rev.
22 Code § 19.86.010(1).

23 4454. The Class Vehicles and defective ACUs installed in them are “assets”
24 within the meaning of Wash. Rev. Code § 19.86.010(3).

25 4455. The ZF and ST Defendants were and are engaged in “trade” or
26 “commerce” within the meaning of Wash. Rev. Code § 19.86.010(2).

27
28

1 4456. The Washington Consumer Protection Act (“Washington CPA”)
2 prohibits “[u]nfair methods of competition and unfair or deceptive acts or practices
3 in the conduct of any trade or commerce[.]” Wash. Rev. Code § 19.86.020.

4 4457. The ZF and ST Defendants had an ongoing duty to the Washington
5 Plaintiff and Washington State Class members to refrain from unfair or deceptive
6 practices under the Washington CPA in the course of their business. Specifically,
7 the ZF and ST Defendants owed the Washington Plaintiff and Washington State
8 Class members a duty to disclose all the material facts concerning the ACU Defect
9 in the Class Vehicles because they possessed exclusive knowledge and they
10 intentionally concealed the ACU Defect from the Washington Plaintiff and
11 Washington State Class members.

12 4458. In the course of their business, the ZF and ST Defendants, through
13 their agents, employees, and/or subsidiaries, violated the Washington CPA by
14 knowingly and intentionally omitting, concealing, and failing to disclose material
15 facts regarding the existence, nature, and scope of the defective ACU and ASIC
16 installed in the Class Vehicles, as detailed above.

17 4459. Additionally, ZF Electronics USA, ZF Passive Safety USA, and ZF
18 Automotive USA through their agents, employees, and/or subsidiaries, violated the
19 Washington CPA when they knowingly and intentionally misrepresented the Class
20 Vehicles as safe and reliable and the defective ACU and ASICs installed in them as
21 properly-functioning and free from defects. Specifically, ZF Electronics USA, ZF
22 Passive Safety USA, and ZF Automotive USA worked with the Vehicle
23 Manufacturer Defendants on the design and inclusion of the airbag readiness
24 indicators in the Class Vehicles, which falsely assured Plaintiffs and Class
25 Members that the Occupant Restraint Systems in the Class Vehicles would function
26 properly in a crash.

27 4460. By misrepresenting, failing to disclose, and actively concealing the
28 dangers and risk posed by the Class Vehicles due to the ACU Defect, the ZF and

1 ST Defendants engaged unfair methods of competition and unfair or deceptive acts
2 or practices in the conduct of any trade or commerce prohibited by Wash. Rev.
3 Code § 19.86.020.

4 4461. The ZF and ST Defendants' unfair or deceptive acts or practices,
5 including their misrepresentations, concealments, omissions, and suppressions of
6 material facts, were designed to mislead and had a tendency or capacity to mislead
7 and create a false impression in consumers that the Class Vehicles had properly-
8 functioning and reliable airbags and seatbelts, and that the Occupant Restraint
9 System did not contain the ACU Defect and would perform its intended function of
10 activating the seatbelts and airbags during a collision. Indeed, those
11 misrepresentations, concealments, omissions, and suppressions of material facts did
12 in fact deceive reasonable consumers, including the Washington Plaintiff and
13 Washington State Class members, about the true safety and reliability of Class
14 Vehicles and/or the defective ACUs and ASICs installed in them, the quality of the
15 Class Vehicles, and the true value of the Class Vehicles.

16 4462. The Washington Plaintiff and Washington State Class members
17 justifiably relied on the ZF and ST Defendants' misrepresentations, omissions, and
18 concealment, as they had no way of discerning that the Class Vehicles contained
19 the ACU Defect, as alleged above. The Washington Plaintiff and Washington State
20 Class members did not, and could not, unravel the ZF and ST Defendants'
21 deception on their own

22 4463. The ZF and ST Defendants' misrepresentations and concealment of the
23 ACU Defect and true characteristics of the defective ACUs and ASICs in the Class
24 Vehicles were material to the decisions of the Washington Plaintiff and Washington
25 State Class members to purchase and lease Class Vehicles, as the ZF and ST
26 Defendants intended. Had they known the truth, the Washington Plaintiff and
27 Washington State Class members would not have purchased or leased the Class
28 Vehicles, or would have paid significantly less for them.

1 4464. The Washington Plaintiff and Washington State Class members
2 suffered ascertainable losses and actual damages as a direct and proximate result of
3 the ZF and ST Defendants' misrepresentations, concealment and/or failure to
4 disclose material information.

5 4465. The ZF and ST Defendants' violations present a continuing risk to the
6 Washington Plaintiff and Washington State Class members, as well as to the
7 general public, because the Class Vehicles remain unsafe due to the defective
8 ACUs and ASICs therein. The ZF and ST Defendants' unlawful acts and practices
9 complained of herein affect the public interest.

10 4466. Pursuant to Wash. Rev. Code §§ 19.86.090, the Washington Plaintiff
11 and Washington State Class members seek an order enjoining the ZF and ST
12 Defendants' unfair or deceptive acts or practices and awarding damages and any
13 other just and proper relief available under the Washington CPA.

14 **c. Washington Count 3: Fraud by Omission and Concealment**
15 **Against Toyota USA and Toyota Sales USA**

16 4467. Plaintiffs reallege and incorporate by reference all preceding
17 allegations as though fully set forth herein.

18 4468. The Washington Plaintiff brings this count individually and on behalf
19 of members of the Washington State Class who purchased or leased Toyota Class
20 Vehicles, against Toyota USA and Toyota Sales USA.

21 4469. Toyota USA and Toyota Sales USA are liable for both fraudulent
22 concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-
23 51 (1977).

24 4470. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
25 serious risks to vehicle occupants, including that it can cause: (1) airbags and
26 seatbelts not to activate during a crash because crashes can sometimes release
27 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
28 vehicle has not crashed, which is dangerous because it is shocking and difficult for

1 the driver to operate a vehicle when the airbag deploys without warning; and (3)
2 failures of other important post-crash operations of the safety system, such as
3 unlocking doors to facilitate escape or extraction of drivers and passengers by
4 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

5 4471. Toyota USA and Toyota Sales USA had a duty to disclose the ACU
6 Defect to the Washington Plaintiff and Washington State Class members because:

- 7 a. Toyota USA and Toyota Sales USA had exclusive access to and
8 far superior knowledge about technical facts regarding the ACU
9 Defect;
- 10 b. Given the ACU Defect's hidden and technical nature, the
11 Washington Plaintiff and Washington State Class members lack
12 the sophisticated expertise in vehicle components and electrical
13 phenomena that would be necessary to discover the ACU Defect
14 on their own;
- 15 c. Toyota USA and Toyota Sales USA knew that the ACU Defect
16 gave rise to serious safety concerns for the consumers who use
17 the vehicles, and the Toyota Class Vehicles containing the ACU
18 Defect would have been a material fact to the Washington
19 Plaintiff's and Washington State Class members' decisions to
20 buy or lease Toyota Class Vehicles; and
- 21 d. Toyota USA and Toyota Sales USA made incomplete
22 representations about the safety and reliability of the Toyota
23 Class Vehicles and their Occupant Restraint System, while
24 purposefully withholding material facts about a known safety
25 defect. In uniform advertising and materials provided with each
26 Class Vehicle, Toyota USA and Toyota Sales USA intentionally
27 concealed, suppressed, and failed to disclose to the Washington
28 Plaintiff and Washington State Class members that the Toyota

1 Class Vehicles contained the ACU Defect. Because they
2 volunteered to provide information about the Toyota Class
3 Vehicles that they marketed and offered for sale and lease to the
4 Washington Plaintiff and Washington State Class members,
5 Toyota USA and Toyota Sales USA had the duty to disclose the
6 whole truth.

7 4472. In breach of their duties, Toyota USA and Toyota Sales USA failed to
8 disclose that the Toyota Class Vehicles were not safe and reliable, and that their
9 Occupant Restraint Systems, including their airbags and seatbelt pretensioners
10 could fail in the event of a crash due to the ACU Defect.

11 4473. Toyota USA and Toyota Sales USA intended for the Washington
12 Plaintiff and Washington State Class members to rely on their omissions—which
13 they did by purchasing and leasing the Toyota Class Vehicles at the prices they paid
14 believing that the Occupant Restraint Systems in their Class Vehicles would
15 function properly.

16 4474. That reliance was reasonable, because a reasonable consumer would
17 not have expected that the Toyota Class Vehicles contained a safety defect that
18 poses such a serious risk. Toyota USA and Toyota Sales USA knew that reasonable
19 consumers expect that their vehicle has working airbags and seatbelt pretensioners
20 and would rely on those facts in deciding whether to purchase, lease, or retain a
21 new or used motor vehicle. Whether a manufacturer's products are safe and
22 reliable, and whether that manufacturer stands behind its products, are material
23 concerns to a consumer. Especially here when at least nine people have already
24 died due to the ACU Defect, and many more have been injured.

25 4475. Additionally, Toyota USA and Toyota Sales USA ensured that the
26 Washington Plaintiff and Washington State Class members did not discover this
27 information by actively concealing and misrepresenting the true nature of the
28 Toyota Class Vehicles' Occupant Restraint Systems to consumers and NHTSA.

1 4476. Toyota USA and Toyota Sales USA actively concealed and suppressed
2 these material facts, in whole or in part, to maintain a market for their Class
3 Vehicles, to protect profits, and to avoid costly recalls that would expose them to
4 liability for those expenses and harm the commercial reputations of Defendants and
5 their products. They did so at the expense of the Washington Plaintiff and
6 Washington State Class members.

7 4477. To this day, Toyota USA and Toyota Sales USA have not fully and
8 adequately disclosed the ACU Defect, and they continue to conceal material
9 information about the defect from consumers and NHTSA. The omitted and
10 concealed facts were material because a reasonable person would find them
11 important in purchasing, leasing, or retaining a new or used motor vehicle, and
12 because they directly impact the value of the Toyota Class Vehicles purchased or
13 leased by the Washington Plaintiff and Washington State Class members.

14 4478. Had they been aware of the ACU Defect in the Toyota Class Vehicles,
15 and Toyota USA's and Toyota Sales USA's callous disregard for safety, the
16 Washington Plaintiff and Washington State Class members either would not have
17 paid as much as they did for their Class Vehicles, or they would not have purchased
18 or leased them.

19 4479. As alleged in Section V above, if Toyota USA and Toyota Sales USA
20 had fully and adequately disclosed the ACU Defect to consumers and NHTSA, the
21 Washington Plaintiff and Washington State Class members would have seen such a
22 disclosure.

23 4480. Accordingly, Toyota USA and Toyota Sales USA are liable to the
24 Washington Plaintiff and Washington State Class members for their damages in an
25 amount to be proven at trial, including, but not limited to, their lost overpayment
26 for the Toyota Class Vehicles at the time of purchase or lease.

27 4481. Toyota USA's and Toyota Sales USA's acts were done maliciously,
28 oppressively, deliberately, with intent to defraud; in reckless disregard of the

1 Washington Plaintiff’s and Washington State Class members’ rights and well-
2 being; and to enrich themselves. Toyota USA’s and Toyota Sales USA’s
3 misconduct warrants an assessment of punitive damages, as permitted by law, in an
4 amount sufficient to deter such conduct in the future, which amount shall be
5 determined according to proof at trial.

6 **d. Washington Count 4: Fraud by Omission and Concealment**
7 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
8 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
9 **ST USA, and ST Malaysia**

9 4482. Plaintiffs reallege and incorporate by reference all preceding
10 allegations as though fully set forth herein.

11 4483. The Washington Plaintiff brings this count individually and on behalf
12 of members of the Washington State Class who purchased or leased Class Vehicles,
13 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
14 TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST
15 Malaysia, and ST USA (collectively, the “ST Defendants”).

16 4484. The ZF and ST Defendants are liable for both fraudulent concealment
17 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

18 4485. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
19 serious risks to vehicle occupants, including that it can cause: (1) airbags and
20 seatbelts not to activate during a crash because crashes can sometimes release
21 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
22 vehicle has not crashed, which is dangerous because it is shocking and difficult for
23 the driver to operate a vehicle when the airbag deploys without warning; and (3)
24 failures of other important post-crash operations of the safety system, such as
25 unlocking doors to facilitate escape or extraction of drivers and passengers by
26 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

27 4486. The ZF and ST Defendants had a duty to disclose the ACU Defect to
28 the Washington Plaintiff and Washington State Class members because:

- 1 a. The ZF and ST Defendants had exclusive access to and far
2 superior knowledge about technical facts regarding the ACU
3 Defect;
- 4 b. Given the ACU Defect’s hidden and technical nature, the
5 Washington Plaintiff and Washington State Class members lack
6 the sophisticated expertise in vehicle components and electrical
7 phenomena that would be necessary to discover the ACU Defect
8 on their own;
- 9 c. The ZF and ST Defendants knew that the ACU Defect gave rise
10 to serious safety concerns for the consumers who use the
11 vehicles, and the Class Vehicles containing the ACU Defect
12 would have been a material fact to the Washington Plaintiff’s
13 and Washington State Class members’ decisions to buy or lease
14 Class Vehicles; and
- 15 d. The ZF Defendants made incomplete representations about the
16 safety and reliability of the Class Vehicles and their Occupant
17 Restraint System, while purposefully withholding material facts
18 about a known safety defect, creating a duty to disclose the
19 whole truth. Specifically, ZF Electronics USA, ZF Passive
20 Safety USA, and ZF Automotive USA worked with the Vehicle
21 Manufacturer Defendants on the design and inclusion of the
22 airbag readiness indicators in the Class Vehicles, which falsely
23 assured Plaintiffs and Class Members that the Occupant
24 Restraint Systems in the Class Vehicles would function properly
25 in a crash.

26 4487. In breach of their duties, the ZF and ST Defendants failed to disclose
27 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
28

1 Systems, including their airbags and seatbelt pretensioners could fail in the event of
2 a crash due to the ACU Defect.

3 4488. The ZF and ST Defendants intended for the Washington Plaintiff and
4 Washington State Class members to rely on their omissions—which they did by
5 purchasing and leasing the Class Vehicles at the prices they paid believing that the
6 Occupant Restraint Systems in their Class Vehicles would function properly.

7 4489. That reliance was reasonable, because a reasonable consumer would
8 not have expected that the Class Vehicles contained a safety defect that poses such
9 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
10 that their vehicle has working airbags and seatbelt pretensioners and would rely on
11 those facts in deciding whether to purchase, lease, or retain a new or used motor
12 vehicle. Whether a manufacturer's products are safe and reliable, and whether that
13 manufacturer stands behind its products, are material concerns to a consumer.
14 Especially here when at least nine people have already died due to the ACU Defect,
15 and many more have been injured.

16 4490. Additionally, the ZF and ST Defendants ensured that the Washington
17 Plaintiff and Washington State Class members did not discover this information by
18 actively concealing and misrepresenting the true nature of the Class Vehicles'
19 Occupant Restraint Systems to consumers and NHTSA.

20 4491. The ZF and ST Defendants actively concealed and suppressed these
21 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
22 protect profits, and to avoid costly recalls that would expose them to liability for
23 those expenses and harm the commercial reputations of Defendants and their
24 products. They did so at the expense of the Washington Plaintiff and Washington
25 State Class members.

26 4492. To this day, the ZF and ST Defendants have not fully and adequately
27 disclosed the ACU Defect, and they continue to conceal material information about
28 the defect from consumers and NHTSA. The omitted and concealed facts were

1 material because a reasonable person would find them important in purchasing,
2 leasing, or retaining a new or used motor vehicle, and because they directly impact
3 the value of the Class Vehicles purchased or leased by the Washington Plaintiff and
4 Washington State Class members.

5 4493. Had they been aware of the ACU Defect in the Class Vehicles, and the
6 ZF and ST Defendants' callous disregard for safety, the Washington Plaintiff and
7 Washington State Class members either would not have paid as much as they did
8 for their Class Vehicles, or they would not have purchased or leased them.

9 4494. As alleged in Section V above, if the ZF and ST Defendants had fully
10 and adequately disclosed the ACU Defect to consumers and NHTSA, the
11 Washington Plaintiff and Washington State Class members would have seen such a
12 disclosure.

13 4495. Accordingly, the ZF and ST Defendants are liable to the Washington
14 Plaintiff and Washington State Class members for their damages in an amount to be
15 proven at trial, including, but not limited to, their lost overpayment for the Class
16 Vehicles at the time of purchase or lease.

17 4496. The ZF and ST Defendants' acts were done maliciously, oppressively,
18 deliberately, with intent to defraud; in reckless disregard of the Washington
19 Plaintiff's and Washington State Class members' rights and well-being; and to
20 enrich themselves. The ZF and ST Defendants' misconduct warrants an assessment
21 of punitive damages, as permitted by law, in an amount sufficient to deter such
22 conduct in the future, which amount shall be determined according to proof at trial.

23 **e. Washington Count 5: Unjust Enrichment Against Toyota**
24 **USA, Toyota Sales USA, and Toyota Engineering USA**

25 4497. Plaintiffs reallege and incorporate by reference all allegations in
26 Sections I-VI above as though fully set forth herein.

27
28

1 4498. The Washington Plaintiff brings this count individually and on behalf
2 of members of the Washington State Class who purchased or leased Toyota Class
3 Vehicles, against Toyota USA, Toyota Sales USA, and Toyota Engineering USA.

4 4499. The Washington Plaintiff and Washington State Class members
5 conferred tangible and material monetary benefits upon Toyota USA, Toyota Sales
6 USA, and Toyota Engineering USA when they purchased or leased the Toyota
7 Class Vehicles. Toyota USA, Toyota Sales USA, and Toyota Engineering USA
8 readily accepted and retained these benefits.

9 4500. The Washington Plaintiff and Washington State Class members would
10 not have purchased or leased the Toyota Class Vehicles, or would have paid less for
11 them, had they known of the ACU Defect at the time of purchase or lease.
12 Therefore, Toyota USA, Toyota Sales USA, and Toyota Engineering USA profited
13 from the sale and lease of the Toyota Class Vehicles to the detriment and expense
14 of the Washington Plaintiff and Washington State Class members.

15 4501. Toyota USA, Toyota Sales USA, and Toyota Engineering USA
16 appreciated these monetary benefits. These benefits were the expected result of
17 Toyota USA, Toyota Sales USA, and Toyota Engineering USA acting in their
18 pecuniary interest at the expense of their customers. Toyota USA, Toyota Sales
19 USA, and Toyota Engineering USA knew of these benefits because they were
20 aware of the ACU Defect, yet they failed to disclose this knowledge and misled the
21 Washington Plaintiff and Washington State Class members regarding the nature
22 and quality of the Toyota Class Vehicles while profiting from this deception.

23 4502. It would be unjust, inequitable, and unconscionable for Toyota USA,
24 Toyota Sales USA, and Toyota Engineering USA to retain these monetary benefits,
25 including because they were procured as a result of Toyota USA's, Toyota Sales
26 USA's, and Toyota Engineering USA's wrongful conduct alleged above.

27 4503. The Washington Plaintiff and Washington State Class members are
28 entitled to restitution of the benefits Toyota USA, Toyota Sales USA, and Toyota

1 Engineering USA unjustly retained and/or any amounts necessary to return the
2 Washington Plaintiff and Washington State Class members to the position they
3 occupied prior to dealing with Toyota USA, Toyota Sales USA, and Toyota
4 Engineering USA, with such amounts to be determined at trial.

5 4504. The Washington Plaintiff pleads this claim separately as well as in the
6 alternative to his claims for damages under Fed. R. Civ. P. 8(a)(3), because if the
7 Washington Plaintiff's claims for damages are dismissed or judgment is entered in
8 favor of Defendants, the Washington Plaintiff would have no adequate legal
9 remedy.

10 **24. Wisconsin**

11 **a. Wisconsin Count 1: Breach of Express Warranty (Wis. Stat.**
12 **§§ 402.313 and 411.210) Against Mitsubishi Japan and**
13 **Mitsubishi USA²²**

14 4505. Plaintiffs reallege and incorporate by reference all preceding
15 allegations as though fully set forth herein.

16 4506. Plaintiff John Sancomb (hereinafter, "Wisconsin Plaintiff") brings this
17 count individually and on behalf of members of the Wisconsin State Class who
18 purchased or leased Mitsubishi Class Vehicles, against Mitsubishi Japan and
19 Mitsubishi USA.

20 4507. Mitsubishi Japan and Mitsubishi USA are and were at all relevant
21 times "merchants" with respect to motor vehicles under Wis. Stat. §§ 402.104(3)
22 and 411.103(1)(t), and "sellers" of motor vehicles under § 402.103(1)(d).

23 4508. With respect to leases, Mitsubishi Japan and Mitsubishi USA are and
24 were at all relevant times "lessors" of motor vehicles under Wis. Stat.
25 § 411.103(1)(p).

26
27 ²² The Court held in its February 9, 2022 Order that the Wisconsin Plaintiff has
28 pleaded sufficient facts to state a claim for breach of express warranty against
MMNA under Wisconsin law. *See* ECF No. 396 at 169.

1 4509. All Wisconsin State Class members who purchased Mitsubishi Class
2 Vehicles in Wisconsin are “buyers” within the meaning of Wis. Stat.
3 § 402.103(1)(a).

4 4510. All Wisconsin State Class members who leased Mitsubishi Class
5 Vehicles in Wisconsin are “lessees” within the meaning of Wis. Stat.
6 § 411.103(1)(n).

7 4511. The Mitsubishi Class Vehicles are and were at all relevant times
8 “goods” within the meaning of Wis. Stat. §§ 402.105(1)(c) and 411.103(1)(h).

9 4512. In connection with the purchase or lease of Mitsubishi Class Vehicles,
10 Mitsubishi Japan and Mitsubishi USA provided the Wisconsin Plaintiff and
11 Wisconsin State Class members with warranties in the form of: (a) written express
12 warranties covering the repair or replacement of components that are defective in
13 materials or workmanship, and (b) descriptions of the Mitsubishi Class Vehicles as
14 safe and reliable, and that their Occupant Restraint Systems, including their airbags
15 and seatbelt pretensioners, would function properly in the event of a crash

16 4513. However, Mitsubishi Japan and Mitsubishi USA knew or should have
17 known that the warranties were false and/or misleading. Specifically, Mitsubishi
18 Japan and Mitsubishi USA were aware of the ACU Defect in the Mitsubishi Class
19 Vehicles, which made the vehicles inherently defective and dangerous at the time
20 that they were sold and leased to the Wisconsin Plaintiff and Wisconsin State Class
21 members.

22 4514. The Wisconsin Plaintiff and Wisconsin State Class members were
23 aware the Mitsubishi Class Vehicles were covered by express warranties, and those
24 warranties were an essential part of the bargain between them, Mitsubishi Japan,
25 and Mitsubishi USA when the Wisconsin Plaintiff and Wisconsin State Class
26 members unknowingly purchased and leased Mitsubishi Class Vehicles that came
27 equipped with defective ACUs and ASICs.
28

1 4515. Mitsubishi Japan and Mitsubishi USA misrepresented the Mitsubishi
2 Class Vehicles as safe and reliable while concealing that they contained the ACU
3 Defect, the Wisconsin Plaintiff and Wisconsin State Class members were exposed
4 to those misrepresentations, and the Wisconsin Plaintiff and Wisconsin State Class
5 members had no way of discerning that Mitsubishi Japan's and Mitsubishi USA's
6 representations were false and misleading or otherwise learning the material facts
7 that Mitsubishi Japan and Mitsubishi USA had concealed or failed to disclose.
8 Accordingly, the Wisconsin Plaintiff and Wisconsin State Class members
9 reasonably relied on Mitsubishi Japan's and Mitsubishi USA's express warranties
10 when purchasing or leasing their Mitsubishi Class Vehicles. Plaintiffs allege the
11 information they relied upon in Section II.B above. To aid review of this
12 information, Exhibit 19 provides paragraph numbers for each Plaintiff.

13 4516. Mitsubishi Japan and Mitsubishi USA knowingly breached its express
14 warranties to repair defects in materials and workmanship by failing to repair the
15 ACU Defect or replace the defective ACUs and ASICs in the Mitsubishi Class
16 Vehicles. Mitsubishi Japan and Mitsubishi USA also breached their express
17 warranties by selling and leasing Mitsubishi Class Vehicles with a defect that was
18 never disclosed to the Wisconsin Plaintiff and Wisconsin State Class members.

19 4517. The Wisconsin Plaintiff and Wisconsin State Class members have
20 provided Mitsubishi Japan and Mitsubishi USA with reasonable notice and
21 opportunity to cure the breaches of its express warranties by way of the numerous
22 NHTSA complaints filed against it, and individual notice letters sent by the
23 Wisconsin State Class members within a reasonable amount of time after the ACU
24 Defect became public. Additionally, a notice letter was sent on behalf of the
25 Wisconsin Plaintiff and Wisconsin State Class members to Mitsubishi USA on
26 April 24, 2020, and a notice letter was sent to Mitsubishi Japan on June 5, 2020.²³

27 ²³ The Court held in its February 9, 2022 Order that the Wisconsin Plaintiff
28 adequately alleged that he provided the requisite notice to Mitsubishi USA, *see*

1 4518. Alternatively, the Wisconsin Plaintiff and Wisconsin State Class
2 members were excused from providing Mitsubishi Japan and Mitsubishi USA with
3 notice and an opportunity to cure the breach, because it would have been futile. As
4 alleged above, Mitsubishi Japan and Mitsubishi USA have long known that the
5 Mitsubishi Class Vehicles contained the ACU Defect, and that the ACU Defect has
6 caused ACUs and ASICs to malfunction in crashes involving Class Vehicles;
7 however, to date, Mitsubishi Japan and Mitsubishi USA have not instituted a recall
8 or any other repair program, or even acknowledged that the ACU Defect exists—
9 even though Mitsubishi Class Vehicles are subject to the NHTSA investigation.
10 Therefore, the Mitsubishi Plaintiff and Mitsubishi State Class members had no
11 reason to believe that Mitsubishi Japan and Mitsubishi USA would have repaired
12 the ACU Defect if the Wisconsin Plaintiff and Wisconsin State Class members
13 presented their Class Vehicles to Mitsubishi Japan and Mitsubishi USA for repair.

14 4519. As a direct and proximate result of Mitsubishi Japan’s and Mitsubishi
15 USA’s breach of their express warranties, the Mitsubishi Class Vehicles were and
16 are defective and the ACU Defect in the Wisconsin Plaintiff’s and Wisconsin State
17 Class members’ Mitsubishi Class Vehicles was not remedied. Therefore, the
18 Wisconsin Plaintiff and Wisconsin State Class members have been damaged, in an
19 amount to be proven at trial, through their overpayment at the time of purchase or
20 lease for Mitsubishi Class Vehicles with an undisclosed safety defect that would not
21 be remedied.

22 **b. Wisconsin Count 2: Violation of the Wisconsin Deceptive**
23 **Trade Practices Act (Wis. Stat. § 100.18, et seq.) Against**
24 **Mitsubishi Japan and Mitsubishi USA**

25 4520. Plaintiffs reallege and incorporate by reference all preceding
26 allegations as though fully set forth herein.

27 _____
28 ECF No. 396 at 169, but failed to, “include sufficient allegations that notice was
provided [to Mitsubishi Japan]. *Id.* The Wisconsin Plaintiff has amended this claim
to include the date in which he sent Mitsubishi Japan a notice letter.

1 4521. The Wisconsin Plaintiff brings this count individually and on behalf of
2 members of the Wisconsin State Class who purchased or leased Mitsubishi Class
3 Vehicles, against Mitsubishi Japan and Mitsubishi USA.

4 4522. Mitsubishi Japan and Mitsubishi USA are “person[s], firm[s],
5 corporation[s], or association[s]” within the meaning of Wis. Stat. § 100.18(1).

6 4523. The Wisconsin Plaintiff and Wisconsin State Class are members of
7 “the public” within the meaning of Wis. Stat. § 100.18(1).

8 4524. The Mitsubishi Class Vehicles and the defective ACUs installed in
9 them are “merchandise” within the meaning of Wis. Stat. § 100.18(1).

10 4525. The Wisconsin Deceptive Trade Practices Act (“Wisconsin DTPA”)
11 prohibits any “assertion, representation or statement of fact which is untrue,
12 deceptive or misleading.” Wis. Stat. § 100.18(1).

13 4526. In the course of their business, Mitsubishi Japan and Mitsubishi USA,
14 through their agents, employees, and/or subsidiaries, violated the Wisconsin DTPA
15 by knowingly and intentionally misrepresenting material facts regarding the
16 reliability, safety, and performance of the Mitsubishi Class Vehicles, the safety of
17 their Occupant Restraint Systems, and the ACU Defect, as detailed above.

18 4527. By misrepresenting the Mitsubishi Class Vehicles as safe and reliable
19 and the defective ACU and ASICs installed in them as properly-functioning and
20 free from defects, Mitsubishi Japan and Mitsubishi USA violated the Wisconsin
21 DTPA by making assertions, representations and statements of fact which are
22 untrue, deceptive or misleading, as prohibited by Wis. Stat. § 100.18(1).

23 4528. Mitsubishi Japan’s and Mitsubishi USA’s misrepresentations of
24 material facts were designed to mislead and had a tendency or capacity to mislead
25 and create a false impression in consumers that the Mitsubishi Class Vehicles had
26 properly-functioning and reliable airbags and seatbelts, and that the Occupant
27 Restraint System did not contain the ACU Defect and would perform its intended
28 function of activating the seatbelts and airbags during a collision. Indeed, those

1 misrepresentations of material facts did in fact deceive reasonable consumers,
2 including the Wisconsin Plaintiff and Wisconsin State Class members, about the
3 true safety and reliability of Mitsubishi Class Vehicles and/or the defective ACUs
4 and ASICs installed in them, the quality of the Mitsubishi Class Vehicles, and the
5 true value of the Mitsubishi Class Vehicles.

6 4529. Mitsubishi Japan's and Mitsubishi USA's misrepresentations of
7 material facts regarding the ACU Defect and true characteristics of the Occupant
8 Restraint Systems in the Mitsubishi Class Vehicles were material to the decisions of
9 the Wisconsin Plaintiff and Wisconsin State Class members to purchase and lease
10 those vehicles, as Mitsubishi Japan and Mitsubishi USA intended. The Wisconsin
11 Plaintiff and Wisconsin State Class members were exposed to those
12 misrepresentations of material facts, and relied on Mitsubishi Japan's and
13 Mitsubishi USA's misrepresentations that the Mitsubishi Class Vehicles and their
14 Occupant Restraint Systems were safe and reliable in deciding to purchase and
15 lease Mitsubishi Class Vehicles. Plaintiffs allege the information they relied upon
16 in Section II.B above. To aid review of this information, Exhibit 19 provides
17 paragraph numbers for each Plaintiff.

18 4530. The Wisconsin Plaintiff's and Wisconsin State Class members'
19 reliance was reasonable, as they had no way of discerning that Mitsubishi Japan's
20 and Mitsubishi USA's representations were false and misleading. The Wisconsin
21 Plaintiff and Wisconsin State Class members did not, and could not, unravel
22 Mitsubishi Japan's and Mitsubishi USA's deception on their own.

23 4531. Had the Wisconsin Plaintiff and Wisconsin State Class members
24 known the truth about the ACU Defect, the Wisconsin Plaintiff and Wisconsin
25 State Class members would not have purchased or leased Mitsubishi Class
26 Vehicles, or would have paid significantly less for them.

27 4532. The Wisconsin Plaintiff and Wisconsin State Class members suffered
28 ascertainable losses and actual damages through their overpayment at the time of

1 purchase and lease for Mitsubishi Class Vehicles with an undisclosed safety defect
2 as a direct and proximate result of Mitsubishi Japan’s and Mitsubishi USA’s
3 misrepresentations of material information.

4 4533. Mitsubishi Japan’s and Mitsubishi USA’s violations present a
5 continuing risk to the Wisconsin Plaintiff and Wisconsin State Class members, as
6 well as to the general public, because the Mitsubishi Class Vehicles remain unsafe
7 due to the defective ACUs and ASICs therein. Additionally, their unlawful acts and
8 practices complained of herein affect the public interest.

9 4534. Pursuant to Wis. Stat. § 100.18(11)(b)(2), the Wisconsin Plaintiff and
10 Wisconsin State Class members seek an order enjoining Mitsubishi Japan’s and
11 Mitsubishi USA’s unfair or deceptive acts or practices and awarding damages and
12 any other just and proper relief available under the Wisconsin DTPA.

13 **c. Wisconsin Count 3: Violation of the Wisconsin Deceptive**
14 **Trade Practices Act (Wis. Stat. § 100.18, et seq.) Against ZF**
15 **Electronics USA, ZF Passive Safety USA, and ZF**
16 **Automotive USA**

16 4535. Plaintiffs reallege and incorporate by reference all preceding
17 allegations as though fully set forth herein.

18 4536. The Wisconsin Plaintiff brings this count individually and on behalf of
19 members of the Wisconsin State Class against ZF Electronics USA, ZF Passive
20 Safety USA, and ZF Automotive USA.

21 4537. ZF Electronics USA, ZF Passive Safety USA, and ZF Automotive
22 USA are “person[s], firm[s], corporation[s], or association[s]” within the meaning
23 of Wis. Stat. § 100.18(1).

24 4538. The Wisconsin Plaintiff and Wisconsin State Class are members of
25 “the public” within the meaning of Wis. Stat. § 100.18(1).

26 4539. The Class Vehicles and the defective ACUs installed in them are
27 “merchandise” within the meaning of Wis. Stat. § 100.18(1).

28

1 4540. The Wisconsin Deceptive Trade Practices Act (“Wisconsin DTPA”)
2 prohibits any “assertion, representation or statement of fact which is untrue,
3 deceptive or misleading.” Wis. Stat. § 100.18(1).

4 4541. ZF Electronics USA, ZF Passive Safety USA, and ZF Automotive
5 USA, through their agents, employees, and/or subsidiaries, violated the Wisconsin
6 DTPA when they knowingly and intentionally misrepresented the Class Vehicles as
7 safe and reliable and the defective ACU and ASICs installed in them as properly-
8 functioning and free from defects. Specifically, ZF Electronics USA, ZF Passive
9 Safety USA, and ZF Automotive USA worked with the Vehicle Manufacturer
10 Defendants on the design and inclusion of the airbag readiness indicators in the
11 Class Vehicles, which falsely assured Plaintiffs and Class Members that the
12 Occupant Restraint Systems in the Class Vehicles would function properly in a
13 crash.

14 4542. By misrepresenting the Occupant Restraint Systems in the Class
15 Vehicles as properly-functioning and free from defects, ZF Electronics USA, ZF
16 Passive Safety USA, and ZF Automotive USA violated the Wisconsin DTPA by
17 making assertions, representations and statements of fact which are untrue,
18 deceptive or misleading, as prohibited by Wis. Stat. § 100.18(1).

19 4543. ZF Electronics USA’s, ZF Passive Safety USA’s, and ZF Automotive
20 USA’s misrepresentations of material facts were designed to mislead and had a
21 tendency or capacity to mislead and create a false impression in consumers that the
22 Class Vehicles had properly-functioning and reliable airbags and seatbelts, and that
23 the Occupant Restraint System did not contain the ACU Defect and would perform
24 its intended function of activating the seatbelts and airbags during a collision.
25 Indeed, those misrepresentations of material facts did in fact deceive reasonable
26 consumers, including the Wisconsin Plaintiff and Wisconsin State Class members,
27 about the true safety and reliability of Class Vehicles and/or the defective ACUs
28

1 and ASICs installed in them, the quality of the Class Vehicles, and the true value of
2 the Class Vehicles.

3 4544. The Wisconsin Plaintiff and Wisconsin State Class members
4 justifiably relied on ZF Electronics USA's, ZF Passive Safety USA's, and ZF
5 Automotive USA's misrepresentations as they had no way of discerning that the
6 Class Vehicles contained the ACU Defect, as alleged above. The Wisconsin
7 Plaintiff and Wisconsin State Class members did not, and could not, unravel ZF
8 Electronics USA's, ZF Passive Safety USA's, and ZF Automotive USA's deception
9 on their own.

10 4545. ZF Electronics USA's, ZF Passive Safety USA's, and ZF Automotive
11 USA's misrepresentations regarding the Occupant Restraint Systems in the Class
12 Vehicles were material to the decisions of the Wisconsin Plaintiff and Wisconsin
13 State Class members to purchase and lease Class Vehicles, as they intended. Had
14 they known the truth, the Wisconsin Plaintiff and Wisconsin State Class members
15 would not have purchased or leased the Class Vehicles, or would have paid
16 significantly less for them.

17 4546. The Wisconsin Plaintiff and Wisconsin State Class members suffered
18 ascertainable losses and actual damages as a direct and proximate result of ZF
19 Electronics USA's, ZF Passive Safety USA's, and ZF Automotive USA's
20 misrepresentations.

21 4547. ZF Electronics USA's, ZF Passive Safety USA's, and ZF Automotive
22 USA's violations present a continuing risk to the Wisconsin Plaintiff and
23 Wisconsin State Class members, as well as to the general public, because the Class
24 Vehicles remain unsafe due to the defective ACUs and ASICs therein. ZF
25 Electronics USA's, ZF Passive Safety USA's, and ZF Automotive USA's unlawful
26 acts and practices complained of herein affect the public interest.

27 4548. Pursuant to Wis. Stat. § 100.18(11)(b)(2), the Wisconsin Plaintiff and
28 Wisconsin State Class members seek an order enjoining ZF Electronics USA's, ZF

1 Passive Safety USA's, and ZF Automotive USA's unfair or deceptive acts or
2 practices and awarding damages and any other just and proper relief available under
3 the Wisconsin DTPA.

4 **d. Wisconsin Count 4: Fraud by Omission and Concealment**
5 **Against Mitsubishi Japan and Mitsubishi USA**

6 4549. Plaintiffs reallege and incorporate by reference all preceding
7 allegations as though fully set forth herein.

8 4550. The Wisconsin Plaintiff brings this count individually and on behalf of
9 members of the Wisconsin State Class who purchased or leased Mitsubishi Class
10 Vehicles, against Mitsubishi Japan and Mitsubishi USA.

11 4551. Mitsubishi Japan and Mitsubishi USA are liable for both fraudulent
12 concealment and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-
13 51 (1977).

14 4552. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
15 serious risks to vehicle occupants, including that it can cause: (1) airbags and
16 seatbelts not to activate during a crash because crashes can sometimes release
17 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
18 vehicle has not crashed, which is dangerous because it is shocking and difficult for
19 the driver to operate a vehicle when the airbag deploys without warning; and (3)
20 failures of other important post-crash operations of the safety system, such as
21 unlocking doors to facilitate escape or extraction of drivers and passengers by
22 emergency personnel, and shutting off a crashed vehicle's fuel or power supply.

23 4553. Mitsubishi Japan and Mitsubishi USA had a duty to disclose the ACU
24 Defect to the Wisconsin Plaintiff and Wisconsin State Class members because:

- 25 a. Mitsubishi Japan and Mitsubishi USA had exclusive access to
26 and far superior knowledge about technical facts regarding the
27 ACU Defect;

19
20
21
22
23
24
25
26
27
28

- b. Given the ACU Defect’s hidden and technical nature, the Wisconsin Plaintiff and Wisconsin State Class members lack the sophisticated expertise in vehicle components and electrical phenomena that would be necessary to discover the ACU Defect on their own;
- c. Mitsubishi Japan and Mitsubishi USA knew that the ACU Defect gave rise to serious safety concerns for the consumers who use the vehicles, and the Mitsubishi Class Vehicles containing the ACU Defect would have been a material fact to the Wisconsin Plaintiff’s and Wisconsin State Class members’ decisions to buy or lease Mitsubishi Class Vehicles; and
- d. Mitsubishi Japan and Mitsubishi USA made incomplete representations about the safety and reliability of the Mitsubishi Class Vehicles and their Occupant Restraint System, while purposefully withholding material facts about a known safety defect. In uniform advertising and materials provided with each Class Vehicle, Mitsubishi Japan, and Mitsubishi USA intentionally concealed, suppressed, and failed to disclose to the Wisconsin Plaintiff and Wisconsin State Class members that the Mitsubishi Class Vehicles contained the ACU Defect. Because they volunteered to provide information about the Mitsubishi Class Vehicles that they marketed and offered for sale and lease to the Wisconsin Plaintiff and Wisconsin State Class members, Mitsubishi Japan and Mitsubishi USA had the duty to disclose the whole truth.

4554. In breach of their duties, Mitsubishi Japan and Mitsubishi USA failed to disclose that the Mitsubishi Class Vehicles were not safe and reliable, and that

1 their Occupant Restraint Systems, including their airbags and seatbelt pretensioners
2 could fail in the event of a crash due to the ACU Defect.

3 4555. Mitsubishi Japan and Mitsubishi USA intended for the Wisconsin
4 Plaintiff and Wisconsin State Class members to rely on their omissions—which
5 they did by purchasing and leasing the Mitsubishi Class Vehicles at the prices they
6 paid believing that the Occupant Restraint Systems in their Class Vehicles would
7 function properly.

8 4556. That reliance was reasonable, because a reasonable consumer would
9 not have expected that the Mitsubishi Class Vehicles contained a safety defect that
10 poses such a serious risk. Mitsubishi Japan and Mitsubishi USA knew that
11 reasonable consumers expect that their vehicle has working airbags and seatbelt
12 pretensioners and would rely on those facts in deciding whether to purchase, lease,
13 or retain a new or used motor vehicle. Whether a manufacturer's products are safe
14 and reliable, and whether that manufacturer stands behind its products, are material
15 concerns to a consumer. Especially here when at least nine people have already
16 died due to the ACU Defect, and many more have been injured.

17 4557. Additionally, Mitsubishi Japan and Mitsubishi USA ensured that the
18 Wisconsin Plaintiff and Wisconsin State Class members did not discover this
19 information by actively concealing and misrepresenting the true nature of the
20 Mitsubishi Class Vehicles' Occupant Restraint Systems to consumers and NHTSA.

21 4558. Mitsubishi Japan and Mitsubishi USA actively concealed and
22 suppressed these material facts, in whole or in part, to maintain a market for their
23 Class Vehicles, to protect profits, and to avoid costly recalls that would expose
24 them to liability for those expenses and harm the commercial reputations of
25 Defendants and their products. They did so at the expense of the Wisconsin
26 Plaintiff and Wisconsin State Class members.

27 4559. To this day, Mitsubishi Japan and Mitsubishi USA have not fully and
28 adequately disclosed the ACU Defect, and they continue to conceal material

1 information about the defect from consumers and NHTSA. The omitted and
2 concealed facts were material because a reasonable person would find them
3 important in purchasing, leasing, or retaining a new or used motor vehicle, and
4 because they directly impact the value of the Mitsubishi Class Vehicles purchased
5 or leased by the Wisconsin Plaintiff and Wisconsin State Class members.

6 4560. Had they been aware of the ACU Defect in the Mitsubishi Class
7 Vehicles, and Mitsubishi Japan's and Mitsubishi USA's callous disregard for
8 safety, the Wisconsin Plaintiff and Wisconsin State Class members either would not
9 have paid as much as they did for their Class Vehicles, or they would not have
10 purchased or leased them.

11 4561. As alleged in Section V above, if Mitsubishi Japan and Mitsubishi
12 USA had fully and adequately disclosed the ACU Defect to consumers and
13 NHTSA, the Wisconsin Plaintiff and Wisconsin State Class members would have
14 seen such a disclosure.

15 4562. Accordingly, Mitsubishi Japan and Mitsubishi USA are liable to the
16 Wisconsin Plaintiff and Wisconsin State Class members for their damages in an
17 amount to be proven at trial, including, but not limited to, their lost overpayment
18 for the Mitsubishi Class Vehicles at the time of purchase or lease.

19 4563. Mitsubishi Japan's and Mitsubishi USA's acts were done maliciously,
20 oppressively, deliberately, with intent to defraud; in reckless disregard of the
21 Wisconsin Plaintiff's and Wisconsin State Class members' rights and well-being;
22 and to enrich themselves. Mitsubishi Japan's and Mitsubishi USA's misconduct
23 warrants an assessment of punitive damages, as permitted by law, in an amount
24 sufficient to deter such conduct in the future, which amount shall be determined
25 according to proof at trial.

1 e. **Wisconsin Count 5: Fraud by Omission and Concealment**
2 **Against ZF Electronics USA, ZF Passive Safety USA, ZF**
3 **Automotive USA, ZF TRW Corp., ZF Germany, ST Italy,**
4 **ST USA, and ST Malaysia**

4 4564. Plaintiffs reallege and incorporate by reference all preceding
5 allegations as though fully set forth herein.

6 4565. The Wisconsin Plaintiff brings this count individually and on behalf of
7 members of the Wisconsin State Class who purchased or leased Class Vehicles,
8 against ZF Electronics USA, ZF Passive Safety USA, ZF Automotive USA, ZF
9 TRW Corp., and ZF Germany (collectively, the “ZF Defendants”), and ST Italy, ST
10 Malaysia, and ST USA (collectively, the “ST Defendants”).

11 4566. The ZF and ST Defendants are liable for both fraudulent concealment
12 and non-disclosure. *See, e.g.*, Restatement (Second) of Torts §§ 550-51 (1977).

13 4567. As explained in Section IV.A, the ACU Defect in Class Vehicles poses
14 serious risks to vehicle occupants, including that it can cause: (1) airbags and
15 seatbelts not to activate during a crash because crashes can sometimes release
16 electrical transients, which cause the ACU to fail; (2) airbags to deploy when the
17 vehicle has not crashed, which is dangerous because it is shocking and difficult for
18 the driver to operate a vehicle when the airbag deploys without warning; and (3)
19 failures of other important post-crash operations of the safety system, such as
20 unlocking doors to facilitate escape or extraction of drivers and passengers by
21 emergency personnel, and shutting off a crashed vehicle’s fuel or power supply.

22 4568. The ZF and ST Defendants had a duty to disclose the ACU Defect to
23 the Wisconsin Plaintiff and Wisconsin State Class members because:

- 24 a. The ZF and ST Defendants had exclusive access to and far
25 superior knowledge about technical facts regarding the ACU
26 Defect;
- 27 b. Given the ACU Defect’s hidden and technical nature, the
28 Wisconsin Plaintiff and Wisconsin State Class members lack the

1 sophisticated expertise in vehicle components and electrical
2 phenomena that would be necessary to discover the ACU Defect
3 on their own;

4 c. The ZF and ST Defendants knew that the ACU Defect gave rise
5 to serious safety concerns for the consumers who use the
6 vehicles, and the Class Vehicles containing the ACU Defect
7 would have been a material fact to the Wisconsin Plaintiff's and
8 Wisconsin State Class members' decisions to buy or lease Class
9 Vehicles; and

10 d. The ZF Defendants made incomplete representations about the
11 safety and reliability of the Class Vehicles and their Occupant
12 Restraint System, while purposefully withholding material facts
13 about a known safety defect, creating a duty to disclose the
14 whole truth. Specifically, ZF Electronics USA, ZF Passive
15 Safety USA, and ZF Automotive USA worked with the Vehicle
16 Manufacturer Defendants on the design and inclusion of the
17 airbag readiness indicators in the Class Vehicles, which falsely
18 assured Plaintiffs and Class Members that the Occupant
19 Restraint Systems in the Class Vehicles would function properly
20 in a crash.

21 4569. In breach of their duties, the ZF and ST Defendants failed to disclose
22 that the Class Vehicles were not safe and reliable, and that their Occupant Restraint
23 Systems, including their airbags and seatbelt pretensioners could fail in the event of
24 a crash due to the ACU Defect.

25 4570. The ZF and ST Defendants intended for the Wisconsin Plaintiff and
26 Wisconsin State Class members to rely on their omissions—which they did by
27 purchasing and leasing the Class Vehicles at the prices they paid believing that the
28 Occupant Restraint Systems in their Class Vehicles would function properly.

1 4571. That reliance was reasonable, because a reasonable consumer would
2 not have expected that the Class Vehicles contained a safety defect that poses such
3 a serious risk. The ZF and ST Defendants knew that reasonable consumers expect
4 that their vehicle has working airbags and seatbelt pretensioners and would rely on
5 those facts in deciding whether to purchase, lease, or retain a new or used motor
6 vehicle. Whether a manufacturer's products are safe and reliable, and whether that
7 manufacturer stands behind its products, are material concerns to a consumer.
8 Especially here when at least nine people have already died due to the ACU Defect,
9 and many more have been injured.

10 4572. Additionally, the ZF and ST Defendants ensured that the Wisconsin
11 Plaintiff and Wisconsin State Class members did not discover this information by
12 actively concealing and misrepresenting the true nature of the Class Vehicles'
13 Occupant Restraint Systems to consumers and NHTSA.

14 4573. The ZF and ST Defendants actively concealed and suppressed these
15 material facts, in whole or in part, to maintain a market for the DS84 ACU, to
16 protect profits, and to avoid costly recalls that would expose them to liability for
17 those expenses and harm the commercial reputations of Defendants and their
18 products. They did so at the expense of the Wisconsin Plaintiff and Wisconsin State
19 Class members.

20 4574. To this day, the ZF and ST Defendants have not fully and adequately
21 disclosed the ACU Defect, and they continue to conceal material information about
22 the defect from consumers and NHTSA. The omitted and concealed facts were
23 material because a reasonable person would find them important in purchasing,
24 leasing, or retaining a new or used motor vehicle, and because they directly impact
25 the value of the Class Vehicles purchased or leased by the Wisconsin Plaintiff and
26 Wisconsin State Class members.

27 4575. Had they been aware of the ACU Defect in the Class Vehicles, and the
28 ZF and ST Defendants' callous disregard for safety, the Wisconsin Plaintiff and

1 Wisconsin State Class members either would not have paid as much as they did for
2 their Class Vehicles, or they would not have purchased or leased them.

3 4576. As alleged in Section V above, if the ZF and ST Defendants had fully
4 and adequately disclosed the ACU Defect to consumers and NHTSA, the
5 Wisconsin Plaintiff and Wisconsin State Class members would have seen such a
6 disclosure.

7 4577. Accordingly, the ZF and ST Defendants are liable to the Wisconsin
8 Plaintiff and Wisconsin State Class members for their damages in an amount to be
9 proven at trial, including, but not limited to, their lost overpayment for the Class
10 Vehicles at the time of purchase or lease.

11 4578. The ZF and ST Defendants' acts were done maliciously, oppressively,
12 deliberately, with intent to defraud; in reckless disregard of the Wisconsin
13 Plaintiff's and Wisconsin State Class members' rights and well-being; and to enrich
14 themselves. The ZF and ST Defendants' misconduct warrants an assessment of
15 punitive damages, as permitted by law, in an amount sufficient to deter such
16 conduct in the future, which amount shall be determined according to proof at trial.

17 **VIII. PRAYER FOR RELIEF**

18 4579. Plaintiffs, on behalf of themselves and all others similarly situated,
19 respectfully request the Court to grant certification of the proposed Classes and
20 enter judgment against the Defendants, as follows:

- 21 a. An order certifying the proposed Classes, designating Plaintiffs
22 as the named representatives of the Class, designating the
23 undersigned as Class Counsel, and making such further orders
24 for the protection of Class members as the Court deems
25 appropriate, under Fed. R. Civ. P. 23;
- 26 b. An order enjoining the Vehicle Manufacturer Defendants to
27 desist from further deceptive distribution, sales, and lease

- practices with respect to the Class Vehicles and such other injunctive relief that the Court deems just and proper;
- c. An award to Plaintiffs and Class Members of compensatory, exemplary, treble, and punitive remedies and damages and statutory penalties, including interest, in an amount to be proven at trial;
 - d. An award to Plaintiffs and Class Members for the return of the purchase prices of the Class Vehicles, with interest from the time it was paid, for the reimbursement of the reasonable expenses occasioned by the sale, for damages, and for reasonable attorney fees;
 - e. A Defendant-funded program, using transparent, consistent, and reasonable protocols, under which out-of-pocket and loss-of-use expenses and damages claims associated with the Defective ACUs in Plaintiffs' and Class Members' Class Vehicles, can be made and paid, such that the Defendants, not the Class Members, absorb the losses and expenses fairly traceable to the recalls of the vehicles and correction of the defective DS84 ACUs;
 - f. A declaration that the Defendants must disgorge, for the benefit of Plaintiffs and Class Members, all or part of the ill-gotten profits they received from the sale or lease of the Class Vehicles or make full restitution to Plaintiffs and Class Members;
 - g. An award of attorneys' fees and costs, as allowed by law;
 - h. An award of any and all applicable statutory and civil penalties;
 - i. An award of prejudgment and post judgment interest, as provided by law;

- j. Leave to amend this Complaint to conform to the evidence produced in discovery and at trial; and
- k. Such other relief as may be appropriate, just, and equitable under the circumstances.

IX. DEMAND FOR JURY TRIAL

4580. Pursuant to Rule 38(b) of the Federal Rules of Civil Procedure, Plaintiffs demand a jury trial as to all issues triable by a jury.

1 Dated: May 26, 2022

2 Respectfully submitted,

APPENDIX – GLOSSARY

TECHNICAL TERMS AND ABBREVIATIONS GLOSSARY

ABBREVIATION/TERM	DEFINITION
573 Report or Part 573 Report	Formal quarterly report filed publicly with NHTSA regarding an automotive safety defect and notification campaign.
ACU	Airbag Control Unit. Vehicle component part responsible for ensuring the airbags and seatbelts activate in crashes where necessary. Also known as "Occupant Restraint Controller" or "ORC."
ASIC	Application-Specific Integrated Circuit. Component part of an ACU responsible for ensuring the airbags and seatbelts activate in crashes where necessary.
Chassis	Physical frame of a motor vehicle.
Commanded nondeployment	Means a crash where the airbags did not deploy because they were not supposed to deploy given the crash severity, and the ACU properly told them not to deploy. When a crash is not severe enough to trigger the airbags, the nondeployment of the airbags is "commanded" by the ACU's normal operations, and the crash data will show records of the ACU "commanding" nondeployment.
Decapsulation analysis	Proprietary analysis by ST USA that involves using lasers and chemicals to remove or penetrate the black packaging (also called a "capsule") on the ASIC to expose the electronic circuitry for analysis. Also known as a "decap" analysis.
DS84 ACU	Specific ACU included in the Class Vehicles, includes a DS84 ASIC.
DS84 ASIC	Custom ASIC used in the Class Vehicles, jointly designed by ST USA, ST Italy, ZF Electronics USA, and ZF Passive Safety USA.
ECU	Electronic Control Unit, another term for ACU, which is a type of ECU.
EDR	Event Data Recorder, part of the ACU that stores a crash record, the automotive equivalent of a "black box" in airplanes. A complete EDR crash record will show whether the ACU commanded the safety system to activate during a crash, as well as the information sent to the ACU about the crash.
EEPROM	Electrically Erasable Programmable Read-Only Memory chip, the location of the "black box" EDR on DS84 ACUs.
EOS	Electrical Overstress, a malfunction of the ACU and ASIC due to an electrical burst.

TECHNICAL TERMS AND ABBREVIATIONS GLOSSARY

ABBREVIATION/TERM	DEFINITION
Inadvertent deployment	Irregular airbag deployment during normal driving conditions, when the vehicle has not crashed.
MS84	Another ASIC designed by ST USA and ST Italy for and with the ZF Defendants. While similar to the DS84, the MS84 uses a different technology for crash sensor communication than the DS84. ZF Automotive USA, ZF Electronics USA, and ZF Passive Safety USA have suggested that this difference may explain the relative weakness of ACUs with the DS84 ASIC.
NHTSA	National Highway Traffic Safety Administration
ORC	Occupant Restraint Controller. Another term for Airbag Control Unit ("ACU").
ORS	Occupant Restraint System. The system of safety features in motor vehicles, including airtbags and seatbelt pretensioners, also know as the passive safety system or the safety restraint system.
Overcurrent	An electrical current that exceeds the normal electrical load in a circuit.
Readiness indicator	Dashboard lamp meant to provide vehicle drivers and occupants with notice of the airbag system's current operating condition. Supposed to "monitor [the occupant protection system's] own readiness" and to illuminate if there is a malfunction or issue with the airbag system. Also known as an "airbag warning lamp."
Schottky Diode	A protective component often added to the DS84 ACU, offers some additional protection from EOS but is external to the ASIC itself.
Squib	The piece of equipment that deploys the airbags in a vehicle.
Transients	Short duration, high magnitude electrical voltage peaks, commonly referred to as surges or bursts, also referred to as "transient electricity," "electrical transients," "transient voltage," and "transient overvoltage."
VSAT	Communication line connected to transmit signals to and from the ACU.
VSDIAG	Communication line connected to transmit signals to and from the ACU.

DEFENDANT NAMES

Defendant Abbreviation	Complete Name
FCA	FCA US LLC
Honda Engineering USA	Honda Development and Manufacturing of America, LLC, the successor of several of Honda Japan’s prior engineering and manufacturing domestic subsidiaries, including American Honda Mfg., Inc. and Honda R&D Americas, LLC.
Honda Japan	Honda Motor Co., Ltd.
Honda USA	American Honda Motor Co., Inc.
Hyundai Korea	Hyundai Motor Co., Ltd.
Hyundai Mobis	Hyundai Mobis Co., Ltd.
Hyundai USA	Hyundai Motor America, Inc.
Kia Korea	Kia Corp.
Kia USA	Kia America, Inc.
Mitsubishi Japan	Mitsubishi Motors Corp.
Mitsubishi USA	Mitsubishi Motors North America, Inc.
ST Italy	STMicroelectronics, S.r.l.
ST Malaysia	STMicroelectronics SDN BHD
ST USA	STMicroelectronics, Inc.
Supplier Defendants	Companies that make and sell the DS84 ACU and/or component parts for the Class Vehicles. The Supplier Defendants are: ZF Electronics USA; ZF Passive Safety USA; ZF Automotive USA; ZF TRW Corp.; ZF Germany, ST USA; ST Italy; ST Malaysia; and Hyundai Mobis.
Toyota Engineering USA	Toyota Motor Engineering & Manufacturing North America, Inc.
Toyota Japan	Toyota Motor Corp.
Toyota Sales USA	Toyota Motor Sales US, Inc.
Toyota USA	Toyota Motor North America, Inc.

DEFENDANT NAMES

Defendant Abbreviation	Complete Name
Vehicle Manufacturer Defendants	Companies and their affiliates that make and sell completed vehicles, including the Class Vehicles. completed vehicles and their affiliates. The Vehicle Manufacturer Defendants are Hyundai Motor Co., Ltd.; Hyundai Motor America, Inc.; Kia Corp.; Kia America, Inc.; FCA US LLC; Toyota Motor North America Inc., Toyota Motor Engineering & Manufacturing North America, Inc.; Toyota Motor Sales, U.S.A., Inc.; Honda Motor Co., Ltd.; American Honda Motor Co., Inc.; Honda Development and Manufacturing of America, LLC; Mitsubishi Motors Corporation; and Mitsubishi Motors North America, Inc.
ZF Automotive USA	ZF Automotive US Inc.
ZF Electronics USA	ZF Active Safety and Electronics US LLC
ZF Germany	ZF Friedrichshafen AG
ZF Passive Safety USA	ZF Passive Safety Systems US Inc.
ZF TRW Corp.	ZF TRW Automotive Holdings Corp.

EXHIBIT 1

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
10358293	DODGE	RAM 1500	2010	09/07/10	09/29/10	TL* THE CONTACT OWNS A 2010 DODGE RAM 1500. THE CONTACT WAS RUN OFF THE ROAD WHILE DRIVING 65 MPH INTO A DITCH. THE FRONTAL AIR BAGS DID NOT DEPLOY AND THE SEAT BELT DID NOT LOCK. THE CONTACT HIT AND BROKE THE STEERING WHEEL AND STEERING COLUMN BECAUSE OF THE SEAT BELT FAILURE; HE WAS INJURED. THE VEHICLE WAS TOWED TO A REPAIR SHOP. THE MECHANIC (AND POLICE OFFICER ON THE SCENE) STATED THAT THE AIR BAGS SHOULD HAVE DEPLOYED. THE CURRENT AND FAILURE MILEAGES WERE APPROXIMATELY 3,600.
10404435	DODGE	RAM 1500	2009	05/06/11	06/04/11	AIRBAGS DID NOT DEPLOY. SEATBELTS DID NOT RETRACT/WORK. WAS INVOLVED IN A FRONTAL DRIVER SIDE COLLISION IN WHICH MY 2009 DODGE RAM 1500 WAS TOTALED. I RECEIVED HEAD TRAUMA INJURY PER AIRBAG AND SEATBELT NOT WORKING. CHRYSLER/DODGE DENYING ANY RESPONSIBILITY W/ THEIR DEFECTIVE PRODUCT. *TR
10406392	DODGE	RAM 1500	2009	05/06/11	06/08/11	1 PERSON INJURED(DRIVER) IN DODGE RAM. HOWEVER 2 OTHER VEHICLES INVOLVED AND NOT SURE ABOUT THEIR INJURIES. I ACCIDENTLY REAR ENDED VEHICLE AHEAD OF ME WHICH CAUSED THAT VEHICLE TO REAR-END VEHICLE AHEAD OF IT. MY VEHICLE(DODGE RAM) WAS TOTALED. FRONTAL IMPACT OF DODGE WAS VERY SEVERE AND CAUSED ME(DRIVER) HEAD AND CERVICAL TRAUMA, RESULTING IN EMERGENCY ROOM VISIT AND REHAB THERAPIES. ALL AIRBAGS IN DODGE RAM FAILED TO DEPLOY AND DRIVER SEATBELT FAILED TO RETRACT/RESPOND RESULTING IN MY HEAD/NECK/SPINAL INJURY. I HAVE WRITTEN DODGE-CHRYSLER, THEY SAY THEY SENT SOMEONE TO INSPECT TRUCK AND SAY THEY ARE NOT RESPONSIBLE FOR THE AIRBAG AND SEATBELT NOT WORKING. DODGE/CHRYSLER ALSO WRITE THE AIRBAG/SEATBELT WAS NOT SUPPOSE TO WORK DUE TO THE SPEED LIMIT (40MPH) DRIVEN AND DUE TO MORE OF A SIDE IMPACT THAN FRONTAL. HOWEVER, THE IMPACT WAS BOTH FRONTAL AND FRONT SIDE. (I HAVE PICTURES)
10431129	DODGE	RAM 1500	2009	05/06/11	06/01/11	AIR BAG DID NOT DEPLOY/SEAT BELT DID NOT LOCK. I WAS THE ONLY PERSON IN MY VEHICLE. I ACCIDENTALLY REAR ENDED A CAR WHO HAD ABRUPTLY STOPPED IN TRAFFIC IN FRONT OF ME. SEVERE HEAVY DAMAGE WAS DONE TO THE FRONT DRIVER SIDE AND PASSENGER SIDE OF MY VEHICLE. MY DODGE WAS DECLARED A TOTAL LOSS. I SUFFERED SEVERE PAIN/INJURY TO MY HEAD AND NECK. ALL PERSONS INVOLVED IN MY AND THE OTHER VEHICLE HAD TO SEEK MEDICAL ATTENTION. MY 2009 DODGE RAM WAS PURCHASED NEW OFF THE DODGE LOT IN 2009...UPDATED 10/20/11 *BF
10435172	DODGE	RAM 1500	2011	11/09/11	11/10/11	TL* THE CONTACT OWNS A 2011 DODGE RAM 1500. THE CONTACT WAS DRIVING 60 MPH AND CRASHED INTO THE REAR OF ANOTHER VEHICLE. THE AIR BAGS DID NOT DEPLOY. THE CONTACT SUSTAINED INJURIES TO THE CHEST AND HEAD. THE PASSENGER SUSTAINED INJURIES TO THE RIB CAGE AND SHOULDER. THE CONTACT AND PASSENGER WERE TRANSPORTED TO THE HOSPITAL FOR TREATMENT AND THE CONTACT LATER CALLED THE MANUFACTURER AND FILED A COMPLAINT. THE VEHICLE WAS NOT INSPECTED FOR THE FAILURE. THE FAILURE MILEAGE WAS 13,000.

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
10473292	DODGE	RAM 1500	2012	06/23/12	09/02/12	TRAVELING APPROX 45MPH. ANOTHER DRIVER FAILED TO YIELD AND HIT MY VEHICLE ON THE PASSENGER SIDE FRONT HEAD LIGHT. THE OTHER DRIVER WAS TRYING TO CROSS THE HIGHWAY GOING APPROX 15-25MPH. THE IMPACT WAS ALMOST A COMPLETE HEAD-ON COLLISION. THE AIRBAGS IN MY VEHICLE DID NOT DEPLOY. MY PASSENGER AND I WERE BOTH TRANSPORTED BY AMBULANCE AND LATER RELEASED BY THE HOSPITAL. *TR
10485943	DODGE	RAM 1500	2009	11/20/12	11/25/12	AIRBAGS FAILED TO GO OFF AFTER COLLISION WITH A FARM IMPLEMENT BEING PULLED BY A FARM TRACTOR. DODGE VEHICLE HAS DAMAGE TO FRAME, PASSENGER SIDE AND FRONT OF VEHICLE. *TR
10508974	FIAT	500	2012	03/22/13	04/21/13	A VEHICLE IN THE RIGHT LANE MADE A U-TURN, CROSSING THE LEFT LANE CAUSING THE FIAT TO T-BONE THE VEHICLE MAKING THE U-TURN. THE SEAT BELT DID NOT RESTRAIN THE FIAT DRIVER AND THE DRIVER CONTACTED THE STEERING WHEEL WITH ENOUGH FORCE TO CAUSE A SIGNIFICANT COMPRESSION INJURY TO THE STERNUM. THE DRIVER WAS TRANSPORTED BY EMS TO A HOSPITAL. THE VEHICLE COULD NOT BE DRIVEN AND SUFFERED NEARLY \$13,000 DAMAGE. EARLIER IN THE DRIVE, THE FIAT 500 DRIVER HAD TO ROCK FORWARD AT AN ON-RAMP TO RELEASE THE SEAT BELT IN ORDER TO VIEW APPROACHING TRAFFIC VIA THE LEFT OUTSIDE MIRROR. APPARENTLY, THE SEAT BELT DOES NOT OR DID NOT REENGAGE AFTER THIS MOVEMENT LEAVING IT FREE AND THE DRIVER UNRESTRAINED. AIR BAGS DID NOT DEPLOY. *TR
10511307	FIAT	500	2012	04/24/13	05/09/13	TL* THE CONTACT OWNS A 2012 FIAT 500C. THE CONTACT WAS DRIVING 40 MPH AND CRASHED INTO ANOTHER VEHICLE. THE AIR BAGS FAILED TO DEPLOY. THE VEHICLE WAS DESTROYED. THERE WAS DAMAGE TO THE FRONT FENDER AND THE FRONT DRIVER'S SIDE DOOR. THE CONTACT SUSTAINED A MILD CONCUSSION. A POLICE REPORT WAS NOT FILED OF THE INCIDENT. THE VEHICLE WAS NOT INSPECTED TO DETERMINE THE CAUSE OF THE FAILURE. THE MANUFACTURER WAS MADE AWARE OF THE FAILURE, BUT DID NOT OFFER ANY ASSISTANCE. THE FAILURE AND CURRENT MILEAGE WAS 20,000.
10512363	JEEP	COMPASS	2013	05/03/13	05/16/13	TL* THE CONTACT OWNS A 2013 JEEP COMPASS. THE CONTACT STATED THAT WHILE TRAVELING 35 MPH, SHE CRASHED INTO SEVERAL TREES BEFORE ROLLING OVER. UPON IMPACT, THE AIR BAGS FAILED TO DEPLOY. THE CONTACT WAS UNABLE TO RECALL THE EXACT DETAILS OF THE CRASH. THE FRONT, DRIVER SIDE, PASSENGER SIDE, AND TOP OF THE VEHICLE WERE STRUCK. THE CONTACT SUSTAINED A CONCUSSION. THE VEHICLE WAS TOWED AND WAS NOT DIAGNOSED. THE APPROXIMATE FAILURE MILEAGE WAS 1,000. *TR

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
10544054	JEEP	WRANGLER	2013	07/19/13	09/17/13	ON JULY 19TH 2013 I WAS WAITING FOR THE LIGHT BIG GARBAGE CONTAINER TRUCK HIT MY BACK AND THE FORCE I HIT INFRONT OF MY VEHICLE INJURING A PASSENGER . THIS WAS A MULTI VEHICLE ACCIDENT ,I WAS IN THE MIDDLE HIT FROM MY BACK AND MY FRONT HIT INFRONT OF MY VEHICLE. DURING THIS IMPACT MY VEHICLE'S AIRBAG DID NOT DEPLOY IT. I COMPLAINED TO CHRYSLER ,THEY ISSUE A CASE#[XXX] AND INVESTIGATE THE ACCIDENT. ACCORDING TO CHRYSLER THEY SEND TO TECHNICIAN TO TAKE A SENSOR DATA FROM MY VEHICLE AND SEND TO DETROIT FOR FURTHER ANALYSIS. COUPLE OF WEEKS AGO I RECEIVED LETTER FROM CHRYSLER GROUP LLC. THE LETTER CONTENTS ARE THE PURPOSE OF THE AIRBAG IS TO DEPLOY IN THOSE IMPACTS WHERE THE ACCIDENT SEVERITY IS GREAT ENOUGH AND THE FRONT-END CRUSH CANNOT MANAGE ALL OF THE ENERGY OF THE IMPACT AND LOWER THE LONGITUDINAL (FRONT TO BACK) DECELERATION IN THE OCCUPANT COMPARTMENT TO THE DESIRED LEVELS. MY CASE I HAVE FRONT AND BACK IMPACT,MY VEHICLE ALONE \$17000.00+ DAMAGE. CHRYSLER REFUSED TO RELEASE THE REPORT TO ME UNLESS I HAVE A LEGAL REPRESENTATIVE. HOW CAN I FIND THAT AIRBAG WASN'T MALFUNCTIONING AND WHAT G-FORCE THAT TRUCK HIT ME. IF YOU NEED ANY INFORMATION REGARDING THESE ACCIDENT I WILL ASSIST YOU WITH BEST OF MY KNOWLEDGE. *TR
10556705	DODGE	NITRO	2010	12/02/13	12/23/13	2010 DODGE NITRO. CONSUMER WRITES IN REGARDS TO NO AIR BAG DEPLOYMENT AFTER SEVERAL VEHICLE ACCIDENTS. *SMD THE CONSUMER STATED THE ACCIDENTS WERE CAUSED BY HIM LOOSING CONTROL OF THE VEHICLE, DURING INCLEMENT WEATHER. THE VEHICLE WAS SEVERELY DAMAGED.

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
10560907	JEEP	LIBERTY	2012	09/03/13	01/21/14	<p>WHILE I WAS DRIVING ON I-70 E, I NOTICED THAT THE VEHICLE APPROACHING ME FROM BEHIND, WAS TRAVELING AT A HIGH RATE OF SPEED SO I SWERVED TO THE RIGHT SHOULDER AND THE OTHER VEHICLE SWERVED TO THE LEFT LANE AND THEN BACK ACROSS THE RIGHT LANE OVER TO THE SHOULDER AND STRUCK MY 2012 JEEP LIBERTY ON THE DRIVERS SIDE FROM THE FRONT TO THE REAR PROBABLY AT A SPEED BETWEEN 60 - 75. WITH THAT IMPACT I RECEIVED WHIPLASH & INJURY TO MY LEFT ARM, LEFT HAND, NECK & SHOULDER. I DID NOT RECEIVED A RECALL NOTICE N38 UNTIL LATE DECEMBER 2013 AND THE ACCIDENT OCCURRED ON SEPTEMBER 3, 2013, SO I CALLED CHRYSLER AND TOLD THEM ABOUT THE ACCIDENT AND ASKED IF THIS RECALL COULD EFFECT THE AIR BAG FROM NOT DEPLOYING, THE LADY DIDN'T KNOW AND SAID SHE WOULD FILE A REPORT. I RECEIVED A LETTER STATING, "WHILE THE PURPOSE OF THE AIR BAG IS TO DEPLOY WHEN THE MAJOR DIRECTION OF THE IMPACT IS FROM THE FRONT OF THE VEHICLE TOWARDS THE BACK OF THE VEHICLE" & "THE VEHICLE DAMAGE MAY LEAD YOU TO BELIEVE THAT THE AIR BAG SHOULD HAVE DEPLOYED, HOW EVER, THIS CAN BE DECEIVING." IT ALSO STATED THAT LARGE AMOUNTS OF FENDER OR SHEET METAL DAMAGE INDICATE THAT THE CRUMPLE ZONE IN THE FRONT OF THE VEHICLE DID THEIR JOB AND AS A RESULT THE AIR BAGS WERE NOT NEEDED. SO I PLACED TWO DIFFERENT CALLS TO CHRYSLER DEALERS AND ALSO WENT IN PERSON TO ONE AND ASK THEM "IF I DIDN'T GET THIS RECALL FIXED, (WHICH THE RECALL NOTICE HAD NOT BEEN SENT OUT WHEN THE ACCIDENT HAPPENED) IF IT COULD CAUSE THE AIR BAG NOT TO DEPLOY," AND ALL THREE OF THE MEN TOLD ME YES IT COULD CAUSE THE AIR BAGS NOT TO DEPLOY OR SOMETHING EVEN WORST, WHICH THE ONE MAN STATED "IT COULD EVEN KILL YOU." I BELIEVE AS HARD AS I WAS HIT, AND WITH THE INJURIES I RECEIVED, THAT THE AIR BAGS SHOULD OF DEPLOYED AND MAYBE I WOULDN'T HAVE BEEN INJURED AS MUCH. IT HAS BEEN OVER 4 MONTHS SINCE THE ACCIDENT AND MY INJURIES ARE STILL PRESENT.</p> <p>SINCERELY *TR</p>

10575416	JEEP	WRANGLER	2013	03/14/14	03/28/14	<p>ON FRIDAY MARCH 14, 2014 I WAS DRIVING WITH MY 1 YEAR OLD DAUGHTER ON HARMONY CHURCH ROAD (ROUTE 704) ON MY WAY TO MY SON'S ELEMENTARY SCHOOL. MY DAUGHTER WAS IN A CAR SEAT IN THE BACK SEAT, DIRECTLY BEHIND THE PASSENGER SEAT. WHILE EN ROUTE, MY 2013 JEEP WRANGLER UNLIMITED HIT DRIFTED TO THE SHOULDER OF THE ROAD AND THE PASSENGER SIDE FRONT TIRE WAS PULLED INTO SOFT MUD. I LOST CONTROL OF THE VEHICLE. MY VEHICLE WAS PULLED TO THE RIGHT SHOULDER OF THE ROAD AND I WENT OFF THE ROAD. THE VEHICLE STRUCK A TREE AND VARIOUS BUSHES. THE LOUDOUN COUNTY SHERIFF'S DEPARTMENT AND LOUDOUN COUNTY FIRE AND RESCUE RESPONDED TO THE SCENE. MY HUSBAND AND I RECENTLY PUT LARGER TIRES AND RIMS ON THE JEEP AND A 3" LIFT KIT. MY HUSBAND COMMENTED THAT WITH THE LARGER TIRES AND THE RAISED HEIGHT, THE JEEP WAS MORE DIFFICULT TO CONTROL ON THE ROAD AND I HAD NOTICED THE VEHICLE VISIBLY "WANDER" ON THE ROAD WHEN I HAD FOLLOWED MY HUSBAND WHILE HE WAS DRIVING THE JEEP. THE SHERIFF'S DEPARTMENT CALLED MY HUSBAND AT HOME AND HE RESPONDED TO THE ACCIDENT SCENE AND TOOK OUR DAUGHTER. I SUSTAINED INJURES IN THE COLLISION, BUT MY DAUGHTER WAS UNHARMED. THE JEEP'S AIRBAGS FAILED TO DEPLOY AND I SUSTAINED A FRACTURED NOSE, FACIAL LACERATIONS, FACIAL CONTUSIONS AND A CONTUSION TO MY STERNUM. I WAS TAKEN BY AMBULANCE TO LEESBURG HOSPITAL AT 224 CORNWALL STREET. *TR</p>
10614617	DODGE	RAM 1500	2009	07/02/14	07/18/14	<p>TL* THE CONTACT OWNS A 2009 DODGE RAM 1500. THE CONTACT STATED THAT WHILE DRIVING APPROXIMATELY 45 MPH, THE BRAKES FAILED. THE BRAKE PEDAL WAS APPLIED AND TRAVELED TO THE FLOORBOARD CAUSING THE CONTACT TO CRASH INTO THE REAR OF ANOTHER VEHICLE. THE AIR BAGS FAILED TO DEPLOY. A POLICE REPORT WAS FILED OF THE INCIDENT. THE FRONT PASSENGER NEEDED STITCHES TO THE FOREHEAD WHICH REQUIRED MEDICAL ATTENTION. THE VEHICLE WAS TOWED TO AN INDEPENDENT MECHANIC BUT WAS NOT DIAGNOSED. THE MANUFACTURER WAS NOT NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 11,506. UPDATED 9/18/14*CN THE CONSUMER STATED SHE HIT HER HEAD ON THE WINDSHIELD CAUSING IT TO CRACK. THE FAILURE CAUSED A FOUR CAR PILE UP. THE CONSUMER RECEIVED A CONCUSSION AND SPLEEN DAMAGE. THE CONSUMER HAD HOME PHYSICAL THERAPY. UPDATED 2/11/2015 *JS</p>
10633640	FIAT	500	2012	09/27/13	09/16/14	<p>TL* THE CONTACT OWNS A 2012 FIAT 500. ANOTHER VEHICLE CRASHED INTO THE FRONT END OF THE CONTACT'S. THE AIR BAGS FAILED TO DEPLOY. A POLICE REPORT WAS FILED. THE CONTACT'S PROSTHETIC ARM HAD TO BE REPLACED AND A ROTATOR CUFF WAS TORN, WHICH REQUIRED MEDICAL ATTENTION. THE VEHICLE WAS REPAIRED, BUT THE DETAILS OF THE REPAIRS WERE UNKNOWN. THE MANUFACTURER WAS MADE AWARE OF THE FAILURE. THE SPEED WAS UNKNOWN. THE FAILURE MILEAGE WAS 5,000.</p>

10639201	JEEP	PATRIOT	2014	09/25/14	09/26/14	WE WERE DRIVING NORTH AND CAME UPON AN INTERSECTION WHERE WE PUT OUR TURN SIGNAL ON, AND SLOWED DOWN AND STOPPED, ABOUT TO TURN WEST. THE LIGHT TURNED RED, AND WE SLOWLY DROVE WEST ONTO THE CROSSING STREET. ANOTHER VEHICLE THAT WAS DRIVING SOUTH PROCEEDED THROUGH THE RED LIGHT, AT ABOUT 45 MPH, AND HIT THE 2014 JEEP PATRIOT BROADSIDE, PASSENGER SIDE. THE JEEP WAS PUSHED AND SPUN 90 DEGREES FROM THE IMPACT OF THE COLLISION, WE WERE TOSSED AROUND VIOLENTLY IN OUR SEATS, WITH THE PASSENGER OBTAINING CONTUSIONS AND ABRASIONS TO HER ARM CLOSEST TO THE IMPACT SITE. SHE HAD ALSO BANGED HER HEAD AGAINST THE WINDOW AND STRAINED HER NECK FROM THE IMPACT, ON THE PASSENGERS SIDE OF THE JEEP. AND FINALLY, HAD STRAINED THE MUSCLES IN HER LOWER BACK FROM GETTING THRUST AT THE DIRECTION OF THE IMPACT SITE. THE DRIVER HAD SUFFERED AN IMPACT ABRASION TO HIS LEFT ARM, LEAVING AN IMPRINT OF THE SEAT BELT MATERIAL INTO HIS SKIN. HE HAD ALSO SUFFERED MUSCLE STRAINS AND LOWER BACK STRAINS FROM THE FORCE OF THE IMPACT. AGAIN, WHILE BEING HIT FROM A VEHICLE GOING 45 MPH, AND LEAVING DAMAGE THAT HAD LITERALLY STARTED TO FOLD THE VEHICLE AT THE MIDPOINT, AND COLLAPSED THE WHEEL AND AXLE, NOT A SINGLE AIRBAG HAD DEPLOYED IN THIS VEHICLE. IF THE VEHICLE THAT HAD COLLIDED WITH THIS JEEP HAD BEEN DRIVING NEAR 65 MPH, DEATH WOULD HAVE BEEN ALMOST CERTAIN...UPDATED 10/06/14 *BF UPDATED 3/25/2015 *JS
10639697	DODGE	CALIBER	2012	09/25/14	09/29/14	I WAS INVOLVED IN A CAR ACCIDENT ON THURSDAY WHERE I HIT A GUARD RAIL PRETTY HARD AND DEAD ON. AT THE TIME I WAS GOING 35 MPH IN THE POURING RAIN. MY AIRBAGS NEVER DEPLOYED. THIS IS VERY BOTHERSOME AS I HAVE HAD ISSUES WITH THIS CAR BEFORE NOT STARTING ALL THE TIME WHEN I FIRST PURCHASED THE CAR. I HAD BUMPER DAMAGE, THE RIGHT HEAD LIGHT WAS DAMAGED AND MY NECK WAS SLICED BY THE SEATBELT! *TR
10653811	JEEP	LIBERTY	2011	11/08/14	11/10/14	TRAVELING SOUTH ON THE NEW YORK STATE THRUWAY BETWEEN EXITS 17 AND 16 A DEER OUT OF NOWHERE COLLIDES WITH THE JEEP CAUSING SEVERE FRONT END DAMAGE . THE AIRBAGS DID NOT DEPLOY . *TR
10659334	JEEP	PATRIOT	2011	10/20/14	11/19/14	TL* THE CONTACT OWNED A 2011 JEEP PATRIOT. WHILE DRIVING APPROXIMATELY 55 MPH, THE CONTACT EXPERIENCED A HEART ATTACK AND CRASHED INTO A HOUSE. THE AIR BAGS FAILED TO DEPLOY. THE CONTACT SUSTAINED FRACTURED RIBS AND AN INJURED SPINE AND NOSE. MEDICAL ATTENTION WAS REQUIRED. A POLICE REPORT WAS FILED. THE VEHICLE WAS DESTROYED. THE MANUFACTURER WAS NOT NOTIFIED. THE CONTACT DID NOT RECEIVE A RECALL NOTIFICATION. THE VIN PROVIDED WAS INVALID. THE FAILURE MILEAGE WAS UNKNOWN.
10667017	DODGE	AVENGER	2014	11/25/14	12/17/14	I WAS HIT BY ANOTHER CAR THAT RAN A STOP SIGN AND NONE OF MY AIRBAGS DEPLOYED. THE ACCIDENT RESULTED IN A TOTAL LOSS DUE TO THE HARD HIT. AS A RESULT I DO NOT FEEL SAFE AT ALL KNOWING THAT I COULD BE HIT SO HARD THAT MY 2014 DODGE AVENGER WAS TOTALED BUT NO AIR BAGS DEPLOYED TO DO THE JOB THEY WERE SUPPOSE TO DO.

10979167	JEEP	WRANGLER	2016	01/30/17	04/18/17	<p>ON JANUARY 30, 2017 ANOTHER VEHICLE PULLED OUT IN FRONT OF ME AND STOPPED. I HIT THAT VEHICLE WITH MY 2016 JEEP WRANGLER AT ABOUT 30-35MPH. THE IMPACT TOTALED BOTH VEHICLES. MY JEEP'S FRAME WAS BUCKLED AND TWISTED ALL OF THE WAY TO THE REAR BUMPER. THE REAR BODY MOUNT BOLT WERE EVEN BENT. THE AIRBAGS DIDN'T DEPLOY AND THE SEAT BELTS DIDN'T PRETENSION. I HIT THE DASH WITH BOTH KNEES AND GOT ABDOMINAL MUSCLE INJURIES AS WELL AS SEVERE WHIPLASH. I AM STILL UNDER A DOCTOR'S CARE FOR MY INJURIES INCLUDING A PINCHED NERVE BETWEEN C5-C6. FCA OPENED AN INVESTIGATION AND SENT ME A LETTER STATING THAT "THE RATE OF DECELERATION NECESSARY TO ACTIVATE THE AIR BAG AND AIR BAG SYSTEM WAS NOT PRESENT DURING THIS ACCIDENT". THE IMPACT BUCKLED MY FRAME AND TOTALED A 5 MONTH OLD VEHICLE, BUT FCA WANTS ME TO BELIEVE THAT IT WASN'T SEVERE ENOUGH FOR THE AIR BAGS TO DEPLOY. FCA IS EITHER BEING DECEPTIVE OR THEIR VEHICLES ARE SIMPLY UNSAFE. EITHER WAY, DUE TO THEIR DECEPTIVE ACTIONS, IT IS IMPOSSIBLE TO KNOW HOW MANY ACCIDENTS ARE TRULY RELATED TO THIS VEHICLE DEFECT. I FOUND OUT ABOUT THE RECALL (S76) THE WEEK AFTER MY ACCIDENT WHEN I FILED A COMPLAINT WITH FCA. MY VEHICLE WAS IN THE DEALERSHIP FOR ITS FIRST OIL CHANGE TWO WEEKS AFTER THIS RECALL WAS ISSUED, BUT IT WASN'T REPAIRED AND I WASN'T INFORMED OF A RECALL. I RECEIVED MY RECALL NOTICE TODAY, 74 DAYS AFTER MY ACCIDENT. I HAVE THE POLICE REPORT, PICTURES OF THE JEEP AND THE FRAME, THE INSURANCE ADJUSTER'S CELL PHONE NUMBER AS WELL AS ALL CORRESPONDENCE WITH FCA, SHOULD YOU WANT IT...UPDATED 05/09/17 *BF UPDATED 9/27/18*JB</p>

10981445	JEEP	WRANGLER	2012	10/02/15	04/29/17	<p>I WAS INVOLVED IN A SINGLE VEHICLE ACCIDENT ON 10/5/15, TRAVELING APPROXIMATELY 30MPH, WHEN MY JEEP SUDDENLY JERKED TO THE RIGHT WITHOUT WARNING, CAUSING IT TO SWERVE OFF THE ROAD AND INTO A DITCH. THE JEEP HIT THE FRONT END OF THE DITCH AT AN ANGLE THAT LAUNCHED IT AIRBORNE, THEN LANDED ON THE CEMENT WALL OF A CULVERT APPROXIMATELY TWO FEET AWAY. THE JEEP BOUNCED TWICE ON THE CEMENT WALL, CRACKING THE FRAME IN TWO PLACES, THEN LANDED IN THE CULVERT, HIT THE FRONT END OF THE CULVERT, THEN HIT A SMALL POLE WHERE IT FINALLY STOPPED. DESPITE SLAMMING ON THE BRAKES THE ENTIRE TIME, NOTHING IN THE VEHICLE SEEMED TO BE WORKING. MY AIRBAGS DID NOT DEPLOY AND MY SEATBELTS DID NOT ENGAGE, CAUSING ME TO SLAM MY FOREHEAD ON THE STEERING WHEEL WITH EACH IMPACT (3-4 TIMES, I HONESTLY DON'T RECALL) AND HITTING MY CHEST ONCE ON THE STEERING WHEEL. I CALLED CHRYSLER TO REPORT THE INCIDENT AFTER THE INSURANCE ADJUSTER RAISED CONCERNS ABOUT THE AIRBAGS NOT DEPLOYING, AND WAS GIVEN A CASE NUMBER AND TOLD I WOULD BE CONTACTED. AFTER A NUMBER OF FURTHER ATTEMPTS TO CONTACT THEM, THEY HAVE REFUSED TO RETURN MY CALLS OR ACKNOWLEDGE MY COMPLAINTS. I AM NOW AWARE OF A NUMBER OF RECALLS REGARDING THE ORC MODULE IN MANY CHRYSLER VEHICLES, AND WONDER IF THIS COULD HAVE BEEN A CONTRIBUTING FACTOR IN MY ACCIDENT. I SUFFERED A SEVERE CONCUSSION AND WAS OUT OF WORK FOR THREE MONTHS. I HAD TO QUIT MY SECOND JOB, CAUSING SIGNIFICANT FINANCIAL STRAIN ON MY FAMILY. I HAVE SINCE HAD CHRONIC NECK PAIN AND MIGRAINES, AN MRI SHOWED TRAUMATIC DISC HERNIATIONS AT C2-6, FOR WHICH I HAVE TO SEE A NEUROSURGEON. I HAVE HAD MULTIPLE INJECTIONS AND OTHER PROCEDURES ON MY NECK SINCE THE ACCIDENT, BUT CONTINUE TO HAVE PAIN DAILY. AT MY REQUEST, MY INSURANCE COMPANY HAS KEPT THE TOTALED JEEP, UNTOUCHED, IN A SECURED LOT, UNTIL I CAN FIND SOMEONE TO HELP ME DETERMINE WHY THE SEATBELTS FAILED TO PROTECT ME.</p>

10991421	JEEP	WRANGLER	2015	02/04/16	05/24/17	<p>I WAS INVOLVED IN A FRONT END MOTOR VEHICLE COLLISION, WITH ANOTHER MOTOR VEHICLE INCIDENT, TO WIT THE FRONT DRIVER SIDE AIRBAG NEVER DEPLOYED APPROPRIATELY. WHERE IN WHICH I RECEIVED INJURY FROM THE COLLISION ACCIDENT. AS A RESULT OF THE COLLISION INCIDENTS, I FURTHER INQUIRED WITH THE DEALERSHIP SERVICE DEPARTMENTS MAINTENANCE PERSONNEL, AND WAS INFORMED, THAT THE DEPLOYMENT CONTACT SWITCH LOCATED ON THE FRONT OF MY 2015 JEEP WRANGLER, WAS LOCATED IN THE FRONT GRILL AREA, AND NOT LOCATED IN THE FRONT BUMPER AREA. RECENTLY BACK IN THE FALL OF 2016, I RECEIVED NOTICE FROM FIAT CHRYSLER JEEP CORPORATION. THAT MY 2016 JEEP WRANGLERS AIRBAG DEPLOYMENT SYSTEM HAD A RECALL ISSUE. WHICH FURTHER STATED, LET AIRBAG DEPLOYMENT SYSTEMS RANGING BACK TO 2012 JEEP WRANGLERS, EXTENDING TO 2017 JEEP WRANGLERS. PLEASE BE ADVISED THAT AS A RESULT OF MY 2015 JEEP WRANGLER COLLISION WHICH ENDED UP IN A TOTAL LOSS. I HAD TO PURSUE ANOTHER VEHICLE, HENCE MY 2016 JEEP WRANGLER, AIRBAG DEPLOYMENT SYSTEM RECALL NOTICE. FURTHER BE ADVISED, THAT WHEN I HAD TO SHOP AGAIN FOR ANOTHER MOTOR VEHICLE, TO WIT MY 2016 JEEP WRANGLER. I HAD ASKED THE DEALERSHIP SALES PERSON, IF THE AIRBAG DEPLOYMENT SYSTEM HAD EVER CHANGED FROM THE 2015 JEEP WRANGLERS, TO THE 2016 JEEP WRANGLERS? WHERE IN WHICH I WAS INFORMED THAT THE SAME AIRBAG DEPLOYMENT SYSTEMS IN THE 2015 JEEP WRANGLER'S WERE THE SAME IN THE 2016 JEEP WRANGLERS. WHERE, GIVEN THE FACT THAT MOTOR VEHICLE AIRBAG RECALLS BY OTHER MANUFACTURING COMPANIES, ARE BEING CALLED INTO QUESTION? IT IS MY CONTENTION, THAT THE 2015 JEEP WRANGLER AIRBAG APPOINTMENT SYSTEM THEN I HAD OWNED AT THE TIME OF THE COLLISION, WAS DEFECTIVE AS WELL. PLEASE FEEL FREE TO CONTACT ME ANYTIME REGARDING THIS ISSUE, OR ANYTHING ELSE RELATED TO THIS ISSUE. RESPECTFULLY SUBMITTED</p>

10993562	JEEP	PATRIOT	2014	06/02/17	06/06/17	SOMEONE IN A 3/4 TON WORK VAN RAN THROUGH A STOP LIGHT AND PLOWED IN TO THE RIGHT PASSENGER FRONT / SIDE OF MY JEEP WHILE I WAS MAKING A LEFT HAND TURN WE WERE ON THE CITY STREETS.. THE IMPACT WAS SO GREAT THAT WHILE MAKING THE LEFT TURN AND BEING HIT SO HARD MY WIFE AND I WENT THROUGH A PIZZA SHOP HEAD ON. NONE OF THE 8 AIR BAGS IN MY JEEP WENT OFF. THERE IS A RECALL FOR THE JEEPS AIR BAGS FOR WHICH I DID GET A HOLD OF THE DEALERSHIP AND THEY TOLD ME THAT THE RECALL IS STILL OPEN AND NO THEY DO NOT HAVE A FIX AT THIS TIME. NOW READING THE JEEPS FACTORY USER GUIDE THE AIR BAGS SHOULD HAVE GONE OFF. THE JEEP DOES HAVE SEAT-MOUNTED SIDE AIR BAGS AND FROM READING THE FACTORY USER GUIDE IT STATES THAT THIS VEHICLE MAY BE EQUIPPED WITH SUPPLEMENTAL SEAT-MOUNTED SIDE AIR BAGS TO PROVIDE ENHANCED PROTECTION TO HELP PROTECT AN OCCUPANT DURING A SIDE IMPACT. IF THE AIR BAGS WOULD HAVE GONE OFF MY WIFE WOULDN'T HAVE GOT SO HURT. SHE NOW HAS A RIGHT CERVICAL STRAIN, LUMBAR CONTUSION, AND A RIGHT CLAVICLE FRACTURE. ALSO WITH THE HEAD ON COLLISION INTO THE BUILDING THE FRONT AIR BAGS SHOULD HAVE GONE OFF THEY DID NOT.
10994152	JEEP	PATRIOT	2016	12/14/16	06/09/17	TL* THE CONTACT OWNED A 2016 JEEP PATRIOT. WHILE DRIVING 65 MPH, THE VEHICLE STALLED WITHOUT WARNING. THE CONTACT LOST CONTROL OF THE VEHICLE AND IT ROLLED OVER. THE POWER STEERING FUNCTION BECAME INOPERABLE AND THE AIR BAGS FAILED TO DEPLOY. A POLICE REPORT WAS NOT FILED. THE CONTACT SUSTAINED A MINOR ANKLE INJURY THAT DID NOT REQUIRE MEDICAL ATTENTION. THE VEHICLE WAS TOWED TO AN INDEPENDENT MECHANIC AND WAS NOT REPAIRED. THE CONTACT WAS CONCERNED THAT THE FAILURE MENTIONED IN NHTSA CAMPAIGN NUMBER: 16V907000 (ENGINE AND ENGINE COOLING) CONTRIBUTED TO THE CRASH. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE AND WAS INFORMED THAT THE VEHICLE WAS NOT BEING DRIVEN AT A SPEED THAT WOULD FACILITATE THE DEPLOYMENT OF THE AIR BAGS. THE VEHICLE WAS DESTROYED. THE APPROXIMATE FAILURE MILEAGE WAS 17,000. ...UPDATED 07/31/17 *BF *JS

11183268	JEEP	WRANGLER	2016	02/24/19	02/28/19	DURING A ROLLOVER CRASH WHICH INITIATED AT 40 MILES PER HOUR, THE FRONTAL AIRBAGS FAILED TO DEPLOY. THE VEHICLE ROLLED AND AN ADEQUATE AMOUNT OF FORCE TO DEPLOY THE AIR BAGS SHOULD HAVE BEEN TRIGGERED. AS A RESULT THE OCCUPANTS EXPERIENCE EXTENSIVE INJURIES CONSISTENT WITH SUDDEN DECELERATION.
11183650	JEEP	PATRIOT	2014	12/01/17	03/02/19	I HAVE BEEN CONTACTING MY DEALERSHIP SINCE THE RECALL WAS ISSUED ON MY VEHICLE SINCE 2017. EVERY TIME I CALL I AM ADVISED THAT THEY DO NOT HAVE THE PARTS TO FIX MY VEHICLE, TO CALL BACK. WELL IT HAS BEEN ALMOST TWO YEARS AND I AM STILL TRYING TO HAVE THIS RECALLED ISSUE FIXED. I WAS INVOLVED IN AN ACCIDENT DECEMBER OF 2017 WHERE MY AIRBAGS DID NOT DEPLOY.
11192853	JEEP	PATRIOT	2012	01/01/17	04/01/19	TL* THE CONTACT OWNS A 2012 JEEP PATRIOT. THE CONTACT STATED THAT AN ONCOMING VEHICLE RAN A STOP SIGN AND CRASHED HEAD ON INTO HIS VEHICLE. NONE OF THE FRONTAL AIR BAGS DEPLOYED. THERE WERE NO INJURIES AND A POLICE REPORT WAS FILED. THE OTHER DRIVER'S INSURANCE COMPANY SETTLED AND PAID FOR THE REPAIRS. THE AIR BAGS WERE NOT DIAGNOSED OR REPAIRED. AFTER THE CONTACT'S BODY DAMAGE WAS REPAIRED, THE CHECK ENGINE, BRAKE LIGHTS, AND AIR BAG INDICATORS STARTED TO ILLUMINATE. THE CONTACT STATED THAT THE OVERALL COMPUTER SYSTEM FOR THE VEHICLE MALFUNCTIONED AND ALL THE INSTRUMENT PANEL INDICATORS ILLUMINATED. BECK CHEVROLET BUICK GMC (1601 REID ST, PALATKA, FL 32177, (386) 227-5222) WAS CONTACTED, BUT ONLY OFFERED TO SELL THE CONTACT A NEW VEHICLE. THE MANUFACTURER WAS NOT CONTACTED. THE VEHICLE WAS INCLUDED IN NHTSA CAMPAIGN NUMBER: 16V668000 (SEAT BELTS, AIR BAGS). THE FAILURE MILEAGE WAS 29,000. PARTS DISTRIBUTION DISCONNECT.
11203283	JEEP	PATRIOT	2014	04/15/19	04/23/19	MY DAUGHTER WAS GOING 30 MPH IN HER JEEP OVER A BRIDGE. THE CAR INFRONT OF HER STOPPED SUDDENLY TO AVOID AN ACCIDENT. SHE WAS UNABLE TO STOP DUE TO ICE AND HIT THE CAR INFRONT OF HER. AIRBAGS DID NOT DEPLOY. THEN THEY WERE HIT FROM BEHIND BY A TRUCK GOING 40 MPH. AIRBAGS DID NOT DEPLOY. ROUTE 72 IN GENOA IL, GOING STRAIGHT. NOT UPLOADING PICTURE DUE TO LICENSE PLATES SEEN.
11203683	JEEP	PATRIOT	2016	11/06/18	04/25/19	BACK IN NOVEMBER OF 2018 MY JEEP WAS IN AN ACCIDENT. MY SON WAS THE OPERATOR OF THE VEHICLE AT THE TIME ON HIS WAY TO PICK ME UP FROM WORK IN TIVERTON RHODE ISLAND. ACCORDING TO HIM, HE RECALLS EVERYTHING FINE AND THEN A MOMENT WHEREIN EVERYTHING WENT BLANK. UPON ARRIVAL THE VEHICLE WAS SEVERELY DAMAGED, I ASKED HIM WHAT HAPPENED, HE WAS IN A STATE OF CONFUSION. AT THAT POINT THE POLICE HAD CAUGHT UP, AND BEGAN THE INVESTIGATION, AND MY SON WENT TO THE HOSPITAL BY RESCUE. FAST FORWARD: WE ARE IN QUESTION TO THE VEHICLE'S SAFETY. AT THE TIME OF THE INCIDENT THE VEHICLE VEERED INTO THE ONCOMING TRAFFIC. BASED ON OUR INVESTIGATION AND RECALL OF THE INCIDENT A: THE AIRBAGS DID NOT DEPLOY AND B: THE RIGHT WHEEL AND AXLE WAS COMPLETELY DISENGAGED ALTHOUGH THE VEHICLE HAD SUSTAINED A MAJORITY OF DAMAGES ON THE LEFT/DRIVER'S SIDE! THE LEFT/DRIVER'S SIDE WHEEL AND AXLE WAS STILL COMPLETELY INTACT DESPITE SUSTAINING A VAST AMOUNT OF DAMAGES. *DT*JB

11230028	JEEP	WRANGLER	2017	05/16/19	07/08/19	TL* THE CONTACT OWNS A 2017 JEEP WRANGLER. WHILE DRIVING APPROXIMATELY 40 MPH, THE FRONT END OF THE VEHICLE SUDDENLY STARTED TO DRIFT AND CAUSED THE DRIVER TO LOSE CONTROL OF THE STEERING. AS A RESULT, THE CONTACT CRASHED INTO A METAL FENCE POST. THE STEERING BECAME INOPERABLE AFTER THE CRASH AND THE AIR BAGS DID NOT DEPLOY. THE DRIVER AND FACIAL CONTUSIONS. MEDICAL ATTENTION WAS NOT RECEIVED. A POLICE REPORT WAS FILED. THE VEHICLE WAS TOWED TO COTTAGE GROVE CHRYSLER (2800 ROW RIVER RD, COTTAGE GROVE, OR 97424) TO BE DIAGNOSED, BUT THE CAUSE OF THE FAILURE COULD NOT BE DETERMINED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE FAILURE MILEAGE WAS 11,324. *BF *TR
11230623	CHRYSLER	200	2015	07/07/19	07/10/19	I WAS INVOLVED IN AN ACCIDENT WITH MY CAR. A CAR TURNED IN FRONT OF ME WHILE I HAD THE RIGHT OF WAY. I DID NOT HAVE TIME TO EVEN HIT THE BRAKES. SO THE FRONT OF MY CAR HIT THE VEHICLE. I WAS GOING ABOUT 40 MPH. THE WHOLE FRONT BUMPER CAME OFF AND THE STEEL SUPPORT BAR AND THE FRAME WAS TWISTED. MY AIRBAGS NEVER DEPLOYED. I DID SUSTAIN INJURIES! THIS WAS NOT THE FIRST ISSUE I HAD WITH THIS CAR. I BOUGHT IT IN 2017 AND A WEEK LATER THE CAR STARTED DOWNSHIFTING AS I WAS DRIVING ALL THE TIME. IT WOULD STALL AND THE TRANSMISSION LIGHT WOULD COME ON. I BROUGHT IT TO CHRYSLER AND WAS TOLD THAT THE ORIGINAL OWNER HAD STARTED THE RECALL PROCESS ON THE TRANSMISSION!! I WAS INFURIATED THAT I WAS NOT TOLD. AFTER RENTAL CARS BECAUSE I COULDN'T USE IT WHILE THE RECALL STUFF WAS BEING DONE. AND ME BRINGING IT BACK AND FORTH 3 TIMES WITH THE PROBLEM STILL PERSISTING! YET AGAIN THE CAR DOWNSHIFTED IN TRAFFIC AND WAS FORCED TO GO OFF THE ROAD. FINALLY THEY REPLACED THE TRANSMISSION. A YEAR LATER AND MY CAR STILL DOES NOT SWITCH GEARS RIGHT AND THE CHECK ENGINE LIGHT NEVER GOES OFF!!! I AM NOW GONNA SUE THE HELL OUT OF CHRYSLER!!
11240474	FIAT	500	2012	07/10/19	07/29/19	TL* THE CONTACT OWNS A 2012 FIAT 500. 10690546	HYUNDAI	SONATA	2013	02/19/15	02/25/15	I WAS IN A CAR WRECK AND THE AIR BAGS DID NOT GO OFF..
10914378	HYUNDAI	SONATA	2013	08/01/16	10/06/16	ON 8/1/2016, I WAS INVOLVED IN A CAR ACCIDENT AND MY AIRBAGS DID NOT DEPLOY. I WAS ON A CITY STREET AT 5:00AM. THE POSTED SPEED WAS 35 MPH, I WAS HEADED WESTBOUND ON 79TH ST IN CHICAGO ILLINOIS AND THE OTHER CAR WAS HEADED EASTBOUND. THE OTHER CAR CAME OVER INTO MY LANE OF TRAFFIC, COMING HEAD ON TO ME, I STARTED BLOWING MY HORN TRYING TO GET HIS ATTENTION TO AVOID THE ACCIDENT. AFTER I SAW THAT HE WAS NOT TRYING TO CHANGE HIS COURSE OF DIRECTION I MOVE SLIGHTLY TOWARD MY RIGHT TO AVOID THE COLLISION, BUT WAS UNSUCCESSFUL. THE OTHER VEHICLE HIT ME STARTING ON THE DRIVER BACK SIDE, MY CAR WAS FORCED OVER THE CURB DUE TO THE IMPACT AND PUSHED ONTO THE SIDE WALK. BEING PUSHED ONTO THE SIDE WALK MY CAR SUSTAINED DAMAGE FROM HITTING A ROD IRON FENCE ON THE RIGHT PASSENGER SIDE AND DAMAGE TO THE DRIVER FRONT AS WELL, MY BACK BUMPER WAS TORN OFF AS WELL FROM THE IMPACT OF THE CRASH. MY BUMPER WAS SEVERAL FEET AWAY FROM WHERE MY CAR WAS AT IT STAND POINT. MY CAR WAS TOTALED DUE TO THE DAMAGE IT HAD SUSTAINED, MY AXLES WERE BROKEN ON MY CAR AND THE OTHER INDIVIDUAL CAR AXLE APPEARED TO BE BROKEN AS WELL. THE INDIVIDUAL THAT HIT ME HIS AIRBAGS HAD DEPLOYED DUE TO THE DAMAGE AND MY AIRBAGS HAD NOT DEPLOYED, MY VEHICLE SUSTAINED MORE VISIBLE DAMAGE MORE SO THEN THE OTHER VEHICLE,

THE CONTACT STATED THAT WHILE DRIVING APPROXIMATELY 15 MPH, ANOTHER VEHICLE CRASHED INTO THE FRONT DRIVER'S SIDE OF THE CONTACT'S VEHICLE. THE AIR BAGS FAILED TO DEPLOY. THE CONTACT SUSTAINED HEAD INJURIES AND THE PASSENGER SUSTAINED A HEMATOMA FROM INJURIES CAUSED BY THE SAFETY BELT. A POLICE REPORT WAS FILED OF THE INCIDENT. THE VEHICLE WAS TOWED TO A REPAIR SHOP BUT THE CAUSE OF THE FAILURE WAS NOT DETERMINED. THE VEHICLE WAS DESTROYED. THE APPROXIMATE FAILURE MILEAGE WAS 1000. *TR
10572518	TOYOTA	TUNDRA	2012	12/24/12	03/15/14	ON 12/24/2012 AROUND 04:00HRS I STRUCK AN ADULT MOOSE IN BEAR LAKE, CANADA WITH THE FRONT END OF MY WIFE'S 2012 TOYOTA TUNDRA CREWMAX ON THE BRITISH COLUMBIA HIGHWAY. THE CONDITION OF THE ROAD WAS SNOW AND ICE BUT WE HAD RECENTLY PURCHASED AFTERMARKET RIMS AND TIRES ON 12/18/2012 IN CALIFORNIA; 18IN MB VOTEX RIMS WITH BFG ALL TERRAIN TIRES. THE TRACTION OF THESE TIRES BOOSTED MY CONFIDENCE IN TRAVELING AT SPEEDS OF 30-40MPH AT NIGHT. WE HAD TRAVELED ALL THE WAY FROM GEORGIA WITHOUT SEEING ANY ANIMALS AT NIGHT. THE HID HEAD LAMPS GAVE ME A FALSE SENSE OF SECURITY NAVIGATING THROUGH THE NIGHT IN ORDER TO MAKE THE FINAL LEG TO ANCHORAGE, AK FOR CHRISTMAS DAY. TO MY SURPRISE, A MOOSE TIPTOED FROM THE WOODS ON MY RIGHT ABOUT 20 FEET AHEAD OF ME AS I INTENDED TO PRESS ON PASS IT. BUT ALL OF A SUDDEN IT GOT SPOOKED AND DARTED INTO MY PATH. I STRUCK THE ANIMAL BROAD SIDE WITH THE FRONT END OF THE TRUCK KNOCKING IT INTO THE ENGINE BAY. INITIALLY I THOUGHT THE CONTACT WAS NOT SEVERE BUT INSPECTION PROVED OTHERWISE. THE HOOD WAS CRUMPLED UP UNTO THE WINDSHIELD, AND THE RADIATOR AND MOTOR WAS PUSHED SO FAR BACK THAT IT WAS NO LONGER DRIVABLE. I BELIEVE MY SPEED WAS AROUND 30MPH UPON IMPACT WHICH SURPRISED ME THAT THE ANIMAL WAS DEAD. THE TRUCK WAS TOWED TO A LOCAL BODY SHOP FOR AN INSURANCE ESTIMATE AS A TOTAL LOSS. I WAS CONCERNED AS TO WHY THE AIRBAGS DID NOT DEPLOY SINCE THE DAMAGES WAS SO GREAT. THE TECH EXPLAINED THAT THE SENSORS FOR THE AIRBAGS ARE LOCATED BEHIND THE BUMPER OF THE TRUCK WHERE IMPACT WAS MINIMAL. BECAUSE THE CONTACT TO THE MOOSE KNOCKED HIM OFF HIS LEGS THE LARGE BODY FELL INTO THE ENGINE COMPARTMENT AND COULD HAVE BEEN FATAL HAD IT A FULL RACK OF ANTLERS. THANK GOD HE DID NOT! THOUGH WE HAVE PURCHASED A 2013 REPLACEMENT OF THE SAME TRUCK, THE AIRBAGS NOT DEPLOYING IS STILL A CONCERN AS A DESIGN FLAW AND NEED TO BE ADDRESSED. *TR
10573606	TOYOTA	AVALON HYBRID	2013	03/16/14	03/19/14	ON SUNDAY, MARCH 16, 2014, AT APPROXIMATELY 12:50PM, NORTHBOUND TRAFFIC ON LAKE SHORE DRIVE WAS BROUGHT TO A HALT BY FOUR POLICE VEHICLES THAT SPREAD ACROSS THE FOUR NORTHBOUND LANES. THE POLICE VEHICLES WERE PARKED, ONE IN EACH LANE. THE OFFICERS HAD CREATED A ROAD BLOCK. MY CAR WAS IN THE FAR EAST LANE IMMEDIATELY BEHIND A PARKED POLICE VEHICLE. I PLACED MY VEHICLE IN PARK, BUT KEPT THE ENGINE RUNNING. MINUTES LATER, A BLACK CHRYSLER SEDAN DRIVING AT A HIGH SPEED (ESTIMATED AT 55-100MPH PER POLICE REPORTS) WAS BEING PURSUED BY THE POLICE IN A HIGH SPEED CHASE. THE BLACK CHRYSLER APPROACHED MY STATIONARY VEHICLE FROM THE REAR WITH NO SIGNS OF SLOWING DOWN. I TOLD MY FAMILY WE WERE ABOUT TO BE HIT AND SOON AFTER WE FELT THE IMPACTS FIRST FROM THE BLACK SEDAN HITTING US FROM BEHIND AND THEN FROM THE FRONT WHEN MY CAR WAS PUSHED INTO THE PARKED POLICE VEHICLE AHEAD OF US. MY HEAD HIT THE STEERING WHEEL CAUSING AN ABRASION AND BLEEDING. NONE OF THE AIRBAGS DEPLOYED DESPITE A HIGH SPEED IMPACT FROM THE REAR AND A SECONDARY IMPACT IN THE FRONT. *TR

10587263	TOYOTA	COROLLA	2011	04/02/14	05/08/14	I REAR ENDED A TRUCK FULL BUMPER TO FULL BUMPER COLLISION GOING ABOUT 25-30MPH. MY ENTIRE FRONT END WAS CRUSHED, RADIATOR AND TRANSMISSION BUSTED, AND FRONT BUMPER PULLED OFF, AND INSIDE CAR UNDER STEERING WHEEL HAD BEEN SLIGHTLY PUSHED OUT TOWARDS DRIVER SEAT. MY CAR WAS TOTALED. I BUSTED THE WINDSHIELD WITH MY HEAD WHEN I HIT IT GIVING ME A CONCUSSION AND HAD CONTUSIONS TO MY CHEST FROM HITTING STEERING WHEEL, AND CONTUSION AND SPRAIN TO MY RIGHT HAND. NO ONE INCLUDING POLICE, FIREMEN, AMBULANCE, AND WRECKING YARD COULD BELIEVE MY AIR BAGS DID NOT DEPLOY. MY HUSBAND AND I CONTACTED TOYOTA ABOUT THIS AND THEY ASSURED ME IT SHOULD NOT HAVE DEPLOYED AND SENT ME AN EMAIL LINK TO READ DESCRIBING WHEN AIR BAGS SHOULD DEPLOY. WHEN I CALLED BACK AFTER READING THE EMAIL AND TOLD THE MAN WHAT THE EMAIL SAID AND THAT MY AIR BAG SHOULD HAVE DEPLOYED HE CALLED ME A LIAR, AND SAID THAT WAS NOT WHAT THE EMAIL SAID. MY HUSBAND THEN CALLED AND REQUESTED INFORMATION FROM EDR BE DOWNLOADED AND READ. TOYOTA NEVER RETURNED OUR PHONE CALL AND NEVER RETRIEVED INFORMATION FROM EDR, AND NOW INSURANCE HAS TAKEN POSSESSION OF THE VEHICLE AND IT IS GONE. A MONTH LATER WE STILL HAVE NEVER RECEIVED A RETURN PHONE CALL OR EXPLANATION FROM TOYOTA. *TR
10595402	TOYOTA	COROLLA	2013	05/29/14	06/01/14	MY VEHICLE WAS AT FULL STOP AT THE TRAFFIC LIGHT WAITING FOR GREEN LIGHT. SUDDENLY A VEHICLE HITTING ME FROM BEHIND AND CAUSING ME TO HIT ANOTHER CAR IN FRONT. A TOTAL OF 3 VEHICLES INVOLVED IN THIS ACCIDENT AND MY VEHICLE WAS IN THE MIDDLE. THE IMPACT WAS SO SEVERE RESULTING IN (1) NEAR TOTAL LOSS BOTH FRONT AND REAR OF MY VEHICLE; AND (2) BODILY INJURES. AS A RESULT OF THIS SEVERE IMPACT, THIS VEHICLE IS NOT LONGER ABLE TO DRIVE AND WAS TOLLED BY A TOLL TRUCK. MOREOVER, NONE OF THE AIRBAGS IN THIS VEHICLE (2013 COROLLA) WERE DEPLOYED AS A RESULT FROM THIS SEVERE ACCIDENT. THIS VEHICLE WAS PURCHASED BRAND NEW WITHIN THE PAST 6-MONTH FROM A LOCAL DEALERSHIP. *TR
10619297	TOYOTA	COROLLA	2013	07/30/14	08/06/14	ON WEDNESDAY, JULY 30, 2014 I WAS DRIVING ON I-5 SOUTH BOUND, JUST BEFORE CANNON ROAD EXIT. TRAFFIC WAS GOING AT 35-40 MPH, HOWEVER, AT TIMES COMING TO COMPLETE STOPS. TRAFFIC WAS VERY SLOW AHEAD SO I BRAKE AND CAME NEAR A COMPLETE STOP. I LOOKED IN THE REARVIEW MIRROR AND NOTICED THE CAR BEHIND ME APPROACHING AT A VERY HIGH SPEED, I WAS CONSTRAINED ON BOTH SIDES AND UNABLE TO MOVE TO AVOID AN ACCIDENT. THE CAR REAR-ENDED ME AT A HIGH SPEED AND WITHIN SECONDS PUSHED ME AT A HIGH SPEED INTO THE CAR IN FRONT OF ME, I DID BRACE FOR THE IMPACT BUT THE SEATBELT NEVER TENSIONED OR LOCKED AND NO AIRBAGS DEPLOYED IN MY VEHICLE EVEN THOUGH MY FRONT END WAS IMPACTED SEVERELY. I PUT MY ARMS UP AND TWISTED MY BODY TO THE LEFT IN ORDER TO PROTECT MYSELF. I USED MY OWN BODY AS A PROTECTION. I AM CURRENTLY BEING TREATED FOR WHIPLASH AND SHOULDER PAIN DUE TO NO ACTIVE OR PASSIVE SYSTEM IN THE CAR BEING DEPLOYED. I CONSIDER THIS A VERY SERIOUS SAFETY CONCERN AND WANT TO ENSURE IT IS ADDRESSED AS SOON AS POSSIBLE TO PREVENT OTHERS FROM HAVING TO GO THROUGH AN ACCIDENT WITH NO ACTIVE OR PASSIVE RESTRAINTS WORKING. *TR..UPDATED 12/09/15 *BF UPDATED 08/28/2017*CT

11154026	TOYOTA	COROLLA	2014	03/06/17	11/26/18	TL* THE CONTACT OWNED A 2014 TOYOTA COROLLA. WHILE DRIVING APPROXIMATELY 55 MPH, THE CONTACT ATTEMPTED TO AVOID AN ANIMAL IN THE ROAD AND CRASHED INTO A TREE. THE AIR BAGS DID NOT DEPLOY. POLICE REPORT NUMBER: 107515 WAS FILED. THE CONTACT SUSTAINED A HEAD CONCUSSION SEVERE BRUISING OF BOTH KNEES. THE CONTACT WAS TAKEN TO THE HOSPITAL IN AN AMBULANCE. THE VEHICLE WAS TOWED TO A POLICE IMPOUND LOT AND LATER RETRIEVED BY THE INSURANCE COMPANY. THE VEHICLE WAS NOT TAKEN TO THE DEALER FOR DIAGNOSTIC TESTING. THE VEHICLE WAS DESTROYED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 130,000.
11161898	TOYOTA	AVALON	2012	11/19/18	12/17/18	MY VEHICLES AIRBAGS DID NOT DEPLOY I WAS HIT BY AN 18 WHEELER AT A HIGH RATE OF SPEED. THE VEHICLE HAD AT LEAST 2 REAR END HITS BY THIS 18 WHEELER ESTIMATED AT A SPEED IN EXCESS OF 25 MILES PER HOUR FASTER THAN MINE (I WAS GOING AT 70MPH NORTHBOUND ON US 75, NINE MILES SOUTH OF TULSA OKLAHOMA ON A SUNNY MONDAY AT 3PM). THE STREET WAS DRY. THE TRUCK INITIALLY HIT ME ON MY REAR AND ON MY LEFT REAR QUARTER. I WAS SPUN IN FRONT OF THE TRUCK AND HE HIT ME AGAIN ON THE REAR QUARTER AND THE BUMPER AND SPUN ME IN THE OPPOSITE DIRECTION AND THEN PUSHED INTO THE GUARDRAIL AT AN ESTIMATED 40+ MPH. THE AIRBAGS DID NOT DEPLOY FOR ANY OF THE THREE COLLISIONS (TWO IN THE REAR AND ONE IN THE FRONT).
11164041	TOYOTA	COROLLA	2018	11/09/18	12/29/18	MY DAUGHTER WAS INVOLVED IN A REAR END COLLISION WITH ANOTHER CAR THAT ABRUPTLY STOPPED TO TURN. SHE WAS ONLY GOING 30 MPH AND HYDO-PLANNED INTO THE CAR AS A RESULT OF THE RAINY CONDITIONS. THERE WAS MINIMAL DAMAGE DONE TO THE VEHICLE THAT SHE HIT BUT HER CAR SUSTAINED SUBSTANTIAL DAMAGE TO THE FRONT END WHICH CAUSED FRAME DAMAGE. THE FRONT END OF THE CAR WAS SEVERELY DAMAGED BUT NONE OF THE AIR BAGS DEPLOYED DESPITE DIRECT DAMAGE TO COLLIDING INTO THE STOPPED VEHICLE.
11172963	TOYOTA	COROLLA	2018	01/20/19	01/29/19	HIT A DEER AT APPROXIMATELY 60 MPH, FRONT END OF CAR WAS DESTROYED, WAS A TOTAL LOSS. AIR BAGS DID NOT DEPLOY AT ALL
11173072	TOYOTA	COROLLA	2016	01/21/19	01/30/19	TL* THE CONTACT OWNS A 2016 TOYOTA COROLLA. WHILE DRIVING 40 MPH, THE CONTACT REAR ENDED A PARKED VEHICLE. THE AIR BAGS DID NOT DEPLOY. THERE WERE NO WARNING INDICATORS ILLUMINATED. THE CONTACT SUSTAINED INJURIES TO THE UPPER BODY. MEDICAL ATTENTION WAS NOT RECEIVED. A POLICE REPORT WAS FILED. THE VEHICLE WAS TOWED TO THE CONTACT'S INSURANCE COMPANY. THE CAUSE OF THE FAILURE WAS NOT DETERMINED. THE MANUFACTURER AND DEALER WERE NOT MADE AWARE OF THE FAILURE. THE FAILURE MILEAGE WAS 43,000.
11184772	TOYOTA	COROLLA	2014	10/28/17	03/07/19	TL* THE CONTACT OWNS A 2014 TOYOTA COROLLA. WHILE DRIVING APPROXIMATELY 65 MPH, THE DRIVER LOST CONTROL OF THE VEHICLE AND CRASHED. DURING THE CRASH, THE VEHICLE ROLLED OVER SEVERAL TIMES AND THE FRONT END WAS SEVERELY DAMAGED; HOWEVER, THE AIR BAGS DID NOT DEPLOY. THE DRIVER SUSTAINED AN INJURED LEFT ARM THAT REQUIRED MEDICAL ATTENTION. A POLICE REPORT WAS FILED AND THE VEHICLE WAS TOWED. THE CAUSE OF THE FAILURE WAS NOT DETERMINED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE DEALER WAS NOT CONTACTED. THE FAILURE MILEAGE WAS 40,000. *DT *JS POLICE REPORTED STATED DRIVER FELL ASLEEP AND DRIFTED OFF THE ROADWAY. *JB

11189840	TOYOTA	COROLLA	2014	03/01/19	03/18/19	IN MARCH 1 2019 AT 840 PM I WAS DRIVING MY TOYOTA COROLLA 2014 HEADING SOUTH ON ARCH STREET IN PITTSFORD VERMONT. I DROVE DOWN THE ROAD WENT OVER A LITTLE HILL AND AS I CAME OVER THE TINY HILL IN MY VISION I SAW A DRIVING CAR COMING TOWARDS ME IN THERE APPROPRIATE LANE, WITH THERE HEADLIGHTS ON, THEN I SAW A PARKED CAR BLOCKING 70 PERCENT OF MY LANE. I HAD NO CHOICE BUT TO HIT THE PARKED CAR. WHEN I HIT THE CAR MY AIR BAGS DID NOT DEPLOY. I DONT REMEMBER ANYTHING AFTER MY FACE HIT THE STEERING WHEEL. MY AIR BAGS DID NOT DEPLOY! I HAVE BROKEN BONES IN MY FACE AND CANT SEE CLEARLY OUT OF MY RIGHT EYE. IVE GONE TO A EYE MD WHO IS A RETINA SPECIALIST AND SHE SAYS IM NOT GOING TO BE ABLE TO SEE OUT OF MY RIGHT EYE. I DO HAVE A LAWYER BUT I BELIEVE IF I WOULD HAVE KNOWN ABOUT THIS DEFECT THAN I WOULD HAVE HAD THIS FIXED AND WOULD HAVE HAD THE PROPER DEPLOY OF THE AIR BAG WHICH THEN I WOULD NOT BE LOSING MY SITE. I WAS GOING 35 MPH.*DT*JB
11191169	TOYOTA	COROLLA	2016	03/22/19	03/24/19	I HIT A DEER AND MY CAR IS POSSIBLE TOTALED, BUT NONE OF THE AIR BAG CAME OUT LIKE THEY SHOULD HAVE. I WAS DOING 55 MILES AN HOUR ON A 2 LANE RD WHEN A DEER JUMP OUT.
11203097	TOYOTA	TACOMA	2017	03/07/19	04/23/19	TL* THE CONTACT OWNED A 2017 TOYOTA TACOMA. WHILE DRIVING APPROXIMATELY 40 MPH, ANOTHER VEHICLE CROSSED OVER THE DOUBLE YELLOW LINES AND STRUCK THE CONTACT'S VEHICLE HEAD ON. NONE OF THE FRONTAL AIR BAGS DEPLOYED. POLICE REPORT NUMBER: [XXX] WAS FILED. THE VEHICLE WAS TOWED TO A PRIVATE IMPOUND LOT. THE DRIVER AND PASSENGER IN THE CONTACT'S VEHICLE WERE TRANSPORTED TO THE HOSPITAL VIA AMBULANCE. THE PASSENGER SUSTAINED A BROKEN KNEE CAP, HEAD TRAUMA, AND WHIPLASH. THE DRIVER SUFFERED TWO HERNIATED DISCS AND NERVE DAMAGE. THE VEHICLE WAS DESTROYED AND TOWED. THE VEHICLE WAS NOT DIAGNOSED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE AND SENT A THIRD PARTY COMPANY TO INSPECT THE VEHICLE. THE DEALER WAS NOT CONTACTED. THE APPROXIMATE FAILURE MILEAGE WAS 31,000. INFORMATION REDACTED PURSUANT TO THE FREEDOM OF INFORMATION ACT (FOIA), 5 U.S.C. 552(B)(6). *TT
11203308	TOYOTA	COROLLA	2015	09/04/18	04/24/19	I WAS INVOLVED IN A FRONT END COLLISION GOING 35MPH AND THE AIRBAGS DID NOT DEPLOY. THIS IS FASTER THAN THE SPEED AT WHICH THE MANUAL STATES AIRBAGS SHOULD DEPLOY FOR THIS VEHICLE. I WAS INJURED AS A RESULT OF THIS ACCIDENT.
11203313	TOYOTA	AVALON	2015	04/01/19	04/24/19	TL* THE CONTACT OWNED A 2015 TOYOTA AVALON. THE CONTACT STATED THAT THE FRONT DRIVERS AIR BAG FAILED. WHILE DRIVING 35 MPH, THE CONTACT WAS UNABLE TO STOP THE VEHICLE IN TIME AND REAR ENDED ANOTHER VEHICLE. THE FRONT DRIVERS AIR BAG FAILED TO DEPLOY. THE CONTACT SUSTAINED INJURIES TO THE CHEST AND NOSE, WHICH REQUIRED MEDICAL ATTENTION. THE VEHICLE WAS DESTROYED AND TOWED. THE MANUFACTURER WAS CONTACTED. THE DEALER WAS NOT CONTACTED. A POLICE REPORT WAS FILED. THE CAUSE OF THE FAILURE WAS NOT DIAGNOSED. THE VIN WAS NOT AVAILABLE. THE APPROXIMATE FAILURE MILEAGE WAS 90,000.
11203382	TOYOTA	COROLLA	2018	04/20/19	04/24/19	4/20/19, THE DRIVER INVOLVED WITH THIS VEHICLE LOST CONTROL AND HIT A CURB AT 25 MILE PER HOUR, WELL WITHIN THE SPEED LIMIT AT 45 MPH. AFTER HITTING THE CURB, THE VEHICLE SWERVED INTO A TREE. THE FRONT END OF VEHICLE HIT THE TREE AND THE ENTIRE FRONT END OF VEHICLE WAS SEVERELY DAMAGED BEYOND REPAIR. THIS IS CONSIDERED A "TOTAL LOST." THE VEHICLE WAS EQUIPPED WITH FRONT AND SIDE AIRBAGS, BUT SURPRISINGLY NONE WAS DEPLOYED.
11204113	TOYOTA	COROLLA	2012	04/24/19	04/27/19	WAS IN A FRONT END COLLISION AND AIRBAGS DID NOT DEPLOY. I T-BONED ANOTHER VEHICLE.

11209262	TOYOTA	COROLLA	2015	04/23/19	05/22/19	TL* THE CONTACT OWNED A 2015 TOYOTA COROLLA. THE CONTACT STATED THAT WHILE THE DRIVER WAS DRIVING 60 MPH, HE SWERVED TO AVOID CRASHING INTO A DEER. THE VEHICLE WAS CRASHED INTO AN EMBANKMENT AND THE VEHICLE STOPPED AFTER CRASHING INTO A TREE. THE AIR BAGS FAILED TO DEPLOY. THE CONTACT SUSTAINED WHIPLASH BUT DID NOT SEEK MEDICAL ATTENTION. IT WAS UNKNOWN IF A DEALER OR THE MANUFACTURER WERE NOTIFIED OF THE FAILURE. A POLICE REPORT WAS NOT FILED. THE FAILURE MILEAGE WAS 38,408.
11243419	TOYOTA	COROLLA	2018	07/25/19	08/12/19	I HAD AN ACCIDENT AND THE AIRBAGS DO NOT DEPLOYED, I ASKED AT KENDALL TOYOTA COLLISION CENTER TO REVIEW WHAT IS THE POSSIBLE CAUSE, THEY DO NOT RESPONSE YET.
11290098	TOYOTA	COROLLA	2014	12/16/19	12/19/19	COLLIDED AT 60+ MPH ON 190 BY DIESEL LARGE TRUCK MAJOR FRONT AND SIDE DAMAGE AND NO AIRBAG DEPLOYMENT OF ANY KIND. HIS TRUCK WAS FINE AND NONE OF MY SIDE NOR FRONTAL AIRBAGS WENT OFF. MY HEAD SLAMMED INTO THE DRIVER'S WINDOW AND MY NECK AND BACK ARE REALLY HURTING. THIS HAPPENED JUST A COUPLE DAYS AGO.
11290892	TOYOTA	AVALON	2015	11/29/19	12/23/19	I WAS HEADING DOWN SNOW GEESSE SOUTH IN DUCK N.C. TO TURN LEFT ONTO WOOD DUCK DRIVE. AS I APPROACHED THE TURN, MY BRAKES FAILED AND I WENT INTO THE PARKING AREA OF 1324 DUCK ROAD. I COULD HIT A PARKED TRUCK OR HOUSE. I HIT THE TRUCK. THE AIRBAGS DIDNT DEPLOY. NONE OF THEM. IT WAS A HEAD ON COLLISION. MY CAR WAS TOTALED. THE POLICE SHOWED UP AND WERE SUPRISED THAT THERE WERE NO AIRBAGS. THIS CONCERNS ME GREATLY. THE BRAKES FAILING WAS SCARY ENOUGH, BUT ABSOLUTELY NO AIRBAGS! *DSY
11299613	TOYOTA	COROLLA	2017	12/27/19	01/15/20	I REAR-ENDED SOMEONE AT APPROXIMATELY 30 MPH AND NONE OF MY AIRBAGS DEPLOYED
11300983	TOYOTA	COROLLA	2017	09/04/19	01/21/20	HELLO, ON SEPTEMBER 4TH 2019 I WAS INVOLVED IN A THREE CAR ACCIDENT, ME BEING IN THE MIDDLE. MY AIR BAGS DID NOT DEPLOY AND THIS EVENING I JUST SAW A NEW ARTICLE ABOUT MANY TOYOTA COROLLAS BEING EFFECTED. LOW AND BEHOLD MY VEHICLE WAS ONE OF THE RECALL CARS. THERE IS NO WAS TO FIX THE CAR NOW I HAD TO GET A NEW ONE WHICH IS AGAIN ON THE LIST. I HAVE CHECKED BOTH VIN'S. I WAS INJURED IN THAT CRASH AND THAT AIR BAG COULD HAVE HELPED MY HEAD NOT GOING THE WAY IT DID. I'M EXTREMELY UPSET WITH THE FACT THIS WAS NOT BROUGHT FORWARD SOONER. I WOULD LIKE TO SPEAK WITH SOMEONE.
11301352	TOYOTA	COROLLA	2016	11/15/19	01/23/20	TL* THE CONTACT OWNS A 2016 TOYOTA COROLLA. THE CONTACT STATED THAT WHILE DRIVING APPROXIMATELY 55 MPH, THE VEHICLE STRUCK A DEER. THE CONTACT STATED THAT NEITHER THE DRIVER NOR PASSENGER FRONTAL AIR BAGS DEPLOYED. A POLICE REPORT WAS FILED. THERE WERE NO INJURIES SUSTAINED HOWEVER, THE CONTACT SOUGHT MEDICAL ATTENTION A DAY LATER. THE VEHICLE WAS DRIVEN TO THE RESIDENCE AND THEN TOWED TO A REPAIR FACILITY THE FOLLOWING DAY. THE LOCAL DEALER WAS NOT CONTACTED AND THE VEHICLE WAS NOT TAKEN TO BE DIAGNOSED. THE VEHICLE WAS INCLUDED IN NHTSA CAMPAIGN NUMBER: 20V024000 (AIR BAGS). THE VEHICLE WAS REPAIRED. THE MANUFACTURER WAS NOT CONTACTED OR NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 78,000.
11301817	TOYOTA	AVALON	2014	08/17/18	01/25/20	ON AUGUST 17, 2018 I WAS TRAVELING WESTBOUND ON IL ROUTE 83 AND I ENTERED AN INTERSECTION AT IL ROUTE 83 AND TORRANCE AVENUE AT LYNWOOD, IL ON A GREEN TRAFFIC SIGNAL. A DRIVER WITHOUT A DRIVERS LICENSE WAS TRAVELING SOUTH ON TORRANCE AVENUE AND ENTERED THE INTERSECTION ON A RED SIGNAL. I APPLIED THE BRAKES ON MY CAR BUT WAS UNABLE TO STOP AND MY CAR HIT THE OTHER DRIVERS CAR IN THE SIDE. THE AIRBAGS IN MY CAR DID NOT DEPLOY.

11302319	TOYOTA	COROLLA	2016	01/25/20	01/27/20	TL* THE CONTACT CALLED ON BEHALF OF HER DAUGHTER WHO OWNS A 2016 TOYOTA COROLLA. THE CONTACT STATED THAT WHILE HER DAUGHTER WAS DRIVING AT 45 MPH, THE DRIVER SIDE TIRE BLOW, AS A RESULT, THE CONTACT LOST CONTROL OF THE VEHICLE AND CRASHED INTO SIX FENCES AND LANDED INTO A TREE. THE AIR BAG FAILED TO DEPLOY. THE DRIVER SUSTAINED LEG AND NOSE INJURIES THAT REQUIRED MEDICAL ATTENTION. THERE WAS NO POLICE REPORT. THE VEHICLE WAS TOW TO THE CONTACT RESIDENCE AND WAS NOT TAKEN TO A DEALER OR AN INDEPENDENT MECHANIC FOR A DIAGNOSTIC TESTING. THE VIN WAS INCLUDED IN NHTSA CAMPAIGN NUMBER: 20V024000 (AIR BAGS). THE MANUFACTURER WAS NOT MADE AWARE OF THE FAILURE. THE FAILURE MILEAGE WAS APPROXIMATELY 50,000.
11309297	TOYOTA	COROLLA	2018	02/08/20	02/14/20	I WAS INVOLVED IN AN ACCIDENT WHERE THE OTHER DRIVER HIT MY CAR ON THE FRONT LEFT SIDE, CLOSE TO MY DOOR AND THE AIRBAGS DID NOT GO OFF. I DON'T KNOW IF THERE'S ANY OTHER SENSORS IN THE BACK BUT I WAS BIT IN THE BACK AFTER AS WELL AND THE AIRBAGS STILL DID NOT GO OFF. I WAS DRIVING 30MPH ON A CITY STREET.
11311424	TOYOTA	COROLLA	2016	02/20/20	02/25/20	I WAS INVOLVED IN A CAR ACCIDENT ON 2/20/2020 MY VEHICLE WAS IN MOTION. I FELT MY 2016 TOYOTA COROLLA LOSE TRACTION ON THE ROAD AND START TO SLIP. MY TRACTION CONTROL LIGHT NEVER CAME ON AND I NEVER FELT IT ENGAGE. I HYDROPLANED, MY CAR HIT A GUARDRAIL HEAD ON, MY SEAT BELT DID NOT TIGHTEN WHICH CAUSED ME TO HIT MY HEAD AND CHEST ON THE STEERING WHEEL AND DASH AS WELL AS INJURIES TO MY NECK FROM BEING SLUNG FORWARD. MY VEHICLE CONTINUED TO IMPACT THE GUARDRAIL. MY AIR BAGS DIDN'T DEPLOY WHICH ALSO CAUSED ME TO HIT MY HEAD AND SHOULDER HARD ON THE DRIVER WINDOW/DOOR. UPON THE MULTIPLE IMPACTS AND DESPITE SENSORS BEING STRUCK, MY AIR BAGS FAILED TO DEPLOY THROUGHOUT MY VEHICLE AND MY SEAT BELT FAILED TO TIGHTEN. CAUSING INJURY TO DIFFERENT AREAS OF MY BODY.

EXHIBIT 5

10532231	HONDA	CIVIC	2012	6/26/13	07/28/13	<p>AS I WAS DRIVING TO WORK AT 4:30 AM IN HEAVY FOG I HIT A DEER THAT WAS STANDING IN THE ROAD. I NOTICED AS I GOT OUT OF THE VEHICLE THE CAR SAID SOMETHING ABOUT THE AIRBAG SENSOR, WELL I DIDN'T THINK NOTHING OF IT AS I WAS WORRIED ABOUT THE CONDITION MY CAR WAS IN AT THE TIME. WELL THE BODY SHOP THAT FIXED MY CAR STATED THE AIRBAG SHOULD HAVE 100% DEPLOYED DUE TO THE FACT THE SENSOR WAS BUSTED AND THE WIRE WAS COMPLETELY INTO. MY CONCERN IS WHY IN THE WORLD DID THE AIRBAG NOT DEPLOY? I AM GLAD IT DIDN'T BUT WHAT IF IT HAD BEEN A COLLISION WITH A CAR. WOULD THE AIRBAGS NOT DEPLOY AND I TAKE A CHANCE ON DYING BECAUSE OF FAULTY AIRBAGS? I AM REALLY UPSET ABOUT THIS SITUATION. I DO NOT FEEL SAFE DRIVING THIS CAR NOW...AND I LOVED THIS CAR AND ONE REASON I BOUGHT THIS WAS BECAUSE OF SAFETY..BUT NOW I DO NOT KNOW IF I MADE THE RIGHT CHOICE. NOW THE CAR IS "FIXED" THE CHECK AIRBAG AND EMISSION SYSTEM LIGHT IS ON. I AM TAKING IT TO HONDA AS SOON AS I CAN, BUT I AM DRIVING THIS CAR WITHOUT SEAT BELT WORKING AND THE AIRBAGS NOT WORKING...CAN SOMEONE PLEASE HELP ME WITH THIS? THANK YOU... *TR</p>

10606730	HONDA	CR-V	2014	6/23/14	06/29/14	JUNE 26, 2014 TO WHOM IT MAY CONCERN, MY HUSBAND AND I WERE DRIVING EAST DOWN HIGHWAY 55 AT AROUND 8A.M. ON JUNE 23, 2014. A DEER CAME OUT QUICKLY FROM THE DRIVER'S SIDE OF THE CAR AND HIT OUR NEW HONDA CR-V. THE DRIVER'S SIDE WAS QUITE CAVED IN AND MY AIRBAG DEPLOYED. I WAS IN THE PASSENGER'S SIDE. MY HUSBAND'S AIRBAG DID NOT. HE HIT THE STEERING WHEEL WITH HIS SHOULDER. WE WERE QUITE SHOOK UP AND SORE AFTERWARD. THE OFFICER THAT CAME TO FILE THE REPORT MENTIONED THAT HE WAS SURPRISED THAT THE DRIVER'S AIRBAG DID NOT GO OFF AND THAT IN ORDER TO MOVE THE CR-V HE SUGGESTED WE TOW IN CASE THE AIRBAG WOULD STILL GO OFF. THIS SITUATION HAS MADE US QUITE NERVOUS ABOUT DRIVING THIS PARTICULAR VEHICLE BECAUSE THE AIRBAG DID NOT GO OFF. WE WOULD APPRECIATE HONDA INVESTIGATING THIS MATTER. WE WOULD LIKE TO HAVE A VEHICLE THAT IS EQUIPPED PROPERLY SHOULD WE BE IN A COLLISION. AND WE ARE CONCERNED THAT WITH THIS PARTICULAR VEHICLE THAT IS NOT THE CASE. PLEASE LET US KNOW WHAT STEPS NEED TO BE TAKEN NEXT, SO THAT WE CAN MOVE FORWARD. SINCERELY, *TR
10643969	HONDA	FIT	2015	9/14/14	10/10/14	WHEN FACED WITH HEAVY IMPACT THE VEHICLE DO NOT ACTIVE THE AIR BAGS. HOWEVER, THE DAMAGE OF THE VEHICLE WERE OF SUCH MAGNITUDE THAT IT BROKE THE TRANSMISSION, THE CLUTCH HOUSING, THE FRONT BODY KIT SUCH AS FOG LIGHT , FRONT BUMPERS AND OTHER PARTS. *TR

10903675	HONDA	CIVIC	2015	8/30/16	09/05/16	THE VEHICLE (V-2) WAS INVOLVED IN A COLLISION AT THE 1-5 NB CYPRESS OFF RAMP IN REDDING CALIFORNIA IN EVENING PEAK HOUR TRAFFIC (AT 1810). V-2 WAS STRUCK BY V-1, WHICH IN TURN PUSHED V-2 INTO V-3. BOTH V-1 AND V-2 WERE STATIONARY AT THE TIME OF COLLISION. V-1, A ISUZA TROOPER SUSTAINED MINOR FRONT END DAMAGE. V-2 RECEIVED MINOR FRONT END DAMAGE, AND MAJOR REAR END DAMAGE. V-3, A KIA SOUL RECEIVED MINOR REAR END DAMAGE. THE ISSUE IS THAT THE V-2 AIRBAG DID NOT DEPLOY OR THE SEAT-BELT RESTRAIN THE DRIVER IN THE VEHICLE. THE DRIVER STRUCK THE STEERING WHEEL RECEIVING A MAJOR BRAIN CONCUSSION AND BROKEN NOSE UPON BEING PUSHED BY V-1 INTO V-3. SEVERAL ON THE SCENE QUESTIONED THE LACK OF AIRBAG DEPLOYMENT OR THE SEAT-BELT NOT PROVIDING THE RESTRAINT NECESSARY TO PREVENT THE INJURY. MY CONCERN IS THIS IS A FAILURE OF THE SAFETY SYSTEMS NECESSARY TO RESTRAIN THE DRIVER. REPORTING PARTY IS THE FATHER OF THE DRIVER OF V-2, A TEEN DRIVER.
10904988	HONDA	CR-V	2015	8/24/16	09/09/16	THE CRV WAS INVOLVED IN A LARGE ACCIDENT AND THE LEFT FRONT LOWER FRAME RAIL IS CRUSHED FROM A HEAD ON COLLISION. THE LEFT AIR BAG DID NOT DEPLOY NOR THE SEATBELT LOCK UP CAUSING A MINOR INJURY TO THE DRIVER. HONDA USA WAS CONTACTED BUT REFUSED TO SEND AN ENGINEER TO INSPECT THE CAR.
10904991	HONDA	CR-V	2015	8/24/16	09/09/16	TL* THE CONTACT OWNS A 2015 HONDA CR-V. WHILE DRIVING AT VARIOUS SPEEDS, THE CONTACT'S VEHICLE COLLIDED INTO ANOTHER VEHICLE WHILE MAKING A LEFT TURN. THE DETAILS OF WHERE THE CONTACT'S VEHICLE WAS STRUCK COULD NOT BE PROVIDED. THE AIR BAGS FAILED TO DEPLOY AND THE SEAT BELT FAILED TO RETRACT. THE CONTACT SUSTAINED MINOR INJURIES, BUT IT WAS UNKNOWN IF MEDICAL ATTENTION WAS RECEIVED. A POLICE REPORT WAS FILED. THE VEHICLE WAS DRIVEN FROM THE SCENE AND THEN TOWED TO AN INDEPENDENT MECHANIC WHERE IT WAS CONFIRMED THAT THE DRIVER SIDE FRAME RAIL WAS CRUSHED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE APPROXIMATE FAILURE MILEAGE WAS 11,000.

THE CONTACT PULLED OVER AND PLACED THE VEHICLE IN PARK. AFTER THE VEHICLE WAS PLACED BACK INTO THE DRIVE POSITION WITH THE BRAKE PEDAL DEPRESSED, THE VEHICLE INDEPENDENTLY ACCELERATED AND CRASHED INTO A CANAL. THE AIR BAGS FAILED TO DEPLOY. A POLICE REPORT WAS FILED. THE CONTACT SUSTAINED NECK AND BACK INJURIES THAT REQUIRED MEDICAL ATTENTION. THE VEHICLE WAS TOWED AND DEEMED DESTROYED. THE MANUFACTURER WAS NOTIFIED OF THE FAILURE. THE FAILURE MILEAGE WAS 200. THE VIN WAS UNAVAILABLE.
10926225	HONDA	ACCORD	2013	10/12/16	11/15/16	TL* THE CONTACT OWNS A 2013 HONDA ACCORD. WHILE DRIVING 45 MPH, THAT CONTACT STRUCK A DEER. THE AIR BAGS FAILED TO DEPLOY ON THE DRIVER SIDE. A POLICE REPORT WAS FILED AND THERE WERE NO INJURIES. THE VEHICLE WAS TAKEN HOME AND PARKED. THE VEHICLE WAS DESTROYED. THE FAILURE MILEAGE WAS APPROXIMATELY 127,000.
10991745	HONDA	CIVIC	2012	5/13/17	05/26/17	DRIVING ON A RURAL HIGHWAY AND HIT A DEER. IMPACT BENT THE BRACKET THAT HOLDS THE AIRBAG SENSOR COMPLETELY BACKWARDS AND INTO THE SENSOR ITSELF, WHICH CRACKED. AIRBAG NEVER DEPLOYED. NOW, POST REPAIR, AIRBAG WARNING AND LIGHT ARE ON CONSTANTLY.
10993310	HONDA	ACCORD	2013	5/19/17	06/05/17	MY DAUGHTER HIT TELEPHONE PULLING IN A PARKING AT 50 MPH OFF OF A CITY STREET. SHE IS A NEW DRIVER AND WAS SPOOKED BY A CAR TAILGATING HER VERY CLOSE. THE DRIVERS SIDE CURTIN AIR BAG DID DEPLOY. BUT THE DRIVERS STEERING WHEEL AIR BAG DID NOT DEPLOY. THERE WAS A PASSENGER IN FRONT SEAT AND HIS AIR BAG DID DEPLOY. THE SIDE CURTIN ON THE PASSENGER'S SIDE DID NOT DEPLOY. BOTH PASSENGER'S WERE WEARING SEAT BELTS AT THE TIME OF ACCIDENT. QUESTION IS WHY DID THE DRIVERS AIR BAG NOT DEPLOY?
10993353	HONDA	CIVIC	2015	5/29/17	06/06/17	I WAS INVOLVED IN AN ACCIDENT ON 5/29/17. MY CAR WAS HIT ON THE LEFT REAR NEAR THE FENDER WELL. THE CAR SPUN OUT OF CONTROL ACROSS THE INTERSTATE AND HIT THE GUARD RAIL FACING THE TRAFFIC. THE AIR BAGS DID NOT DEPLOY.

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
11006304	HONDA	CR-V	2016	4/20/17	07/19/17	VEHICLE WAS STOPPED AT A LIGHT, AND RECEIVED FRONT CRASH FROM INCOMING VEHICLE. AIR BAGS DID NOT WORK, AND SEATBELT BROKE. PASSENGER RECEIVED SIGNIFICANT BODILY INJURY
11006609	HONDA	CR-V	2015	6/12/17	07/20/17	ON JUNE 12TH, 2017, I PASSED OUT WHILE DRIVING AND HIT A PARKED PICKUP. I WAS TRAVELING AT 50-55 MPH WHEN I CRASHED. MY CAR PUSHED THE PICKUP BACKWARDS 33'. THE PICKUP PUSHED THE CAR BEHIND IT 8' THEN THAT CAR WAS PUSHED BACKWARD INTO ANOTHER CAR. MY CAR AND THE PICKUP WERE TOTALED. MY SIDE AIRBAGS DID NOT DEPLOY. I WAS SEVERELY INJURED. I SUSTAINED 5 BROKEN RIBS, MY LEFT WRIST WAS BROKEN ALONG WITH A BONE IN THE SAME HAND. I HAD A LARGE HEMATOMA ON THE LEFT SIDE OF MY NECK AND A BASEBALL SIZE HEMATOMA ON THE LEFT SIDE OF MY ABDOMEN. MOST OF MY INJURIES WAS FROM THE SEAT BELT. THERE WAS AN ABRASION ACROSS MY NECK. THE MUSCLES IN MY RIGHT CHEST WERE PULLED. ALSO THE MUSCLES AROUND MY RIGHT BREAST AND UNDER MY RIGHT ARM WERE PULLED. ON JULY 3RD, I HAD SURGERY TO REMOVE THE HEMATOMA ON MY LEFT ABDOMEN. IT WAS ATHE SIZE OF TWO FISTS. I HAVE WORN A WOUND VAC SINCE THE SURGERY AND HAVE 2-3 WEEKS TO GO. I RECEIVED A BLOW TO THE TOP OF MY HEAD. I HAD A. RISE ON MY FOREHEAD AND ALONG THE BRIDGE OF MY NOSE. I BELIEVE THE SIDE AIRBAGS SHOULD HAVE DEPLOYED. MY INJURIES WOULD HAVE BEEN SIGNIFICANTLY LESS HAD THE AIRBAGS PROTECTED ME. I'M REQUESTING THAT YOU INVESTIGATE WHO MADE THE PARTS FOR THE AIRBAGS AND WHY DID THEY NOT WORK.
11010652	HONDA	CIVIC	2014	11/5/16	07/25/17	I WAS IN A CAR ACCIDENT AND THE AIRBAG DID NOT DEPLOY. I CONTINUE TO HAVE PAIN AND INJURIES THAT HAVE NOT HEALED.
11046438	HONDA	CIVIC	2012	11/5/17	11/16/17	I WAS IN AN ACCIDENT. THY FRONT OF THY CAR WAS CRUSHED. MY CAR IS DEEMED A LOSS AND TOTAL . THE AIRBAGS NEVER WENT OFF .I WAS DRIVING AN STRUCK A BUCK KILLING HIM INSTANTLY. I WAS WEARING MY SEAT BELT AND HAVE SUFFERED A CONCUSSION FROM THE ACCIDENT.

11051165	HONDA	CIVIC	2015	9/29/17	11/29/17	TL* THE CONTACT OWNED A 2015 HONDA CIVIC. WHILE DRIVING APPROXIMATELY 40 MPH AND DEPRESSING THE BRAKE PEDAL, THE VEHICLE SKID. AS A RESULT, THE CONTACT CRASHED INTO ANOTHER VEHICLE. THE AIR BAGS FAILED TO DEPLOY. THE CONTACT SUSTAINED HEAD AND CHEST INJURIES THAT REQUIRED MEDICAL ATTENTION. A POLICE REPORT WAS FILED. THE VEHICLE WAS TOWED TO A TOWING LOT. THE VEHICLE WAS NOT TAKEN TO A DEALER. THE VEHICLE WAS DESTROYED. THE MANUFACTURER WAS NOT CONTACTED AND MADE AWARE OF THE FAILURE. THE FAILURE MILEAGE WAS UNKNOWN. THE VIN WAS NOT AVAILABLE.
11105044	HONDA	CIVIC	2012	6/29/18	07/02/18	FRONT END COLLISION. 30 MPH. RAN INTO STOPPED CAR AHEAD. AIRBAG DID NOT DEPLOY.
11128250	HONDA	CIVIC	2013	9/4/18	09/08/18	HONDA CIVIC 2013 WAS IN A FRONT END COLLISION WHERE THE CAR WAS TOTALED. AIRBAGS NEVER DEPLOYED. ACCIDENT WAS ON THE HIGHWAY IN MOTION. DRIVER OR PASSENGER AIRBAGS NEVER DEPLOYED. MILEAGE IS ESTIMATED.
11132084	HONDA	CIVIC	2015	9/27/18	09/28/18	MY DAUGHTER WAS INVOLVED IN A FRONTAL COLLISION ON 9/27/2018 IN HER 2015 HONDA CIVIC. THE AIRBAGS DID NOT DEPLOY AND SHE HIT HER HEAD, CHEST, AND PELVIS ON THE STEERING WHEEL. WE HAVE HAD THIS CAR SINCE IT WAS NEW. SHE WAS DRIVING ABOUT 35MPH WHEN A CAR STARTED TO TURN IN FRONT OF HER, AND THEY COLLIDED NEARLY HEAD-ON.
11193687	HONDA	CIVIC	2012	4/1/19	04/03/19	ON APRIL 1, 2019 I WAS INVOLVED IN A COLLISION AT AN INTERSECTION ON CITY STREETS AND THE AIRBAG IN STEERING WHEEL DID NOT DEPLOY HOWEVER THE PASSENGER SIDE CURTAIN AIRBAG DID DEPLOY. THE IMPACT WAS FRONT AND PASSENGER SIDE OF VEHICLE. I HIT THE STEERING WHEEL WITH FORCE AND NOW THE STEERING WHEEL DOES NOT LOCK IN PLACE AND I AM HA ING A LOT OF PAIN IN STERNUM AND RIBS. SHOULDNT THE DRIVER AIRBAG HAVE DEPLOYED? THE CAR IS PROBABLY TOTALED. I AM WAITING FOR INSURANCE ADJUSTER TO INSPECT IT.

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
11203383	HONDA	CIVIC	2014	3/25/19	04/24/19	I WAS HIT BY A CAR TURNING LEFT AND MY AIRBAGS DID NOT DEPLOY. THE CARS SCREEN HAD AN ALERT ON IT WITH THE WORDS "AIRBAG FAILED". MY VIN IS NOT IN THE RECALL HOWEVER I AM CONCERNED. THE ARIBAGS FAILED AND I'M LUCKY THAT I WAS OK. THE CAR IS DEEMED A TOTAL LOSS DUE TO THE AIRBAGS FAILING.
11205512	HONDA	FIT	2015	4/18/19	05/03/19	I WAS STOPPED IN TRAFFIC BECAUSE A FEW CARS AHEAD OF ME SOMEONE WAS STOPPED TO TURN LEFT. I WAS REAR ENDED BY SOMEONE IN A NISSAN ROGUE SUV WHICH HIT ME WITH ENOUGH FORCE TO PUSH MY CAR FORWARD AND SMASH ME INTO A FORD EXPLORER. I WAS HIT TWICE AND MY AIRBAGS DID NOT DEPLOY AND MY CAR SUSTAINED SUBSTANTIAL REAR-END AND FRONT DAMAGE. SO MUCH SO THAT THE CAR WAS DECLARED A TOTAL LOSS. MY AIR BAG DID NOT DEPLOY AND FROM THE DAMAGE DONE SHOULD HAVE. IF IT HAD, I WOULD OF SUSTAINED LESS INJURIES FROM MY ACCIDENT.
11209214	HONDA	CR-V	2015	5/4/19	05/22/19	WE WERE TRAVELING ON A ROAD AT 55 MPH. ANOTHER VEHICLE ABRUPTLY PULLED OUT IN FRONT OF US AT 10 MPH. OUR DRIVER ATTEMPTED TO AVOID COLLISION BY SWERVING TO THE RIGHT MEDIAN. THE IMPACT WAS OUR FRONT DRIVER SIDE HITTING THE OTHER DRIVER'S BACK PASSENGER SIDE. ACCORDING TO WITNESS STATEMENTS, OUR CAR WENT AIR BORN AND INTO A MULTIPLE SPIN SITUATION. WE TOOK OUT A GUARD RAIL. DAMAGE WAS SUSTAINED ON ALL SIDES OF THE VEHICLE, EXCEPT THE ROOF. VEHICLE WAS TOTALED. POLICE RULED FAULT WAS THE OTHER DRIVER. WE WERE WEARING SEAT BELTS. LUGGAGE FLEW OUT THE BACK WINDOW, APPROXIMATELY 30 FEET INTO THE ROAD. THE SIDE AIRBAGS DEPLOYED SUCCESSFULLY. NEITHER FRONT AIRBAG DEPLOYED. GLASS IN WINDSHIELD WAS SHATTERED, BUT PART OF THE GUARD RAIL (WE THINK) TOOK OUT THE GLASS IN A CIRCULAR PATTERN ON THE PASSENGER SIDE.

ODI No.	Make	Model	Year	Failure Date	Complaint Date	Full Text
11218739	HONDA	CIVIC	2013	6/5/19	06/09/19	CAR WAS INVOLVED IN A ROLL OVER ACCIDENT WHICH INCLUDED DRIVER FRONT SIDE IMPACT. CAR WENT OF THE ROAD INTO A DITCH, WENT OVER THE OTHER SIDE OF THE DITCH FLIPPING BACK ON ITS 4 WHEELS. IMPACT ON WHEELS WAS ENOUGH TO KNOCK WHEELS PARTIAL OFF THE CAR WITH BLOWN BACK WINDOW AND CRACKED WINDSHIELD. NEITHER THE DRIVER OR PASSENGER AIRBAGS WERE DEPLOYED. SIDE CURTAIN AIRBAGS WERE DEPLOYED. VEHICLE SUSTAIN TOTAL DAMAGE. DRIVER SUSTAINED LIFE THREATENING INJURIES
11230881	HONDA	ACCORD	2015	5/19/19	07/10/19	I WAS INVOLVED AN ACCIDENT AND MY AIRBAG DIDNT WORKS, WAS A VERY STRONG HITTING, I WAS WAITING IN THE RED LIGHT AND A DODGE CARAVAN HIT ME IN THE FRONT VERY STRONG WHEN SHE MISSED THE RED LIGHT
11232553	HONDA	CR-V	2016	5/26/19	07/16/19	TAMARA RECALL... ON MAY 26, 2019 WE WERE TRAVELING DOWN FROM OUR MOUNTAIN HOME IN SEQUOIA MOUNTAINS ABOVE PORTERVILLE. IT WAS STARTING TO SNOW AT 4 PM. GOING BETWEEN 10 AND 15 MPH, ROUNDING A CURVE, IN LOW GEAR THE CAR LOST TRACTION WENT DOWN A 200 FOOT EMBANKMENT. SMASHED HEAD ON MORE ON THE PASSENGER SIDE, INTO A LARGE BOULDER THE CAR FLIPPED ON ITS DRIVER SIDE AND LANDED IN A CREEK. THE FRONT AIRBAGS DID NOT DEPLOY, SIDE AIRBAGS DID HOWEVER. MY WIFE AND I SUFFERED INJURIES SHE SUFFERED A FRACTURED STERNUM, I SUFFERED A LOWER FRACTURE IN MY VERTEBRAE. FROM THE IMPACT OF THE CAR I WOULD HAVE THOUGHT AT LEAST THE DRIVER SIDE FRONT AIRBAG WOULD HAVE DEPLOYED, IT DID NOT, AND IF THEY HAD IM NOT SURE MY WIFE WOULD HAVE SUFFERED THE INJURIES SHE DID.

11286664	HONDA	ACCORD	2013	11/28/19	12/03/19	ON 11-28-2019@ APPROXIMATELY 1835 HRS. MY HONDA ACCORD LX-AUTOMATIC WAS INVOLVED IN A MULTIPLE CAR ACCIDENT INVOLVING 5 CARS. I AM CONCERNED THAT THE AIRBAGS DID NOT DEPLOYED WHEN THE CAR WAS HIT FROM THE REAR AND PUSHED INTO THE CAR IN FRONT. 2 IMPACTS WERE FELT FROM BEHIND FROM. AT THIS TIME THE CAR IS DISABLED AND I AM AWAITING FOR ESURANCE TO EVALUATE MY LOSS. I AM VERY CONCERN THAT THIS COULD HAVE POTENTIALLY BEEN A DEADLY SITUATION FOR MYSELF AS WELL AS THE OCCUPANTS OF THE CAR. I WAS ON THE LEFT LANE TRAVELING WESTBOUND WHEN THE CAR IN FRONT OF ME SUDDENLY SLAMMED ON THE BREAKS AND THE CAR FROM BEHIND PUSHED MY CAR INTO THE CAR IN FRONT OF ME. THE SPEED LIMIT ON THE I-495 WESTBOUND IS 50 MPH.
11297555	HONDA	CR-V	2016	12/18/19	01/07/20	I WAS INVOLVED IN A FRONTAL CRASH ON THE FREEWAY AND MY AIRBAG DID NOT DEPLOY. MY CAR WAS TOTALED WITH EXTENSIVE FRONT END DAMAGE IN WHICH BOTH DOORS COULD NOT OPEN ALL THE WAY DUE TO STRUCTURAL DAMAGE. I AM STILL AWAITING THE POLICE REPORT. MY NOSE WAS BRUISED AND HAD LACERATIONS.

 VIN: 19UUA8F29CA019443

Engine: V6 Cylinder Engine
 Transmission: 6-Speed A/T
 Colors: Bellanova White Pearl / Ebony
 Mileage: 109,496

Stock #: 2018-193

MECHANICAL

- 3.5L SOHC PGM-FI 24-valve VTEC V6 engine
- Drive-by-wire throttle system
- 6-speed sequential SportShift automatic transmission -inc: paddle shifters, grade logic control
- Front wheel drive
- Independent double wishbone front suspension
- Independent multi-link rear suspension
- Front/rear stabilizer bars
- Electric variable pwr-assisted rack & pinion steering
- Pwr ventilated front/solid rear disc brakes
- Integrated dual outlet exhaust

EXTERIOR

- 17" x 8" 7-spoke alloy wheels
- P245/50VR17 all-season tires
- Temporary spare tire
- Pwr operated moonroof w/tilt -inc: auto-open/close, auto-reverse, key-off operation
- Xenon high-intensity discharge (HID) headlights w/auto-on/off
- Front fog lights
- LED tail lights
- Acoustic glass windshield (2011)
- Heated pwr mirrors w/memory, reverse-gear tilt down, integrated LED directional signals
- Speed-sensitive variable intermittent windshield wipers (2011)
- Body-color door handles

ENTERTAINMENT

- XM satellite radio *Available in 48 contiguous United States, first 90 days are free*
- Radio data system
- Speed-sensitive volume control

INTERIOR

- Active front headrests
- Rear bench seat w/adjustable headrests
- Rear seat center armrest w/locking trunk pass-through
- Front center console -inc: sliding tray
- Black carpeting
- Front/rear carpeted floor mats
- Theft deterrent system w/electronic immobilizer
- LED back-lit instruments w/progressive illumination (2011)
- Multi-info display

- Outside temp gauge
- Trip computer
- Maintenance Minder system
- Alarm system (2011)
- Pwr windows w/front auto up-down, auto-reverse, remote open, key-off operation
- HomeLink universal garage door opener
- Dual zone/mode automatic climate control -inc: air filtration, automatic humidity control, rear vents w/controls
- Rear window defroster w/timer (2011)
- Auto-dimming rearview mirror
- Dual illuminated vanity mirrors -inc: driver card holder (2011)
- Ambient cabin lighting -inc: footwell lighting, console lighting
- Footwell lighting
- Door-mounted courtesy lights (2011)
- Front/rear LED map lights
- Leather-wrapped gearshift knob
- Front/rear beverage holders
- (2) 12-volt pwr outlets
- Simulated wood trim

SAFETY

- 4-wheel anti-lock braking system (ABS) -inc: electronic brake force distribution, brake assist
- Vehicle stability assist (VSA) w/traction control
- Advanced compatibility engineering (ACE) body structure
- Side-impact door beams (2011)
- Impact absorbing front/rear crumple zones (2011)
- Daytime running lights
- Dual stage multiple threshold front airbags
- Front side-impact airbags w/passenger occupant position detection system
- Front/rear side-curtain airbags
- 3-point seat belts
- Front seat belt height adjusters, load limiters, pretensioners
- Lower anchors & tethers for children (LATCH)
- Rear child safety door locks
- Emergency trunk release
- Tire pressure monitor w/location & pressure indicators

- Tilt / Telescoping Steering Column Luxury Front and Rear Floor Mats EXTERIOR FEATURES Dual Rear Exhaust with Chrome Tips Bi-Function Halogen Projector Headlamps Automatic Headlamps Projector Fog Lamps LED Tail Lamps Chrome Exterior Mirrors Power Heated Exterior Mirrors w/ Manual Fold-Away 17-Inch x 6.5-Inch Aluminum Wheels 225/55R17 BSW All Season Touring Tires \$50 -\$500

Annual fuel cost \$2,300

Fuel Economy 23 MPG combined city/hwy 20 city 31 highway 4.3 gallons per 100 miles

You save \$100 in fuel costs over 5 years compared to the average new vehicle.

Actual results will vary for many reasons, including driving conditions and how you drive and maintain your vehicle. The average new vehicle gets 23 MPG and cost \$11,600 to fuel over 5 years. Cost estimates are based on 15,000 miles per year at \$3.35 per gallon. MPGe is miles per gasoline gallon equivalent. Vehicle emissions are a significant cause of climate change and smog.

GOVERNMENT 5-STAR SAFETY RATINGS

Table with columns: Overall Vehicle Score (5 stars), Frontal Crash (5 stars), Side Crash (5 stars), Rollover (5 stars), Driver (5 stars), Passenger (5 stars), Front seat (5 stars), Rear seat (5 stars). Includes text: 'Based on the risk of injury in a frontal impact. Should ONLY be compared to other vehicles of similar size and weight.' and 'Based on the risk of injury in a side impact. Should ONLY be compared to other vehicles of similar size and weight.'

Star ratings range from 1 to 5 stars (★★★★★) with 5 being the highest. Source: National Highway Traffic Safety Administration (NHTSA) www.safercar.gov or 1-888-327-4236

The safety ratings above are based on Federal Government tests of particular vehicles equipped with certain features and options. The performance of this vehicle may differ. Bumper Performance This vehicle is equipped with bumper systems that can withstand a frontal barrier impact speed of 2.5 miles per hour and a rear barrier impact speed of 2.5 miles per hour with no more damage than allowed by the Federal bumper standard. The Federal bumper standard allows damage to the bumpers and attaching hardware and specifies barrier tests to be conducted at 2.5 miles per hour.

GOVERNMENT 5-STAR SAFETY RATINGS

Overall Vehicle Score	Not Rated
Frontal Crash	Driver: ★★ ★★ ★★ Passenger: ★★ ★★ ★★
Side Crash	Front seat: Not Rated Rear seat: Not Rated
Rollover	★★★★

Star ratings range from 1 to 5 stars (★★★★★) with 5 being the highest.
Source: National Highway Traffic Safety Administration (NHTSA)
www.safercar.gov or 1-888-327-4236

The safety ratings above are based on Federal Government tests of particular vehicles equipped with certain features and options. The performance of this vehicle may differ. This vehicle is equipped with bumper systems that can withstand a frontal barrier impact speed of 2.5 miles per hour and a rear barrier impact speed of 2.5 miles per hour with no more damage than allowed by the Federal bumper standard. The Federal bumper standard allows damage to the bumpers and attaching hardware and specifies barrier tests to be conducted at 2.5 miles per hour.

EPA Fuel Economy and Environment

Electric Vehicle

Fuel Economy **112** MPGe
 Minicompact cars range from 15 to 116 MPGe. The best vehicle rates 119 MPGe.

You Save \$6,000
 in fuel costs over 5 years compared to the average new vehicle.

Annual fuel Cost **\$600**

Actual results will vary for many reasons, including driving conditions and how you drive and maintain your vehicle. The average new vehicle gets 25 MPG and cost \$9,000 to fuel over 5 years. Cost estimates are based on 15,000 miles per year at 30.13 per kW-hr. MPGe is miles per gasoline gallon equivalent. Vehicle emissions are a significant cause of climate change and smog.

GOVERNMENT 5-STAR SAFETY RATINGS

This vehicle has not been rated by the government for frontal crash, side crash or rollover risk.

Source: National Highway Traffic Safety Administration (NHTSA)
www.safercar.gov or 1-888-327-4236

Bumper Performance

This vehicle is equipped with bumper systems that can withstand a front/rear barrier impact speed of 2.5 miles per hour and a rear barrier impact speed of 2.5 miles per hour with no more damage than allowed by the Federal bumper standard. The Federal bumper standard allows damage to the bumpers and attaching hardware and specifies barrier tests to be conducted at 2.5 miles per hour.

Year: 2014
 Make: Honda
 Model: CR-V 2WD 5dr EX
 VIN: 2HKRM3H51EH543901

Engine: 4 Cylinder Engine
 Transmission: 5-Speed A/T
 Colors: Urban Titanium Metallic / Beige

Stock #: 2539A

MECHANICAL

- 4.44 Axle Ratio
- GWR: 4,464 lbs
- Front-Wheel Drive
- 36-Amp/Hr 410CCA Maintenance-Free Battery
- 850# Maximum Payload
- Gas-Pressurized Shock Absorbers
- Front And Rear Anti-Roll Bars
- Electric Power-Assist Speed-Sensing Steering
- 15.3 Gal. Fuel Tank
- Single Stainless Steel Exhaust
- Strut Front Suspension w/Coil Springs
- Multi-Link Rear Suspension w/Coil Springs
- 4-Wheel Disc Brakes w/4-Wheel ABS, Front Vented Discs, Brake Assist and Hill Hold Control

EXTERIOR

- Wheels: 17" 10-Spoke Alloy
- Tires: P225/65R17 102T All-Season
- 6.5" Wheels w/Silver Accents
- Steel Spare Wheel
- Compact Spare Tire Mounted Inside Under Cargo
- Clearcoat Paint
- Express Open/Close Sliding And Tilting Glass 1st Row Sunroof w/Sunshade
- Body-Colored Front Bumper w/Black Rub Strip/Fascia Accent
- Body-Colored Rear Bumper w/Black Rub Strip/Fascia Accent
- Black Bodyside Cladding and Black Wheel Well Trim
- Chrome Side Windows Trim and Black Front Windshield Trim
- Body-Colored Door Handles
- Body-Colored Power Side Mirrors w/Convex Spotter and Manual Folding
- Fixed Rear Window w/Fixed Interval Wiper, Heated Wiper Park and Defroster
- Deep Tinted Glass
- Speed Sensitive Variable Intermittent Wipers
- Fully Galvanized Steel Panels
- Chrome Grille
- Liftgate Rear Cargo Access
- Programmable Aero-Composite Halogen Daytime Running Headlamps w/Delay-Off
- Front Fog Lamps

ENTERTAINMENT

- Radio: AM/FM/CD Audio System w/6 Speakers -inc: 160-Watts, Bluetooth streaming audio, Pandora Internet radio compatibility, USB audio interface, MP3/auxiliary input jack, MP3/Windows Media Audio playback capability, Radio Data System and Speed-Sensitive Volume Control
- Radio w/Clock and Steering Wheel Controls
- Audio Theft Deterrent
- Integrated Roof Antenna
- Bluetooth Handsfreelink Wireless Phone Connectivity
- 1 LCD Monitor In The Front

INTERIOR

- Front Bucket Seats -inc: driver's seat w/manual height adjustment
- Driver Seat
- 4-Way Passenger Seat -inc: Manual Recline and Fore/Aft Movement
- 60-40 Folding Split-Bench Front Facing Flip Forward Cushion/Seatback Rear Seat

- Manual Tilt/Telescoping Steering Column
- Front Cupholder
- Rear Cupholder

GOVERNMENT 5-STAR SAFETY RATINGS

Overall Vehicle Score ★ ★ ★ ★ ★
 Based on the combined rating of frontal, side and rollover. Should ONLY be compared to other vehicles of similar size and weight.

Frontal	Driver	★ ★ ★ ★ ★
Crash	Passenger	★ ★ ★ ★ ★
Based on the risk of injury in a frontal impact. Should ONLY be compared to other vehicles of similar size and weight.		
Side	Front seat	★ ★ ★ ★ ★
Crash	Rear seat	★ ★ ★ ★ ★
Based on the risk of injury in a side impact.		
Rollover		★ ★ ★ ★ ★
Based on the risk of rollover in a single-vehicle crash.		

Star ratings range from 1 to 5 stars (★★★★★) with 5 being the highest.
 Source: National Highway Traffic Safety Administration (NHTSA).

Fuel Economy

MPG 29 combined city/hwy

25 city

36 highway

3.4 gallons per 100 miles

You save \$1,250 in fuel costs over 5 years compared to the average new vehicle.

Annual fuel cost \$1,550

Fuel Economy & Greenhouse Gas Rating (tailpipe only)

Smog Rating (tailpipe only)

fueleconomy.gov

Calculate personalized estimates and compare vehicles

Actual results will vary for many reasons, including driving conditions and how you drive and maintain your vehicle. The average new vehicle gets 25 MPG and costs \$9,000 to fuel over 5 years. Cost estimates are based on 15,000 miles per year at \$3.00 per gallon. MPG is miles per gasoline gallon equivalent. Vehicle emissions are a significant cause of climate change and smog.

EPA Fuel Economy and Environment

Fuel Economy
24 MPG
 MIDSIZE CARS range from 12 to 136 MPG. The best vehicle rates 136 MPG.
21 city
30 highway
 4.2 gallons per 100 miles

Annual fuel cost
\$1,700

Fuel Economy & Greenhouse Gas Rating (tailpipe only)
5

Smog Rating (tailpipe only)
5

This vehicle emits 371 grams CO₂ per mile. The best emits 0 grams per mile (tailpipe only). Producing and distributing fuel also create emissions; learn more at fueleconomy.gov.

Actual results will vary for many reasons, including driving conditions and how you drive and maintain your vehicle. The average new vehicle gets 27 MPG and costs \$7,500 to fuel over 5 years. Cost estimates are based on 15,000 miles per year at \$2.70 per gallon. MPGe is miles per gasoline gallon equivalent. Vehicle emissions are a significant cause of climate change and smog.

GOVERNMENT 5-STAR SAFETY RATINGS

Overall Vehicle Score ★ ★ ★ ★ ★
 Based on the combined rating of frontal, side and rollover. Should ONLY be compared to other vehicles of similar size and weight.

Frontal	Driver	★ ★ ★ ★ ★
Crash	Passenger	★ ★ ★ ★ ★
Side	Front seat	★ ★ ★ ★ ★
Crash	Rear seat	★ ★ ★ ★ ★
Rollover		★ ★ ★ ★ ★

Star ratings based on the risk of rollover in a single-vehicle crash.

Star ratings range from 1 to 5 stars (★★★★★) with 5 being the highest.

17 city
23 highway

Annual fuel cost
\$2,950

5.3 gallons per 100 miles

Fuel Economy & Greenhouse Gas Rating (tailpipe only)

4

Fuel Economy & Greenhouse Gas Rating (tailpipe only)

10 Best
1 Worst

This vehicle emits 464 grams CO₂ per mile. The best emits 0 grams CO₂ per mile (tailpipe only). Producing and distributing fuel also create emissions; learn more at fuelconomy.gov.

Actual results will vary for many reasons, including driving conditions and how you drive and maintain your vehicle. The average new vehicle gets 23 MPG and costs \$11,500 to fuel over 5 years. Cost estimates are based on 15,000 miles per year at \$3.75 per gallon. MPG is miles per gasoline gallon equivalent. Vehicle emissions are a significant cause of climate change and smog.

Year: 2013
 Make: Toyota
 Model: Avalon LIMITED
 VIN: 4T1BK1EB6DU020105

Engine: V6 Cylinder Engine
 Transmission: 6AT
 Exterior: Moulin Rouge Mica
 Interior: Almond

MECHANICAL

- 3.5L DOHC EFI 24-valve V6 engine
- Dual variable valve timing w/intelligence
- Push button start
- 6-speed automatic transmission w/sequential shift -inc: flex-start lock-up clutch, transmission fluid warmer
- Front wheel drive
- Battery saver
- MacPherson strut front suspension - inc: offset coil springs, stabilizer bar
- Dual-link independent MacPherson strut rear suspension -inc: offset coil springs, stabilizer bar
- Variable-assist pwr rack & pinion steering
- Pwr ventilated front/solid rear disc brakes
- Dual chrome-tipped integrated exhaust

- Rear defogger w/timer
- Illuminated glove box
- Wood-grain style trim -inc: smoked chrome interior accents & door handles
- Overhead console w/front map lights & sunglasses storage
- Dual sun visors w/illuminated visor vanity mirrors
- Rear passenger reading lamps

SAFETY

- 4-wheel anti-lock brake system (ABS)
- Smart stop technology
- Electronic brakeforce distribution (EBD) w/brake assist (BA)
- Front/rear crumple zones
- Side-impact door beams
- Driver & front passenger advanced airbags -inc: occupant sensor
- Driver & front passenger seat-mounted side-impact airbags
- Front & rear side curtain airbags
- Driver knee airbag
- 3-point seatbelts for all passenger seating positions -inc: front adjustable shoulder belt anchors, emergency locking retractor (ELR), passenger automatic locking retractors (ALR)
- Outboard front seatbelt pretensioners w/force limiters
- Child restraint system -inc: rear seat lower anchors, tether anchor brackets
- Child protector rear door locks
- Tire pressure monitor system
- Internal trunk-release handle
- Whiplash-lessening front seats

EXTERIOR

- Temporary spare tire
- Color-keyed bumpers
- LED taillights
- Acoustic noise-reducing windshield

INTERIOR

- Rear seat -inc: center armrest w/(2) cup holders, trunk pass through
- Center console w/sliding cover/armrest -inc: storage compartment, dual cup holders, 12V aux pwr outlet
- eBin sliding electronic device holder - inc: wire management feature, illuminated interior storage, aux audio jack, USB port, (2) 12V aux pwr outlets
- Multi-information display -inc: twin tripmeters, outside temp display, fuel economy history, avg fuel economy, distance-to-empty
- Pwr windows -inc: auto up/down, jam protection, retained pwr
- Pwr door locks w/anti-lockout feature
- Pwr trunk & fuel-filler door releases

DELIVERY PROCESSING AND HANDLING FEE 1,195.00

TOTAL \$42,632.00

The New Vehicle Limited Warranty provides 3-year/50,000-mile coverage, plus 9-year/unlimited-mile coverage. Excludes 200,000-mile powertrain coverage. For additional service contract see available for VW vehicles. Manufacturer's suggested retail price includes manufacturer's recommended pre-delivery service, Gasoline, license and title fees, applicable dealer, state and local taxes and dealer and distributor installed options and accessories are not included in the manufacturer's suggested retail price. ToyotaCare, which covers normal factory scheduled maintenance for two years or 25,000 miles, whichever occurs first, is an extra cost. See participating dealer for eligibility and coverage details.

EXHIBIT 8

TOYOTA			
Make	Model Year	Representation re: Class Vehicle Safety	Source and Author
Avalon	2012	Seven Airbags... Avalon's advanced Supplemental Restraint System (SRS) is a marvel of safety technology. Employing sophisticated sensors, the system includes seven airbags: driver and front passenger airbags, front and rear side curtain airbags, front seat-mounted side airbags for the driver and front passenger, and a driver knee airbag. Also at the ready are 3-point front seatbelts with adjustable shoulder anchors and an energy-absorbing steering column. In addition, front and rear crumple zones and side-impact door beams surround the passenger cabin.	Toyota Avalon 2012 Vehicle Brochure Toyota Sales USA
Avalon	2013	Ten airbags — includes driver and front passenger Advanced Airbag System, driver and front passenger seat-mounted side airbags, driver and front passenger knee airbags, rear seat-mounted side airbags, and front and rear side curtain airbags	Toyota Avalon 2013 Vehicle Brochure Toyota Sales USA
Avalon	2014	Add a class-leading ten standard airbags and you have a system working together with one purpose in mind: a more confident drive Ten airbags: Avalon comes standard with ten airbags, including driver and front passenger Advanced Airbag System, driver and front passenger seat-mounted side airbags, driver and front passenger knee airbags, rear seat-mounted side airbags and front and rear side curtain airbags.	Toyota Avalon 2014 Vehicle Brochure Toyota Sales USA

Lancer	2013	<p>The Insurance Institute for Highway Safety (IIHS) awarded Lancer the highest rating for front and rear-impact safety for many reasons. Including the extensive use of high-tension steel in the RISE body for increased rigidity, crumple zones for collision safety, a seven-airbag safety system, and anti-lock brakes with Electronic Brakeforce Distribution to help ensure that drivers stay in control. It all goes to prove that when it comes to keeping drivers and passengers safe, the 2013 Lancer is clearly different for a reason.</p> <p>Seven-Airbag System</p> <p>The Lancer offers standard advanced dual-stage front SRS airbags, driver and passenger side-impact airbags and front and rear side-curtain airbags on all Lancer models. Sensors evaluate the deceleration during an impact, the position of the driver's seat, and the weight on the front passenger's seat to provide the appropriate level of front airbag deployment. A first-in-segment feature, Lancer's standard driver's side knee airbag helps to prevent injury by stabilizing the legs and lower body of the driver in certain frontal collisions.</p>	<p>Mitsubishi Webpage available on April 14, 2014</p> <p>Available at: http://www.mitsubishicars.com/MMNA/jsp/lancer/13/safety (last visited May 18, 2020)</p> <p>Mitsubishi USA</p>

Lancer Series	2014	<p>When it comes to safety, our goal is simple: Continue to improve. In fact, both Lancer and Sportback, 4WD models excluded, are rated a 2013 Top Safety Pick with the Insurance Institute for Highway Safety.</p> <p>Seven-Airbag Safety</p> <p>Lancer’s Supplemental Restraint System (SRS) consists of seven airbags, including a dual-stage front, a front-seat side, and side-impact curtain airbags. Lancer also features a standard driver-side knee airbag, which helps stabilize the driver’s legs and lower body in the event of a collision.</p>	<p>Mitsubishi Lancer 2014 Series Brochure</p> <p>Mitsubishi USA</p>
Lancer	2014	<p><i>Mitsubishi Lancer named an Insurance Institute For Highway Safety “Top Safety Pick”</i></p> <p>It is great to see our very popular Mitsubishi Lancer once again named as a “Top Safety Pick” by the Insurance Institute for Highway Safety, said Don Swearingen, Executive Vice President of MMNA. Lancer is a versatile compact sports sedan that has an exceptional degree of safety, excellent fuel economy, sporty performance and plentiful standard features all at price to fit almost any budget.</p>	<p>July 30, 2014 Press Release</p> <p>Mitsubishi USA</p>

EXHIBIT 13

Vehicle	Year	Page	Author	Statement
Avalon	2012	106	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Avalon	2012	106	Toyota USA and Toyota Japan	Driver airbag/front passenger airbag can help protect the head and chest of the driver and front passenger from impact with interior components.
Avalon	2012	108	Toyota USA and Toyota Japan	Your vehicle is equipped with "ADVANCED AIRBAGS" designed based on US motor vehicle safety standards (FMVSS208). The airbag system controls airbag deployment power for the driver and front passenger. The driver airbag system consists of the driver seat's position sensor etc. The front passenger's airbag system consists of the front passenger occupant classification sensor etc. In certain types of severe frontal or side impacts, the SRS airbag system triggers the airbag inflators. A chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.
Avalon	2012	109	Toyota USA and Toyota Japan	The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).
Avalon	2012	478	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.
Avalon	2013	34	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Avalon	2013	34	Toyota USA and Toyota Japan	SRS driver airbag/front passenger airbag can help protect the head and chest of the driver and front passenger from impact with interior components.
Avalon	2013	36	Toyota USA and Toyota Japan	Your vehicle is equipped with ADVANCED AIRBAGS designed based on the US motor vehicle safety standards (FMVSS208). The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. As the airbags deploy, a chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.
Avalon	2013	36	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Avalon	2013	40	Toyota USA and Toyota Japan	For Safety Connect subscribers, if the SRS airbags deploy or in the event of a severe rear-end collision, the system is designed to send an emergency call to the response center, notifying them of the vehicle's location (without needing to push the "SOS" button) and an agent will attempt to speak with the occupants to ascertain the level of emergency and assistance required. If the occupants are unable to communicate, the agent automatically treats the call as an emergency and helps to dispatch the necessary emergency services.
Avalon	2013	41	Toyota USA and Toyota Japan	The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).
Avalon	2013	386	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or when an airbag inflates upon collision, the fuel pump shut off system stops the supply of fuel to the engine.

The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. As the airbags deploy, a chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.
Avalon Hybrid	2018	39	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Avalon Hybrid	2018	43	Toyota USA and Toyota Japan	For Safety Connect subscribers, if the SRS airbags deploy or in the event of a severe rear-end collision, the system is designed to send an emergency call to the response center, notifying them of the vehicle's location (without needing to push the "SOS" button) and an agent will attempt to speak with the occupants to ascertain the level of emergency and assistance required. If the occupants are unable to communicate, the agent automatically treats the call as an emergency and helps to dispatch the necessary emergency services.
Avalon Hybrid	2018	44	Toyota USA and Toyota Japan	The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).
Corolla	2011	85	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Corolla	2011	85	Toyota USA and Toyota Japan	Driver airbag and front passenger airbag can help protect the head and chest of the driver and front passenger from impact with interior components.

Vehicle	Year	Page	Author	Statement
Corolla	2011	86	Toyota USA and Toyota Japan	Your vehicle is equipped with ADVANCED AIRBAGS designed based on US motor vehicle safety standards (FMVSS208). The airbag system controls airbag deployment power for the driver and front passenger. The driver airbag system consists of the driver seat's position sensor etc. The front passenger's airbag system consists of the front passenger occupant classification sensor etc.
Corolla	2011	87	Toyota USA and Toyota Japan	The SRS airbag system is controlled by the airbag sensor assembly. The airbag sensor assembly consists of a safing sensor and an airbag sensor. In certain types of severe frontal or side impacts, the SRS airbag system triggers the airbag inflators.
Corolla	2011	88	Toyota USA and Toyota Japan	The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).
Corolla	2011	92	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Corolla	2011	421	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.
Corolla	2012	86	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Corolla	2012	86	Toyota USA and Toyota Japan	Driver airbag and front passenger airbag Can help protect the head and chest of the driver and front passenger from impact with interior components.

Tacoma	2013	95	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Tacoma	2013	402	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.
Tacoma	2014	86	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Tacoma	2014	86	Toyota USA and Toyota Japan	Driver airbag/front passenger airbag Can help protect the head and chest of the driver and right front passenger from impact with interior components.
Tacoma	2014	88	Toyota USA and Toyota Japan	Your vehicle is equipped with ADVANCED AIRBAGS designed based on the US motor vehicle safety standards (FMVSS208). The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. As the airbags deploy, a chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants. Bench type front seat: The SRS airbags are designed to protect the driver and right front passenger, and they are not designed to protect an occupant in the front center seating position.
Tacoma	2014	89	Toyota USA and Toyota Japan	The SRS front airbag will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12-18 mph [20-30 km/h] frontal collision with a fixed wall that does not move or deform).
Tacoma	2014	94	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Tacoma	2014	483	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.
Tacoma	2015	82	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Tacoma	2015	82	Toyota USA and Toyota Japan	Driver airbag/front passenger airbag Can help protect the head and chest of the driver and right front passenger from impact with interior components.
Tacoma	2015	84	Toyota USA and Toyota Japan	Your vehicle is equipped with ADVANCED AIRBAGS designed based on the US motor vehicle safety standards (FMVSS208). The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. As the airbags deploy, a chemical reaction in the inflators quickly fills the airbags with non-toxic gas to help restrain the motion of the occupants.

Tacoma	2019	37	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Tacoma	2019	41	Toyota USA and Toyota Japan	The SRS front airbags will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12 - 18 mph [20 - 30 km/h] frontal collision with a fixed wall that does not move or deform).
Tacoma	2019	567	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or when an airbag inflates upon collision, the fuel pump shut off system stops supply of fuel to the engine.
Tundra	2012	122	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Tundra	2012	122	Toyota USA and Toyota Japan	Driver airbag/front passenger airbag Can help protect the head and chest of the driver and right front passenger from impact with interior components.

Vehicle	Year	Page	Author	Statement
Tundra	2012	124	Toyota USA and Toyota Japan	Your vehicle is equipped with ADVANCED AIRBAGS designed based on US motor vehicle safety standards (FMVSS208). The airbag system controls airbag deployment power for the driver and right front passenger. The driver airbag system consists of the driver seat's position sensor etc. The front passenger's airbag system consists of the front passenger occupant classification sensor etc. The main SRS airbag system components are shown above. The SRS airbag system is controlled by the airbag sensor assembly. The airbag sensor assembly consists of a safing sensor and an airbag sensor. Front bench type seat: The SRS airbags are designed to protect the driver and right front passenger, and they are not designed to protect an occupant in the front center seating position. In certain types of severe frontal or side impacts, the SRS airbag system triggers the airbag inflators.
Tundra	2012	125	Toyota USA and Toyota Japan	The SRS front airbag will deploy in the event of an impact that exceeds the set threshold level (the level of force corresponding to an approximately 12-18 mph [20-30 km/h] frontal collision with a fixed wall that does not move or deform).
Tundra	2012	129	Toyota USA and Toyota Japan	The SRS airbags are supplemental devices to be used with the seat belts.
Tundra	2012	608	Toyota USA and Toyota Japan	To minimize the risk of fuel leakage when the engine stalls or an airbag inflates upon collision, the fuel pump shut off system stops supplying fuel to the engine.
Tundra	2013	122	Toyota USA and Toyota Japan	The SRS airbags inflate when the vehicle is subjected to certain types of severe impacts that may cause significant injury to the occupants. They work together with the seat belts to help reduce the risk of death or serious injury.
Tundra	2013	122	Toyota USA and Toyota Japan	Driver airbag/front passenger airbag Can help protect the head and chest of the driver and right front passenger from impact with interior components.
Tundra	2013	124	Toyota USA and Toyota Japan	Your vehicle is equipped with ADVANCED AIRBAGS designed based on the US motor vehicle safety standards (FMVSS208). The airbag sensor assembly (ECU) controls airbag deployment based on information obtained from the sensors etc. shown in the system components diagram above. This information includes crash severity and occupant information. EXHIBIT 14

Vehicle	Year	Page	Author	Statement
Sonata	2011	38	Hyundai USA	Generally, air bags are designed to inflate by the severity of a collision and its direction. These two factors determine whether the sensors sendout an electronic deployment/inflation signal.
Sonata	2011	38	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata	2011	41	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the ignition switch is ON to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Sonata	2011	42	Hyundai USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Sonata	2011	44	Hyundai USA	The occupant classification system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not. The driver's front air bag is not affected or controlled by the occupant classification system.
Sonata	2011	49	Hyundai USA	Your vehicle is equipped with a Supplemental Restraint (Air Bag) System and lap/shoulder belts at both the driver and passenger seating positions.
Sonata	2011	49	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity. The SRS uses sensors to gather information about the driver's seat position, the driver's and front passenger's seat belt usage and impact severity.
Sonata	2011	50	Hyundai USA	The advanced SRS offers the ability to control the air bag inflation within two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts. According to the impact severity, seating position and seat belt usage, the SRSCM [SRS Control Module] (SRS Control Module) controls the air bag inflation.
Sonata	2011	57	Hyundai USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Sonata	2012	38	Hyundai USA	Generally, air bags are designed to inflate by the severity of a collision and its direction. These two factors determine whether the sensors sendout an electronic deployment/ inflation signal.
Sonata	2012	38	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata	2012	41	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the ignition switch is ON to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.

Sonata	2014	57	Hyundai USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Sonata	2015	47	Hyundai USA	Your vehicle is equipped with a Advanced Supplemental Restraint System (SRS) and lap/shoulder belts at both the driver and passenger seating positions.

Vehicle	Year	Page	Author	Statement
Sonata	2015	47	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and front passengers with additional protection than that offered by the seat belt system alone. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity.
Sonata	2015	47	Hyundai USA	The advanced SRS offers the ability to control the air bag inflation within two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts. According to the impact severity, and seat belt usage, the SRS Control Module (SRSCM) controls the air bag inflation.
Sonata	2015	51	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the Engine Start/Stop button is in the ON position to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Sonata	2015	52	Hyundai USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/inflation signal.
Sonata	2015	52	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata	2015	54	Hyundai USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver or the front passenger forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Sonata	2015	56	Hyundai USA	The OCS is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not. The driver's front air bag is not affected or controlled by the OCS.
Sonata	2015	63	Hyundai USA	Front air bags and the driver's knee air bag are designed to inflate in a frontal collision depending on the severity, speed or angles of impact of the front collision.
Sonata	2016	46	Hyundai USA	The front air bags are designed to supplement the three-point seat belts. For these air bags to provide protection, the seat belts must be worn at all times when driving.
Sonata	2016	47	Hyundai USA	Your vehicle is equipped with a Advanced Supplemental Restraint System (SRS) and lap/shoulder belts at both the driver and passenger seating positions.
Sonata	2016	47	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and front passengers with additional protection than that offered by the seat belt system alone. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity. The seat belt buckle sensors determine if the driver and front passenger's seat belts are fastened. These sensors provide the ability to control the SRS deployment based on whether or not the seat belts are fastened, and how severe the impact is.
Sonata	2016	49	Hyundai USA	According to the impact severity, and seat belt usage, the SRS control Module (SRSCM [SRS Control Module]) controls the air bag inflation. Failure to properly wear seat belts can increase the risk or severity of injury in an accident.
Sonata	2016	51	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the Engine start/stop button is in the ON position to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.

Vehicle	Year	Page	Author	Statement
Sonata	2016	52	Hyundai USA	During a frontal collision, sensors will detect the vehicle's deceleration. If the rate of deceleration is high enough, the control unit will inflate the front air bags. The front air bags help protect the driver and front passenger by responding to frontal impacts in which seat belts alone cannot provide adequate restraint.
Sonata	2016	52	Hyundai USA	Air bag deployment depends on a number of factors including vehicle speed, angles of impact and the density and stiffness of the vehicles or objects which your vehicle impacts during a collision.
Sonata	2016	52	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata	2016	53	Hyundai USA	When the SRSCM [SRS Control Module] detects a sufficiently severe impact to the front of the vehicle, it will automatically deploy the front air bags.
Sonata	2016	54	Hyundai USA	After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Sonata	2016	56	Hyundai USA	The OCS is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not. The driver's front air bag is not affected or controlled by the OCS.
Sonata	2017	48	Hyundai USA	The front air bags are designed to supplement the three-point seat belts. For these air bags to provide protection, the seat belts must be worn at all times when driving.
Sonata	2017	49	Hyundai USA	Your vehicle is equipped with a Advanced Supplemental Restraint System (SRS) and lap/shoulder belts at both the driver and passenger seating positions.
Sonata	2017	49	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and front passengers with additional protection than that offered by the seat belt system alone. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity. The seat belt buckle sensors determine if the driver and front passenger's seat belts are fastened. These sensors provide the ability to control the SRS deployment based on whether or not the seat belts are fastened, and how severe the impact is.
Sonata	2017	49	Hyundai USA	According to the impact severity, and seat belt usage, the SRS control Module (SRSCM) controls the air bag inflation. Failure to properly wear seat belts can increase the risk or severity of injury in an accident.
Sonata	2017	53	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the Engine start/stop button is in the ON position to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Sonata	2017	54	Hyundai USA	During a frontal collision, sensors will detect the vehicle's deceleration. If the deceleration rate (measured in g-force) is high enough, the control unit will inflate the front air bags. The front air bags help protect the driver and front passenger by responding to frontal impacts in which seat belts alone cannot provide adequate restraint.
Sonata	2017	54	Hyundai USA	Air bag deployment depends on a number of factors including vehicle speed, angles of impact and the density and stiffness of the vehicles or objects which your vehicle impacts during a collision.
Sonata	2017	54	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.

Vehicle	Year	Page	Author	Statement
Sonata	2017	55	Hyundai USA	When the SRSCM [SRS Control Module] detects a sufficiently severe impact to the front of the vehicle, it will automatically deploy the front air bags.
Sonata	2017	56	Hyundai USA	After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Sonata	2017	58	Hyundai USA	The OCS is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not. The purpose is to help reduce the risk of injury or death from an inflating air bag to certain front passenger seat occupants, such as children, by requiring the air bag to be automatically turned OFF.
Sonata	2018	22	Hyundai USA	Air bags are designed to supplement the seat belt as an additional safety device, but they are not a substitute. Most states require all occupants of a vehicle to wear seat belts.
Sonata	2018	46	Hyundai USA	This vehicle is equipped with an Advanced Supplemental Air Bag System for the driver's seat and front passenger's seats.
Sonata	2018	47	Hyundai USA	Your vehicle is equipped with a Advanced Supplemental Restraint System (SRS) and lap/shoulder belts at both the driver and passenger seating positions.
Sonata	2018	47	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and front passengers with additional protection than that offered by the seat belt system alone. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity.
Sonata	2018	47	Hyundai USA	The seat belt buckle sensors determine if the driver and front passenger's seat belts are fastened. These sensors provide the ability to control the SRS deployment based on whether or not the seat belts are fastened, and how severe the impact is. The advanced SRS offers the ability to control the air bag inflation within two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts.
Sonata	2018	51	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the Engine Start/Stop button is in the ON position to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Sonata	2018	52	Hyundai USA	The front air bags help protect the driver and front passenger by responding to frontal impacts in which seat belts alone cannot provide adequate restraint.
Sonata	2018	52	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata	2018	53	Hyundai USA	To help provide protection, the air bags must inflate rapidly. The speed of air bag inflation is a consequence of extremely short time in which to inflate the air bag between the occupant and the vehicle structures before the occupant impacts those structures.
Sonata	2018	53	Hyundai USA	When the SRSCM [SRS Control Module] detects a sufficiently severe impact to the front of the vehicle, it will automatically deploy the front air bags.
Sonata	2018	54	Hyundai USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver or the front passenger forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.

Sonata	2018	56	Hyundai USA	Occupant Classification System: A detection device located within the front passenger seat cushion. Electronic system to determine whether the passenger air bag systems should be activated or deactivated.
Sonata	2019	22	Hyundai USA	Air bags are designed to supplement the seat belt as an additional safety device, but they are not a substitute. Most states require all occupants of a vehicle to wear seat belts.
Sonata	2019	46	Hyundai USA	This vehicle is equipped with an Advanced Supplemental Air Bag System for the driver's seat and front passenger's seats.
Sonata	2019	47	Hyundai USA	Your vehicle is equipped with a Advanced Supplemental Restraint System (SRS) and lap/shoulder belts at both the driver and passenger seating positions.
Sonata	2019	47	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and front passengers with additional protection than that offered by the seat belt system alone. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity. The seat belt buckle sensors determine if the driver and front passenger's seat belts are fastened. These sensors provide the ability to control the SRS deployment based on whether or not the seat belts are fastened, and how severe the impact is.
Sonata	2019	47	Hyundai USA	The advanced SRS offers the ability to control the air bag inflation within two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts.
Sonata	2019	51	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the Engine Start/Stop button is in the ON position to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Sonata	2019	52	Hyundai USA	The front air bags help protect the driver and front passenger by responding to frontal impacts in which seat belts alone cannot provide adequate restraint.
Sonata	2019	52	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata	2019	53	Hyundai USA	To help provide protection, the air bags must inflate rapidly. The speed of air bag inflation is a consequence of extremely short time in which to inflate the air bag between the occupant and the vehicle structures before the occupant impacts those structures. This speed of inflation reduces the risk of serious or lifethreatening injuries and is thus a necessary part of air bag design.
Sonata	2019	53	Hyundai USA	When the SRSCM [SRS Control Module] detects a sufficiently severe impact to the front of the vehicle, it will automatically deploy the front air bags.
Sonata	2019	54	Hyundai USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver or the front passenger forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Sonata	2019	56	Hyundai USA	Occupant Classification System: A detection device located within the front passenger seat cushion. Electronic system to determine whether the passenger air bag systems should be activated or deactivated.
Sonata Hybrid	2011	36	Hyundai USA	Generally, air bags are designed to inflate by the severity of a collision and its direction. These two factors determine whether the sensors sendout an electronic deployment/ inflation signal.

Vehicle	Year	Page	Author	Statement
Sonata Hybrid	2011	36	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Sonata Hybrid	2011	39	Hyundai USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the engine start/stop button is ON to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Sonata Hybrid	2011	41	Hyundai USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Sonata Hybrid	2011	42	Hyundai USA	The occupant classification system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not. The driver's front air bag is not affected or controlled by the occupant classification system.
Sonata Hybrid	2011	48	Hyundai USA	Your vehicle is equipped with a Supplemental Restraint (Air Bag) System and lap/shoulder belts at both the driver and passenger seating positions.
Sonata Hybrid	2011	48	Hyundai USA	The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity. The SRS uses sensors to gather information about the driver's seat position, the driver's and front passenger's seat belt usage and impact severity.
Sonata Hybrid	2011	49	Hyundai USA	The advanced SRS offers the ability to control the air bag inflation within two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts. According to the impact severity, seating position and seat belt usage, the SRSCM [SRS Control Module] (SRS Control Module) controls the air bag inflation.
Sonata Hybrid	2011	56	Hyundai USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Sonata Hybrid	2012	36	Hyundai USA	Generally, air bags are designed to inflate by the severity of a collision and its direction. These two factors determine whether the sensors send out an electronic deployment/ inflation signal.
Sonata Hybrid	2012	36	Hyundai USA	The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. Vehicle	Year	Page	Author	Statement
Forte	2012	3 45	Kia USA	The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity.
Forte	2012	3 45	Kia USA	The advanced SRS offers the ability to control the air bag inflation with two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts. The passenger's front air bag is designed to help reduce the injury of children sitting close to the instrument panel in low speed collisions.
Forte	2012	3 46	Kia USA	Advanced air bags are combined with pre-tensioner seat belts to help provide enhanced occupant protection in frontal crashes.
Forte	2012	3 51	Kia USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Optima	2014	3 23	Kia USA	The pretensioner seat belts may be activated together with the air bags upon a severe enough collision.
Optima	2014	3 35	Kia USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/inflation signal.
Optima	2014	3 35	Kia USA	Air bag deployment depends on a number of complex factors including vehicle speed, angles of impact and the density and stiffness of the vehicles or objects which your vehicle hits in the collision. Though, factors are not limited to those mentioned above. The front air bags will completely inflate and deflate in an instant. It is virtually impossible for you to see the air bags inflate during an accident. It is much more likely that you will simply see the deflated air bags hanging out of their storage compartments after the collision.
Optima	2014	3 38	Kia USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the ignition switch is ON to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Optima	2014	3 39	Kia USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Optima	2014	3 40	Kia USA	The occupant detection system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not.

Vehicle	Year	Page	Author	Statement
Optima	2014	3 46	Kia USA	The SRS consists of air bags installed under the pad covers in the center of the steering wheel and the passenger's side front panel above the glove box. The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity. The SRS uses sensors to gather information about the driver's seat position, the driver's and front passenger's seat belt usage and impact severity. The advanced SRS offers the ability to control the air bag inflation with two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts. The passenger's front air bag is designed to help reduce the injury of children sitting close to the instrument panel in low speed collisions. However, children are safer if they are restraint in the rear seat. According to the impact severity, seating position and seat belt usage, the SRSCM (SRS Control Module) controls the air bag inflation. Failure to properly wear seat belts can increase the risk or severity of injury in an accident.
Optima	2014	3 47	Kia USA	Advanced air bags are combined with pre-tensioner seat belts to help provide enhanced occupant protection in frontal crashes.
Optima	2014	3 51	Kia USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Optima	2015	3 37	Kia USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/ inflation signal.
Optima	2015	3 40	Kia USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the ignition switch is ON to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Optima	2015	3 41	Kia USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Optima	2015	3 42	Kia USA	Your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not.
Optima	2015	3 47	Kia USA	Your vehicle is equipped with an Advanced Supplemental Restraint (Air Bag) System and lap/shoulder belts at both the driver and passenger seating position.

Vehicle	Year	Page	Author	Statement
Optima	2015	3 48	Kia USA	The advanced SRS offers the ability to control the air bag inflation with two levels. A first stage level is provided for moderate severity impacts. A second stage level is provided for more severe impacts. The passenger's front air bag is designed to help reduce the injury of children sitting close to the instrument panel in low speed collisions. However, children are safer if they are restraint in the rear seat. According to the impact severity, seating position and seat belt usage, the SRSCM (SRS Control Module) controls the air bag inflation. Failure to properly wear seat belts can increase the risk or severity of injury in an accident. Additionally, your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system detects the presence of a passenger in the front passenger's seat and will turn off the front passenger's air bag under certain conditions. For more detail, see "Occupant detection system" in this section.
Optima	2015	3 49	Kia USA	Advanced air bags are combined with pre-tensioner seat belts to help provide enhanced occupant protection in frontal crashes.
Optima	2015	3 50	Kia USA	The purpose of the air bag is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt alone.
Optima	2015	3 53	Kia USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Optima	2016	3 2	Kia USA	Air bags are designed to supplement seat belts, not replace them.
Optima	2016	3 44	Kia USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/ inflation signal.
Optima	2016	3 49	Kia USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Optima	2016	3 50	Kia USA	Your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not.
Optima	2016	3 59	Kia USA	Your vehicle is equipped with an Advanced Supplemental Restraint (Air Bag) System and lap/shoulder belts at both the driver and passenger seating position.
Optima	2016	3 59	Kia USA	The SRS consists of air bags installed under the pad covers in the center of the steering wheel and the passenger's side front panel above the glove box. The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity.

Vehicle	Year	Page	Author	Statement
Optima	2016	3 60	Kia USA	The advanced SRS offers the ability to control the air bag inflation with two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts.
Optima	2016	3 60	Kia USA	According to the impact severity and seat belt usage, the SRSCM (SRS Control Module) controls the air bag inflation.
Optima	2016	3 60	Kia USA	Additionally, your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system detects the presence of a passenger in the front passenger's seat and will turn off the front passenger's air bag under certain conditions.
Optima	2016	3 60	Kia USA	Advanced air bags are combined with pre-tensioner seat belts to help provide enhanced occupant protection in frontal crashes.
Optima	2016	3 65	Kia USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Optima	2017	3 44	Kia USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/ inflation signal.
Optima	2017	3 49	Kia USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Optima	2017	3 50	Kia USA	Your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not.
Optima	2017	3 58	Kia USA	Your vehicle is equipped with an Advanced Supplemental Restraint (Air Bag) System and lap/shoulder belts at both the driver and passenger seating position.
Optima	2017	3 59	Kia USA	The SRS consists of air bags installed under the pad covers in the center of the steering wheel and the passenger's side front panel above the glove box. The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity. Optima	2019	3 67	Kia USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.

Vehicle	Year	Page	Author	Statement
Optima	2020	3 28	Kia USA	Your vehicle is equipped with driver's and front passenger's pre-tensioner seat belts (retractor pretensioner and EFD (Emergency Fastening Device)). The pre-tensioner seat belts may be activated when a frontal collision is severe enough, together with the air bags.
Optima	2020	3 46	Kia USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/ inflation signal. Air bag deployment depends on a number of factors including vehicle speed, angles of impact, and, the density and stiffness of the vehicles or objects which your vehicle hits in the collision. The determining factors are not limited to those mentioned above.
Optima	2020	3 46	Kia USA	In order to help provide protection, the air bags must inflate rapidly. The speed of the air bag inflation is a consequence of extremely short time in which to inflate the air bag between the occupant and the vehicle structures before the occupant impacts those structures. This speed of inflation reduces the risk of serious or life-threatening injuries and is thus a necessary part of the air bag design.
Optima	2020	3 50	Kia USA	When the SRSCM [SRS Control Module] detects a sufficiently severe impact to the front of the vehicle, it will automatically deploy the front air bags.
Optima	2020	3 51	Kia USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to steer or operate other controls.
Optima	2020	3 52	Kia USA	Your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not. Only the front passenger front air bag is controlled by the Occupant Detection System.
Optima	2020	3 60	Kia USA	Your vehicle is equipped with an Advanced Supplemental Restraint (Air Bag) System and lap/shoulder belts at both the driver and passenger seating position. The indication of the system's presence are the letters "AIR BAG" located on the air bag pad cover on the steering wheel and the passenger's side front panel pad above the glove box.
Optima	2020	3 61	Kia USA	The purpose of the SRS is to provide the vehicle's driver and/or the front passenger with additional protection than that offered by the seat belt system alone in case of a frontal impact of sufficient severity. The SRS uses sensors to gather information about the driver's and front passenger's seat belt usage and impact severity. The seat belt buckle sensors determine if the driver and front passenger's seat belts are fastened.

Vehicle	Year	Page	Author	Statement
Optima	2020	3 61	Kia USA	These sensors provide the ability to control the SRS deployment based on whether or not the seat belts are fastened, and how severe the impact is. The advanced SRS offers the ability to control the air bag inflation with two levels. A first stage level is provided for moderate-severity impacts. A second stage level is provided for more severe impacts. The passenger's front air bag is designed to help reduce the injury of children sitting close to the instrument panel in low speed collisions. However, children are safer if they are restrained in the rear seat. According to the impact severity and seat belt usage, the SRSCM [SRS Control Module] (SRS Control Module) controls the air bag inflation.
Optima	2020	3 61	Kia USA	Additionally, your vehicle is equipped with an occupant detection system in the front passenger's seat. The occupant detection system detects the presence of a passenger in the front passenger's seat and will turn off the front passenger's air bag under certain conditions.
Optima	2020	3 62	Kia USA	Advanced air bags are combined with pre-tensioner seat belts to help provide enhanced occupant protection in frontal crashes. Front air bags are not intended to deploy in collisions in which sufficient protection can be provided by the pre-tensioner seat belt.
Optima	2020	3 67	Kia USA	Front air bags are designed to inflate in a frontal collision depending on the intensity, speed or angles of impact of the front collision.
Optima Hybrid	2014	3 23	Kia USA	The retractor pre-tensiner is a supplemental system of the seat belts. The purpose of the retractor pre-tensioner is to tighten the shoulder belt against the occupant's upper body in certain frontal collisions.
Optima Hybrid	2014	3 23	Kia USA	The pretensioner seat belts may be activated together with the air bags upon a severe enough collision.
Optima Hybrid	2014	3 35	Kia USA	Generally, air bags are designed to inflate based upon the severity of a collision and its direction. These two factors determine whether the sensors produce an electronic deployment/ inflation signal.
Optima Hybrid	2014	3 38	Kia USA	The SRSCM [SRS Control Module] continually monitors all SRS components while the ignition switch is ON to determine if a crash impact is severe enough to require air bag deployment or pre-tensioner seat belt deployment.
Optima Hybrid	2014	3 39	Kia USA	A fully inflated air bag, in combination with a properly worn seat belt, slows the driver's or the passenger's forward motion, reducing the risk of head and chest injury. After complete inflation, the air bag immediately starts deflating, enabling the driver to maintain forward visibility and the ability to
Optima Hybrid	2014	3 40	Kia USA	The occupant detection system is designed to detect the presence of a properly-seated front passenger and determine if the passenger's front air bag should be enabled (may inflate) or not.
Optima Hybrid	2014	3 46	Kia USA	The SRS consists of air bags installed under the pad covers in the center of the steering wheel and the passenger's side front panel above the glove box. EXHIBIT 16

Brand	Vehicle	Year	Page	Author	Statement
Chrysler	Sebring	2010	53	FCA US LLC* (Manuals prior to 2014 state "Chrysler Group LLC" which formed in 2009 after bankruptcy, and changed its corporate name to FCA US LLC in 2014)	This vehicle has Advanced Front Airbags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Airbag is mounted in the center of the steering wheel. The passenger's Advanced Front Airbag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the airbag covers. These airbags are certified to the new Federal regulations for Advanced Airbags.
Chrysler	Sebring	2010	54	FCA US LLC	The Advanced Front Airbags have a multistage inflator design. This allows the airbag to have different rates of inflation that are based on the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Airbags based upon seat position.
Chrysler	Sebring	2010	55	FCA US LLC	The Advanced Front Airbag system has multistage driver and front passenger airbags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors.
Chrysler	Sebring	2010	60	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side airbags in a frontal or side collision is required. Based on the impact sensors signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Airbags, SABIC airbags — if equipped, Supplemental Seat-Mounted Side Airbags — if equipped, and front seat belt pretensioners — if equipped, as required, depending on the severity and type of impact.
Chrysler	Sebring	2010	61	FCA US LLC	Advanced Front Airbags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision. Advanced Front Airbags are not expected to reduce the risk of injury in rear, side, or rollover collisions.
Chrysler	200	2011	58	FCA US LLC	The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air bags based upon seat position.

Brand	Vehicle	Year	Page	Author	Statement
Chrysler	200	2011	60	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors.
Chrysler	200	2011	64	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air bags, SABIC air bags, Supplemental Seat-Mounted Side Air Bags, and front seat belt pretensioners, as required, depending on the severity and type of impact.
Chrysler	200	2011	64	FCA US LLC	Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision.
Chrysler	200	2012	58	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers.

Chrysler	200	2012	59	FCA US LLC	The Driver and Front Passenger Advanced Front Air Bags are certified to the new Federal regulations for Advanced Air Bags. The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on several factors, including the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position.
Chrysler	200	2012	60	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors.
Chrysler	200	2012	64	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, SABIC air bags, Supplemental Seat-Mounted Side Air Bags, and front seat belt pretensioners, as required, depending on several factors, including the severity and type of impact.
Chrysler	200	2013	60	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers.
Chrysler	200	2013	61	FCA US LLC	The Driver and Passenger Advanced Front Air Bags are certified to new Federal regulations. The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on several factors, including the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position.
Chrysler	200	2013	62	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors.
Chrysler	200	2013	66	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, SABIC air bags, Supplemental Seat-Mounted Side Air Bags, and front seat belt pretensioners, as required, depending on the severity and type of impact.
Chrysler	200	2013	68	FCA US LLC	Different air bag inflation rates are possible, based on several factors, including the collision type and severity.

Brand	Vehicle	Year	Page	Author	Statement
Chrysler	200	2014	60	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers.
Chrysler	200	2014	61	FCA US LLC	The Driver and Passenger Advanced Front Air Bags are certified to new Federal regulations. The Advanced Front Air Bags have a multistage inflator design. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, SABIC air bags, Supplemental Seat-Mounted Side Air Bags, and front seat belt pretensioners, as required, depending on the severity and type of impact.
Chrysler	200	2015	63	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors or other system components.
Chrysler	200	2015	64	FCA US LLC	Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts.
Chrysler	200	2015	65	FCA US LLC	The OCS is part of a Federally regulated safety system for this vehicle. It is designed to provide Passenger Advanced Front Air Bag output appropriate to the occupant's seated weight, as determined by the OCS.
Dodge	Avenger	2010	53	FCA US LLC	This vehicle has Advanced Front Airbags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Airbag is mounted in the center of the steering wheel. The passenger's Advanced Front Airbag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the airbag covers. These airbags are certified to the new Federal regulations for Advanced Airbags.

Brand	Vehicle	Year	Page	Author	Statement
Dodge	Avenger	2010	54	FCA US LLC	The Advanced Front Airbags have a multistage inflator design. This allows the airbag to have different rates of inflation that are based on the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Airbags based upon seat position. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Airbags. This vehicle may also be equipped with Supplemental Side Airbag Inflatable Curtains (SABIC) to protect the driver, front, and rear passengers sitting next to a window. If the vehicle is equipped with SABIC, they are located above the side windows. The trim covering the side airbags is labeled SRS AIRBAG.
Dodge	Avenger	2010	55	FCA US LLC	The Advanced Front Airbag system has multistage driver and front passenger airbags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors. The first stage inflator is triggered immediately during an impact that requires airbag deployment. The timing of the second stage determines whether the output force is low, medium, or high. If a low output is sufficient to meet the need, the remaining gas in the inflator is expended.
Dodge	Avenger	2010	60	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle.
Dodge	Avenger	2010	61	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side airbags in a frontal or side collision is required. Based on the impact sensors signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Airbags, SABIC airbags — if equipped, Supplemental Seat-Mounted Side Airbags — if equipped, and front seat belt pretensioners — if equipped, as required, depending on the severity and type of impact. Advanced Front Airbags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision. Advanced Front Airbags are not expected to reduce the risk of injury in rear, side, or rollover collisions. The Advanced Front Airbags will not deploy in all frontal collisions, including some that may produce substantial vehicle damage — for example, some pole collisions, truck underrides, and angle offset collisions. On the other hand, depending on the type and location of impact, Advanced Front Airbags may deploy in crashes with little vehicle front-end damage but that produce a severe initial deceleration.
Dodge	Avenger	2011	58	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems.
Dodge	Avenger	2011	59	FCA US LLC	These air bags are certified to the new Federal regulations for Advanced Air Bags. The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags.

Dodge	Avenger	2011	61	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors. The first stage inflator is triggered immediately during an impact that requires air bag deployment. This low output is used in less severe collisions. A higher energy output is used for more severe collisions.
Dodge	Avenger	2011	64	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, SABIC air
Dodge	Avenger	2011	65	FCA US LLC	Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision. Advanced Front Air Bags are not expected to reduce the risk of injury in rear, side, or rollover collisions. The side air bags will not deploy in all side collisions. Side air bag deployment will depend on the severity and type of collision. Because air bag sensors measure vehicle deceleration over time, vehicle speed and damage by themselves are not good indicators of whether or not an air bag should have deployed. Seat belts are necessary for your protection in all accidents, and also are needed to help keep you in position, away from an inflating air bag.
Dodge	Avenger	2012	52	FCA US LLC	The pretensioners are triggered by the Occupant Restraint Controller (ORC). Like the air bags, the pretensioners are single use items. A deployed pretensioner or a deployed air bag must be replaced immediately.
Dodge	Avenger	2012	58	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems.
Dodge	Avenger	2012	59	FCA US LLC	The Driver and Front Passenger Advanced Front Air Bags are certified to the new Federal regulations for Advanced Air Bags. The first stage inflator is triggered immediately during an impact that requires airbag deployment. The timing of the second stage determines whether the output force is low, medium, or high. If a low output is sufficient to meet the need, the remaining gas in the inflator is expended.
Dodge	Ram 1500	2009	58	FCA US LLC	Along with seat belts and pretensioners, Advanced Front Airbags work with the knee bolsters to provide improved protection for the driver and front passenger. Side airbags also work with seat belts to improve occupant protection.
Dodge	Ram 1500	2009	60	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side airbags in a frontal or side collision is required. Based on the impact sensors signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Airbags, SABIC airbags— if equipped, Supplemental Side Seat Airbags—if equipped, and front seat belt pretensioners — if equipped, as required, depending on severity and type of impact. Advanced Front Airbags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision.

Brand	Vehicle	Year	Page	Author	Statement
Dodge	Ram 1500	2009	62	FCA US LLC	When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the airbags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the Advanced Front Airbags. Different airbag inflation rates are possible, based on the collision type and severity. The steering wheel hub trim cover and the upper right side of the instrument panel separate and fold out of the way as the bags inflate to their full size. The bags fully inflate in about 50 to 70 milliseconds. This is about half of the time it takes to blink your eyes. The bags then quickly deflate while helping to restrain the driver and front passenger.
Dodge	Ram 1500	2009	63	FCA US LLC	In front and side impacts, impact sensors aid the ORC [Occupant Restraint Controller, aka ACU] in determining appropriate response to impact events. Additional sensors in the ORC [Occupant Restraint Controller, aka ACU]
Dodge	Ram 1500	2010	53	FCA US LLC	This vehicle has Advanced Front Airbags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Airbag is mounted in the center of the steering wheel. The passenger's Advanced Front Airbag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the airbag covers. These airbags are certified to the new Federal regulations for Advanced Airbags.
Dodge	Ram 1500	2010	54	FCA US LLC	The Advanced Front Airbags have a multistage inflator design. This allows the airbag to have different rates of inflation based on the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Airbags based upon seat position. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Airbags.
Dodge	Ram 1500	2010	55	FCA US LLC	The Advanced Front Airbag system has multistage driver and front passenger airbags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors (if equipped). The first stage inflator is triggered immediately during an impact that requires airbag deployment. This low output is used in less severe collisions. A higher energy output is used for more severe collisions.

The seat belt buckle switch may adjust the inflation rate of the Advanced Front Airbags.
Dodge	Ram 5500	2011	51	FCA US LLC	The Advanced Front Airbag system has multistage driver and front passenger (if equipped) airbags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC). The first stage inflator is triggered immediately during an impact that requires airbag deployment. The timing of the second stage determines whether the output force is low, medium, or high. If a low output is sufficient to meet the need, the remaining gas in the inflator is expended.
Dodge	Ram 5500	2011	54	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front airbags in a frontal collision is required. Based on impact sensor signals a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Airbags, as required, depending on the severity and type of impact. Advanced Front Airbags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision. Advanced Front Airbags are not expected to reduce the risk of injury in rear, side or rollover collisions.
	Ram 5500	2011	55	FCA US LLC	When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the Advanced Front Airbags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the Advanced Front Airbags. Different airbag inflation rates are possible, based on the collision type and severity.
Dodge	Ram 5500	2012	52	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger (if equipped) as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers.

Dodge	Ram 5500	2012	53	FCA US LLC	The Driver and Front Passenger Advanced Front Air Bags are certified to the new Federal regulations for Advanced Air Bags. The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation based on several factors, including the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags.
Dodge	Ram 5500	2012	54	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger (if equipped) air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC). The first stage inflator is triggered immediately during an impact that requires air bag deployment. This low output is used in less severe collisions. A higher energy output is used for more severe collisions.
Dodge	Ram 5500	2012	57	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, and front seat belt pretensioners — if equipped, as required, depending on several factors, including the severity and type of impact. Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on several factors, including the severity and type of collision.
Dodge	Ram 5500	2012	59	FCA US LLC	The Driver and Passenger Advanced Front Air Bag Inflator Units are located in the center of the steering wheel and on the right side of the instrument panel (if equipped). When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the Advanced Front Air Bags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the Advanced Front Air Bags. Different air bag inflation rates are possible, based on the collision type and severity. The steering wheel hub trim cover and the upper right side of the instrument panel separate and fold out of the way as the air bags inflate to their full size. The air bags fully inflate in about 50 to 70 milliseconds. This is about half of the time it takes to blink your eyes. The air bags then quickly deflate while helping to restrain the driver and front passenger.

Jeep	Compass	2012	67	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, SABIC air bags, Supplemental Seat-Mounted Side Air Bags — if equipped, and front seat belt pretensioners, as required, depending on several factors, including the severity and type of impact. Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on several factors, including the severity and type of collision.
Jeep	Compass	2012	69	FCA US LLC	The Driver and Passenger Advanced Front Air Bag Inflator Units are located in the center of the steering wheel and on the right side of the instrument panel. When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the Advanced Front Air Bags, it signals the inflator units.

Brand	Vehicle	Year	Page	Author	Statement
Jeep	Compass	2012	69	FCA US LLC	The steering wheel hub trim cover and the upper right side of the instrument panel separate and fold out of the way as the air bags inflate to their full size. The air bags fully inflate in about 50 to 70 milliseconds. This is about half of the time it takes to blink your eyes. The air bags then quickly deflate while helping to restrain the driver and front passenger.
Jeep	Compass	2013	62	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers. The Driver and Front Passenger Advanced Front Air Bags are certified to the new Federal regulations for Advanced Air Bags.
Jeep	Compass	2013	63	FCA US LLC	The Driver and Front Passenger Advanced Front Air Bags are certified to the new Federal regulations for Advanced Air Bags. The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on several factors, including the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags.
Jeep	Compass	2013	64-65	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors. The first stage inflator is triggered immediately during an impact that requires air bag deployment. This low output is used in less severe collisions. A higher energy output is used for more severe collisions.
Jeep	Compass	2013	68	FCA US LLC	Along with seat belts and pretensioners, Advanced Front Air Bags work with the knee impact bolsters to provide improved protection for the driver and front passenger. Side air bags also work with seat belts to improve occupant protection.

Brand	Vehicle	Year	Page	Author	Statement
Jeep	Compass	2017	169	FCA US LLC	The first stage inflator is triggered immediately during an impact that requires air bag deployment. A low energy output is used in less severe collisions. A higher energy output is used for more severe collisions. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is buckled. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position.
Jeep	Compass	2017	170	FCA US LLC	When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the front air bags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the front air bags. The steering wheel hub trim cover and the upper right side of the instrument panel separate and fold out of the way as the air bags inflate to their full size. The front air bags fully inflate in less time than it takes to blink your eyes. The front air bags then quickly deflate while helping to restrain the driver and front passenger.
Jeep	Liberty	2010	56	FCA US LLC	This vehicle has airbags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's front airbag is mounted in the steering wheel. The passenger's front airbag is mounted in the instrument panel, above the glove compartment. The words SRS/AIRBAG are embossed on the airbag covers.
Jeep	Liberty	2010	58	FCA US LLC	The Advanced Front Airbag system has multistage driver and front passenger airbags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the impact sensors at the front of the car.
Jeep	Liberty	2010	59	FCA US LLC	The first stage inflator is triggered immediately during an impact that requires airbag deployment. The timing of the second stage determines whether the output force is low, medium, or high. If a low output is sufficient to meet the need, the remaining gas in the inflator is expended.
Jeep	Liberty	2010	61	FCA US LLC	Along with seat belts and pretensioners, Advanced Front Airbags work with the knee bolsters to provide improved protection for the driver and front passenger. Side airbags also work with seat belts to improve occupant protection.
Jeep	Liberty	2010	63	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. Based on the impact sensors signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Airbags, side airbags, and front seat belt, as required, depending on each type of impact. Advanced Front Airbags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on the severity and type of collision. Advanced Front Airbags are not expected to reduce the risk of injury in rear, side, or rollover collisions. The Advanced Front Airbags will not deploy in all frontal collisions, including some that may produce substantial vehicle damage — for example, some pole collisions, truck underrides, and angle offset collisions. On the other hand, depending on the type and location of impact, Advanced Front Airbags may deploy in crashes with little vehicle front-end damage but that produce a severe initial deceleration.

Brand	Vehicle	Year	Page	Author	Statement
Jeep	Liberty	2010	63-64	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] also monitors the readiness of the electronic parts of the air bag system whenever the ignition switch is in the START or ON/RUN position.
Jeep	Liberty	2010	64	FCA US LLC	The Occupant Classification System (OCS) is part of a Federally regulated safety system required for this vehicle. It is designed to turn off the front passenger airbag for an empty seat and for occupants classified in a category other than that of an adult. This could be a child, teenager, or even a small size adult.
Jeep	Liberty	2010	68	FCA US LLC	The Driver and Passenger Airbag/Inflator Units are located in the center of the steering wheel and the right side of the instrument panel. When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the airbags, it signals the inflator units.
Jeep	Liberty	2010	68	FCA US LLC	Different airbag inflation rates are possible based on collision severity and type. The steering wheel hub trim cover and the upper right side of the instrument panel separate and fold out of the way as the bags inflate to their full size. The bags fully inflate in about 50 to 70 milliseconds. This is about half of the time it takes to blink your eyes. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers.
Jeep	Patriot	2013	62	FCA US LLC	The Driver and Passenger Advanced Front Air Bags are certified to new Federal regulations. The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on the severity and type of collision. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags.

Brand	Vehicle	Year	Page	Author	Statement
Jeep	Patriot	2013	64	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors. The first stage inflator is triggered immediately during an impact that requires air bag deployment. This low output is used in less severe collisions. A higher energy output is used for more severe collisions.
Jeep	Patriot	2013	68	FCA US LLC	The ORC [Occupant Restraint Controller, aka ACU] is part of a Federally regulated safety system required for this vehicle. The ORC [Occupant Restraint Controller, aka ACU] determines if deployment of the front and/or side air bags in a frontal or side collision is required. Based on the impact sensor's signals, a central electronic ORC [Occupant Restraint Controller, aka ACU] deploys the Advanced Front Air Bags, SABIC air bags, Supplemental Seat-Mounted Side Air Bags — if equipped, and front seat belt pretensioners, as required, depending on several factors, including the severity and type of impact. Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts in certain frontal collisions depending on several factors, including the severity and type of collision.
Jeep	Patriot	2013	70	FCA US LLC	The Driver and Passenger Advanced Front Air Bag Inflator Units are located in the center of the steering wheel and on the right side of the instrument panel. When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the Advanced Front Air Bags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the Advanced Front Air Bags. Different air bag inflation rates are possible, based on several factors, including the collision type and severity. The steering wheel hub trim cover and the upper right side of the instrument panel separate and fold out of the way as the air bags inflate to their full size. The air bags fully inflate in about 50 to 70 milliseconds. This is about half of the time it takes to blink your eyes. The air bags then quickly deflate while helping to restrain the driver and front passenger.
Jeep	Patriot	2014	62	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words SRS AIRBAG are embossed on the air bag covers. NOTE: The Driver and Passenger Advanced Front Air Bags are certified to new Federal regulations.
Jeep	Patriot	2014	63	FCA US LLC	The Advanced Front Air Bags have a multistage inflator design. This allows the air bag to have different rates of inflation that are based on the severity and type of collision. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is fastened. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags.
Jeep	Patriot	2014	64	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors. The first stage inflator is triggered immediately during an impact that requires air bag deployment. This low output is used in less severe collisions. A higher energy output is used for more severe collisions.
Jeep	Patriot	2014	68	FCA US LLC	Along with seat belts and pretensioners, Advanced Front Air Bags work with the knee impact bolsters to provide improved protection for the driver and front passenger.

Brand	Vehicle	Year	Page	Author	Statement
Jeep	Wrangler	2015	66	FCA US LLC	Advanced Front Air Bags are designed to provide additional protection by supplementing the seat belts. Because air bag sensors measure vehicle deceleration over time, vehicle speed and damage by themselves are not good indicators of whether or not an air bag should have deployed. Seat belts are necessary for your protection in all collisions, and also are needed to help keep you in position, away from an inflating air bag. When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the Advanced Front Air Bags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the Advanced Front Air Bags.
Jeep	Wrangler	2015	67	FCA US LLC	The Advanced Front Air Bags fully inflate in less time than it takes to blink your eyes. The air bags then quickly deflate while helping to restrain the driver and front passenger.
Jeep	Wrangler	2016	64	FCA US LLC	This vehicle has Advanced Front Air Bags for both the driver and front passenger as a supplement to the seat belt restraint systems. The driver's Advanced Front Air Bag is mounted in the center of the steering wheel. The passenger's Advanced Front Air Bag is mounted in the instrument panel, above the glove compartment. The words "SRS AIRBAG" or "AIRBAG" are embossed on the air bag covers.
Jeep	Wrangler	2016	65	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors or other system components. On the other hand, depending on the type and location of impact, front air bags may deploy in crashes with little vehicle front-end damage but that produce a severe initial deceleration. Because air bag sensors measure vehicle deceleration over time, vehicle speed and damage by themselves are not good indicators of whether or not an air bag should have deployed. Seat belts are necessary for your protection in all collisions, and also are needed to help keep you in position, away from an inflating air bag. When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the front air bags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the front air bags.
Jeep	Wrangler	2018	256	FCA US LLC	Some of the safety features described in this section may be standard equipment on some models, or may be optional equipment on others. If you are not sure, ask an authorized dealer. The air bag system must be ready to protect you in a collision. The Occupant Restraint Controller (ORC) monitors the internal circuits and interconnecting wiring associated with the electrical Air Bag System Components.
Jeep	Wrangler	2018	258	FCA US LLC	This vehicle has front air bags and lap/shoulder belts for both the driver and front passenger. The front air bags are a supplement to the seat belt restraint systems. The driver front air bag is mounted in the center of the steering wheel. The passenger front air bag is mounted in the instrument panel, above the glove compartment. The words "SRS AIRBAG" or "AIRBAG" are embossed on the air bag covers.

Brand	Vehicle	Year	Page	Author	Statement
Jeep	Wrangler	2018	258	FCA US LLC	The Advanced Front Air Bag system has multistage driver and front passenger air bags. This system provides output appropriate to the severity and type of collision as determined by the Occupant Restraint Controller (ORC), which may receive information from the front impact sensors (if equipped) or other system components.
Jeep	Wrangler	2018	259	FCA US LLC	The first stage inflator is triggered immediately during an impact that requires air bag deployment. A low energy output is used in less severe collisions. A higher energy output is used for more severe collisions. This vehicle may be equipped with a driver and/or front passenger seat belt buckle switch that detects whether the driver or front passenger seat belt is buckled. The seat belt buckle switch may adjust the inflation rate of the Advanced Front Air Bags. This vehicle may be equipped with driver and/or front passenger seat track position sensors that may adjust the inflation rate of the Advanced Front Air Bags based upon seat position. This vehicle has an Occupant Classification System (“OCS”) in the front passenger seat. The OCS is designed to activate or deactivate the Passenger Advanced Front Air Bag depending on the occupant’s seated weight.
Jeep	Wrangler	2018	260	FCA US LLC	Front Air Bags are designed to provide additional protection by supplementing the seat belts. Front air bags are not expected to reduce the risk of injury in rear, side, or rollover collisions. The front air bags will not deploy in all frontal collisions, including some that may produce substantial vehicle damage — for example, some pole collisions, truck underrides, and angle offset collisions. On the other hand, depending on the type and location of impact, front air bags may deploy in crashes with little vehicle front-end damage but that produce a severe initial deceleration. Because air bag sensors measure vehicle deceleration over time, vehicle speed and damage by themselves are not good indicators of whether or not an air bag should have deployed. Seat belts are necessary for your protection in all collisions, and also are needed to help keep you in position, away from an inflating air bag. When the ORC [Occupant Restraint Controller, aka ACU] detects a collision requiring the front air bags, it signals the inflator units. A large quantity of non-toxic gas is generated to inflate the front air bags.
Jeep	Wrangler	2018	260	FCA US LLC	The OCS is part of a Federally regulated safety system for this vehicle. It is designed to activate or deactivate the Passenger Advanced Front Air Bag depending on the occupant’s seated weight.
Jeep	Wrangler	2018	261	FCA US LLC	The Occupant Classification Module (OCM) is located underneath the front passenger seat. The Sensor is located beneath the passenger seat cushion foam. Any weight on the seat will be sensed by the Sensor. The OCM uses input from the Sensor to determine the front passenger’s most probable classification. The OCM communicates this information to the ORC. The ORC [Occupant Restraint Controller, aka ACU] uses the classification to determine whether it should activate or deactivate the Passenger Advanced Front Air Bag.

EXHIBIT 17

Vehicle	Year	Page	Author	Statement
Lancer	2013	3	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer	2013	22	Mitsubishi Motors Corporation	In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer	2013	23	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer	2013	35	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer	2013	40	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer	2013	42	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer	2013	43	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer	2013	48	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer	2014	14	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer	2014	22	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer	2014	25	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer	2014	26	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.

Vehicle	Year	Page	Author	Statement
Lancer	2014	26	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer	2014	28	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer	2014	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer	2014	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer	2015	14	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer	2015	21	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer	2015	24	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer	2015	25	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer	2015	25	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer	2015	27-28	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer	2015	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.

Vehicle	Year	Page	Author	Statement
Lancer	2015	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer	2016	2	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer	2016	13	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The pre-tensioner seat belt system will operate only when the ignition switch is in the "ON" or "START" position.
Lancer	2016	20	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer	2016	24	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer	2016	24	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer	2016	26-27	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer	2016	28	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer	2017	2	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer	2017	12	Mitsubishi Motors Corporation	The driver and front passenger seat belts are equipped with a seat belt pre-tensioner system. In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer	2017	13	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.

Vehicle	Year	Page	Author	Statement
Lancer	2017	21	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer	2017	21	Mitsubishi Motors Corporation	The SRS side airbags provide the driver and front passenger with protection against chest injuries by deploying the bag on the side impacted in moderate to severe side impact collisions.
Lancer	2017	23	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The airbags will operate only when the ignition switch is in the "ON" or "START" position. When the impact sensors detect a front or side impact sufficient to deploy the airbag(s), the appropriate airbag(s) will be deployed.
Lancer	2017	24	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer	2017	25	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer	2017	27	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer	2017	28	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer Evolution	2013	3	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Evolution	2013	20	Mitsubishi Motors Corporation	In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer Evolution	2013	20	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.

Vehicle	Year	Page	Author	Statement
Lancer Evolution	2013	33	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Evolution	2013	33	Mitsubishi Motors Corporation	The SRS side airbags provide the driver and front passenger with protection against chest injuries by deploying the bag on the side impacted in moderate to severe side impact collisions.
Lancer Evolution	2013	37	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer Evolution	2013	38	Mitsubishi Motors Corporation	When the impact sensors detect a front or side impact sufficient to deploy the airbag(s), the appropriate airbag(s) will be deployed. When airbags deploy, some smoke is released accompanied by a loud noise. The smoke is not harmful, but do not intentionally inhale the smoke as it may cause temporary irritation to people with respiratory problems.
Lancer Evolution	2013	39	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Evolution	2013	40	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Evolution	2013	41	Mitsubishi Motors Corporation	The indicator normally comes on when the ignition switch is turned to the "ON" position and goes out a few seconds later. In the following situations, the indicator will stay on to show that the passenger's front airbag is not operational. The passenger's seat weight sensors sense a weight of less than approximately 66 pounds (30 kg) on the front passenger seat. The front passenger's seat is not occupied. When the weight applied to the front passenger seat is sensed to be approximately 66 pounds (30 kg) or greater, the indicator goes out to show that the passenger's front airbag is operational.
Lancer Evolution	2013	43	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer Evolution	2013	45	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer Evolution	2013	45	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.

Vehicle	Year	Page	Author	Statement
Lancer Evolution	2014	2	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Evolution	2014	11	Mitsubishi Motors Corporation	The driver and front passenger seat belts are equipped with a seat belt pre-tensioner system. In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer Evolution	2014	12	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer Evolution	2014	20	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Evolution	2014	23	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The airbags will operate only when the ignition switch is in the "ON" or "START" position. When the impact sensors detect a front or side impact sufficient to deploy the airbag(s), the appropriate airbag(s) will be deployed.
Lancer Evolution	2014	24	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Evolution	2014	24	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Evolution	2014	26	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer Evolution	2014	27	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer Evolution	2014	27	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer Evolution	2014	33	Mitsubishi Motors Corporation	The SRS (Supplemental Restraint System) side airbags and curtain airbags are designed to provide additional protection.

Vehicle	Year	Page	Author	Statement
Lancer Evolution	2015	2	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Evolution	2015	12	Mitsubishi Motors Corporation	The driver and front passenger seat belts are equipped with a seat belt pre-tensioner system. In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer Evolution	2015	13	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer Evolution	2015	20	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Evolution	2015	23	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The airbags will operate only when the ignition switch is in the "ON" or "START" position. When the impact sensors detect a front or side impact sufficient to deploy the airbag(s), the appropriate airbag(s) will be deployed.
Lancer Evolution	2015	24	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Evolution	2015	24	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Evolution	2015	26	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer Evolution	2015	28	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer Evolution	2015	28	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer Evolution	2015	33	Mitsubishi Motors Corporation	The SRS (Supplemental Restraint System) side airbags and curtain airbags are designed to provide additional protection.

Vehicle	Year	Page	Author	Statement
Lancer Ralliart	2013	3	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Ralliart	2013	23	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The pre-tensioner seat belt system will operate only when the ignition switch is in the "ON" or "START" position.
Lancer Ralliart	2013	35	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system. The SRS driver's knee airbag is designed to supplement the primary protection of the driver's seat belt system. It can reduce the forward movement of the driver's lower legs and provide increased overall body protection in certain moderate to severe frontal collisions.
Lancer Ralliart	2013	42	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Ralliart	2013	43	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Ralliart	2013	46	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).

Vehicle	Year	Page	Author	Statement
Lancer Ralliart	2013	48	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact. A typical condition is shown in the illustration to the left. The front airbags and driver's knee airbag are designed to deploy only in certain moderate to severe frontal collisions within the shaded area between the arrows in the illustration to the right. The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform. If the impact to the vehicle's main structure is below this threshold level, the front airbags and driver's knee airbag may not deploy. This threshold level may also be higher if the vehicle hits something that absorbs the impact, either by bending or moving (for example, another stationary vehicle, a pole or a guard rail). The beginning stage of airbag inflation is the most forceful, and can cause serious injuries or death if you are too close to the deploying airbag. Accordingly, it is important that you always wear the available seat belt.
Lancer Ralliart	2014	2	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Ralliart	2014	13	Mitsubishi Motors Corporation	In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer Ralliart	2014	14	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The pre-tensioner seat belt system will operate only when the ignition switch is in the "ON" or "START" position.
Lancer Ralliart	2014	22	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Ralliart	2014	22	Mitsubishi Motors Corporation	The SRS side airbags (if so equipped) and the curtain airbags (if so equipped) are also designed to supplement the seat belts. The SRS side airbags provide the driver and front passenger with protection against chest injuries by deploying the bag on the side impacted in moderate to severe side impact collisions.
Lancer Ralliart	2014	25	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The airbags will operate only when the ignition switch is in the "ON" or "START" position. When the impact sensors detect a front or side impact sufficient to deploy the airbag(s), the appropriate airbag(s) will be deployed.
Lancer Ralliart	2014	26	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.

Vehicle	Year	Page	Author	Statement
Lancer Ralliart	2014	26	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Ralliart	2014	28	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30kg).
Lancer Ralliart	2014	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer Ralliart	2014	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer Ralliart	2015	14	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer Ralliart	2015	21	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Ralliart	2015	24	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer Ralliart	2015	25	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Ralliart	2015	25	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Ralliart	2015	27-28	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).

Vehicle	Year	Page	Author	Statement
Lancer Ralliart	2015	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer Ralliart	2015	29	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer Sportback	2013	3	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Sportback	2013	24	Mitsubishi Motors Corporation	In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer Sportback	2013	24	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.
Lancer Sportback	2013	37	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Sportback	2013	37	Mitsubishi Motors Corporation	The SRS side airbags provide the driver and front passenger with protection against chest injuries by deploying the bag on the side impacted in moderate to severe side impact collisions.
Lancer Sportback	2013	41	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The airbags will operate only when the ignition switch is in the "ON" or "START" position.
Lancer Sportback	2013	42	Mitsubishi Motors Corporation	When the impact sensors detect a front or side impact sufficient to deploy the airbag(s), the appropriate airbag(s) will be deployed. When airbags deploy, some smoke is released accompanied by a loud noise. The smoke is not harmful, but do not intentionally inhale the smoke as it may cause temporary irritation to people with respiratory problems.
Lancer Sportback	2013	43	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Sportback	2013	44	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.

Vehicle	Year	Page	Author	Statement
Lancer Sportback	2013	47	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer Sportback	2013	49	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Lancer Sportback	2013	49	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Lancer Sportback	2014	2	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Lancer Sportback	2014	14	Mitsubishi Motors Corporation	In a moderate-to-severe frontal or side collision, the pre-tensioner system operates simultaneously with the deployment of the front airbags or side airbags and curtain airbags.
Lancer Sportback	2014	15	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The pre-tensioner seat belt system will operate only when the ignition switch is in the "ON" or "START" position.
Lancer Sportback	2014	23	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. Lancer Sportback	2016	13	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position. These include all of the items listed above and all related wiring. The pre-tensioner seat belt system will operate only when the ignition switch is in the "ON" or "START" position.
Lancer Sportback	2016	20	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system.
Lancer Sportback	2016	24	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Lancer Sportback	2016	24	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger's airbag off indicator will come on.
Lancer Sportback	2016	26-27	Mitsubishi Motors Corporation	The driver's airbag and the front passenger's airbag are designed to deploy at the same time. However, the front passenger's airbag does not deploy when the front passenger seat is not occupied or when the weight sensor in the front passenger seat senses a weight on the seat of less than approximately 66 pounds (30 kg).
Lancer Sportback	2016	28	Mitsubishi Motors Corporation	The front airbags and driver's knee airbag will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.
Outlander	2013	5	Mitsubishi Motors Corporation	For added protection during a severe frontal collision, your vehicle has a Supplemental Restraint System (SRS) with airbags for the driver and passengers. The seats, head restraints, and door locks also are safety equipment, which must be used correctly.
Outlander	2013	48	Mitsubishi Motors Corporation	The driver and front passenger seat belts are equipped with a seat belt pre-tensioner system. In a moderate-to-severe frontal or side collision or when a rollover or overturning of the vehicle is detected, the pre-tensioner system operates simultaneously with the deployment of the front airbags, side airbags or curtain airbags.
Outlander	2013	49	Mitsubishi Motors Corporation	The airbag control unit monitors the readiness of the electronic parts of the system whenever the ignition switch is in the "ON" or "START" position.

Vehicle	Year	Page	Author	Statement
Outlander	2013	61	Mitsubishi Motors Corporation	This vehicle is equipped with a Supplemental Restraint System (SRS), which includes airbags for the driver and passengers. The SRS front airbags are designed to supplement the primary protection of the driver and front passenger seat belt systems by providing those occupants with protection against head and chest injuries in certain moderate to severe frontal collisions. The SRS front airbags, together with sensors at the front of the vehicle and sensors attached to the front seats, form an advanced airbag system. The SRS side airbags and the curtain airbags are also designed to supplement the seat belts. The SRS side airbags provide the driver and front passenger with protection against chest injuries by deploying the bag on the side impacted in moderate to severe side impact collisions.
Outlander	2013	68	Mitsubishi Motors Corporation	The driver's seat position sensor is attached to the seat rail and provides the airbag control unit with information on the seat's fore-aft position. The airbag control unit controls deployment of the driver's front airbag in accordance with the information it receives from this sensor.
Outlander	2013	68	Mitsubishi Motors Corporation	The passenger's seat weight sensors are attached to the seat rails and provide the airbag control unit with information regarding the weight on the front passenger seat. The airbag control unit controls deployment of the passenger's front airbag in accordance with the information it receives from this sensor. The passenger's front airbag will not deploy in an impact when the weight on the seat is sensed to be less than approximately 66 pounds (30 kg). In this case, the passenger airbag off indicator will come on.
Outlander	2013	73	Mitsubishi Motors Corporation	The front airbags are designed to deploy when the vehicle suffers a moderate to severe frontal impact.
Outlander	2013	73	Mitsubishi Motors Corporation	The front airbags are designed to deploy only in certain moderate to severe frontal collisions within the shaded area between the arrows in the illustration to the right. The front airbags will deploy if the impact to the vehicle's main structure is above a specific threshold level. The threshold level is approximately 15 mph (25 km/h) for a frontal collision straight into a solid flat wall that does not bend or deform.

EXHIBIT 18

Brand	Vehicle	Year	Page	Author	Statement
Acura	RLX	2014	7	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.
Acura	RLX	2014	38	Honda USA.; Honda Japan approval	The front, driver's knee, front side, and side curtain airbags are deployed According to the direction and severity of impact. Both side curtain airbags are deployed in a rollover. The airbag system includes: 1. Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked SRS AIRBAG. 2. Driver's knee airbag. The knee airbag is stored under the steering column. It is marked SRS AIRBAG. 3. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG. 4. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG. 5. An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the power mode is in ON. 6. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. The front seat belt tensioners also include the e-pretensioners. 7. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 8. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 9. Impact sensors that can detect a moderate-to-severe front or side impact. 10. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 11. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 12. Safing Sensor 13. A rollover sensor that detects whether the vehicle is about to roll over.
Acura	RLX	2014	40	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate to severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Acura	RLX	2014	40	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether the seat belts are latched, and/or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Acura	RLX	2014	41	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Acura	RLX	2014	41	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Acura	RLX	2014	41	Honda USA.; Honda Japan approval	Although the driver's and front passenger's airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy.
Acura	RLX	2015	9	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Acura	RLX	2017	9	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Brand	Vehicle	Year	Page	Author	Statement
Acura	RLX	2017	38	Honda USA.; Honda Japan approval	The front, driver's knee, front side, and side curtain airbags are deployed According to the direction and severity of impact. Both side curtain airbags are deployed in a rollover. The airbag system includes: 1. Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked SRS AIRBAG. 2. Driver's knee airbag. The knee airbag is stored under the steering column. It is marked SRS AIRBAG. 3. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG. 4. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG. 5. An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the power mode is in ON. 6. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. The front seat belt tensioners also include the e-pretensioners. 7. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 8. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 9. Impact sensors that can detect a moderate-to-severe front or side impact. 10. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 11. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 12. Safing Sensor 13. A rollover sensor that detects whether the vehicle is about to roll over.
Acura	RLX	2017	40	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint systems.
Acura	RLX	2017	40	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether the seat belts are latched, and/or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Acura	RLX	2017	41	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Acura	RLX	2017	41	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Acura	RLX	2017	41	Honda USA.; Honda Japan approval	Although the driver's and front passenger's airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy.
Acura	RLX	2018	15	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.
Acura	RLX	2018	46	Honda USA.; Honda Japan approval	The front, driver's knee, front side, and side curtain airbags are deployed According to the direction and severity of impact.
Acura	RLX	2018	48	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Acura	RLX	2018	48	Honda USA.; Honda Japan approval	During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/ or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Acura	RLX	2018	49	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate. A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.

Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked SRS. AIRBAG 2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG. 3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG. 4. An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON (w. 5. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. 6. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 7. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 8. Impact sensors that can detect a moderate-to-severe front or side collision. 9. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 10. Sensors that can detect if a child or small statured adult is in the deployment path of the front passenger's side airbag. 11. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 12. An indicator on the instrument panel that alerts you that the front passenger's side airbag has been turned off.
Acura	TSX	2012	36	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Acura	TSX	2012	36	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/ or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Acura	TSX	2012	37	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Acura	TSX	2012	37	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Acura	TSX	2012	37	Honda USA.; Honda Japan approval	Although the driver's and front passenger's airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy. In such cases, the seat belt will provide sufficient protection, and the supplemental protection offered by the airbag would be minimal.
Acura	TSX	2013	7	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Honda	Accord	2015	43	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Honda	Accord	2015	43	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	Accord Hybrid	2014	15	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Brand	Vehicle	Year	Page	Author	Statement
Honda	Accord Hybrid	2014	44	Honda USA.; Honda Japan approval	The front, front side, and side curtain airbags are deployed According to the direction and severity of impact. Both side curtain airbags are deployed in a rollover. The airbag system includes: 1. Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked SRS AIRBAG. 2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG. 3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG. 4. An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the power mode is in ON. 5. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. 6. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 7. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 8. Impact sensors that can detect a moderate-to-severe front or side impact. 9. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 10. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 11. Safing Sensor 12. A rollover sensor that detects whether the vehicle is about to roll over.
Honda	Accord Hybrid	2014	46	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Honda	Accord Hybrid	2014	46	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	Accord Hybrid	2014	47	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Honda	Accord Hybrid	2014	47	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	Accord Hybrid	2015	18	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Honda	Civic GX	2015	42	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	Civic GX	2015	43	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Honda	Civic GX	2015	43	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	Civic Hybrid	2012	12	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.
Honda	Civic Hybrid	2012	40	Honda USA.; Honda Japan approval	The front, front side, and side curtain airbags are deployed According to the direction and severity of impact. The airbag system includes: 1. Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked "SRS AIRBAG." 2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked "SIDE AIRBAG." 3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked "SIDE CURTAIN AIRBAG." 4. An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON (w. 5. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. 6. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 7. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 8. Impact sensors that can detect a moderate-to-severe front or side collision. 9. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 10. Sensors that can detect if a child or small statured adult is in the deployment path of the front passenger's side airbag. 11. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 12. An indicator on the instrument panel that alerts you that the front passenger's side airbag has been turned off.

Honda	Civic Hybrid	2012	42	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Honda	Civic Hybrid	2012	42	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/ or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	Civic Hybrid	2012	43	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate. A frontal collision can be either head-on or angled between two vehicles, or when a vehicle crashes into a stationary object, such as a concrete wall.
Honda	Civic Hybrid	2012	43	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	Civic Hybrid	2012	43	Honda USA.; Honda Japan approval	Although the driver's and front passenger's airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy. In such cases, the seat belt will provide sufficient protection, and the supplemental protection offered by the airbag would be minimal.
Honda	Civic Hybrid	2013	12	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.
Honda	Civic Hybrid	2013	40	Honda USA.; Honda Japan approval	The front, front side, and side curtain airbags are deployed According to the direction and severity of impact. Both side curtain airbags are deployed in a rollover. The airbag system includes: 1. Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked SRS AIRBAG. 2. Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked SIDE AIRBAG. 3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked SIDE CURTAIN AIRBAG. 4. An electronic control unit that continually monitors and can record information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON (II). 5. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. 6. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 7. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 8. Impact sensors that can detect a moderate to severe front or side collision. 9. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 10. Sensors that can detect if a child or small statured adult is in the deployment path of the front passenger's side airbag. 11. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 12. An indicator on the instrument panel that alerts you that the front passenger's side airbag has been turned off. 13. Safing Sensor 14. A rollover sensor that detects whether the vehicle is about to roll over.
Honda	CR-V	2013	40	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate to severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Honda	CR-V	2013	40	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/ or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	CR-V	2013	41	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Honda	CR-V	2013	41	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	CR-V	2014	8	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 11. A rollover sensor that detects whether the vehicle is about to roll over.
Honda	Fit	2017	44	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate-to-severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Honda	Fit	2017	44	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/ or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	Fit	2017	45	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Honda	Fit	2017	45	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	Fit	2017	45	Honda USA.; Honda Japan approval	Although the driver's and front passenger's airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy.
Honda	Fit EV	2013	15	Honda USA.; Honda Japan approval	Your vehicle is fitted with airbags to help protect you and your passengers during a moderate-to-severe collision.

Brand	Vehicle	Year	Page	Author	Statement
Honda	Fit EV	2013	42	Honda USA.; Honda Japan approval	The front, front side, and side curtain airbags are deployed According to the direction and severity of impact. The airbag system includes: 1.Two SRS (Supplemental Restraint System) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked "SRS AIRBAG." 2.Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked "SIDE AIRBAG." 3. Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked "SIDE CURTAIN AIRBAG." 4. An electronic control unit that continually monitors and records information about the sensors, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in ON (II) 5. Automatic front seat belt tensioners. The driver's and front passenger's seat belts incorporate sensors that detect whether or not they are fastened. 6. A driver's seat position sensor. If the seat is too far forward, the airbag will inflate with less force. 7. Weight sensors in the front passenger's seat. The front passenger's airbag will be turned off if the weight on the seat is 65 lbs. (29 kg) or less (the weight of an infant or small child). 8. Impact sensors that can detect a moderate-to-severe front or side collision. 9. An indicator on the dashboard that alerts you that the front passenger's front airbag has been turned off. 10. Sensors that can detect if a child or small statured adult is in the deployment path of the front passenger's side airbag. 11. An indicator on the instrument panel that alerts you to a possible problem with your airbag system or seat belt tensioners. 12. An indicator on the instrument panel that alerts you that the front passenger's side airbag has been turned off.
Honda	Fit EV	2013	44	Honda USA.; Honda Japan approval	The front SRS airbags inflate in a moderate to severe frontal collision to help protect the head and chest of the driver and/or front passenger. SRS (Supplemental Restraint System) indicates that the airbags are designed to supplement seat belts, not replace them. Seat belts are the occupant's primary restraint system.
Honda	Fit EV	2013	44	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). Honda	Fit EV	2014	44	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/ or other factors. Frontal airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	Fit EV	2014	45	Honda USA.; Honda Japan approval	Front airbags are designed to inflate during moderate-to-severe frontal collisions. When the vehicle decelerates suddenly, the sensors send information to the control unit which signals one or both front airbags to inflate.
Honda	Fit EV	2014	45	Honda USA.; Honda Japan approval	While your seat belt restrains your torso, the front airbag provides supplemental protection for your head and chest.
Honda	Fit EV	2014	45	Honda USA.; Honda Japan approval	Although the driver's and front passenger's airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy.
Honda	Ridgeline	2012	9	Honda USA.; Honda Japan approval	Your vehicle has a supplemental restraint system (SRS) with front airbags to help protect the heads and chests of the driver and a front seat passenger during a moderate to severe frontal collision (see page 25 for more information on how your front airbags work).
Honda	Ridgeline	2012	24	Honda USA.; Honda Japan approval	Your airbag system includes: Two SRS (supplemental restraint system) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked "SRS AIRBAG" (see page 25). Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked "SIDE AIRBAG" (see page 28). Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked "SIDE CURTAIN AIRBAG" (see page 30). Automatic front seat belt tensioners (see page 22). Sensors that can detect a moderate to severe front impact, side impact, or if your vehicle is about to rollover. Sensors that can detect whether a child is in the passenger's side airbag path and signal the control unit to turn the airbag off (see page 29). Sensors that can detect whether the driver's seat belt and the front passenger's seat belt are latched or unlatched (see page 20). A driver's seat position sensor that monitors the distance of the seat from the front airbag. If the seat is too far forward, the airbag will inflate with less force (see page 27). Weight sensors that monitor the weight on the front passenger's seat. If the weight is about 65 lbs. (29 kg) or less (the weight of an infant or small child), the passenger's front airbag will be turned off (see page 27). A rollover sensor that can detect if your vehicle is about to roll over and signal the control unit to deploy both side curtain airbags (see page 30). A sophisticated electronic system that continually monitors and records information about the sensors, the control unit, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in the ON (II) position.
Honda	Ridgeline	2012	25	Honda USA.; Honda Japan approval	If you ever have a moderate to severe frontal collision, sensors will detect the vehicle's rapid deceleration. If the rate of deceleration is high enough, the control unit will inflate the driver's and front passenger's airbags, at the time and with the force needed. During a frontal crash, your seat belt restrains your lower body and torso, and the front airbag helps protect your head and chest. Although both airbags normally inflate within a split second of each other, it is possible for only one airbag to deploy. This can happen if the severity of a collision is at the margin, or threshold, that determines whether or not the airbags will deploy. In such cases, the seat belt will provide sufficient protection, and the supplemental protection offered by the airbag would be minimal. Only the driver's airbag can deploy if there is no passenger in the front seat, or if the advanced airbag system has turned the passenger's airbag off (see page 27).
Honda	Ridgeline	2012	26	Honda USA.; Honda Japan approval	Your vehicle is equipped with dual-stage, multiple-threshold front airbags (SRS). During a frontal crash severe enough to cause one or both front airbags to deploy, the airbags can inflate at different rates, depending on the severity of the crash, whether or not the seat belts are latched, and/or other factors. Front airbags are designed to supplement the seat belts to help reduce the likelihood of head and chest injuries in frontal crashes.
Honda	Ridgeline	2013	9	Honda USA.; Honda Japan approval	Your vehicle has a supplemental restraint system (SRS) with front airbags to help protect the heads and chests of the driver and a front seat passenger during a moderate to severe frontal collision (see page for more information on how your front airbags work).

Brand	Vehicle	Year	Page	Author	Statement
Honda	Ridgeline	2013	24	Honda USA.; Honda Japan approval	Your airbag system includes: Two SRS (supplemental restraint system) front airbags. The driver's airbag is stored in the center of the steering wheel; the front passenger's airbag is stored in the dashboard. Both are marked "SRS AIRBAG" (see page 25). Two side airbags, one for the driver and one for a front passenger. The airbags are stored in the outer edges of the seatbacks. Both are marked "SIDE AIRBAG" (see page 28). Two side curtain airbags, one for each side of the vehicle. The airbags are stored in the ceiling, above the side windows. The front and rear pillars are marked "SIDE CURTAIN AIRBAG" (see page 30). Automatic front seat belt tensioners (see page 22). Sensors that can detect a moderate to severe front impact, side impact, or if your vehicle is about to rollover. Sensors that can detect whether a child is in the passenger's side airbag path and signal the control unit to turn the airbag off (see page 29). Sensors that can detect whether the driver's seat belt and the front passenger's seat belt are latched or unlatched (see page 20). A driver's seat position sensor that monitors the distance of the seat from the front airbag. If the seat is too far forward, the airbag will inflate with less force (see page 27). Weight sensors that monitor the weight on the front passenger's seat. If the weight is about 65 lbs. (29 kg) or less (the weight of an infant or small child), the passenger's front airbag will be turned off (see page 27). A rollover sensor that can detect if your vehicle is about to roll over and signal the control unit to deploy both side curtain airbags (see page 30). A sophisticated electronic system that continually monitors and records information about the sensors, the control unit, the airbag activators, the seat belt tensioners, and driver and front passenger seat belt use when the ignition switch is in the ON (II) position.
Honda	Ridgeline	2013	25	Honda USA.; Honda Japan approval	If you ever have a moderate to severe frontal collision, sensors will detect the vehicle's rapid deceleration. If the rate of deceleration is high enough, the control unit will inflate the driver's and front passenger's airbags, at the time and with the force needed.
